

PROCEEDINGS OF SPIE

International Conference on Signal Processing and Neural Network Applications (SPNNA 2024)

Tao Lei
Lei Chen
Editors

13–15 December 2024
Wuhan, China

Organized by
Xiangtan University (China)

Published by
SPIE

Volume 13652

Proceedings of SPIE 0277-786X, V. 13652

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Signal Processing and Neural Network Applications (SPNNA 2024)*, edited by Tao Lei, Lei Chen, Proc. of SPIE 13652, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	Conference Committee
ix	Introduction

RESEARCH ON INTELLIGENT PERCEPTION AND IMAGE PROCESSING TECHNOLOGY

13652 02	Research and realization of key technology based on UE5 in building indoor immersive exhibition space [13652-35]
13652 03	Performance evaluation of image retrieval with an industrial workpiece type dataset [13652-10]
13652 04	Trajectory-tracking for mobile vehicle based on PD-type iterative learning control with disturbance [13652-21]
13652 05	Research on target detection and recognition for autonomous vehicles based on convolutional neural networks [13652-13]
13652 06	NLGF-MIL: a multi-instance learning method based on non-hierarchical mamba for local and global feature fusion in pathological images [13652-7]
13652 07	Semi-supervised learning with dynamic threshold for sleep staging and its application on DoC patients [13652-11]
13652 08	Image recognition technology and applications based on deep neural networks [13652-20]
13652 09	Research on the application of semantic segmentation in pavement crack images [13652-19]
13652 0A	The effects of female skin aging on the statistics of backscattered envelope in high-frequency ultrasound [13652-36]
13652 0B	Weighted low-rank t-SVD under general mixture noise distribution [13652-8]
13652 0C	Research on GAN-based image enhancement method [13652-32]
13652 0D	FlameGS: reconstruct flame light field via Gaussian splatting [13652-41]
13652 0E	Research on gait recognition method based on multimodal information feature level fusion [13652-18]
13652 0F	Research on lightweight gas station target detection algorithm based on improved Yolov8n [13652-12]

- 13652 OG **UAV ground motion target tracking algorithm based on optical flow clustering** [13652-3]
- 13652 OH **LightDTTrack: light dynamic temporal tracking** [13652-23]
- 13652 OI **Spatial-aware and supervised contrastive representation learning for few-shot object detection** [13652-39]
- 13652 OJ **Research on temperature compensation technology for fiber optic gyroscopes based on FISCSO-BPNN model and temperature field modeling** [13652-22]

INTELLIGENT SYSTEM AND NEURAL NETWORK TECHNOLOGY APPLICATIONS

- 13652 OK **Mental stress scoring based on Bayesian network using improved heart rate variability** [13652-16]
- 13652 OL **A nonlinear robust control method based on distributed deep reinforcement learning** [13652-26]
- 13652 OM **Performance evaluation of anomaly detection with a novel battery spot welding anomaly dataset** [13652-9]
- 13652 ON **Research on high performance FFT algorithm on GPUs** [13652-17]
- 13652 OO **Study on group key update method for distributed photovoltaic terminal control based on the SM9 algorithm** [13652-28]
- 13652 OP **Research on a road roughness classifier built by the wavelet neural network using an immune algorithm to generate initial values** [13652-30]
- 13652 OQ **IoT device recognition based on variational autoencoder and multiscale convolutional network** [13652-40]
- 13652 OR **Reinforcement learning-based MTC random access and heterogeneous network resource allocation** [13652-15]
- 13652 OS **Intelligent control system for digital instruments based on deep convolutional neural networks and edge computing** [13652-27]
- 13652 OT **Research on human thermal comfort prediction method based on KAN network** [13652-31]
- 13652 OU **Convolutional neural network (CNN) based on hyperspectral technique for the identification of covered raspberry fruits** [13652-24]
- 13652 OV **Fine generation method for unmanned aerial vehicle maneuvering flight trajectory based on action feature optimization** [13652-33]
- 13652 OW **Convolutional neural network according to HVS for NR-IQA** [13652-4]

- 13652 0X **Research and application of dam compaction construction platform based on deep learning and IoT technology** [13652-2]
- 13652 0Y **GDAN-Deeplabv3+: a crack detection method fusing attention mechanism and Deeplabv3+** [13652-29]
- 13652 0Z **Diagnosis method of rotor broken bar based on adaptive filtering and phase difference algorithm** [13652-38]
