# TABLE OF CONTENTS

|                                                                                                                                                     |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Vision-Aided Inertial-Based Simultaneous Indoor Fall Prediction and Localization .....                                                              | 1  |
| <i>Jingjing Yan, Craig Hancock, Anahid Basiri</i>                                                                                                   |    |
| A Fast and Real-Time Digital Method to Sense Fault Conditions in Resonant-Based MEMS Systems.....                                                   | 7  |
| <i>Raffaele Enrico Furceri, Marco Zamprogno</i>                                                                                                     |    |
| Marine Radar CFAR Target Detection in Sea Clutter Dynamic Distribution Based on Superpixel Segmentation .....                                       | 12 |
| <i>Bowen Zhou, Zhizhong Lu, Yongfeng Mao, Baotian Wen</i>                                                                                           |    |
| Predicting Pulmonary Function from Chest X-Rays Using Deep Learning: A DenseNet Approach to Estimating FEV1/FVC Z-Scores .....                      | 18 |
| <i>Somin Mindy Lee, Mohamed Abdalla, Bita Behrouzi, Soyoung Lee, Po-Chih Kuo, Han-Jay Shu, Kenneth Patrick Seastedt, Leo Anthony Celi, Ben Fine</i> |    |
| Data-Driven Dynamics Modeling of a 9-Degree-of-Freedom Rehabilitation Robot Based on the Koopman Operator .....                                     | 24 |
| <i>Junyu Wu, Yubin Liu, Zhuoqi Man, Zeyu Sun, Xiaofan Yang, Xuanming Cao</i>                                                                        |    |
| A Data-Driven Accuracy Estimation Method for Calibration Devices on an Automatic Verification Assembly Line for Smart Meters.....                   | 29 |
| <i>Zemin Qu, Yang Jiao, Hongbin Li, Gai Jiang, Hang Yang, Ziqin Gao</i>                                                                             |    |
| MGCCDCNet: A Multisensor Fusion Network with Delay Compensation for Component-Level Fault Diagnosis.....                                            | 35 |
| <i>Yuhan Huang, Xiaoxi Hu, Jingming Cao, Fei Chen</i>                                                                                               |    |
| Deep Learning Supported Length Measurement Algorithm of Seals from Drone Images .....                                                               | 41 |
| <i>Michael Harslem, Felix Zilske, Leif Ole Harders, Stephan Hussmann, Marc Schnurawa, Anna Kersten</i>                                              |    |
| Enhancing Efficiency Prediction Accuracy in PEM Fuel Cell Hybrid Systems Using AI .....                                                             | 47 |
| <i>Virginia Negri, Livio D'Alvia, Alessandro Mingotti</i>                                                                                           |    |
| Estimation of DOA of Low-Altitude Moving Source Using 1D-CNN Based on a Single 3-Axis Geophone .....                                                | 53 |
| <i>Xin Wang, Pengxiao Teng, Tao Jiang, Jun Lv, Wei Cheng</i>                                                                                        |    |
| ECG and EEG Analysis of Brain-Heart Interactions During Seizure Episodes .....                                                                      | 59 |
| <i>Yasir Hussain, Amna Ramzan, Aamir Saeed Malik</i>                                                                                                |    |
| Real-Time Estimation of Space Magnetic Field for Magnetocardiographic Devices.....                                                                  | 65 |
| <i>Shengjie Qiu, Jiqiang Tang, Kun Liu, Lu Zhang</i>                                                                                                |    |
| Microcrack Detection in Nickel-Based Superalloy GH4169 Using Eddy Current-TMR Testing .....                                                         | 70 |
| <i>Zhaoyuan Xu, Jianbo Wu, Erlong Li, Zhe Wang, Jian Tang, Yuanhong Tao</i>                                                                         |    |
| Analytical Modeling of Eddy Current Testing for Asymmetric Cylinders and Estimation of Radii and Electromagnetic Properties .....                   | 76 |
| <i>Saibo She, Xun Zou, Kuohai Yu, Xinnan Zheng, Zhijie Zhang, Wuliang Yin</i>                                                                       |    |

