# TABLE OF CONTENTS

## VOLUME 1

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Advanced Rotor Technology for Effective, Power-Efficient Screening.....                                                                                    | 1   |
| <i>Steven Johnson, Cam Demler</i>                                                                                                                          |     |
| SB2/A-USP/Product Presentation .....                                                                                                                       | 6   |
| <i>Mohamed Warsame, John Crane</i>                                                                                                                         |     |
| Comparative Study of Different Hot-Pressing Techniques for Lignin-Containing Papers.....                                                                   | 13  |
| <i>Cherryleen Garcia-Lindgren, Tove Joelsson, Amanda Mattsson, Gunilla Pettersson</i>                                                                      |     |
| Leveraging Press Technology in the Design, "Greenfield" Construction, Expansion or Renovation<br>of Modern Paper Mills.....                                | 21  |
| <i>N/A</i>                                                                                                                                                 |     |
| Advanced Dryer Technology Improves Paper Production While Reducing CO2-Emissions.....                                                                      | 24  |
| <i>Peter Kayser</i>                                                                                                                                        |     |
| Compact Dryer Section Design for Enhanced Runnability and Drying Efficiency.....                                                                           | 31  |
| <i>Kirsi Peltola</i>                                                                                                                                       |     |
| Comparing Portable Contact Angle Goniometer Versus Lab-Style Research Goniometer for<br>Wettability and Surface Energy Results on Various Substrates ..... | 34  |
| <i>Paul Simutis</i>                                                                                                                                        |     |
| What Excellent Gearing and Gearbox Maintenance Looks Like .....                                                                                            | 45  |
| <i>Scott Franks</i>                                                                                                                                        |     |
| Building Better Systems: 5 Key Principles to Escape the Technology Trap and Create Stable<br>Processes .....                                               | 59  |
| <i>Richard Ermlick</i>                                                                                                                                     |     |
| Dissolution of Frozen Smelt in Recovery Boiler Dissolving Tanks .....                                                                                      | 62  |
| <i>Honghi Tran, Xiaosong Mao, Markus Bussmann</i>                                                                                                          |     |
| Talent Development, Safety and Best Practices Introduction.....                                                                                            | 72  |
| <i>Sarah Loner</i>                                                                                                                                         |     |
| Paper Mill Performance and "The Earplug Theory" .....                                                                                                      | 80  |
| <i>Douglas F. Sweet</i>                                                                                                                                    |     |
| Large-Scale Production of Cellulose Nanofibers .....                                                                                                       | 86  |
| <i>Evan E. Koslow, Andrew Lombardo</i>                                                                                                                     |     |
| Industrial Hemp as a Possible Replacement for NBSK Pulp .....                                                                                              | 96  |
| <i>Karthik Raghavan</i>                                                                                                                                    |     |
| Patent Review Part 2: Active Patents in the Paper Industry .....                                                                                           | 111 |
| <i>Gary Fugitt</i>                                                                                                                                         |     |
| The History of Paper Industry Patent Applications .....                                                                                                    | 127 |
| <i>Gary Fugitt</i>                                                                                                                                         |     |

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| Commercialization of Patented Technology .....                                                                            | 148 |
| <i>Nik Nikolic</i>                                                                                                        |     |
| Pulp & Paper Power-Up: From First Principles to AI Enhancing Mill Operations .....                                        | 156 |
| <i>Mariana Sandin</i>                                                                                                     |     |
| Using Advanced Analytics to Improve Manufacturing Performance .....                                                       | 164 |
| <i>David Zerr, Philip Pearce</i>                                                                                          |     |
| Advancing Tissue Converting: Smart Automation for Optimized Efficiency, Consistency, and<br>Reduced Operator Strain ..... | 172 |
| <i>Cory Schubring, Stefano Spinelli</i>                                                                                   |     |
| A Paperboard Supplier's Role in Creating a Sustainable Value Chain .....                                                  | 175 |
| <i>Nate Pajka</i>                                                                                                         |     |
| Enhancing Pulp, Paper, & Packaging Sustainability with Predictive Maintenance.....                                        | 183 |
| <i>Dustin Moore</i>                                                                                                       |     |
| A Practical Approach to Scope 3 Greenhouse Gas Management .....                                                           | 193 |
| <i>Anu Krishnan, Kathryn Connolly</i>                                                                                     |     |
| Yankee Doctor Operational Guidelines TAPPI TIP 0425-11 .....                                                              | 203 |
| <i>Mike Six</i>                                                                                                           |     |
| TIPs Much Appreciated – TAPPI TIP 0404-47 Paper Machine Performance Guidelines .....                                      | 211 |
| <i>Gareth Beattie</i>                                                                                                     |     |
| TAPPI TIP 0808-08 Tactile Evaluation of Softness of Tissue – An Overview of Panel Methods .....                           | 217 |
| <i>Jessica Carette</i>                                                                                                    |     |
| Influence of Base Sheet Properties on Barrier Coating Performance .....                                                   | 236 |
| <i>Dustin Burton, Alan Piwowar, Greg Welsch</i>                                                                           |     |
| Vacuum Assisted Coating of Cellulose Nanofibers onto a Porous Web .....                                                   | 252 |
| <i>Sandro Zier, Zechariah Hoeft, Caitlin Howell, Douglas Bousfield</i>                                                    |     |
| Barrier Properties of Lab and Semi-Pilot Coatings with Different CNF Formulations .....                                   | 257 |
| <i>Peter Rättö, Dimitar Valtakari, Rosana Moriana</i>                                                                     |     |
| Curtain Coating of CNF in Pilot Scale .....                                                                               | 267 |
| <i>Peter Rättö, Dimitar Valtakari, Andreas Fall</i>                                                                       |     |
