2025 IEEE Conference on Artificial Intelligence (CAI)

CAI 2025

Table of Contents

Message from the General Chairs ..... **xxxviii**
Message from the Program Chairs ..... **xxxix**

Engineering & Manufacture – 1

SmartPilot: A Multiagent CoPilot for Adaptive and Intelligent Manufacturing 1
Chathurangi Shyalika (Artificial Intelligence Institute, University of South Carolina), Renjith Prasad (Artificial Intelligence Institute, University of South Carolina), Alaa Al Ghazo (Artificial Intelligence Institute, University of South Carolina), Darssan Eswaramoorthi (Artificial Intelligence Institute, University of South Carolina), Harleen Kaur (Artificial Intelligence Institute, University of South Carolina), Sara Shree Muthuselvam (Artificial Intelligence Institute, University of South Carolina), and Amit Sheth (Artificial Intelligence Institute, University of South Carolina)

Sample-Efficient Bayesian Transfer Learning for Online Machine Parameter Optimization 9
Philipp Wagner (Fraunhofer Institute for Manufacturing Engineering and Automation IPA), Tobias Nagel (Fraunhofer Institute for Manufacturing Engineering and Automation IPA), Philipp Leube (TRUMPF SE + Co. KG), and Marco Huber (Institute of Industrial Manufacturing and Management IFF, University of Stuttgart)

A Hybrid Quantum-Classical Approach Using D-Wave and SLSQP for Double Wishbone Suspension
System Optimization 16
Muhammad Waqas Arshad (University of Bologna, Italy), Stefano Lodi (University of Bologna, Italy), and David Q. Liu (Purdue University, USA)

Metric Learning-based Incorrect Component Detection Framework 20
Chia-Yu Lin (Department of Computer Science and Information Engineering, National Central University, Taoyuan, Taiwan), Yu-Chiao Kuo (Department of Computer Science and Engineering, Yuan Ze University, Taoyuan, Taiwan), Sheng-Che Lin (Department of Creative Convergence Design, Korea University, Seoul, South Korea), and Ted T. Kuo (College of Artificial Intelligence, National Yang Ming Chiao Tung University, Tainan, Taiwan)

Engineering & Manufacture – 2

MPGT: Multimodal Physics-constrained Graph Transformer Learning for Hybrid Digital Twins …. 26
Benjamin Uhrich (Leipzig University/Center for Scalable Data Analytics and Artificial Intelligence (ScaDS.AI)) and Erhard Rahm (Leipzig University/Center for Scalable Data Analytics and Artificial Intelligence (ScaDS.AI))

Graphical Causal Model based Bayesian Optimization for Industrial Process Parameterization.. 33
Christoph Hennebold (Fraunhofer Institute for Manufacturing Engineering and Automation IPA) and Marco F. Huber (Institute for Industrial Manufacturing and Management IFF, University Stuttgart)

Machine Learning-Augmented Boundary Value Problem Solvers for Optimizing Melt Spinning Processes …… 39
Viny Saajan Victor (Fraunhofer Institute for Industrial Mathematics, Germany), Manuel Ettmüller (Fraunhofer Institute for Industrial Mathematics, Germany), Andre Schmeißer (Fraunhofer Institute for Industrial Mathematics, Germany), Heike Leitte (Rhineland-Palatinate Technical University, Germany), and Simone Gramsch (Frankfurt University of Applied Sciences, Germany)

Automated Construction and Semantic Interoperability for Digital Twins: Integrating Heterogeneous Data with Large Language Models …… 47
Leonardo Pilarski (University of Trás-os-Montes and Alto Douro, Portugal), Luiz E. Luiz (University of Trás-os-Montes and Alto Douro, Portugal and Instituto Politécnico de Bragança, Portugal), Gonçalo S. Gomes (University of Trás-os-Montes and Alto Douro, Portugal), Tiago Pinto (University of Trás-os-Montes and Alto Douro, Portugal and INESC-TEC, Portugal), Vitor M. Filipe (University of Trás-os-Montes and Alto Douro, Portugal and INESC-TEC, Portugal), João Barroso (University of Trás-os-Montes and Alto Douro, Portugal and INESC-TEC, Portugal), and Gonçalo Rijo (Neoception, Portugal)

Causal Temporal Neural Networks using the Conditional Average Treatment Effect …… 49
Shahenda Youssef (Karlsruhe Institute of Technology KIT, Germany), Julius Pfrommer (Fraunhofer IOSB, Germany), and Jürgen Beyerer (Karlsruhe Institute of Technology KIT and Fraunhofer IOSB, Germany)

Business Intelligence – 1

Empowering Business Decisions and Knowledge Management through Advanced RAG-Driven QA Systems …… 55
Renato Miyaji (Visagio Group, Brazil), Renato Moulin (Visagio Group, Brazil), Samuel Monção (Visagio Group, Brazil), and Leonardo Machado (Visagio Group, Brazil)

Bitcoin Price Prediction using Machine Learning and Combinatorial Fusion Analysis …… 61
Yuanhong Wu (Fordham University), Wei Ye (Fordham University), Jingyan Xu (Fordham University), and D. Frank Hsu (Fordham University)

CARE: A Framework for Correcting Numerical Hallucinations in LLM-Generated Financial Texts.. 69
Jian Kim (Hanyang university, Republic of Korea) and Woohwan Jung (Hanyang university, Republic of Korea)

Business Intelligence – 2

It's About Time: Incorporating Temporality in Retrieval Augmented Language Models 75
Anoushka Gade (San Jose State University), Jorjeta Jetcheva (San Jose State University), and Hardi Trivedi (San Jose State University)

Real-Time Adaptive Multi-Modal Stock Prediction with Temporal Graph Attention and Dynamic Interaction Networks 83
Abhishek Joshi (Texas A&M University-Corpus Christi), Jahnavi Krishna Koda (Texas A&M University-Corpus Christi), Alihan Hadimlioglu (Texas A&M University-Corpus Christi), and Gurojaspreet Kaur (Apex Institute of Technology, Chandigarh University)

Business Intelligence – 3

Diverse GNN Encoder-Decoder for Graph Anomaly Detection 89
Kenneth John (San Jose State University) and Katerina Potika (San Jose State University)

Generative Data Visualization with JSON Representations 95
Charles Glaser (Johns Hopkins University) and Erhan Guven (Johns Hopkins University)

Business Intelligence – 4

Comparative Analysis of Image, Video, and Audio Classifiers for Automated News Video Segmentation 102
Jonathan Attard (Department of Artificial Intelligence, University of Malta) and Dylan Seychell (Department of Artificial Intelligence, University of Malta)

Vogue Vision: Customized Apparel Recommender System Using Hybrid Approach 108
Anvesha Riya (Netaji Subhas University Of Technology, India), Snehal Kaur (Netaji Subhas University Of Technology, India), Aayush Yadav (Netaji Subhas University Of Technology, India), Tushar Srivastava (Netaji Subhas University Of Technology, India), and Richa Bhatia (Netaji Subhas University Of Technology, India)

VisioRAG: A Multimodal Framework for Enhancing Recommendation System Using Vision Transformers and RAG 114
Anitha Balachandran (San Jose State University) and Mohammad Masum (San Jose State University)

Business Intelligence – 5

Fine-tuning DeBERTaV3 with Adaptive Training Strategies for Fine-Grained Sentiment Analysis 120
Lana Do (Northeastern University) and Tehmina Amjad (Northeastern University)

InvadeAI: INteractive ADvertising with Multimodal AI 126
Andrew Dunton (San Jose State University), Riddhi Vyas (San Jose State University), Harshal Shah (San Jose State University), Soujanya Sankathala (San Jose State University), and Mohammad Masum (San Jose State University)

Business Intelligence – 6

A Comprehensive Categorization and Comparative Analysis of Methodologies in Aspect-Based Sentiment Analysis 132
Neda Keivandarian (Dept. of Engineering and Science, Florida Institute of Technology, Melbourne, USA) and Marco Carvalho (Dept. of Engineering and Science, Florida Institute of Technology, Melbourne, USA)

An Attention-Augmented BiLSTM-CNN Model for Stock Price Prediction 139
Faaria Syed (Virginia Polytechnic Institute and State University) and Jianhua Xuan (Virginia Polytechnic Institute and State University)

Stimulate the Sharing Economy by Optimizing Reward Policy: an Extended Mathematical Framework 145
Angela Li (Stony Brook University) and David Li (Yeshiva University)

Business Intelligence – 7

Optimizing Recommendations Using Fine-Tuned LLMs 151
Prabhdeep Cheema (John Hopkins University, USA) and Erhan Guven (John Hopkins University, USA)

Graph LLM-based Portfolio Management Algorithm 157
Dayu Qin (Institute of Data and Information, Tsinghua Shenzhen International Graduate School, Tsinghua University, China), Yi Yan (Institute of Data and Information, Tsinghua Shenzhen International Graduate School, Tsinghua University, China), and Ercan E. Kuruoglu (Institute of Data and Information, Tsinghua Shenzhen International Graduate School, Tsinghua University, China)

Human-Centered AI – 1

Tab-AML: A Transformer Based Transaction Monitoring Model for Anti-Money Laundering .. 161
Berkan Oztas (Bournemouth University), Deniz Cetinkaya (Bournemouth University), Festus Adedoyin (Bournemouth University), Marcin Budka (Bournemouth University), Huseyin Dogan (Bournemouth University), and Gokhan Aksu (Danske Bank Group)

Equitable Representation of Demographic Groups in Constrained Spectral Clustering 168
Laxita Agrawal (Indian Institute of Technology, Guwahati, India), V Vijaya Saradhi (Indian Institute of Technology, Guwahati, India), and Teena Sharma (Indian Institute of Technology, Guwahati, India)

What One Million Prompts Tells Us About AI Usage, Topics, and Preferences 174
Zhouqing Zhang (University of Canterbury, New Zealand), Kongmeng Liew (University of Canterbury, New Zealand), and Tham Piumsomboon (University of Canterbury, New Zealand)

Human-Centered AI – 2

Human-Centered AI in FinTech: A Conceptual Model and Strategic Research Agenda 180
Festus Adedoyin (Bournemouth University, UK), Huseyin Dogan (Bournemouth University, UK), Deniz Cetinkaya (Bournemouth University, UK), and Nan Jiang (Bournemouth University, UK)

From Prompts to Performance: Leveraging LLMs for Enhanced Educational AI Interactions 188
Vishwa Bhatt (School of Computer Science and Engineering California State University- San Bernardino San Bernardino, USA), Zhixin Yu (Faculty of Arts and Science, Department of Economics University of Toronto- St. George Toronto, Canada), Yunfei Hou (School of Computer Science and Engineering California State University- San Bernardino San Bernardino, USA), Bilal Khan (School of Computer Science and Engineering California State University- San Bernardino San Bernardino, USA), Khalil Dajani (School of Computer Science and Engineering California State University- San Bernardino San Bernardino, USA), and Jennifer Jin (School of Computer Science and Engineering California State University- San Bernardino San Bernardino, USA)

Enhancing Mental Health Support through Human-AI Collaboration: Toward Secure and Empathetic AI-Enabled Chatbots 196
Rawan AlMakinah (AI in Complex Systems Lab, University at Albany, SUNY), Andrea Norcini-Pala (School of Public Health, SUNY Downstate Health Sciences University), Lindsey Disney (School of Social Welfare, University at Albany, SUNY), and Muhammed Abdullah Canbaz (AI in Complex Systems Lab, University at Albany, SUNY)