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Tilt Effects in Pulsed Eddy Current Measurements.....                                                                                              | 82  |
| <i>Kuohai Yu, Rui Guo, Saibo She, Lei Xiong, Xinnan Zheng, Xun Zou, Wuliang Yin</i>                                                                |     |
| Electrical Resistance Tomography for the Investigation of Memristive Nanowire Networks.....                                                        | 87  |
| <i>Alessandro Cultrera, Gianluca Milano, Carlo Ricciardi, Luca Callegaro</i>                                                                       |     |
| Gas Component Strategy and Signal Graph Attention Network for Enhanced Gas Concentration Estimation.....                                           | 91  |
| <i>Ding Wang, Xin Huang, Haiyan Wang, Huilin Yin, Lei Wang, Yuan Gao</i>                                                                           |     |
| On the False Notion of Misclassification Probability as Uncertainty in Machine Learning-Assisted Measurements.....                                 | 97  |
| <i>Fan Wang, Shervin Shirmohammadi, Cheng-Hsin Hsu</i>                                                                                             |     |
| Establishment Point-Of-care Device for Real-time Detection Creatinine of Acute Ischemic Stroke Patients .....                                      | 102 |
| <i>Rui-Cian Weng, Shih-Jye Chou, Yen-Pei Lu, Cheng-Fang Ho, Chi-Hung Hwang</i>                                                                     |     |
| NFS2ECG: Estimation of Electrocardiogram Signal Waveforms from Near-Field Sensing on Chest Wall .....                                              | 108 |
| <i>Shun Hinatsu, Saki Wada</i>                                                                                                                     |     |
| ECT Sensor with Unique Structure for Robot Gripper Application .....                                                                               | 114 |
| <i>Yang Hu, Ruixiang Deng, Haozheng Bai, Wuqiang Yang</i>                                                                                          |     |
| Multi-Element and Multi-organ Heavy Metal Measurements Using ICP-MS - a Contribution to Reference Value Generation in Human Tissues.....           | 120 |
| <i>Heidi Fleischer, Sybille Horn, Jan Jordan Bruckhaus, Annett Klinder, Christoph Lutter, Wolfram Mittelmeier, Andreas Büttner, Kerstin Thurow</i> |     |
| Cellular Signals-Of-Opportunity for RF Propagation Measurements with SDRs .....                                                                    | 126 |
| <i>Max Hollingsworth, Prasanth Prahladan, Michael G. Cotton, Dirk Grunwald</i>                                                                     |     |
| Zero-Shot Learning Model with Dynamic and Static Feature Fusion for Industrial Gas-liquid Two-phase Flow State Identification .....                | 132 |
| <i>Xinyi Han, Linghan Li, Shumei Zhang, Feng Dong, Feng Dong</i>                                                                                   |     |
| Attribute Causality-Guided State Monitoring Model for Oil-gas-water Three-phase Flow Processes.....                                                | 138 |
| <i>Xinyi Wang, Linghan Li, Feng Dong, Feng Dong</i>                                                                                                |     |
| Black-Box Conformity Tests on Regulated Measuring Instruments: A Machine Learning Approach .....                                                   | 144 |
| <i>Levin Chee Xian Ho, Marko Esche, Martin Nischwitz, Sabine Glesner</i>                                                                           |     |
| Deep Machine Learning for Identifying Time-Series Functions of Regulated Measuring Instruments .....                                               | 150 |
| <i>Levin Chee Xian Ho, Marko Esche, Martin Nischwitz, Manuel Maue, Sabine Glesner</i>                                                              |     |
| Extending Self-Mix Interferometer Measurements to the Range of Several Tens to Hundred Meters.....                                                 | 156 |
| <i>Alfred Albert, Silvano Donati, San-Liang Lee</i>                                                                                                |     |
| A Distributed Emulation Environment for In-Memory Computing Systems .....                                                                          | 160 |
| <i>Eleni Bougioukou, Anastasios Petropoulos, Nikolaos Toulgaridis, Theodoros Chatzimichail, Theodore Antonakopoulos</i>                            |     |
| Study on the Radiation Field Directivity of PPM-EMAT by FE Simulation and Theoretical Calculation.....                                             | 166 |
| <i>Xiaofei Huang, Yuedong Xie, Fulu Liu, Jiyao Li, Huiyuan Kong, Lijun Xu</i>                                                                      |     |

|                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Optomechatronic Tool Wear Sensor Positioning with Increased Repeatability .....                                                                         | 171 |
| <i>Jiuzhou Xiang, Dirk Stobener, Andreas Fischer, Sabrina Stemmer, Jens Sölter, Bernhard Karpuschewski</i>                                              |     |
| Capture of Dynamic Propagation of Switching Mechanical Waves in IGBT Modules Using Laser Interferometric Vibrometer .....                               | 176 |
| <i>Jiahao Wang, Cong Chen, Libing Bai, Chaoyue Song, Yuxin Luo, Yuhua Cheng</i>                                                                         |     |
| Uncertainty-Driven Data Augmentation for Improved Load Time Series Forecasting .....                                                                    | 181 |
| <i>Virginia Negri, Simone Mari, Alessandro Mingotti, Fabrizio Ciacetta, Roberto Tinarelli, Lorenzo Peretto</i>                                          |     |
| An Encoder-Decoder LSTM Network for Load Forecasting in Building Power Systems .....                                                                    | 187 |
| <i>Simone Mari, Patricio G. Donato, Álvaro Hernández, Edoardo Fiorucci</i>                                                                              |     |
| Material Recognition with Capacitive Tactile Sensor and Robotic Arm .....                                                                               | 193 |
| <i>Ruixiang Deng, Yang Hu, Haozheng Bai, Wuqiang Yang</i>                                                                                               |     |
| Analysis of the Motion-Induced Eddy Current Effect in High-speed EMAT Testing .....                                                                     | 199 |
| <i>Yiru Xiao, Yini Song, Kai Wang, Jun Tu, Yihua Kang, Bo Feng</i>                                                                                      |     |
| Enhanced Disbond Detection in CFRP Joints Using Autoencoders for Guided Wave Signal .....                                                               | 205 |
| <i>Mohsen Barzegar, Sahar Moradi Cherati, Muchao Zhang, Dario J. Pasadas, Artur L. Ribeiro, Helena G. Ramos</i>                                         |     |
| Metrological Characterization of a Jump Height Measurement Procedure Based on Inertial Sensors .....                                                    | 211 |
| <i>Luna Panni, Gloria Cosoli, Marco Arnesano, Lorenzo Scalise</i>                                                                                       |     |
| Magnetic Field Adjustment Method for Magnetic Shielding Room Based on Demagnetization .....                                                             | 217 |
