

# **2025 4th OPJU International Technology Conference (OTCON 2025) on Smart Computing for Innovation and Advancement in Industry 5.0**

**Raigarh, India  
9-11 April 2025**

**Pages 1-663**

**IEEE Catalog Number: CFP25Z28-POD  
ISBN: 979-8-3315-3537-7**

# TABLE OF CONTENTS

|                                                                                                                                    |    |
|------------------------------------------------------------------------------------------------------------------------------------|----|
| Machine Learning Approach for Credit Card Fraud Detection: A Comprehensive Analysis .....                                          | 1  |
| <i>Jagdish Chandra Patni, G. Sai Manoj, V. Vamisdhar, A. Aravind, S. Vasudeva Reddy, T. Venkata Jaswant, Pramod K Pandey</i>       |    |
| Blockchain Sharding Model to Rise the Efficiency of Luxury Product Trades Base on Blockchain Technology .....                      | 6  |
| <i>Inayatulloh</i>                                                                                                                 |    |
| Hybrid Blockchain Model to Improve Information Privacy Security and Transparency of Drug Sales Transactions .....                  | 11 |
| <i>Inayatulloh</i>                                                                                                                 |    |
| Effective Design of Load Frequency Controller for a Single Area System Using Sailfish Optimization Algorithm.....                  | 15 |
| <i>Shuhangi Sambariya, M. Lalwani, D. K. Sambariya</i>                                                                             |    |
| Improving Security and Preventing Cyber Attacks in Smart Device Networks .....                                                     | 23 |
| <i>Darshan Desai, Amit Nayak, Deep Kothadiya</i>                                                                                   |    |
| Email-Based Spam Detection Using Long Short-Term Memory .....                                                                      | 29 |
| <i>Ganpat Singh Chauhan, Ravi Nahta, Neeraj Garg</i>                                                                               |    |
| Automated Plagiarism Detection in Handwritten Documents Using Various Computer Vision Algorithms.....                              | 34 |
| <i>Sharine Helen Precilla P, Blessy Esther S, R. Mohan Das</i>                                                                     |    |
| Detecting and Preventing DoS/DDoS Attacks Through Monitoring and Limiting Malicious Traffic.....                                   | 41 |
| <i>Sneha Padhiar, Hetanshi Patel, Darshil Chocha</i>                                                                               |    |
| Hybrid Cloud-Edge Computing for Real-Time IoT-Based Health Monitoring: Performance Evaluation and Optimization .....               | 47 |
| <i>Gaurav Tuteja, Anmol Rattan Singh, G Sunilgoli</i>                                                                              |    |
| Hybrid Machine Learning Models for AI-Driven Anomaly Detection in WSN-IoT Networks: Challenges, Techniques, and Applications ..... | 53 |
| <i>Gaurav Tuteja, Anmol Rattan Singh, Bura Vijay Kumar</i>                                                                         |    |
| Anomaly Detection in IoT Networks Using Random Forest and the RT-IoT2022 Dataset.....                                              | 59 |
| <i>Gaurav Tuteja, Anmol Rattan Singh, Gotte Ranjith Kumar</i>                                                                      |    |
| BLDC Motor Performance in Cuk and Sheppard-Taylor Topologies.....                                                                  | 65 |
| <i>Santanu Mondal, Abhijit Dey, Sunam Saha, Madhurima Chattopadhyay</i>                                                            |    |
| Multimodal Methods for Chest Diseases: A Review and Analysis of Recent Technological Trends .....                                  | 70 |
| <i>Devid Kumar, Yogesh Kumar Gupta</i>                                                                                             |    |
| Anomaly Detection in IoT Networks Using MLP Classifier and RT-IoT2022 Dataset.....                                                 | 79 |
| <i>Gaurav Tuteja, Anmol Rattan Singh, Nagendar Yamsani</i>                                                                         |    |
| XGBoost-Based Anomaly Detection in IoT Networks Using the RT-IoT2022 Dataset.....                                                  | 85 |
| <i>Gaurav Tuteja, Anmol Rattan Singh, Gotte Ranjith Kumar, Mohhamied Husaein Fallaah</i>                                           |    |