Human-Centered AI – 3

Towards a Signal Detection Based Measure for Assessing Information Quality of Explainable Recommender Systems 203
Yeonbin Son (University of Virginia) and Matthew Bolton (University of Virginia)

SJ-ORPO: Alignment of LLMs using Multi-Task Learning and Self-Judgment 209
Jayant Parashar (University of Georgia) and Suchendra M. Bhandarkar (University of Georgia)

Nurse Town: An LLM-powered Simulation Game for Nursing Education 215
Yuqi Hu (Northeastern University, USA), Qiwen Xiong (Northeastern University, USA), Liheng Yi (Northeastern University, USA), and Ilmi Yoon (Northeastern University, USA)

Human-Centered AI – 4

Efficient Intent-Based Filtering for Multi-Party Conversations Using Knowledge Distillation from LLMs 223
Reem Gody (Microsoft AI), Mohamed AbdelGhaffar (Microsoft AI), Mohammed Jabreel (Microsoft AI), and Ahmed Y. Tawfik (Microsoft AI)

An Experimental Study on the Interpretability of Transformer Models for Dialog Understanding 229
Gnaneswar Villuri (Stony Brook University) and Alex Doboli (Stony Brook University)

Human-Centered AI – 5

AI for Becoming Fluent: Designing an App for Advanced Bilingual Speakers 236
Cecilia Delgado-Solorzano (Clemson university, USA), Sara Mendoza (Clemson University, USA), Fernando Morales-Flores (Universidad del SABES, México), Jesus Martinez-Garcia (Universidad del SABES, México), Néstor E. Briones-Ramirez (Universidad del SABES, México), Emmanuel A. Zarazua-Rubio (Universidad SABES), Ventura Rivera-Robles (Universidad del SABES, México), Asis H. Rangel-Ortiz (CICATA, México), and Carlos Toxtli (Clemson University, USA)

Evaluating Gender, Racial, and Age Biases in Large Language Models: A Comparative Analysis of Occupational and Crime Scenarios 244
Vishal Mirza (New York University, USA), Rahul Kulkarni (Northeastern University, USA), and Aakanksha Jadhav (Washington University in Saint Louis, USA)

ConvoGen: Enhancing Conversational AI with Synthetic Data: A Multi-Agent Approach 252
Reem Gody (Microsoft AI), Mahmoud Goudy (Microsoft AI), and Ahmed Y. Tawfik (Microsoft AI)

Human-Centered AI – 6

Coverage Metrics for Detecting Bias in Facial Recognition Datasets 258
Sakshi Mhatre (Virginia Tech National Security Institute), Brian Lee (Virginia Tech National Security Institute), Erin Lanus (Virginia Tech National Security Institute), and Laura Freeman (Virginia Tech National Security Institute)

Enhancing Accessibility: A Natural Human-Computer Interaction System Using Hand Gestures and Voice for Disabled Populations 265
Siddharth Singh (Montclair State University), Mohammed Siddiqui (Montclair State University), and Michelle Zhu (Montclair State University)

Clustering-Guided Counterfactual Design Evolution 271
Sujung Choi (Computer Science, Missouri State University, USA) and Rahul Dubey (Computer Science, Missouri State University, USA)

Human-Centered AI – 7

A Deep Learning Framework for Visual Attention Prediction and Analysis of News Interfaces 278
Matthew Kenely (University of Malta), Dylan Seychell (University of Malta), Carl James Debono (University of Malta), and Chris Porter (University of Malta)

Trust, Support, and Adoption Intentions Towards Generative AI are Context Dependent 284
Kongmeng Liew (University of Canterbury, New Zealand), Xiaoli Wu (University of Canterbury, New Zealand), and Zhouqing Zhang (University of Canterbury, New Zealand)

Ethical Logic in Six Large Language Models 290
W. Russell Neuman Neuman (New York University)

Human-Centered AI – 8

Mediating Cognitive Biases in Business Decisions using LLMs 296
Natalie Friedman (SAP), Marcus Krug (SAP), and S. Joy Mountford (SAP)

Advancing Scientific Workflows: A Human-LLM Note-Taking System with Case-Based Reasoning 302
Douglas B. Craig (University of Michigan)

Cooperative AI Agents Using Supervised Global Workspaces 306
Parham Aarabi (PRE Inc.) and Yiqian Qin (PRE Inc.)

AI for Sustainability- 1

Artemis AI: Multi-LLM Framework for Code Optimisation 310
Rafail Giavrimis (TurinTech AI), Michail Basios (TurinTech AI), Fan Wu (TurinTech AI), Leslie Kanthan (TurinTech AI), and Roman Bauer (University of Surrey)

The Efficiency Frontier: Optimal Combinations of Energy-Saving Strategies in Data Centers 316
Alaeddine Mokri (System Design and Management, Massachusetts Institute of Technology) and Vijay Gadepally (Lincoln Laboratory, Massachusetts Institute of Technology)

A Multimodal Deep Learning End-to-End Model for Improving Barley Genotype-to-Phenotype Prediction Using Heterogeneous Data 322
Samuel Pradhan (School of Information Technology, Murdoch University, Perth, Australia), Guanjin Wang (School of Information Technology, Murdoch University, Perth, Australia), Junyu Xuan (Australia Artificial Intelligence Institute, Faculty of Engineering and Information Technology, University of Technology Sydney, NSW, Australia), Penghao Wang (School of Medical, Molecular and Forensic Sciences, Murdoch University, Perth, Australia), Chengdao Li (Western Crop Genetics Alliance, Murdoch University Perth, Australia; Western Australian State Agricultural Biotechnology Centre; Department of Primary Industries and Regional Development), and Jie Lu (Australia Artificial Intelligence Institute, Faculty of Engineering and Information Technology, University of Technology Sydney, NSW, Australia)

AI for Sustainability- 2

SubTerra: Estimating Soil Moisture at Root Zone Depths Using Science-guided Learning 328
Paahuni Khandelwal (Colorado State University, United States of America), Jeffrey D. Niemann (Colorado State University, United States of America), David J. Mulla (University of Minnesota, United States of America), Shrideep Pallickara (Colorado State University, United States of America), and Sangmi Lee Pallickara (Colorado State University, United States of America)

The Impact of Tree Data on Urban Heat Island Mapping: A San Jose Case Study 336
Martin Alvarez Lopez (San Jose State University, USA) and Magdalini Eirinaki (San Jose State University, USA)

Deep Learning based Real-Time Approach for Optimal Power Flow in Unbalanced Distribution Systems with High-Level EV Penetration 342
Haiyang You (University of Glasgow, UK), Chengwei Lou (University of Glasgow, UK), Jin Yang (University of Glasgow, UK), and David Flynn (University of Glasgow, UK)

Smart Building Platform for Energy Resource Management 350
Brígida Teixeira (Polytechnic of Porto, Portugal), Gabriel Santos (Polytechnic of Porto, Portugal), Letícia Gomes (Polytechnic of Porto, Portugal), David Araujo (Polytechnic of Porto, Portugal), and Zita Vale (Polytechnic of Porto, Portugal)

AI for Sustainability- 3

Spicing Up LLMs: The Role of PAPRICA Pruning in Linear Computation Coding 352
Johanna S. Fröhlich (Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany), Hans Rosenberger (Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany), and Ralf R. Müller (Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany)

Chroma-Sense: A Memory-Efficient Plant Leaf Disease Classification Model For Edge Devices 358
Kiran K. Kethineni (University of North Texas, USA), Samuel Y. Wu (University of North Texas, USA), Saraju P. Mohanty (University of North Texas, USA), and Elias Kougianos (University of North Texas, USA)

Engineering Legislative-guided LLM to Support Waste Management Learning 364
Qiming Sun (Santa Clara University) and I-Han Hsiao (Santa Clara University)

AI for Sustainability- 4

Optimizing Large Language Models: Metrics, Energy Efficiency, and Case Study Insights 370
Tahniat Khan (Vector Institute, Canada), Soroor Motie (University of Ottawa, Canada), Sedef Akinli Kocak (Vector Institute, Canada), and Shaina Raza (Vector Institute, Canada)

Data-Driven State Estimation for Sparse Distribution Networks using Machine Learning 376
Mohamad EL IAALI (Polytechnic of Porto, Portugal), Reza RAZI (Centrale Lille, France), Antoine BRUYERE (Centrale Lille, France), Bruno FRANCOIS (Centrale Lille, France), Joao Soares (GECAD, Polytechnic of Porto), and Zita Vale (GECAD, Polytechnic of Porto)

Enhancing Battery Capacity Estimation in Electric Vehicles through Continuous Domain Adaptation 382
Hanbing Liu (Tsinghua University), Huijie Li (Tsinghua University), Yang Li (Tsinghua University), and Xuan Zhang (Tsinghua University)

AI for Sustainability- 5

Leveraging Social Digital Twin Technology to Maximise Sustainable Transformation from Multimodality: a Case Study of Commuters to Greater London 384
Oluwatamilore Orojo (Fujitsu Research of Europe), Bin Chen (Fujitsu Limited), Takushi Fujita (Fujitsu Limited), Tatsuya Mitomi (Fujitsu Limited), Eigo Segawa (Fujitsu Limited), and Lowell T. Edgar (Fujitsu Research of Europe)

Phenological States Classification of Blueberries Using Artificial Intelligence 390
Juan Felipe Castañeda Bustos (University Escuela colombiana de Ingeniería Julio Garavito) and Javier Alberto Chaparro Preciado (University Escuela colombiana de Ingeniería Julio Garavito)

AI for Sustainability- 6

An LSTM Model for Sustainable Microgrid Energy Resources in Myanmar 394
Ramy Othman (Montclair State University), Katherine G. Herbert-Berger (Montclair State University), and Thomas J. Marlowe (Seton Hall University)

Privacy-Aware Logic Free Building Automation Using Split Learning 399
Ryosuke Hara (The University of Tokyo, Japan), Hiroshi Esaki (The University of Tokyo), and Hideya Ochiai (The University of Tokyo)

Energy Efficient Explainable Regularization Technique for Sustainable Trustworthy AI 405
Jayanta Choudhury (AI Innovation and Incubation at Ericsson Inc.), John Cleveland (INARA), Rohit Tiwari (BNEW RCE AT Al at Ericsson Inc.), Chenhua Shi (AI Innovation and Incubation at Ericsson Inc.), and Subhadip Bandyopadhyay (BCSS CNE AT AI at Ericsson)

AI for Healthcare and life Science - 1

From Patient Consultations to Graphs: Leveraging LLMs for Patient Journey Knowledge Graph Construction 410
Hassan Al Khatib (Mississippi State University), Sudip Mittal (Mississippi State University), Shahram Rahimi (University of Alabama), Sean Bozorgzad (Potentia Analytics), and Nina Marhamati (Potentia Analytics)

Facial Palsy Detection Through Spatiotemporal Landmark Analysis with Attention Mechanisms ... 416
Ahmed Mostayed (University of Cincinnati Blue Ash), Mehdi Norouzi (University of Cincinnati), and Xuefu Zhou (University of Cincinnati)

A Reversible-Zero Watermarking Scheme for Medical Volume Data via Difference Expansion 420
Jiangnan Zhu (Kyushu University, Japan), Yuntao Wang (The University of Electro-Communications, Japan), and Yujie Gu (Kyushu University, Japan)

