

# **13th European Symposium on Martensitic Transformation (ESOMAT 2024)**

Procedia Structural Integrity Volume 69

Lecco, Italy  
26-30 August 2024

**Editors:**

**Ausonio Tuissi  
Carmin Maletta**

ISBN: 979-8-3313-2342-4

**Printed from e-media with permission by:**

# TABLE OF CONTENTS

|                                                                                                                                                                                   |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Preface .....                                                                                                                                                                     | 1  |
| <i>Ausonio Tuissi, Carmine Maletta</i>                                                                                                                                            |    |
| Multiphysics Modeling of NiTi Shape Memory Alloy Fabricated by Laser Powder Bed Fusion using Computational Fluid Dynamics .....                                                   | 2  |
| <i>Mohammadjavad Abdollahzadeh, Mohammadreza Nematollahi, Hossein Abedi, Fatemeh Kordizadeh, Shiva Mohajerani, Mohammad Elahinia</i>                                              |    |
| Experimental Performance Evaluation of Shape Memory Alloy-Based Active Composites Under Aerodynamic Loading .....                                                                 | 20 |
| <i>Stefano Rodinò, Elio M. Curcio, Diego Perrone, Teresa Castiglione, Carmine Maletta</i>                                                                                         |    |
| Development of Ni <sub>3</sub> Ta-Based High Temperature Shape Memory Alloys.....                                                                                                 | 26 |
| <i>Alberto Coda, Jannis N. Lemke, Carlo A. Biffi, Jacopo Fiocchi, Ausonio Tuissi</i>                                                                                              |    |
| Development of a New Technological Scheme to Produce NiTi Seamless Tubes .....                                                                                                    | 35 |
| <i>Roman Karelin, Victor Kimarov, Vladimir Cherkasov, Vladimir Andreev, Vladimir Yusupov</i>                                                                                      |    |
| Enhancing the Functional Fatigue Properties of TiNbZrSn Biocompatible Shape Memory Alloy Through Femtosecond Laser Shock Peening .....                                            | 41 |
| <i>Muhammad Asim, Wael Abuzaid, Faisal Mustafa, Ali S. Alnaser</i>                                                                                                                |    |
| Effect of Beam Shaping in Laser Welding on the Microstructure and Transformation Temperatures of NiTiHf High-Temperature Shape Memory Alloy.....                                  | 47 |
| <i>C. A. Biffi, A. G. Demir, L. Caprio, J. Fiocchi, B. Previtali, A. Tuissi</i>                                                                                                   |    |
| Strain-Induced Martensite Formation During Punching of a Medium Manganese Advanced High-Strength Steel .....                                                                      | 53 |
| <i>Pekka Kantanen, Pekka Plosila, Vahid Javaheri, Tuomas Perkiö, Antti Kaijalainen</i>                                                                                            |    |
| Improvement of Mechanical Behaviour in B Doped Ni <sub>3</sub> Ta Based High Temperature Shape Memory Alloy .....                                                                 | 61 |
| <i>Carlo A. Biffi, Jacopo Fiocchi, Jannis N. Lemke, Alberto Coda, Ausonio Tuissi</i>                                                                                              |    |
| Carbon Redistribution in a Martensitic Medium Mn Steel During Heating to Intercritical Region: An In-Situ Synchrotron XRD Study.....                                              | 69 |
| <i>R. Surki Aliabad, S. Sadeghpour, P. Karjalainen, J. Kömi, H. Singh, V. Javaheri</i>                                                                                            |    |
| Deformation Behavior of NiTi Shape Memory Alloy Subjected to Severe Torsion Deformation .....                                                                                     | 76 |
| <i>Victor Komarov, Roman Karelin, Vladimir Cherkasov, Ivan Postnikov, Grzegorz Korpala, Irina Khmelevskaya, Vladimir Yusupov, Rudolf Kawalla, Ulrich Prahl, Sergey Prokoshkin</i> |    |
| Characterization of Vibration Damping in Nitinol Samples Manufactured Through Selective Laser Melting .....                                                                       | 80 |
| <i>Diego Scaccabarozzi, Carlo A. Biffi, Jacopo Fiocchi, Abdelrahman Mohamed, Ragab M. Ahmed, Marco G. Corti, Ausonio Tuissi, Bortolino Saggin</i>                                 |    |
| Dynamic Theory of Surface Martensite Formation, Allowing Also a General Scenario of Lateral Growth.....                                                                           | 89 |
| <i>Nadezhda M. Kashchenko, Mikhail P. Kashchenko</i>                                                                                                                              |    |
| Effect of Pearlite on Microstructures and Tensile Properties in Mn-Heterogeneous Steels .....                                                                                     | 97 |
| <i>Dezhen Yang, Youjing Zhang, Hao Zhang, Qi Chen, Xiaohui Wang, Zhiping Xiong</i>                                                                                                |    |

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Effect of Partitioning Time and Silicon Content on Retained Austenite Stability in Medium-Carbon<br>Advanced High-Strength Steels.....                     | 105 |
| <i>Zeynab Aalipour, Sumit Ghosh, Jukka Kömi, Vahid Javaheri</i>                                                                                            |     |
| Effect of Solid-Solution Temperature on the Microstructure and Mechanical Properties in Low-<br>Cobalt Secondary Hardening Ultra-High Strength Steel ..... | 113 |
| <i>Haofei Zhu, Zhiping Xiong, Jianwen Mao, Xingwang Cheng</i>                                                                                              |     |
| Laser Shape Setting Feasibility for Promoting Shape Memory Effect in Thin Ti rich-NiTi Wires .....                                                         | 121 |
| <i>Carlo A. Biffi, Gloria Ischia, Stefano Gialanella, Ausonio Tuissi</i>                                                                                   |     |
