

PROCEEDINGS OF SPIE

# ***First Conference on Distributed Optical Fiber Sensing Technology and Applications (DOFS 2024)***

**Xuping Zhang**

*Editor*

**22–24 November 2024**

**Nanjing, China**

*Organized by*

Chinese Laser Press (China)

Key Laboratory of Optical Intelligent Sensing and Integration Technology of Ministry of Education,  
Nanjing University (China)

Beogold Technology (China)

*Published by*

SPIE

**Volume 13654**

Proceedings of SPIE 0277-786X, V. 13654

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *First Conference on Distributed Optical Fiber Sensing Technology and Applications (DOFS 2024)*, edited by Xuping Zhang, Proc. of SPIE 13654, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## DISTRIBUTED OPTICAL FIBER SENSING TECHNOLOGY AND APPLICATIONS

---

- 13654 02 **High-power REC-DFB laser array based on slab-coupled optical waveguide technology**  
[13654-11]
- 13654 03 **Influence of tension-induced photosensitivity change on the fabrication of Erbium-doped phase-shifted fiber gratings** [13654-12]
- 13654 04 **Research on real-time distributed temperature sensing with optical frequency domain reflectometry for high-voltage switchgear temperature monitoring applications** [13654-13]
- 13654 05 **Research on bending sensing based on optical fiber mode decomposition** [13654-16]
- 13654 06 **Urban rail foreign object detection based on distributed fiber optic acoustic sensing system**  
[13654-17]
- 13654 07 **Cost-effective application of fiber vibration sensing technology** [13654-19]
- 13654 08 **A low signal-to-noise target detection method for fiber optic distributed acoustic sensing based on end-to-end joint training** [13654-2]
- 13654 09 **Dual-comb OFDR system for high-precision distributed fiber sensing** [13654-20]
- 13654 0A **Programmable deterministic generation method of soliton microcomb** [13654-21]
- 13654 0B **Distributed optical fiber anomaly detection based on IoT** [13654-22]
- 13654 0C **Research on underground pipeline illegal intrusion monitoring based on distributed optical fiber sensing technology** [13654-23]
- 13654 0D **Study on optical fiber sensing system for safety monitoring of underground utility tunnel**  
[13654-24]
- 13654 0E **Research on the road collapse detection method of distributed optical fiber sensing technology** [13654-25]
- 13654 0F **Ultra-high-speed demodulation system of the weak FBG sensor based on multi-wavelength REC-DFB laser array** [13654-28]
- 13654 0G **Strain measurement and tension distribution analysis for inner and outer layers of guidance optical fiber using BOTDA** [13654-29]

- 13654 OH **Vector magnetic field sensor based on a single-hole dual-core optical fiber structure and magnetic fluid coating** [13654-3]
- 13654 OI **Low frequency vibration detection for phase-sensitive OTDR based on SSA+VMD** [13654-30]
- 13654 OJ **Vertical distance estimation of vibration sources based on distributed optical fiber sensing** [13654-31]
- 13654 OK **Research on the application of distributed fiber optic temperature sensing system in large-scale scientific facilities** [13654-34]
- 13654 OL **Distributed optical fiber humidity sensing system based on phase-sensitive optical time-domain reflectometer** [13654-35]
- 13654 OM **Investigation of OFDR monitoring for physical model experiments on deep saline reinjection** [13654-38]
- 13654 ON **Disturbance event identification and localization based on temporal convolutional network and sliding window algorithm** [13654-40]
- 13654 OO **Application of distributed acoustic sensors in communication cable operation and maintenance** [13654-42]
- 13654 OP **AI-assisted dual mode WDM system for anomaly detection and localization integrated communication and sensing** [13654-43]
- 13654 OQ **Partial discharge sensing system for power cable joints based on distributed fiber optic sensing technology** [13654-45]
- 13654 OR **Research on shaft vibration monitoring sensor based on optical fiber Fabry-Perot interference** [13654-46]
- 13654 OS **Sensing response of aluminum-side-polished fiber-based surface plasmon resonance sensors to surface roughness** [13654-48]
- 13654 OT **The influence of fiber core size on the output mode of hundred watt pulse lasers** [13654-5]
- 13654 OU **Accurate recognition of multiple events for DAS** [13654-50]
- 13654 OV **Few-sample learning for fiber-optic distributed acoustic sensors (DAS) in cross scenes** [13654-51]
- 13654 OW **Research on design and preparation technology of optical fiber for high temperature oil and gas wells** [13654-53]
- 13654 OX **Sagnac interference-based broadband distributed vibration sensing system** [13654-55]
- 13654 OY **Optimisation of Raman amplification based on distributed power monitoring of communication signals** [13654-57]

- 13654 0Z **Analysis and comparison of demodulation methods for distributed fiber-optic sensing based on optical frequency-domain reflectometry [13654-59]**
- 13654 10 **Research on the application of structural monitoring of large prestressed concrete cable-stayed bridges based on DPP-BOTDA [13654-60]**
- 13654 11 **Submarine cable disturbance monitoring based on fiber optic distributed acoustic sensing [13654-62]**
- 13654 12 **Hybrid  $\Phi$ -OTDR/BOTDR based on remotely pumped optical amplification [13654-63]**
- 13654 13 **Fiber optic identification of bolt loosening features based on modal level convergence calculation [13654-64]**
- 13654 14 **Load identification method based on distributed optical fiber sensing and inverse element method [13654-66]**
- 13654 15 **Research on the characteristics of distributed optical fiber temperature sensing based on spectrum [13654-67]**
- 13654 16 **Key technologies and engineering applications of intelligent optical fiber monitoring for section coal pillars [13654-7]**
- 13654 17 **Research on distributed fiber optic monitoring and field reconstruction of temperatures for aerospace vehicle shells [13654-72]**
- 13654 18 **Strain-temperature monitoring and decoupling by distributed fiber optic sensors for typical astronautic structures [13654-73]**
- 13654 19 **Reconstruction of composite panel deformation based on modal superposition and calibration method by fiber optic sensors [13654-74]**
- 13654 1A **Flexible structure morphology reconstruction based on multi-core fiber grating sensors [13654-76]**
- 13654 1B **Measurement of frequency interval stability for dual-frequency phase-sensitive optical frequency-domain reflectometry [13654-79]**
- 13654 1C **Researches and applications of high-performance quasi-distributed and distributed optical fiber vibration sensors for oil and gas industry [13654-8]**
- 13654 1D **Characteristics of Brillouin scattering in semiconductor-doped optical fibers [13654-80]**
- 13654 1E **Shape reconstruction of aerial refueling hose based on distributed fiber optic sensors and FSResNet-MLP [13654-81]**
- 13654 1F **Fiber optic seismometer based on scattering enhanced DAS [13654-82]**

- 13654 1G **Comparative analysis of intensity and phase frequency demodulation based on DAS**  
[13654-83]
- 13654 1H **Study on vibration characteristics of OPGW cables based on DAS technology** [13654-84]
- 13654 1I **Advances in distributed fiber optic acoustic sensing technology based on linear distribution of phase change** [13654-9]