Prioritizing Cancer Genes Using HodgeRank Reveals Critical Pathways in Cancer Progression 424
Yutong Jiang (Institute of Data and Information, Tsinghua Shenzhen International Graduate School, Tsinghua University) and Ercan E.Kuruoglu (Institute of Data and Information, Tsinghua Shenzhen International Graduate School, Tsinghua University)

AI for Healthcare and life Science - 2

Conditional Hierarchical Bayesian Tucker Decomposition for Genetic Data Analysis 428
Adam Sandler (Northwestern University, USA), Diego Klabjan (Northwestern University, USA), and Yuan Luo (Northwestern University, USA)

A Layered Multi-Expert Framework for Long-Context Mental Health Assessments 435
Jinwen Tang (University of Missouri), Qiming Guo (Texas A&M University-Corpus Christi), Wenbo Sun (Delft University of Technology), and Yi Shang (University of Missouri)

Automatic Detection of Butterfly Malar Rash in Facial Images Using Deep Learning 441
Abdilahi Jama (Minnesota State University Mankato, USA), Graham Wilkins (Minnesota State University, Mankato, USA), Blake Reamer (Minnesota State University, Mankato, USA), Nabiyu Haile (Minnesota State University, Mankato, USA), and Naseef Mansoor (Minnesota State University, Mankato, USA)

Performance Analysis of Deep Learning Models for Femur Segmentation in MRI Scan 447
Mengyuan Liu (Northeastern University, United States), Yixiao Chen (Northeastern University, United States), Anning Tian (Northeastern University, United States), Xinmeng Wu (Northeastern University, United States), Mozhi Shen (Northeastern University, United States), Tianchou Gong (Northeastern University), and Jeongkyu Lee (Northeastern University, United States)

AI for Healthcare and life Science - 3

Early Diagnosis of Lung Adenocarcinoma Leveraging YOLO Architectures 451
Vihan Bhattacharjee (Bellarmine College Preparatory), Kamalashree S (AIClub), and Sindhu Ghanta (AIClub)

Health Status Discovery for Online Bidirectional Contact Tracing and Disease Aware Navigation 457
Sofia Hurtado (University of Texas at Austin, United States of America) and Radu Marculescu (University of Texas at Austin, United States of America)

Improved Molecular Generation through Attribute-Driven Integrative Embeddings and GAN Selectivity 463
NANDAN JOSHI (Johns Hopkins University, United States) and Erhan Guven (Johns Hopkins University)

AI for Healthcare and life Science - 4

Edge-aware and Attention-aided U-Net Model for Skin Lesion Segmentation 469
Dipika Ray (Jadavpur University), Sujan Sarkar (Jadavpur University), Diego Oliva (Universidad de Guadalajara, CUCEI), Oscar Ramos-Soto (Universidad de Guadalajara, CUCEI), and Ram Sarkar (Jadavpur University)

DAM-UNET: Dual Attention Module UNET for Lung Tumor Segmentation Using CT Scans ... 475
Zubair Saeed (Taxes A&M University), Souha Aouadi (Hamad Medical Corporation (HMC) Hospital), Tarraf Torfeh (Hamad Medical Corporation (HMC) Hospital), Jim Ji (Taxes A&M University), and Othmane Bouhali (Hamad Bin Khalifa University)

Recurrent Event Analysis and Biomarker Discovery for Glioblastoma Using mRNA-seq Data .. 482
Krish Nachnani (The Harker School, United States), Smriti Bhandari (Pyxeda Inc., United States), and Shilpi Shaw (Pyxeda Inc., United States)

AI for Healthcare and life Science - 5

Reducing Global Breast Cancer Mortality with Early, Low-cost Diagnosis Using Generative AI and Hybrid DL Architecture 488
Disha Gupta (The Harker School)

Vision Transformers Excel in Chest X-Ray Analysis 495
Sourodip Ghosh (Northeastern University), Ahana Bandyopadhyay (Northeastern University), Moinak Bose (Western University), and KC Santosh (AI Research Lab, University of South Dakota)

Attentional Triple-Encoder Network in Spatiospectral Domains for Medical Image Segmentation 501
Kristin Qi (University of Massachusetts Boston, USA) and Xinhan Di (Giant Network AI Lab, China)

Skin Lesion Segmentation Using Improved Topological Image Processing 503
Hong Cheng (Southern Arkansas University) and Rupesh Konduru (Southern Arkansas University)

AI for Healthcare and life Science - 6

FELGNN-DP: Federated Ensemble Learning-Based Graph Neural Network for Disease Prediction 507
Fataneh Tabarteh Farahani (Islamic Azad University) and Sathish Kumar (Cleveland State University)

Medical Vision Language Models as Policies for Robotic Surgery 513
Akshay Muppidi (Stony Brook University, USA) and Martin Radfar (Stony Brook University, USA)

IRC-SC: Improving Robustness of CNN-based MRI System using SRGAN and CNN 519
Gaurang Patel (Cleveland State University), Vivek Chaturvedi (Indian Institute of Technology, Palakkad), and Sathish Kumar (Cleveland State University)

Expression Variability of Cognition-Associated Genes Across Neural Cell Types and Species During Aging, with Implications for Predicting Alzheimer's Disease in Humans 527
Natasha Petrovska (Florida Atlantic University, United States of America), Maria Larrondo-Petrie (Florida Atlantic University, United States of America), and Mirjana Pavlovic (Florida Atlantic University, United States of America)

AI for Healthcare and life Science - 7

PDE-Informed Gradient Boosting for Disease Outbreak Detection and Forecasting 531
Ruixin Chen (Yeshiva University) and David Li (Yeshiva University)

Multi-Label Classification with Constraint-Based Learning for Hierarchical Consistency 537
Abhishek Shivanna (Oak Ridge National Laboratory, USA), Heidi Hanson (Oak Ridge National Laboratory, USA), John Gounley (Oak Ridge National Laboratory, USA), and Adam Spannaus (Oak Ridge National Laboratory, USA)

GluTANN: Transformer-Based Continuous Glucose Monitoring Model with ANN Attention .. 543
Sijie Xiong (Kyushu University, Japan), Youhao Xu (Southeast University, China), Cheng Tang (Kyushu University, Japan), Jianing Wang (Huazhong University of Science and Technology, China), Shuqing Liu (Kyushu University, Japan), and Atsushi Shimada (Kyushu University)

AI for Healthcare and life Science - 8

Brain Tumour Diagnostics and Analysis (TDA): Segmentation, Classification and Interactive Interface 549
Ahmeed Suliman Farhan (University of Hull), Umar Manzoor (University of Wolverhampton), and Muhammad Khalid (University of Hull)

Mapping Biomedical Ontology Terms to IDs: Effect of Domain Prevalence on Prediction Accuracy 555
Thanh Son Do (Missouri State University), Daniel B. Hier (Missouri University of Science and Technology), and Tayo Obafemi-Ajayi (Missouri State University)

PATL: Pool-based Active Twin Learner from Oracle with Imitation Learning for Early Epidemic Detection 561
Pooja Singh (AI Research Lab, University of South Dakota), Rodrigue Rizk (AI Research Lab, University of South Dakota), and KC Santosh (AI Research Lab, University of South Dakota)

Development of Predictive Model for Patient Triaging at Emergency Department 567
Kristacia Kang (Synapxe), Annitha Annathurai (Sengkang General Hospital), Yong Khiang Leow (Synapxe), Emileen Chia (Sengkang General Hospital), and Zhiyan Fu (Synapxe)

AI for Healthcare and life Science - 9

FLARE: Federated Learning and Reinforcement Optimization for Cancer Survival Models 573
Fataneh Tabarteh Farahani (Islamic Azad University) and Sathish Kumar (Cleveland State University)

Bias Mitigation in Deep Learning: A Survey of Modern Techniques 577
Farheen Akhter (California State University, San Bernardino), Nabeel Alzahrani (California State University, San Bernardino), and Khalil Dajani (California State University, San Bernardino)

Leveraging Temporal Aggregation and Graph Structures to Analyze EHR Trajectories 579
Ghada M. Fathy (The City for Scientific Research and Technological Applications, Egypt), Amira Soliman (Halmstad University, Sweden), Farzaneh Etminani (Halmstad University, Sweden), and Mattias Ohlsson (Halmstad University, Sweden)

ShapeChain: Revealing Oxytocin-Receptor Structural Mimicry with AI Validation 583
Tia Pope (North Carolina A&T State University) and Ahmad Patooghy (North Carolina A&T State University)

AI for Healthcare and life Science - 10

Medical Device Safety: An Analytical International Survey of AI/ML-Enabled Medical Devices 587
Olivia Ostrom Finn (Johns Hopkins University, United States of America)

Learn to Detect Freezing of Gait in Parkinson's Disease Patients Using Mobile Sensors Assisted by Video Data 591
Yaxin Liu (Independent Researcher) and Andrew Liu (Lynbrook High School)

Canvas Insight: Enhancing AI-Driven Scheduling for Depression Diagnosis Using the House-Tree-Person Projective Test 594
Pakeeza Akram (University of St. Thomas, MN, USA), Ammara Ghalib (National University of Sciences and Technology), and Syeda Fizzah Hashmi (National University of Sciences and Technology)

Home-Based Gait Abnormality Detection: Fast Gait Abnormality Detection Using SAIL-TUG Dataset and Machine Learning Techniques 598
Haoyu Song (Singapore Institute of Technology) and Indriyati Atmosukarto (Singapore Institue of Technology)

Leveraging Machine Learning and ChemBERTa for Efficient Identification of CB1 Receptor-Active Compounds 600
Shloak Vatsyayan (Robbinsville High School, Robbinsville, NJ-08691 , USA)

From Sparse to Precise: Wavelet Implicit Neural Network for Radiotherapy Commissioning ... 606
Maryam Albuainin (Imam Abdulrahman bin Faisal University, Saudi Arabia, University of New Mexico, USA), Richard Shaw (Corewell Health William Beaumont University Hospital, USA), and Shuang Luan (University of New Mexico)

AI for Security and Safety (Industry)

GenAI Security: Outsmarting the Bots with a Proactive Testing Framework 610
Sunil Kumar Jang Bahadur (Google), Gopala Dhar (Google), and Lavi Nigam (Google)

Bugdar: AI-Augmented Secure Code Review for GitHub Pull Requests 613
John Naulty (Mysten Labs), Eason Chen (Carnegie Mellon University), Joy Wang (Mysten Labs), George Digkas (Mysten Labs), and Kostas Chalkias (Mysten Labs)

AI Testing and Automation - 1

Unlearning in Decision Tree Classifiers and Microcontroller Implementations 617
Rupesh Raj Karn (New York University Abu Dhabi), Prithwish Basu Roy (NYU Tandon School of Engineering, New York, USA), Johann Knechtel (New York University Abu Dhabi), and Ozgur Sinanoglu (New York University Abu Dhabi)

Transformer-Based Unit Test Generation 625
Khushnood Adil Rafique (University of Kaiserslautern-Landau (RPTU)), Pooja Biradar (University of Kaiserslautern-Landau (RPTU)), and Christoph Grimm (University of Kaiserslautern-Landau (RPTU))

