

PROCEEDINGS OF SPIE

# ***Fourth International Conference on Optics, Computer Applications, and Materials Science (CMSD-IV 2024)***

**Ramazon Abdullozoda  
Arthur Gibadullin**  
*Editors*

**23–25 December 2024  
Dushanbe, Tajikistan**

*Organized by*  
Tajik Technical University named after academician M.S. Osimi (Tajikistan)

*Published by*  
SPIE

**Volume 13651**

Proceedings of SPIE 0277-786X, V. 13651

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourth International Conference on Optics, Computer Applications, and Materials Science (CMSD-IV 2024)*, edited by Ramazon Abdullozoda, Arthur Gibadullin, Proc. of SPIE 13651, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

## INFORMATION TECHNOLOGY

---

- 13651 02 **Applying a quantum-inspired discrete cosine transform to filter thumbnail images**  
[13651-10]
- 13651 03 **The integration of satellite data and geographic information systems for the sustainable management of energy logistics** [13651-14]
- 13651 04 **Models for recognition and classification of agricultural weeds based on transfer learning**  
[13651-19]
- 13651 05 **Use of variational quantum algorithm for solving problems of diagnostics of cattle diseases**  
[13651-30]
- 13651 06 **Forecasting the condition of electrotechnical equipment using impulse modeling and fuzzy logic tools** [13651-33]
- 13651 07 **Architecture and data structures of the information monitoring and decision-making software suite for business intelligence** [13651-43]
- 13651 08 **Organizing full-text search in texts** [13651-44]
- 13651 09 **Deep learning-based modeling and recognition of poultry diseases** [13651-6]
- 13651 0A **Quantum encoding of images using NEQR, FREI, and LPIQE methods** [13651-9]
- 13651 0B **The impact of digital technologies on the design and production of clothing** [13651-1]
- 13651 0C **Implementation of a genetic algorithm for two-dimensional arrays using the numpy library for python** [13651-11]
- 13651 0D **Comparative analysis of parallel discrete event simulation algorithms: Time Warp, Window Racer, and null messages** [13651-12]
- 13651 0E **Increasing the statistical signification of regression dependence in the problems of processing experimental samples of small volume** [13651-13]
- 13651 0F **Review of cell detection approaches in intelligent systems for antinuclear factor determination** [13651-15]
- 13651 0G **The impact of Gaussian filtering on image clustering accuracy** [13651-16]

- 13651 OH **Quantifying the quality of responses generated by augmented large language models**  
[13651-20]
- 13651 OI **Development of a software system for automated extraction of text data from social media**  
[13651-22]
- 13651 OJ **Elastic cloud resource allocation using short-term long short-term memory-based workload prediction** [13651-23]
- 13651 OK **Data collection and intelligent processing system for a distributed network of poly-landscape polygons based on a multiagent neurocognitive architecture** [13651-24]
- 13651 OL **Detection of furniture on 2D-floor plans using neural networks** [13651-25]
- 13651 OM **Digitalization in the tasks of data analysis** [13651-27]
- 13651 ON **Development of a system for recognizing the condition of sucker rod pumps using machine learning** [13651-28]
- 13651 OO **Of automated fractal shape drawing software for manufacturing enterprises based on kaleidoscopic repeated function system** [13651-3]
- 13651 OP **A neural network approach to prediction of glass transition temperature** [13651-32]
- 13651 OQ **Study of the efficiency of monitoring the pollution of the earth's surface with oil products in the near IR range depending on the number of spectral channels** [13651-35]
- 13651 OR **A comparative study of web frontend reactivity** [13651-38]
- 13651 OS **Comparative analysis of stochastic optimization methods for image classification using convolutional neural networks** [13651-39]
- 13651 OT **Development of automated information and measurement systems for laboratory setup based on microprocessor systems** [13651-40]
- 13651 OU **Creation of an information and analytical database based on an intelligent analysis system from online services for monitoring and forecasting the environmental condition of industrial areas** [13651-45]
- 13651 OV **Development of an integrated approach to detecting anomalies in multidimensional data**  
[13651-46]
- 13651 OW **The development of algorithms for optimizing the Internet of Things system in production organization** [13651-5]

## OPTICS AND MATERIALS SCIENCE

---

- 13651 0X **Study and design of antenna based on a strip line with variable wave impedance**  
[13651-26]
- 13651 0Y **On the modern possibilities of transmitting a discrete signal between systems using the tunneling effect** [13651-4]
- 13651 0Z **Computer model of satellite communication channel of high-throughput satellite in medium Earth orbit system with second generation satellite extensions and orthogonal frequency-division multiplexing technologies** [13651-8]
- 13651 10 **Study of deformation of cured polymer composite materials during loading under microwave exposure** [13651-17]
- 13651 11 **Modification of structure and physical-mechanical properties of tool hard alloys with coatings by high-power ion beams** [13651-18]
- 13651 12 **The quantitative analysis in diagnostics of molecular objects using the Raman scattering method** [13651-21]
- 13651 13 **Influence of point defects interacting with rectilinear edge dislocation on internal friction caused by its oscillations in dissipative crystal** [13651-41]
- 13651 14 **Automation of the process of setting up a self-oscillating excitation system for a vibration-frequency liquid densitometer** [13651-7]
