

PROCEEDINGS OF SPIE

Fourth International Conference on Digital Technologies, Optics, and Materials Science (DTIEE 2025)

**Khamza Eshankulov
Arthur Gibadullin**
Editors

**20–23 May 2025
Bukhara, Uzbekistan**

Organized by
Bukhara State University (Uzbekistan)

Published by
SPIE

Volume 13662

Proceedings of SPIE 0277-786X, V. 13662

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourth International Conference on Digital Technologies, Optics, and Materials Science (DTIEE 2025)*, edited by Khamza Eshankulov, Arthur Gibadullin, Proc. of SPIE 13662, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xii *Conference Committee*

INFORMATION TECHNOLOGY

- 13662 02 **Development of a parking space detection service using surveillance camera images**
[13662-1]
- 13662 03 **Design of a national platform of personal bibliographic data with integration of external sources** [13662-2]
- 13662 04 **Control algorithmization of complex technological systems under uncertainty conditions**
[13662-3]
- 13662 05 **Development of a hybrid software architecture based on artificial intelligence** [13662-4]
- 13662 06 **Numerical solution of hyperbolic equations using the finite element method for modeling dynamic systems** [13662-5]
- 13662 07 **Mathematical and computer modeling of the ore charge composition forecasting system**
[13662-6]
- 13662 08 **Mathematical description of the process of calculation of dispersed ore raw material dosing time in mixing and dosing complexes** [13662-7]
- 13662 09 **Development of a mathematical model for describing the spatial dynamics of temperatures and humidity levels in grain storage facilities** [13662-8]
- 13662 0A **Development of information and analytical functionality of situation centers** [13662-9]
- 13662 0B **Building the prototype of a smart ward for patient health monitoring** [13662-10]
- 13662 0C **Unique neural network training methods from Kolmogorov-Arnold functions to diffusion-based learning** [13662-11]
- 13662 0D **Development of a mathematical model of the process of grinding root crops with rotating flat knives** [13662-12]
- 13662 0E **Numerical simulation and computational modeling of thermo-electro-magnetic stress in anisotropic plates using scientific computing algorithms** [13662-14]
- 13662 0F **Use of mathematical modeling for the optimization of nozzle design used in the small-size horizontal powders gas atomization reactor** [13662-17]

- 13662 OG **Utilizing software-defined mobile networking to reduce transmission delays for unmanned agricultural harvesters** [13662-19]
- 13662 OH **Design of a cascade controller based on a predictive model** [13662-20]
- 13662 OI **Statistical analysis of acceleration signals in the stone detection system of a forage harvester to build an emulation of the system** [13662-21]
- 13662 OJ **Modeling of groundwater flow in a multilayer porous medium based on a nonlinear mathematical model** [13662-25]
- 13662 OK **Mathematical modeling of the distribution of pollutants in the atmosphere, taking into account their physical and mechanical properties** [13662-27]
- 13662 OL **Comparative analysis of methods for object detection and text recognition in document images based on computer vision** [13662-28]
- 13662 OM **A data-driven approach to decision-support system development for road traffic management** [13662-30]
- 13662 ON **Telegram bot for recognizing phishing links using machine learning** [13662-31]
- 13662 OO **Mathematical model of a photoelectric thermal electric energy converter under load** [13662-33]
- 13662 OP **Mathematical modeling, design, and simulation of an acoustic array for unmanned aerial vehicles location** [13662-34]
- 13662 OQ **Enhancing unmanned aerial vehicle photogrammetry accuracy with kinematic positioning techniques** [13662-37]
- 13662 OR **Evaluating the effectiveness of text summarization algorithms based on recall-oriented understudy for Gisting evaluation metrics** [13662-38]
- 13662 OS **Image quality assessment based on metrics using quantum algorithms** [13662-39]
- 13662 OT **Artificial intelligence-based threat detection and prevention methods for securing Internet of Things devices** [13662-40]
- 13662 OU **Designing an optimal recurrent neural network for time series forecasting** [13662-41]
- 13662 OV **Extraction and analysis of information from accounting invoices across different countries** [13662-42]
- 13662 OW **Comprehensive review of educational platform for assessing and classifying students' knowledge levels utilizing machine learning** [13662-43]
- 13662 OX **System analysis and modeling of dynamic critical infrastructure protection systems using long-term short-term memory networks** [13662-46]

OPTICS AND MATERIALS SCIENCE

- 13662 0Y **Study of polysulfone composites with silicon dioxide filler** [13662-18]
- 13662 0Z **Deterministic mathematical model of thermal storages in low-volume bioreactor complexes with resistive heating of contents** [13662-23]
- 13662 10 **Structural, electronic, and magneto-optical transformations in monocrystalline KDB-3 silicon doped with manganese via high-temperature diffusion** [13662-26]
- 13662 11 **Electrolyte-induced transformations during micro-arc oxidation of aluminum alloys: toward functional oxide coatings for optical industry applications** [13662-29]
- 13662 12 **Investigation of the possibility of creating a film photothermal converter** [13662-32]
- 13662 13 **Multimodal sensor fusion and embedded control for obstacle-aware feed pusher robotics in precision livestock farming** [13662-35]