Collision Scenario Analysis for Autonomous Vehicles Using Multimodal Deep Learning Models ... 631
Johnny Qiu (San Jose State University), Lin Zhu (San Jose State University), Manyu Zhang (San Jose State University), Yuan Pan (San Jose State University), Peng Xu (Virginia Tech), Jerry Gao (San Jose State University), and Jun Liu (San Jose State University)

AI Testing and Automation - 2

Verification of Neural Network Robustness Against Weight Perturbations Using Star Sets 637
Muhammad Usama Zubair (University of Texas at Dallas, Richardson, TX, USA), Taylor T. Johnson (Vanderbilt University, Nashville, TN, USA), Kanad Basu (University of Texas at Dallas, Richardson, TX, USA), and Waseem Abbas (University of Texas at Dallas, Richardson, TX, USA)

Navigating MLOps: Insights into Maturity, Lifecycle, Tools, and Careers 643
Jasper Stone (Mississippi State University, United States), Raj Patel (Mississippi State University, United States), Farbod Ghiasi (Mississippi State University, United States), Sudip Mittal (Mississippi State University, United States), and Shahram Rahimi (Mississippi State University, United States)

ATOS: An Open-Source Platform for Testing AI-Based Automated Vehicle Systems in Integrated Simulated and Physical Scenarios 651
Victor Jarlow (AstaZero AB), Lukas Wikander (AstaZero AB), Samuel Thorén (AstaZero AB), Robert Brenick (AstaZero AB), Xianbiao Hu (Pennsylvania State University), and Timo Kero (AstaZero AB)

Multimodal Generative AI for Story Point Estimation 659
Mohammad Rubyet Islam (Adjunct Professor) and Peter Sandborn (University of Maryland)

AI Testing and Automation - 3

Human Oversight over Autonomous Task Execution in Sandbox Environments 663
Wangfan Li (Human-AI Empowerment Lab, Clemson University, Clemson, South Carolina), Athish Venkatachalam (Human-AI Empowerment Lab, Clemson University, Clemson, South Carolina), Jackson Bowen (Human-AI Empowerment Lab, Clemson University, Clemson, South Carolina), and Carlos Toxtli (Human-AI Empowerment Lab, Clemson University, Clemson, South Carolina)

AI Testing and Automation - 4

Edge-X: Cost Factor Evaluation Workflow for Model Deployment on Edge AI Devices 669
Jack Conley (University of San Diego, United States), Nikhil Yadav (University of San Diego, United States), and Penelope Yanez (University of San Diego, United States)

Contextual Augmented Multi-Model Programming (CAMP): A Local-Cloud Copilot Solution . 675
Yuchen Wang (Nanyang Technological University), Shangxin Guo (City University of Hong Kong), and Chee Wei Tan (Nanyang Technological University)

DiffCraft: A Modular Differentiable Framework for Music Synthesis with Timbre Transfer 682
Venkat Suprabath Bitra (Dept. of Computer Science, Columbia University, New York, US) and Homayoon Beigi (Dept. of Mechanical Engineering and Dept. of Electrical Engineering, Columbia University and Recognition Technologies, Inc., New York, US)

REMIND: Recall Enhanced Memory Integration for Natural Language Dialogue Systems 689
Bo-Sheng Huang (College of Artificial Intelligence, National Yang Ming Chiao Tung University), Ted T. Kuo (College of Artificial Intelligence, National Yang Ming Chiao Tung University), Li-Jen Wang (College of Artificial Intelligence, National Yang Ming Chiao Tung University), and Chia-Yu Lin (Department of Computer Science and Information Engineering, National Central University)

DREAM: Dynamic Responsibility and Evolutionary Adaptive Modularization for Knowledge Distillation 695
William Zhang (Harvard), Purab Seth (Harvard), Sedik Sadik (Harvard), and Alex Geng (Harvard)

AI for Robotics/UAV

Leader-Based Coalition Formation for Extremely Large Scale Collectives 701
Neha G. Pusalkar (Oregon State University) and Julie A. Adams (Oregon State University)

AI-based Olfactory Sensing for Robotic Platform 707
AISHIK PAL (Indian Institute of Technology Jodhpur, India)

Deep Reinforcement Learning for Dynamic Resource Allocation : Generalizing Defensive Strategies Based on Pairwise Unit Analysis 711
Valentin Colliard (Sorbonne Université, CNRS, LIP6), Alain Peres (Thales LAS France), and Vincent Corruble (Sorbonne Université, CNRS, LIP6)

Quadruped Robots and Canine Likeness: The Uncanny Valley Effect 719
Carolina Velasco (Ontario Technology University, Canada), Patrick C. K Hung (Ontario Technology University, Canada), Farkhund Iqbal (Zayed University, United Arab Emirates), Hamda Al Breiki (Zayed University, United Arab Emirates), and Hao An Tseng (Ontario Technology University, Canada)

Improving ORB-SLAM3 Performance in Textureless Environments: Mapping and Localization in Hospital Corridors 723
Zijun Sha (Toyota Motor Corporation, Japan), Syuuhei Shiro (KSK CO.,LTD., Japan), Kazuki Shibamiya (KSK CO.,LTD., Japan), Kazuhiro Shintani (Toyota Motor Corporation, Japan), and Kazuhito Tanaka (Toyota Motor Corporation, Japan)

AI for Computer Vision – 1

Assessing AI Models' Spatial Visualization in PSVT:R and Augmented Reality: Towards Enhancing AI's Spatial Intelligence 727
Uttamasha Monjoree (Texas A&M University) and Wei Yan (Texas A&M University)

EffBin: Efficient Face Recognition via Binary Neural Networks 735
Susim Roy (University at Buffalo, USA), Bharat Yalavarthi (University at Buffalo, USA), and Nalini Ratha (University at Buffalo, USA)

AniLarm: AI for Small Animal Detection Under Cars Using Thermal Camera 741
Rahul Choutapally (University of the Pacific, USA), Konika Reddy Saddikuti (University of the Pacific, USA), and Solomon Berhe (University of the Pacific, USA)

AI for Computer Vision – 2

The Dawn of KAN in Image-to-Image (I2I) Translation: Integrating Kolmogorov-Arnold Networks with GANs for Unpaired I2I Translation 747
Arpan Mahara (Florida International University), Naphtali D. Rishe (Florida International University), and Liangdong Deng (Florida International University)

Estimating Position and Orientation of Ships in Real Time using Constrained Hand-Annotated Data 755
Sashank Vempati (Alutiiq LLC., United States), Chelsea Mediavilla (NIWC Pacific, United States), Shane Wechsler (SDSU vice NIWC Pacific, United States), Miguel Torres (Alutiiq LLC., United States), Mark Bilinski (NIWC Pacific, United States), Michael Hess (Alutiiq LLC., United States), and Ray Provost (NIWC Pacific, United States)

PixMus : Video and Text Conditioned Background Music Generation using Latent Diffusion .. 761
Tilak Sharma Honnappaiah Kumara (University at Buffalo), Arjun Kaushik (University at Buffalo), and Nalini Ratha (University at Buffalo)

When Event-Based Shape from Polarization Meets Spiking Neural Networks 767
Peng Kang (University of Illinois Springfield), Srutarshi Banerjee (Argonne National Laboratory), Henry Chopp (Northwestern University), Aggelos Katsaggelos (Northwestern University), and Oliver Cossairt (Northwestern University)

AI for Computer Vision – 3

Enhancing Automated Feedback for Fitness Exercises Using Pose Estimation and Semi-Supervised Generative Adversarial Learning 771
Oliver Werthwein (FZI Research Center for Information Technology, Germany), Constantin Kronbichler (FZI Research Center for Information Technology, Germany), Marc Schroth (FZI Research Center for Information Technology, Germany), and Wilhelm Stork (Karlsruhe Institute of Technology, Germany)

Entanglement Learning: An Information-Theoretic Framework for Adaptive Convolutional Neural Networks 777
Wael Hafez (Semarx research Ltd.), Amir Nazeri (Semarx research Ltd.), Cameron Reid (Semarx research Ltd.), and Sherif Elshamy (Semarx research Ltd.)

FUSE: First-Order and Second-Order Unified SynthEsis in Stochastic Optimization 783
Zhanhong Jiang (Iowa State University, USA), Md Zahid Hasan (Iowa State University, USA), Aditya Balu (Iowa State University, USA), Joshua R. Waite (Iowa State University, USA), Genyi Huang (Oracle, USA), and Soumik Sarkar (Iowa State University, USA)

AI for Computer Vision – 4

Transferability Prediction for Model Recommendation: A Graph Learning Method 789
Xiangyu Chen (Shenzhen Key Laboratory of Ubiquitous Data Enabling, Shenzhen International Graduate School, Tsinghua University), Yanru Wu (Shenzhen Ubiquitous Data Enabling Key Lab, Shenzhen International Graduate School, Tsinghua University), Jian Xu (Shenzhen Ubiquitous Data Enabling Key Lab, Shenzhen International Graduate School, Tsinghua University), Wenhao Guo (Shenzhen Tsingle Tech Ltd.), Yang Li (Shenzhen Ubiquitous Data Enabling Key Lab, Shenzhen International Graduate School, Tsinghua University), and Xiaoping Zhang (Shenzhen Ubiquitous Data Enabling Key Lab, Shenzhen International Graduate School, Tsinghua University)

ViT-Slim: A Genetic Algorithm-based NAS Framework for Efficient Vision Transformer Design 796
Eunjoung Yoo (Ewha Womans University, South Korea) and Jaehyeong Sim (Ewha Womans University, South Korea)

Controllable Diffusion Model for Generating Multimodal Biometric Images 803
Quoc Dung Nguyen (Inha University, Republic of Korea) and Hakil Kim (Inha University, Republic of Korea)

YOLO-KAN: Exploring the Adaptability of Kolmogorov-Arnold Networks in the YOLO Model 809
Xiaofeng Zhao (Northeastern University), Jeongkyu Lee (Northeastern University), and Tehmina Amjad (Northeastern University)

AI for Computer Vision – 5

A Data-Driven Approach to Enhancing Gravity Models for Trip Demand Prediction 815
Kamal Acharya (University of Maryland Baltimore County), Mehul Lad (University of Maryland Baltimore County), Liang Sun (Baylor University), and Houbing Song (University of Maryland Baltimore County)

Crash Severity Analysis of Child Bicyclists using Arm-Net and MambaNet 821
Shriyank Somvanshi (Texas State University), Rohit Chakraborty (Texas State University), Subasish Das (Texas State University), and Anandi K Dutta (Texas State University)

BARTNet: Context-Aware Deep Learning Framework for BART Ridership Forecasting 825
Leela Sai Rahul Suryadevara (San Jose State University), Nivegna Lagadapati (San Jose State University), Venkata Sai Krishna Velamala (San Jose State University), Yesheswini Lakshmi Spandana Potti (San Jose State University), and Mohammad Masum (San Jose State University)

A Survey on Generative AI in Transportation Systems Management and Operation 829
Shriyank Somvanshi (Texas State University), Jinli Liu (Texas State University), and Subasish Das (Texas State University)

AI for Healthcare: Applications of Semantic Segmentation in Lung Cancer Detection using Python and Implications for Public Policy 833
Broto Bhardwaj (Bharati Vidyapeeth Deemed University (Institute Of Management And Research), India)

AI for Security and Safety - 1

Backdoor Attack Detection in Decision Tree Classifiers Using SHAP Explainability 839
Rupesh Raj Karn (New York University Abu Dhabi), Johann Knechtel (New York University Abu Dhabi), and Ozgur Sinanoglu (New York University Abu Dhabi)

