# TABLE OF CONTENTS

## **EMI ANALYSES AND PREDICTIONS (I)**

|                                                                                                                  |    |
|------------------------------------------------------------------------------------------------------------------|----|
| EMC System Modeler Software-Research, Validation and Space Applications .....                                    | 1  |
| <i>Paul G. Bremner, Dawn H. Trout, Gabriel Vazquez, Weitao Dai, Arielle Frank</i>                                |    |
| Low Frequency Modelling Capability for Antenna Positioning and Radiofrequency Compatibility<br>on Aircraft ..... | 7  |
| <i>Alexandre Piche, Toufic Abboud, Benoit Chaigne</i>                                                            |    |
| Shielded Cable Unified MTL Model Applications .....                                                              | 11 |
| <i>Junqua Isabelle, Parmantier Jean-Philippe, Bertuol Solange, Ridel Michael</i>                                 |    |
| Post-Launch System Level Interference Modelling Method for JUICE Spacecraft .....                                | 16 |
| <i>Zoltan Kiss, Marc Pous, Sven Landstroem, Sam Verstaen, Salvador Mercader-Pellicer</i>                         |    |

## **MEASUREMENT TECHNIQUES AND TEST METHODS (I)**

|                                                                                           |    |
|-------------------------------------------------------------------------------------------|----|
| Time-Varying Radiated Emissions Testing of SmallSats and Payloads Using a VIRC .....      | 22 |
| <i>Marc Pous, Ramiro Serra, Dongsheng Zhao</i>                                            |    |
| Emission Measurement for Electric Propulsion in a Vacuum Tank Reverberation Chamber ..... | 28 |
| <i>Sebastian Weixler, Marc Pous</i>                                                       |    |
| Analysis of the Field Homogeneity and Isotropy in a Tent-Like Reverberation Chamber ..... | 34 |
| <i>Mathias Magdowski, Sebastian Wessels, Ralf Vick</i>                                    |    |

## **MAGNETIC CLEANLINESS (I)**

|                                                                                                                                                    |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Mathematical Model for Magnetorquer DC H-Field Prediction for Spacecraft Avionic Units<br>Positioning .....                                        | 40 |
| <i>Pedro Assuncao, Salvatore Sagnelli, Riccardo Pelle</i>                                                                                          |    |
| The On-Site DC Magnetic Survey of the SXI Telescope for SMILE Project .....                                                                        | 44 |
| <i>Dongsheng Zhao, Jakub Zlámál, Andy Cheney, Walfried Raab, Chris Runciman</i>                                                                    |    |
| Magnetic Cleanliness and Measurements for the Comet-I Mission .....                                                                                | 49 |
| <i>D. Morfei, David Hercik, Hans-Ulrich Auster, G. Viscillo, D. Giuliani, V. Iacovone, Francesco Ratti, Jorge Fernandez de Toro, Johannes Wolf</i> |    |

## **EMC CONTROL, DESIGN, MANAGEMENT AND STANDARDIZATION (I)**

|                                                                                                                                                                             |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Electromagnetic Interferences of Electric Faults in an Aircraft's Power Train .....                                                                                         | 55 |
| <i>Ing Robert Kebel, Felix Rüting, Ing Hoang Duc Pham</i>                                                                                                                   |    |
| PWM Signal Prediction for Broadband Active CM EMI Suppression of a GaN Motor Inverter with<br>Adaptive FIR Filters .....                                                    | 61 |
| <i>Jens Aigner, Julius Mennemeier, Maximilian Lemke, Tobias Dörlemann, Stephan Frei,<br/>Gregory Almeida, Sébastien Serpaud, Richard Perraud, Davin Guedon, Léa Pommier</i> |    |