|                                                                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Heart Disease Prediction Using Knowledge Graphs .....                                                                                                                                      | 91  |
| <i>P K Gupta, Samayamanthula Rohith Kumar, Chamarthi Jaswanth, Malem Dinesh, Golla Deepika</i>                                                                                             |     |
| Real-Time Traffic Management System Using YOLOv8: An Analysis of Various YOLO Models .....                                                                                                 | 97  |
| <i>Sumit Saklani, Shiv Ashish Dhondiyal, Devendra Singh</i>                                                                                                                                |     |
| Classifying Hair Textures: A Convolutional Neural Network and SVM-Based Model for Hairstyle Recognition .....                                                                              | 103 |
| <i>Gurpreet Singh, Jashanpreet Kaur, Kanegonda Ravi Chythanya, Saif Obayed, Gaurav Sharma</i>                                                                                              |     |
| Optimizing Market Making with MDPs.....                                                                                                                                                    | 109 |
| <i>Pramath Parashar</i>                                                                                                                                                                    |     |
| Design and Implementation of an Automatic Plant Watering Device with 2D Visual Gesture Recognition .....                                                                                   | 115 |
| <i>Pramath Parashar</i>                                                                                                                                                                    |     |
| Improving Intrusion Detection System Performance: Addressing Data Labeling and Imbalance Issues .....                                                                                      | 123 |
| <i>C. Siva Kumar, Nariboyina Sudeep Kumar, Mukthapuram Prasanthi, Reddem Sri Harshavardhan Reddy, Natarani Vishnu Vardhan</i>                                                              |     |
| Infertility Prediction Using Long Short-Term Memory Algorithm with PCOS Electronic Healthcare Data .....                                                                                   | 129 |
| <i>T. Sarath, K. Brindha</i>                                                                                                                                                               |     |
| Implementing Non-Invasive Mechanism for Epileptic Seizure Detection and Monitoring .....                                                                                                   | 136 |
| <i>Anmol Rattan Singh, Gurjinder Singh, Komuravelly Sudheer Kumar, Haeedir Mohameed</i>                                                                                                    |     |
| Recurrent Neural Networks and Gated Recurrent Units for Efficient Detection of ADHD .....                                                                                                  | 141 |
| <i>Anmol Rattan Singh, Gurjinder Singh, Pramod Kumar P, Srinivas Madhira</i>                                                                                                               |     |
| Monkeypox Detection Using Deep Learning: A Hybrid ResNet-50 and SegNet Approach.....                                                                                                       | 146 |
| <i>Saurabh Paul, Pardeep Singh, Namrata Kumari</i>                                                                                                                                         |     |
| Multi-Component Attention Graph Convolutional Network and Optimized Adaptive Multi-Scale Feature Extraction for Detecting Adverse Weather Conditions in Autonomous Electric Vehicles ..... | 151 |
| <i>K. P. Senthilkumar, E. Anbalagan</i>                                                                                                                                                    |     |
| Find Matching Faces Based on Face Parameters.....                                                                                                                                          | 159 |
| <i>Setu A. Bhatt, Harshadkumar B. Prajapati, Vipul K. Dabhi, Ankush Tyagi</i>                                                                                                              |     |
| Multi-Tenant Architecture: Enhancing Database Scalability with In-memory Database .....                                                                                                    | 165 |
| <i>Arpita Shah, Mrugendra Rahevar, Ronak R Patel, Deep Kothadiya</i>                                                                                                                       |     |
| Smart Computing for Communication: Real-Time Sign Language Translation for Educational Accessibility of Hard-of-Hearing Individuals .....                                                  | 169 |
| <i>Kanaga Suba Raja, S. Shanmugapriya, Thanisha K U, Siddharth B R</i>                                                                                                                     |     |
| An Efficient Malicious Activity Detection Model for Video Surveillance with Deep CNN Model Using Positional Inclination Features.....                                                      | 175 |
| <i>K. Lokesh, M. Baskar</i>                                                                                                                                                                |     |
| A Blockchain-Enhanced Authentication Framework for 6G-Enabled Internet of Vehicles.....                                                                                                    | 181 |
| <i>Swati Saha, Preeti Chandrakar</i>                                                                                                                                                       |     |

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Fine-Grained Parts-of-Speech Tagging for Hindi-Devanagari Script Based on Deep Learning.....                                                             | 189 |