RAG with Differential Privacy 847
Nicolas Grislain (Sarus Technologies)

LLM Interpretability: Tracing How LLMs Answer Factual Queries and Math Questions 853
Shweta Agrawal (Google LLC), He Nan Li (Google LLC), and Lucas Lu (Google LLC)

Prompt-Tuning for Recommendation Unlearning 859
Jin Huang (Stony Brook University, US), Zezhong Fan (Walmart Global Tech, US), Lalitesh Morishetti (Walmart Global Tech, US), Yuchan Guo (Apple, US), Kaushiki Nag (Walmart Global Tech, US), Hongshik Ahn (Stony Brook University, US), Ziheng Chen (Walmart Global Tech, US), and Gabriele Tolomei (Sapienza University of Rome, Italy)

AI-Powered Data Encryption Techniques: Safeguarding Cloud Infrastructure 864
Advait Patel (IEEE Senior Member), Hariharan Ragothaman (IEEE Senior Member), Milavkumar Shah (IEEE Senior Member), Adit Sheth (IEEE Senior Member), Charit Upadhyay (IEEE Senior Member), Pravin Pandey (IEEE Senior Member), and Saai Krishnan Udayakumar (IEEE Senior Member)

AI for Security and Safety - 2

Anti-Collusion and Latency-Tolerant Privacy-Preserving Federated Learning Framework via Multi-Key Homomorphic Aggregation 872
Yuntao Wang (The University of Electro-Communications), Yujie Gu (Kyushu University), and Xun Shen (Tokyo University of Agriculture and Technology)

Context-Awareness and Interpretability of Rare Occurrences for Discovery and Formalization of Critical Failure Modes 876
Sridevi Polavaram (The MITRE Corporation, Virginia, USA), Xin Zhou (The MITRE Corporation, Austin, USA), Meenu Ravi (The MITRE Corporation, Virginia, USA), Mohammad Zarei (The MITRE Corporation, San Diego, USA), and Anmol Srivastava (The MITRE Corporation, Virginia, USA)

An Adversarial Toxicity Prompt Generator Exploiting Multilingual Code-Switching in LLMs .. 884
Vinit Sudhir Wadgaonkar (University of Buffalo) and Nalini Ratha (University of Buffalo)

AI for Security and Safety - 3

Robust Anomaly Detection with Graph Neural Networks using Controllability 888
Yifan Wei (Vanderbilt University, USA), Anwar Said (Vanderbilt University, USA), Waseem Abbas (University of Texas at Dallas, USA), and Xenofon Koutsoukos (Vanderbilt University, USA)

SocialCipher: A Multimodal Framework for Proactive Threat Detection with SentIntel 896
Tia Pope (North Carolina A&T State University), Kailani Lemieux-Mack (Vanderbilt University), Vinayak Sharma (University of California San Diego), Anjolaoluwa Ogedengbe (Massachusetts Institute of Technology), and Aman Thanvi (University of Maryland)

Scaling Responsible Generative AI: Automating Red Teaming of LLM Applications 902
Adison Goh (National University of Singapore, Singapore), Benjamin Chee (Swiss Re, Singapore), Matteo Vagnoli (Swiss Re, Switzerland), Luca Baldassarre (Swiss Re, Switzerland), and Akshay Narayan (National University of Singapore, Singapore)

LLM-based Automated Mitigation and Assurance Case Generation Against Threats to AI Systems. 906
Yuya Fujiwara (Waseda University, Japan), Takuma Tuchida (Waseda University, Japan), Rikuho Miyata (Waseda University, Japan), Hironori Washizaki (Waseda University, Japan), and Naoyasu Ubayashi (Waseda University, Japan)

AI for Security and Safety - 4

GraphCodeBERT-Augmented Graph Attention Networks for Code Vulnerability Detection 912
Deekshith Sagar Rangapuram (University at Buffalo, USA) and Nalini Ratha (University at Buffalo, USA)

TrustToken: A Framework for Evaluating Tokenizer Security and Robustness in NLP Pipelines 918
Tia Pope (North Carolina A&T State University) and Ahmad Patooghy (North Carolina A&T State University)

Large Language Model Corruption Can Spread Between Both Human and Synthetic Languages ... 924
Wonjae Oh (University of North Carolina at Chapel Hill, US, Scalator L.L.C., US), David Kim (University of North Carolina at Chapel Hill, US), and Wonou Chung (University of North Carolina at Chapel Hill, US)

AI for Security and Safety - 5

Temporal Context Awareness: A Defense Framework Against Multi-turn Manipulation Attacks on Large Language Models 930
Prashant Kulkarni (Google) and Assaf Namer (Google)

AUTHENTICATION: Identifying Rare Failure Modes in Autonomous Vehicle Perception Systems using Adversarially Guided Diffusion Models 936
Mohammad Zarei (The MITRE Corporation), Melanie Jutras (The MITRE Corporation), Eliana Evans (The MITRE Corporation), Mike Tan (Cranium), and Omid Aaramoon (Booz Allen Hamilton)

Quantifying Explainability: Metrics and Methodologies for Dense Neural Network Interpretability 944
Calvin Raab (Booz Allen Hamilton) and Terry Slenn (Booz Allen Hamilton)

Automated Host Identification Using SSL/TLS Traffic with SHAP and Artificial Bee Colony 950
Ahmet Aksoy (University of Central Missouri), Sundeep Varma (University of Central Missouri), Khursaid Ansari (University of Central Missouri), and Yaman Shrestha (University of Central Missouri)

AI for Security and Safety - 6

Fraudulent Event Detection Via Temporal Graph Networks 956
Diego Saldana Ulloa (Benemerita Universidad Autonoma de Puebla) and Guillermo De Ita Luna (Benemerita Universidad Autonoma de Puebla)

Data-Driven IT/OT Cyber Risk Evaluation and Mitigation Prioritization Using Machine Learning 962
Maryam Karimi (FM, USA) and Diego Mendez Mena (FM, USA)

AI for Security and Safety - 7

Web-based Machine Learning Framework for Phishing URL Detection and Analysis 970
Rahul Choutapally (University of the Pacific) and Tapadhir Das (University of the Pacific)

BananaGuard: A Comparative Analysis of AI Models for Firearm Detection in Crowded Environments 976
Rumeysa Kara (AI in Complex Systems Lab, University at Albany, SUNY), Betul Tok (AI in Complex Systems Lab, University at Albany, SUNY), Rawan AlMakinah (AI in Complex Systems Lab, University at Albany, SUNY), and Muhammed Abdullah Canbaz (AI in Complex Systems Lab, University at Albany, SUNY)

Dynamical Sketching for Enhanced Communication Efficiency in Federated Learning 982
Sharmin Afrose (Oak Ridge National Laboratory) and Olivera Kotevska (Oak Ridge National Laboratory)

Large Language Model can Reduce the Necessity of using Large Data Samples for Training Models 988
Md Abdur Rahman (Department of Intelligent Systems and Robotics, University of West Florida, Pensacola, FL), Guillermo Francia (Center for Cybersecurity, University of West Florida, Pensacola, FL, USA), Hossain Shahriar (Center for Cybersecurity, University of West Florida, Pensacola, FL, USA), and Sheikh Iqbal Ahamed (Department of Computer Science Marquette University WI, USA)

AI for Security and Safety - 8

Graph Neural Network-Based Edge Classification Approach for Detection of Cybersecurity Attacks 992
Sathish Kumar (Cleveland State University), Danny DeJesus (Cleveland State University), and Fataneh Tabarteh Farahani (Islamic Azad University)

Deep Fake Audio Detection Framework using MFCCs, Chroma Features, and Spectrogram Images 998
Nora Bakken (University of the Pacific), Shavil Singh (University of the Pacific), Makwana Prashant (University of the Pacific), and Tapadhir Das (University of the Pacific)

Using a Structured Composition of Correlation Coefficient Functions to Optimize Machine Learning-Driven Cyber Attack Detection Models 1004
Pavitra Modi (University of New Brunswick, Canada)

AI for Transportation & Aerospace - 1

Applying Tabular Deep Learning Models to Estimate Crash Injury Types of Young Motorcyclists 1010
Shriyank Somvanshi (Texas State University), Anannya Ghosh Tusti (Texas State University), Rohit Chakraborty (Texas State University), and Subasish Das (Texas State University)

Compact Autoencoder Architectures for Anomaly Detection in Electric Drivetrain Current Sensors: A Comparative Study 1016
Johannes Sautter (University of Stuttgart, Germany), Markus Frey (University of Stuttgart, Germany), Philipp Wagner (Robert Bosch GmbH, Germany), Gunther Götting (Robert Bosch GmbH, Germany), Michael Grill (FKFS, Germany), and André Casal Kulzer (University of Stuttgart, Germany)

AI for Transportation & Aerospace - 2

Comparative Analysis of Advanced AI-based Object Detection Models for Pavement Marking Quality Assessment during Daytime 1023
Gian Antariksa (PT Mitra Solusi Telematika), Rohit Chakraborty (Texas State University), Shriyank Somvanshi (Texas State University), Subasish Das (Texas State University), Mohammad Jalayer (Rowan University), Deep Rameshkumar Patel (Rowan University), and David Mills (Texas State University)

NormFusion: Real-Time Test-Time Adaptation for LiDAR Segmentation under Corruption ... 1029
Yunxiang Zhou (Singapore Institute of Technology and Nanyang Technological University), Xin Lou (Singapore Institute of Technology), Ying He (Nanyang Technological University), Wei Zhang (Singapore Institute of Technology), and Indriyati Atmosukarto (Singapore Institute of Technology)

Adversarially Trained Dynamic Ensemble: A Moving Target Defense Strategy for Robust Semantic Segmentation in Autonomous Vehicles 1036
Yanghui Mo (Singapore Institute of Technology), Xin Lou (Singapore Institute of Technology), Mageshwaran Muthusamy (Singapore Institute of Technology), Wei Zhang (Singapore Institute of Technology), Indriyati Atmosukarto (Singapore Institute of Technology), and Xunpei Sun (Sun Yat-sen University)

AI for Transportation & Aerospace - 3

Modeling Distracted Driving: Analyzing Driver Gaze, Vehicle Positioning, and Psychological Response for Enhanced Traffic Safety 1044
Swastika Barua (Texas State University), Anandi Dutta (Texas State University), and Subasish Das (Texas State University)

Predicting Pedestrian Intent: Evaluating Deep Learning with LSTM, CNN, and Transformers 1050
Abdul Hady Bin Zaydie (Singapore Institute of Technology, Singapore) and Indriyati Atmosukarto (Singapore Institute of Technology, Singapore)

Long Short-Term Memory Networks for Data-Driven Modeling of Proton Exchange Membrane Fuel Cell Systems 1056
Louis Weller (University of Stuttgart. Germany), Timo Hagenbucher (FKFS, Germany), Dirk Itzen (University of Stuttgart, Germany), Markus Frey (University of Stuttgart, Germany), Michael Grill (FKFS, Germany), and André Casal Kulzer (University of Stuttgart, Germany)

AI for Transportation & Aerospace - 4

Smart City AI Traffic Cloud - City Traffic Analysis and Monitoring Using AI Models 1062
Yukta Mehta (San Jose State University, USA), Aishwarya Ashok (San Jose State University, USA), Deepthi Desharaju (San Jose State University, USA), Padhmavathy Cebolu Srinivasan (San Jose State University, USA), Sowmya Manchikanti (San Jose State University, USA), and Jerry Gao (San Jose State University, USA)

TwinExplainer: Explaining Predictions of an Automotive Digital Twin 1070
Subash Neupane (Mississippi Sate Unviersity), Shaswata Mitra (Mississippi State University), Ivan A Fernandez (Mississippi State Unviersity), Sudip Mittal (Mississippi State University), and Shahram Rahimi (University of Alabama)

Transport Mode Recognition Data Collection Campaign and Model Training 1078
Daniele Martini (dept. of Energy, Politecnico di Milano), Michela Longo (dept. of Energy, Politecnico di Milano), Sonia Leva (dept. of Energy, Politecnico di Milano), Sergio Vaccarini (Gremove S.r.l.), and Federica Foiadelli (Gremove S.r.l.)