## **POSTER PRESENTATIONS (I)**

|                                                                                                                                                                                                                                                                |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Automatic System Using LabVIEW for Testing and Locating Lightning Damage in Aircraft Composites .....                                                                                                                                                          | 67  |
| <i>Ngoc Nam Pham, Jan Leuchter, Erik Blasch</i>                                                                                                                                                                                                                |     |
| Application of a Passive Differential Probe for Safe and Reliable CS101 Testing .....                                                                                                                                                                          | 73  |
| <i>Erdem Akpınar, Soydan Çakır, Ali Karaalı, Osman Özgür Gürşahbaz</i>                                                                                                                                                                                         |     |
| Time Domain Measurement of Magnetic Field Shielding of Planar Materials .....                                                                                                                                                                                  | 77  |
| <i>Julio C. Parra, Lirim Koraqi, Davy Pissort, Mireya Fernandez-Chimeno, Frank Leferink, Marco A. Azpúrua</i>                                                                                                                                                  |     |
| Shielding Effectiveness Characterisation in Time Domain .....                                                                                                                                                                                                  | 82  |
| <i>Rafael R. Nunes, Marc Pous, Dongsheng Zhao</i>                                                                                                                                                                                                              |     |
| Biomass – a Custom Designed Simulated Boom for EMC Auto-Compatibility Tests .....                                                                                                                                                                              | 87  |
| <i>Dilan Sikotra, Rémi Bergé, Benoit Herbert, Maxsim Pudney, Trevor Deacon</i>                                                                                                                                                                                 |     |
| Characterisation of Magnetic Sensors for Space Applications .....                                                                                                                                                                                              | 91  |
| <i>Adam Wilson, Stuart Harmon, Graeme Finch, Connie Pallister</i>                                                                                                                                                                                              |     |
| Enhanced Attenuation and Bandwidth of Electromagnetic Absorbers Through Monte Carlo Optimization of Resonant Periodic Metastructures .....                                                                                                                     | 96  |
| <i>Steven Ugo Mamolo, Dandan Zhang, Kanat Anurakparadorn, Eric Michielssen, Alan I. Taub</i>                                                                                                                                                                   |     |
| Validation of Low Frequency AC Magnetic Field Modelling Tool for System Pre-Verification.....                                                                                                                                                                  | 102 |
| <i>Marco Nicoletto, Ilario Marziali, Sotirios T. Spantideas, Athanasios Kotsaras, Stelios Tsatalas</i>                                                                                                                                                         |     |
| Magnetic Cleanliness of the Psyche Spacecraft .....                                                                                                                                                                                                            | 108 |
| <i>Jodie B. Ream, Benjamin P. Weiss, Rona Oran, Matthew B. Wall, Katherine Dang, Pablo Narvaez, Kyle Cloutier, Carol A. Polanskey, Carol A. Raymond, Noah Warner, José M. G. Merayo, Christopher T. Russell, Manuel Martin Soriano, Linda T. Elkins-Tanton</i> |     |
| Improved Verification Method with Reference Sources and Software-Based Level Comparison for Emission Testing .....                                                                                                                                             | 114 |
| <i>Soydan Çakır, Erdem Akpınar, Ali Karaalı, Osman Özgür Gürşahbaz</i>                                                                                                                                                                                         |     |

## **MEASUREMENT TECHNIQUES AND TEST METHODS (II)**

|                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------|-----|
| Efficient Low-Cost Time Domain Calibration and Validation of Aerospace LISNs .....                       | 120 |
| <i>Jordi Solé-Lloveras, Marc García-Bermúdez, David Sánchez-Muñoz, Albert Sumalla, Marco A. Azpúrua</i>  |     |
| Radiated Emission Measurements in Close Proximity to the Noise Floor .....                               | 126 |
| <i>María Jiménez Lorenzo, Jens Medler</i>                                                                |     |
| Experimental Evaluation of the Quality of Aircraft Composites with Respect to Lightning Protection ..... | 132 |
| <i>Jan Leuchter, Ngoc Nam Pham, Erik Blasch, Martin Honig, Jan Vaclavik, Michal Krbal</i>                |     |

## **MAGNETIC CLEANLINESS (II)**

|                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| Integral Methodology for the Determination of the Magnetic Momentum of the JUICE's Power Control and Distribution Unit.....          | 138 |
| <i>Marina Díaz Michelena, Miguel Ángel Rivero Rodríguez, Sergio Fernández Romero, Pablo López Cenamor, José María Martínez Cerdá</i> |     |
| ADAM – a Newly Commissioned Magnetic Test Facility for LISA and Future Missions .....                                                | 143 |
| <i>Stefan Engelke, Maxim Pudney, Christian Trenkel, Klaus Bubeck, Laurent Trounoux, Jörg Lange</i>                                   |     |
| Rejection of Ambient Disturbances in Magnetic Verification Tests of the JUICE Spacecraft.....                                        | 149 |
| <i>Stefan Engelke, Maxim Pudney, Christian Trenkel, Klaus Bubeck, Manuela Baroni, Laurent Trounoux, Zoltan Kiss, Jörg Lange</i>      |     |

## **EM ENVIRONMENT AND EMI EFFECTS (I)**

|                                                                                                                                            |     |