Physically Interpretable Representation and Controlled Generation for Turbulence Data 1084
Tiffany Fan (Stanford University), Murray Cutforth (Stanford University), Marta D'Elia (Atomic Machines and Stanford University), Alexandre Cortiella (National Renewable Energy Laboratory), Alireza Doostan (University of Colorado Boulder), and Eric Darve (Stanford University)

AI for Infrastructure and Platform

AutoML Framework for Ensembling: Split Validation Sets for Coefficient and Structure Selection 1086
Brandon Warner (Verseon International Corp.), Edward Ratner (Verseon International Corp.), Christopher Douglas (Verseon International Corp.), and Elliot Farmer Garcia (Verseon International Corp.)

Top-K Difference Sparsification and Quantization for Communication-Efficient Model Aggregation in Wireless Ad Hoc Federated Learning 1093
Kaito Tsuchiya (The University of Tokyo, Japan), Hiroshi Esaki (The University of Tokyo, Japan), and Hideya Ochiai (The University of Tokyo, Japan)

CATP: Cross-Attention Token Pruning for Accuracy Preserved Multimodal Model Inference . 1100
Ruqi Liao (Harvard University), Chuqing Zhao (Harvard University), Jin Li (Harvard University), Weiqi Feng (Harvard University), Yi Lyu (University of Wisconsin-Madison), Bingxian Chen (Stanford University), and Haochen Yang (Harvard University)

Workshop: AI for Sustainable Energy

Towards Real-Time Machine Learning Approximations of AC Optimal Power Flow 1105
Marek Miltner (Czech Technical University, Stanford University), Daniel Vašata (Czech Technical University in Prague), Magda Friedjungová (Czech Technical University in Prague), Nishant Gadde (Czech Technical University in Prague), Ondřej Štogl (Czech Technical University in Prague), Oldřich Starý (Czech Technical University in Prague), and Ram Rajagopal (Stanford University)

Artificial Intelligence System for Enabling Microreactor-Driven Cold Ironing in Maritime Ports 1111
Miltiadis Alamaniotis (University of Texas at San Antonio)

Workshop: Adaptive Cyber Defense

Steerability of Autonomous Cyber-Defense Agents by Meta-Attackers 1117
Luis Burbano (University of California Santa Cruz), Hampei Sasahara (Institute of Science Tokyo), and Alvaro A. Cardenas (University of California Santa Cruz)

Large Language Models are Autonomous Cyber Defenders 1125
Sebastián R. Castro (UC Santa Cruz), Roberto Campbell (UC Santa Cruz), Nancy Lau (UC Santa Cruz), Octavio Villalobos (UC Santa Cruz), Jiaqi Duan (UC Santa Cruz), and Alvaro A. Cardenas (UC Santa Cruz)

SkyQuery: Evaluating LLMs for Decision Making in the CAGE Challenge 1133
Ryan Gabrys (Naval Information Warfare Center Pacific)

Mitigating Exploding Gradients in Large Language Models with Neural Architecture Search . 1139
Qingya Lu (China Academy of Aerospace Science and Innovation), Zijie Wang (China Academy of Aerospace Science and Innovation), Xiaoman Zhang (China Academy of Aerospace Science and Innovation), and Yue Zhong (China Academy of Aerospace Science and Innovation)

Understanding Cyber Attackers Through Behavioral Science: A Systematic Study of the Representativeness Heuristic 1142
Mohammad Taneem Bin Nazim (University of Texas at El Paso, USA), Siyu Deng (University of Texas at El Paso, USA), Danilo Romero (University of Texas at El Paso, USA), Sridhar Venkatesan (Peraton Labs, USA), Jonathan Pfautz (Peraton Labs, USA), Prashanth Rajivan (University of Washington, USA), Cleotilde Gonzalez (Carnegie Mellon University, USA), Christopher Kiekintveld (University of Texas at El Paso, USA), and Palvi Aggarwal (University of Texas at El Paso, USA)

ICARuS: InterCode-CTF Auto-Randomization System 1150
Ryan Kerr (Defence Research and Development Canada, Canada), Adrian Taylor (Defence Research and Development Canada, Canada), Madeena Sultana (Defence Research and Development Canada, Canada), and Jean-Pierre Sabbagh El-Rami (Defence Research and Development Canada, Canada)

Credit Card Fraud Detection Using RoFormer Model With Relative Distance Rotating Encoding ... 1156
Kevin Reyes (Flow Payment) and Vasco Cortez (Flow Payment)

Auspex: Building Threat Modeling Tradecraft into an Artificial Intelligence-based Copilot 1160
Andrew Crossman (JPMorgan Chase, USA), Andrew R. Plummer (JPMorgan Chase, USA), Chandra Sekharudu (JPMorgan Chase, USA), Deepak Warrier (JPMorgan Chase, USA), and Mohammad Yekrangian (JPMorgan Chase, USA)

Towards Deepfake Detection for Everyone: A Lightweight Deepfake Detection Algorithm (LiDD) 1168
Anoop Krishnan Upendran Nair (Southern Methodist University) and Amit Basu (Southern Methodist University)

Workshop: Human Alignment in AI Decision-Making Systems

Trust in Aligned AI Decision Makers 1175
Jennifer McVay (CACI, Inc), Ewart de Visser (De Visser Research), Brian Pippin (CACI, Inc), Ashutosh Mani (Big Bear AI), Jacob Hyde (Warfighter Consulting), and Nicholas Kman (The Ohio State University)

A Roadmap for Alignable Algorithmic Decision-Makers in the Medical Triage Domain 1179
Brian Hu (Kitware, Inc.), David Chan (University of California, Berkeley), Taylor Sorensen (University of Washington), Xiusi Chen (University of Illinois Urbana-Champaign), Heng Ji (University of Illinois Urbana-Champaign), Yejin Choi (University of Washington), Trevor Darrell (University of California, Berkeley), and Arslan Basharat (Kitware, Inc.)

A Proof-Of-Concept Validation of Alignment in Decision-Making Attributes for Trustworthy AI 1184
Amy Summerville (Kairos Research), Louis Marti (Kairos Research), Ion Juvina (Kairos Research & Wright State University), B. Locke Welborn (Kairos Research), Cara Widmer (Kairos Research), and Alice Leung (RTX BBN Technologies)

A Framework for Identifying Key Decision-Maker Attributes in Uncertain and Complex Environments 1188
Joseph Borders (ShadowBox LLC), Alice Leung (RTX BBN Technologies), and Micah Condon (ShadowBox LLC)

A Generalisable Alignment System (GAS) for Human-Artificial Intelligence (AI) Alignment .. 1193
Neil Shortland (University of Massachusetts Lowell), Elias Nader (Kent State University), Bob Bixler (SoarTech), Joseph Cohn (SoarTech), AnaCristina Bedoya (University of Massachusetts Lowell), Katelyn Smith (University of Massachusetts Lowell), and Laurence Alison (University of Liverpool)

Creating Bayesian Ethical Alignment Models for Eliciting, Modeling, and Calibrating Ethical Human Decision-Making Values and Priorities 1198
Spencer Kohn (Perceptronics Solutions), Gershon Weltman (Perceptronics Solutions), Marvin Cohen (Perceptronics Solutions), Ewart de Visser (Air Force Academy), David Barnes (Empowering AI), and Elan Freedy (Perceptronics Solutions)

Enhancing Human-Artificial Intelligence Alignment: A Calibration-Based Approach 1204
Angela Woods (Soar Technology, LLC), Jordan Lampi (Soar Technology, LLC), Sara Pisanelli (Soar Technology, LLC), Neil Shortland (University of Massachusetts Lowell), Robert Marinier (Soar Technology, LLC), Robert Bixler (Soar Technology, LLC), and Joseph Cohn (Soar Technology, LLC)

Role-based Ethics for Decision-maker Alignment 1209
Christopher B. Rauch (Drexel University), Matthew Molineaux (Parallax Advanced Research), Mallika Mainali (Drexel University), Anik Sen (Drexel University), Michael W. Floyd (Knexus Research), and Rosina O. Weber (Drexel University)

Antisera for Misconceptions around Agentic Technology 1213
Ariel Greenberg (Johns Hopkins University Applied Physics Laboratory)

Using Human-Aware AI as a Framework to Achieve Intent Alignment 1217
Sarath Sreedharan (Colorado State University)

Decision-Maker Alignment: Benchmark Datasets 1221
Anik Sen (Drexel University), Rosina O Weber (Drexel University), Christopher B Rauch (Drexel University), Mallika Mainali (Drexel University), JT Turner (Knexus Research), John Meyer (Knexus Research), Michael W Floyd (Knexus Research), and Matthew Molineaux (Parallax Advanced Research)

Human-Aligned Chess AI: A Multitask Transformer for Humanlike Decision-Making 1230
Easwar Gnana Hari Sekar (Washington High School) and Roger Jin (Nous Research)

Alignment Divergence Metrics: Measuring Human-AI Concordance in Document Content Analysis 1235
Chunling Niu (University of the Incarnate Word), Soheila Sadeghi (University of the Incarnate Word), Marta Del Rio-Guerra (University of the Incarnate Word), Kelly Bradley (University of Kentucky), Meerna Ammari (University of the Incarnate Word), and Arthur Hernandez (University of the Incarnate Word)

Human-Aligned AI Must Counter Overtrust 1239
Colin Holbrook (University of California, Merced) and Alan Wagner (The Pennsylvania State University)

Predictive Models of Decision Making in Medical Triage 1243
Jordan Lampi (Soar Technology, LLC), Simona Temereanca (Soar Technology, LLC), Neil Shortland (University of Massachusetts Lowell), Jon Sussman-Fort (Soar Technology, LLC), Robert Bixler (Soar Technology, LLC), and Joseph Cohn (Soar Technology, LLC)

Enhancing Fine-Tuning LLM Evaluation: A Study on Calibration and Metrics for Industry-Specific AI Alignment 1247
Lucia Larise Stavarache (IBM)

Context Sensitive Frames and AI Alignment 1251
Jared Peterson (ShadowBox)

Semi-Supervised Learning for Loan Default Prediction: Leveraging Unlabeled Data from Time-Aware Splits 1255
Dániel Unyi (Budapest University of Technology and Economics, Hungary) and Bálint Gyires-Tóth (Budapest University of Technology and Economics, Hungary)

Workshop: Fairness-Aware Federated Optimizations and Learning

Fully Decentralized Collaborative Learning for Visual Question Answering in Distributed Scenarios 1262
Yudai Ueda (The University of Tokyo, Japan) and Hideya Ochiai (The University of Tokyo, Japan)

Tackling Environment Heterogeneity in Federated Reinforcement Learning 1268
Ukjo Hwang (Hanyang University), Hyung-Taig Lim (Samsung Electronics), and Songnam Hong (Hanyang University)

Secure Federated XGBoost with CUDA-accelerated Homomorphic Encryption via NVIDIA FLARE 1274
Ziyue Xu (NVIDIA Corporation, USA), Yuan-Ting Hsieh (NVIDIA Corporation, USA), Zhihong Zhang (NVIDIA Corporation, USA), Holger R. Roth (NVIDIA Corporation, USA), Chester Chen (NVIDIA Corporation, USA), Yan Cheng (NVIDIA Corporation, USA), and Andrew Feng (NVIDIA Corporation, USA)

Workshop: Swarm intelligence and Evolutionary Computation: Trends, Challenges, and Applications

Constrained Multi-Objective Optimization with dMOPSO: An Adaptive Penalty Approach ... 1280
Néstor A. García-Rojas (Instituto Nacional de Astrofísica Óptica y Electrónica), Miguel A. Jiménez-Domínguez (Instituto Nacional de Astrofísica Óptica y Electrónica), Saúl Zapotecas-Martínez (Instituto Nacional de Astrofísica Óptica y Electrónica), Raquel Díaz-Hernández (Instituto Nacional de Astrofísica Óptica y Electrónica), Leopoldo Altamirano-Robles (Instituto Nacional de Astrofísica Óptica y Electrónica), and Bilel Derbel (Univ. Lille, CNRS, Inria, Centrale Lille)

Machine Learning with Heuristic Search-based Hybrid Framework for Cycle Time Optimization in Semiconductor Production 1286
Mohammad Sharifur Rahman (Ulster University), M.M. Manjurul Islam (Ulster University), Saugat Bhattacharyya (Ulster University), Karl McCreadie (Ulster University), Tamas Reiter (Seagate Technology), Nuala Parker (Seagate Technology), and Girijesh Prasad (Ulster University)

Enhancing Evolutionary Algorithms through Meta-Evolution Strategies 1292
Oliver Kramer (University of Oldenburg)

Evolutionary Cognitive Prompting for Enhancing the Capabilities of Language Models 1298
Oliver Kramer (University of Oldenburg)

Standardized AI-Driven UAV Water Rescue System for Safe and Reliable Autonomous Operations..... 1302
Uzu-Kuei Hsu (National Pingtung University of Science and Technology, Taiwan), Yuxin Ye (National Pingtung University of Science and Technology, Taiwan), Sheng-Yao Hsu (Ming Chi University of Technology, Taiwan), and Chia-Hao Ku (Ming Chi University of Technology, Taiwan)

Cellular Computational Networks for Sustainable Artificial Intelligence 1306
Ganesh Venayagamoorthy (Clemson University)

Workshop: AI for Biology and Biomedicine – 1

Sequence-Based Protein Pocket Prediction via ProtT5 Embeddings and Spatial Sampling 1312
Rocio Rebollido-Rios (University of Cologne, Faculty of Medicine and University Hospital Cologne, Department I of Internal Medicine, Center for Molecular Medicine Cologne, CECAD Cluster of Excellence for Aging Research, Germany) and Oliver Kramer (Computational Intelligence Lab, Department of Computer Science, University of Oldenburg, Germany)

AI, Cybercrime, and Society: Closing the Gap Between Threats and Defenses 1316
Vrushali Channapattan (Okta Inc, USA), Gil Baram (University of California, Berkeley, USA), Nathan Wiebe (Contra Costa County, USA), and T.C. Niedzialkowski (Opendoor, USA)

Enhancing Deep Learning Performance with Parallel Coordinates and Data Encoding for Thrombogenesis Prediction 1318
Joong-Lyul Lee (University of North Carolina at Pembroke, USA), Haitao Zhao (University of North Carolina at Pembroke, USA), Mike Tree (Corvid Technologies, USA), Angelo Cristobal (Institute of Digital Engineering USA, USA), and Hozaifa Owaisi (University of North Carolina at Pembroke, USA)

Generative AI to Enhance Situational Awareness and Collaboration: A Co-Worker for Tech Support in Enterprise Environments 1324
Yasemin Karaca (Bournemouth University, United Kingdom), Gozde Sarsar (Bournemouth University, United Kingdom), Huseyin Dogan (Bournemouth University, United Kingdom), and Stephen Giff (Google Inc, US)

Geometric Deep Learning for Multiple Conformation Generation from Electron Density Images 1332
Saurav Jayakumar (University of Washington, USA), Jie Hou (Saint Louis University, USA), Renzhi Cao (Pacific Lutheran University, USA), and Dong Si (University of Washington, USA)

Numerical-Symbolic Learning from Biomedical Data 1338
Daniel Cyrus (University of Surrey Department of Computer Science), Dany Varghese (University of Surrey Department of Computer Science), Roman Bauer (University of Surrey Department of Computer Science), and Alireza Tamaddoni-Nezhad (University of Surrey Department of Computer Science)

Workshop: AI for Biology and Biomedicine – 2

Advancing Protein-Ligand Binding Site Prediction with 3D Instance Segmentation Techniques 1344
Esha Rajesh Gavali (University of Washington Bothell, USA), Jie Hou (Saint Louis University, USA), Renzhi Cao (Pacific Lutheran University, USA), and Dong Si (University of Washington Bothell, USA)

Privacy Preserving Medical Image Detection and Transmission using Deep Learning Architecture: A Pipeline 1350
Kamal KC (College of Biomedical Engineering and Applied Sciences, Purbanchal University), Alaka Acharya (College of Biomedical Engineering and Applied Sciences, Purbanchal University), Kalyan Singh Karki (Kumaripati ventures Pvt Ltd, Kathmandu), and Kushal Devkota (College of Biomedical Engineering and Applied Sciences, Purbanchal University)

A Novel Modeling Focused Missing Data Imputation Framework 1355
Asha Collie (Verseon International Corp.), Elliot Farmer Garcia (Verseon International Corp.), Brandon Warner (Verseon International Corp.), Edward Ratner (Verseon International Corp.), and Christopher Douglas (Verseon International Corp.)

AI Standard

AI for Standard and QA Track on AI Infrastructure and Tools

AMLOP: A Framework for the Operational Safety Assurance of Machine Learning Leveraging Model Monitoring 1361
Yunjia Wang (KU Leuven), Laure Buysse (KU Leuven), Dries Vanoost (KU Leuven), Davy Pissoort (KU Leuven), Jeroen Boydens (KU Leuven), and Mathias Verbeke (KU Leuven)

From Black Box to Open Book: An Emerging Transparency Imperative in Generative AI Codebases 1369
Nell Watson (University of Gloucestershire) and Matt van Italie (Sema Software)

Quantum Reinforcement Learning Approaches: Current Status and Future Research Directions ... 1375
Ahmad Alomari (Cleveland State University) and Sathish Kumar (Cleveland State University)

Unifying Model for AI Standardization Processes 1383
Marina Cortês (University of Lisbon, Portugal), Richard Tong (IEEE Artificial Intelligence Standards Committee, USA), and Janusz Zalewski (State University of Applied Sciences, Poland)

Establishing Trust in AI-Driven Data Observability and Quality Control: A Framework for Reliable and Scalable Standards 1388
Behrouz Banitalebi (Morningstar Inc., Canada) and Satya Venkata Anusha Dwivedula (Morningstar Inc., USA)

Advancements in Artificial Intelligence: Breakthroughs, Challenges and the Road Ahead 1394
Alok Tibrewala (Independent Researcher, Senior Member IEEE, MS Computer Science, The George Washington University, USA)

Build a Resilient AI Ecosystem and Strategic Insights for the U.S. 1403
Shereen Salah Moussa (New York University), Ramachandra Vamsi Krishna Nalam (University of Buffalo), and Bhoomika Ghosh (University of Illinois at Chicago)

AI for Standard and QA Track on UAV and Aerospace

Advanced Prediction of Hypersonic Missile Trajectories with CNN-LSTM-GRU Architectures 1409
Amir Hossein Baradaran (School of Electrical Engineering Iran University of Science and Technology)

AI-Driven UAV Path Planning for Efficient Medical Item Delivery 1417
Fathi Smaili (Industrial Engineering Department, College of Engineering, University of Bisha,. Bisha 61922, Saudi Arabia), Khalid Ayed Alharthi (Department of Computer Science, College Of Computing, University of Bisha,. Bisha 61922, P.O. Box 551, Saudi Arabia), Abdullah M. Al-Fowaih (Undergraduate Student in Industrial Engineering Department, College of Engineering, University of Bisha Bisha 61922, Saudi Arabia), Abdulkarim F. Al-Shahrani (Undergraduate Student in Industrial Engineering Department, College of Engineering, University of Bisha Bisha 61922, Saudi Arabia), Sharif E. Al-Kathami (Undergraduate Student in Industrial Engineering Department, College of Engineering, University of Bisha Bisha 61922, Saudi Arabia), Omar A. Al-Subaie (Undergraduate Student in Industrial Engineering Department, College of Engineering, University of Bisha Bisha 61922, Saudi Arabia), and Zayd O. Al-Shashai (Undergraduate Student in Industrial Engineering Department, College of Engineering, University of Bisha Bisha 61922, Saudi Arabia)

Analyzing the Impact of Specific FAA Regulations on Commercial Drone Operations: A Focus on Enhanced Safety Measures 1423
Zakiya Chinue Irawagbon Percy Percy (North Carolina A&T)

AI Standards and QA for Smart Grids and Clean Energy

Machine Learning-Driven Load Prioritization for Reliable Residential Smart Grids 1429
Hiba Darwish (Computational Data Science and Engineering Department), Ahmad Harb (Computational Data Science and Engineering Department), Marwan Bikdash (Computational Data Science and Engineering Department), Balakrishna Gokaraju (Computational Data Science and Engineering Department), and Raymond Tesiero (Civil, Architectural and Environmental Engineering)

Research on System Design and Field Application of Intelligent Wireless Temperature Monitoring Devices for Switchgear 1438
Xiaomeng Li (STATE GRID SHANGHAI SONGJIANG ELECTRIC POWER SUPPLY COMPANY), Pei Cao (STATE GRID SHANGHAI ELECTRIC POWER RESEARCH), Guliang Zhou (STATE GRID SHANGHAI MUNICIPAL ELECTRIC POWER), Binghua Zhou (STATE GRID SHANGHAI SONGJIANG ELECTRIC POWER SUPPLY COMPANY), Feng Xue (STATE GRID SHANGHAI SONGJIANG ELECTRIC POWER SUPPLY COMPANY), and Yikai Yan (STATE GRID SHANGHAI ELECTRIC POWER RESEARCH INSTITUTE)

Predicting Extreme Weather-Induced Outages in Distribution Networks Using Graph-Based Neural Network Models 1443
Colin Le (University of Central Florida), Kenneth McDonald (University of Central Florida), and Zhihua Qu (University of Central Florida)

LIME-Based Explainable AI Approach for Battery Health Monitoring 1449
Shyam Krishan Joshi (Woxsen University), Ojashwini Dubey (Woxsen University), Palak Dwivedi (Woxsen University), Hemchandran K (Woxsen University), Raul V Rodriguez (Woxsen University), and Manjeet Rege (St.Thomas University)

Interpreting Carbon Price Predictions: A Temporal Analysis with Explainable AI for Market Shock and Recovery 1455
Mada Altiary (University of Technology Sydney, Australia - University of Tabuk, Saudi Arabia) and Farookh Hussain (University of Technology Sydney, Australia)

AI Standards and QA for AgriTech

Advanced Carbon Monitoring in Agriculture using Remote Sensing and Machine Learning Techniques 1461
Ann John (San Jose State University), Priyanka Bhyregowda (San Jose State University), Madhulika Dutta (San Jose State University), Sahana Prabhuswamy (sjsu), Supriya Vasagiri (sjsu), Jun Liu (SJSU), and Jerry Gao (SJSU)

Incorporating Farmer Trust into AI-driven Agricultural Management Optimization 1469
Zhaoan Wang (The University of Iowa, USA), Wonseok Jang (The University of Iowa, USA), Bowen Ruan (The University of Iowa, USA), Jun Wang (The University of Iowa, USA), and Shaoping Xiao (The University of Iowa, USA)

AI Standards and QA for AI Standards and QA for Semiconductors

Artificial Intelligence (AI) Standards and QA for Semiconductor Manufacturing 1475
RAM CHANDRA PALSANIYA (IEEE Control Systems Chapter Secretary)

ESG Intelligence Standards and QA for Global Environmental, Social and Governance

Study on AI Data Center Infrastructure Sustainable Deployment and Standardization 1480
SHUGUANG QI (China Academy of Information and Communications Technology), LIN NIU (China Mobile Group Design Institute Co., Ltd), and ZILONG WU (China Academy of Information and Communications Technology)

Navigating AI Adoption – An "AI verse" Framework for Enterprises 1488
Aseem Khanna (IEEE, Denver Chapter) and Anuradha Bhusri (Yati Solutions)

Study on Energy Efficiency Metrics for Environmental Sustainable Computing 1492
SHUGUANG QI (China Academy of Information and Communications Technology) and XINGFANG YE (China Academy of Information and Communications Technology)

Analyzing the Global AI Governance Ecosystem 1500
Owen J. Daniels (Center for Security and Emerging Technology (CSET), United States), Mina Narayanan (Center for Security and Emerging Technology (CSET), United States), and Cole McFaul (Center for Security and Emerging Technology (CSET), United States)

AI Standards and QA for Computer Vision

Visualization Driven AI Ensuring Quality in Wearable Time-Series Sensor Data for Healthcare 1502
Sayma Akther (Department of Computer Science, San José State University)

Scene Perceived Image Perceptual Score (SPIPS): Combining Global and Local Perception for Image Quality Assessment 1511
Zhiqiang Lao (Futurewei Technology Inc) and Heather Yu (Futurewei Technology Inc)

3D Neural Light Quantum Fields for Photo-realistic 3D Reconstruction from 2D Images 1520
Yongfeng Shan (University of Technology Sydney) and Christy Liang (University of Technology Sydney)

State of Play and Future Directions in Industrial Computer Vision AI Standards 1528
Artemis Stefanidou (Harokopio University of Athens, Greece), Panagiotis Radoglou-Grammatikis (K3Y Ltd, Bulgaria), Vasileios Argyriou (Kingston University, United Kingdom), Panagiotis Sarigiannidis (University of Western Macedonia, Greece), Iraklis Varlamis (Harokopio University of Athens, Greece), and Georgios Th. Papadopoulos (Harokopio University of Athens, Greece)

Sexing Orcas: Classification Using Convolution Neural Networks 1534
Ayodeji Adeyemo (University of Louisiana at Lafayette, US), Albert Carlson (Quantum Security Alliance, US), and Michael Totaro (University of Louisiana at Lafayette, US)

AI Standards and QA for Robotics and Autonomous Vehicles

Strengthening AI Validation and Verification in Autonomous Vehicles: Comprehensive Analysis and Improvements to Key Standards 1540
Sai Charan Dekkata (North Carolina A&T State University), Hrishikesh Tawade (Ample Inc), Vamsidhar Reddy Kamanuru (University of California San Diego), Santhosh Kusuma Kumar Parimi (Independent Researcher), and Surendra Rathod (Fr Conceicao Rodrigues College of Engineering)

Market Access and Compliance innovation for AI-Based Functional Safety Systems 1550
Thor Myklebust (SINTEF Digital)

LiDAR-Driven Steering Command Prediction for Autonomous Vehicles using Machine Learning .. 1560
Christopher Nenebi (North Carolina A&T State University Greensboro, USA), Sally Acquaah (North Carolina A&T State University Greensboro, USA), Andrews Tang (North Carolina A&T State University Greensboro, USA), Kourtney Tucker (North Carolina A&T State University Greensboro, USA), Issa W. AlHmoud (North Carolina A&T State University Greensboro, USA), and Balakrishna Gokaraju (North Carolina A&T State University Greensboro, USA)

Toward AI Standardization: A Triadic Human-AI Collaboration Framework for Multi-Level Autonomous Mobility 1568
Gaojian Huang (San Jose State University, USA), Wei-Hsiang Lo (San Jose State University, USA), Guannan Liu (San Jose State University, USA), Yue Luo (San Jose State University, USA), and Yantong Jin (San Jose State University, USA)

PCLane: Accurate Lane Localization with LiDAR and Abstract Data 1578
Aditya Mushyam (DLR), Oliver Boettcher (DLR), and Franz Andert (DLR)

Standardizing Scenario Annotations: A Comprehensive Mapping and Gap Analysis Across OpenSCENARIO, OpenODD, and OpenLABEL 1582
Hrishikesh Tawade (Ample Inc), Sai Charan Dekkata (North Carolina A\&T State University), Vamsidhar Reddy Kamanuru (University of California San Diego), Surendra Rathod (Fr Conceicao Rodrigues College of Engineering), and Santhosh Parimi (Independent Researcher)

AI Standards and QA for Chatbots

A First-Principle Based Risk Assessment Framework and the IEEE P3396 Standard 1588
Richard Jiarui Tong (IEEE Artificial Intelligence Standards Committee, USA), Marina Cortes (Institute of Astrophysics and Space Sciences, University of Lisbon, Portugal), Jeanine A. DeFalco (University of New Haven), Mark Underwood (IEEE P3396), and Janusz Zalewski (State Academy of Applied Sciences, Poland)

AI-Driven Mental Health Chatbot: Empowering Well-Being with Conversational AI and Retrieval-Augmented Generation 1596
Tayyba Haider (University of Engineering and Technology Lahore, Pakistan), Numan Shafi (University of Engineering and Technology Lahore, Pakistan), and Nazeef Ul Haq (University of Engineering and Technology Lahore, Pakistan)

IEEE AI Standards for Agentic Systems 1603
Richard Jiarui Tong (IEEE Artificial Intelligence Standards Committee, USA), Haoyang Li (IEEE P3428, China), Sridhar Raghavan (IEEE P3394, USA), Qingsong Wen (IEEE P3428, China), Shannon Gray (Gray Sky AI, Australia), Anand Paul (IEEE P3394, USA), Joleen Liang (IEEE P3428, China), Janusz Zalewski (State University of Applied Sciences, Poland), Yacheng Yang (Tsinghua University, China), George Tambouratzis (Athena Research Center, Greece), and Bong Chong Ang (Intel)

An Architectural Framework for Educational Knowledge Graphs for IEEE P2807.6 1610
Bin Xu (Tsinghua University, China), Richard Jiarui Tong (IEEE Artificial Intelligence Standards Committee), Yanyan Li (Beijing Normal University, China), Penghe Chen (Beijing Normal University, China), Hanming Li (Tsinghua University, China), Joleen Jing Liang (P2807.6), Fan Xing (Squirrel Ai Learning), and Jessie Tong (P2807.6)

Agentic AI with Chatops for Large Scale Network Operations 1617
Fatos Peci (University of Pristina), Enver Hamiti (University of Pristina), and Ishtiaq Khan (Equinix Inc)

Ensuring Trust and Security in AI-Powered Chatbots: A Framework for Standardization 1627
Sridharan Sankaran (Tata Consultancy Services)

GraphRAG Makes it Possible to Digest Convoluted Legal Jargons 1633
Joed Ngangmeni (Howard University) and Danda B. Rawat (Howard University)

AI Standards and QA for HealthCare and Life Science

Ensemble Learning-Based Seizure Classification with Quality Assurance and Regulatory Alignment in AI-Driven Healthcare 1639
Qaiser Khan (University of Oulu, Finland) and Pantea Keikhosrokiani (University of Oulu, Finland)

Leveraging Advanced Artificial Intelligence Paradigms for Proactive Prediction and Diagnostic Analysis of Alzheimer's Disease Pathogenesis 1649
Priyan Malarvizhi Kumar (University of North Texas, Denton,USA.), Abhignya Jagathpally (University of North Texas, Denton,USA.), Wael Korani (University of North Texas, Denton,USA.), and Prabhu kavin Balasubramanian (SRM Institute of Science and Technology TamilNadu, India)

Multinomial Classification Deep Learning Approach for Knee Osteoporosis 1656
Vinod Nithin K. Rachakonda (Clark University, USA), Jothsna Praveena Pendyala (Clark University, USA), Naveena Chatti (Clark University, USA), Sai Nithisha Marripelly (Clark University, USA), Ahmed ElSayed (University of Bridgeport), and Khald Aboalayon (Clark University, USA)

Deep Learning-Based CAD System for ECG Image Classification 1663
Kunal Malhan (Clark University, USA), Keerthana Goka (Clark University, USA), Khald Aboalayon (Clark University, USA), Ahmed ElSayed (University of Bridgeport, USA), Shail Jyala (Clark University), Shubhika Jain (Clark University, USA), and Prathamesh Kulkarni (Clark University, USA)

XGBoost-based Emotion Classification in Healthcare Using Electroencephalogram Signals 1670
Pranjali Gajbhiye (AI Research Centre, Department of Analytics, Woxsen University, Hyderabad 502345, India), Manjeet Rege (Department of Software Engineering and Data Science, University of St. Thomas, MN, USA), Shravani Wanjari (AI Research Centre, Department of Analytics, Woxsen University, Hyderabad 502345, India), Vineet Singh (AI Research Centre, Department of Analytics, Woxsen University, Hyderabad 502345, India), and Hemachandran K (AI Research Centre, Department of Analytics, Woxsen University, Hyderabad 502345, India)

Design Requirements for AI-Enabled Progressive Web Applications to Decrease Risk of Breast Cancer 1676
Jane Mugunghwa Kim (Georgia Institute of Technology, United States), Christopher J. MacLellan (Georgia Institute of Technology, United States), and Leandro Miletto Tonetto (Georgia Institute of Technology, United States)

PANDORA: An AI Model for the Automatic Extraction of Clinical Unstructured Data and Clinical Risk Score Implementation 1682
Daniel Jimenez (Arkangel AI), Natalia Castano-Villegas (Arkangel AI), Isabella Llano (Arkangel AI), Julian Martinez (Arkangel AI), Laura Ortiz (Arkangel AI), Laura Velasquez (Arkangel AI), and Jose Zea (Arkangel AI)

BioChk: A Regulation-Aligned Quality Assurance Framework for AI-Generated Biologics 1689
Tia Pope (North Carolina A&T State University) and Ahmad Patooghy (North Carolina A&T State University)

Author Index
