

11th International Operational Modal Analysis Conference (IOMAC 2025)

Rennes, France
20-23 May 2025

Editors:

**Michael Döhler
Adrien Mélot
Manuel Aenlle López**

ISBN: 979-8-3313-2352-3

Table of contents

S1 - Diagnosis of rotating machinery	1
Incipient gear fault detection under varying operating speed and load via Multiple Model vibration time series methods Dimitrios M. Bourdalos, Xenofon D. Konstantinou, John S. Sakellariou, Spilios D. Fassois	1
Model Updating of Rotating Wind Turbines Using Operational Modal Analysis and Floquet Mode Decomposition Nina Delette, Enora Denimal Goy, Jean-Lou Pfister, Laurent Mevel, Reda El Amri	9
Harmonic removal for Automated Operational Modal Analysis of coupled rotor foundation system influenced by magnetic bearings and gas seals Nathali Dreher, Mona Amer, Tiago Machado	17
Assessment of harmonic suppression methods within OMA of an axial piston pump under constant speed Vijayasankar Irissappane, Christian Svendsen, Luis David Avendaño-Valencia . .	29
S2 - Monitoring for railway infrastructure: technologies and methods	39
Modal analysis of road and rail bridges for damage detection and resonance prediction Lutz Auersch, Samir Said, Rolf Rohrmann	39
Suitability of MEMS accelerometers for continuous monitoring of railway bridges – a case study Chanalisa Salvi, Carlos Moutinho, Sérgio Pereira, Elsa Caetano	47
Ambient vibration testing results to estimate the predominant periods of soil motion and the shear wave velocity profile in an anthropic soil zone associated with the Mexico City METRO, Jorge A. Avila, Roberto Duran, Jorge A. Avila Haro	55
S3 - Advances in modal analysis for aeronautical and space systems	63
Dynamic Characterization of a Flexible Wing Model Using Stochastic Modal Appropriation for Nonlinear Aeroelastic Analysis Daniele Antonini, Gianpietro Fronteddu, Roberto Giovanni Sbarra, Ludovica Onofri, Giuliano Coppotelli, Maher Abdelgani	63
Fast and relaxed vector fitting: an application to a fighter jet aircraft Marco Civera, Gabriele Dessena, Bernardino Chiaia	74
Modal parameter extraction via the Loewner Framework: Current progress and future directions Gabriele Dessena, Marco Civera	81

Application of gyroscopes for stability monitoring in flutter tests Martin Tang, Keith Soal, Marc Böswald, Yves Govers	92
S4 - Dynamic identification and long-term modal-based monitoring of bridges	99
Long-term operational modal analysis of a steel-concrete composite bridge Ana Avramova, and Carmelo Gentile	99
Experimental Damping Identification of a Bridge Case Study in Norway under Still Air Conditions Marco M. Rosso, Marco Civera, Gabriele Dessena, Bernardino Chiaia, Giuseppe C. Marano	107
System identification and model calibration of a steel road bridge Falk Hille, Ronald Schneider, Patrick Simon, Ralf Herrmann, and Matthias Baeßler	114
A multi-scenario approach for structural health monitoring of existing bridges Laura Ierimonti, Agnese Natali, Giuseppe Chellini, Michele Morici, Laura Gioiella, Enrique García-Macías, Andrea Dall'Asta, Filippo Ubertini, Walter Salvatore . .	122
A design map for a structural health monitoring system based on redundancy of autocovariance functions Jyrki Kullaa	130
Wavelet-Based Damage Sensitive Features Extraction for Structural Health Mon- itoring of Bridges Luigi Severa, Silvia Milana, Nicola Roveri, Eleonora Maria Tronci, Antonio Culla, Antonio Carcaterra	138
Examining environmental influences on natural frequencies with the help of local distance correlation Carina Beering	146
Addressing Mode-Mixing Challenges in Structural Health Monitoring: Numerical and experimental validation Lakhadive Mehulkumar Rajkumar, Anshu Sharma, Basuraj Bhowmik	153
Operational modal analysis of two similar multi-span bridges Ana Avramova, Paolo Borlenghi, Carmelo Gentile	161
Finite element model refinement of a reinforced concrete highway arch bridge based on Operational Modal Analysis Ilenia Rosati, Edwin Reynders, Marco Di Ludovico, Carlo Rainieri	169
S5 - Optical methods for structural identification and monitoring	177
Advancements in structural dynamics characterization: the role of Video Motion Magnification in full-field Operational Deflection Shape characterization Francesco Cosco, Davide Mastrodicasa, Emilio Di Lorenzo, Domenico Mundo . .	177
Frequency-domain Triangulation for Single-Camera Sound Radiation Measure- ment Domen Gorjup, Sofia Baldini, Gianluca Guernieri, Paolo Gardonio, Janko Slavič, and Roberto Rinaldo	185
Vibration analysis of a car door using randomly sampled stereo camera measure- ments with a large stereo angle Yonggang Wang, Thijs Willems, Nathan Dwek, Matteo Krichner, Frank Naets .	192

Multi-target computer-vision dynamic monitoring of displacements in a full-scale building	
Laura Gioiella, Fabio Micozzi, Morgan McBain, Michele Morici, Alessandro Zona, Andrea Dall'Asta, Barbara G. Simpson, Andre R. Barbosa	200
Mode-shape magnification in high-speed camera measurements	
Krištof Čufar, and Janko Slavič, Miha Boltežar	208
Optimal sensor placement of FBGs based on the effective independence method for OMA of a Vierendeel truss bridge	
Dimitrios Anastasopoulos, Eleni N. Chatzi, Geert Lombaert, Edwin P. B. Reynders	216
Post-processing of fiber optic sensors data with consideration of strain transfer for distributed strain measurements	
Mira Kabbara, Xavier Chapeleau, Qinghua Zhang, Frédéric Bourquin	225
Modal shape reconstruction with distributed fiber optic strain sensing	
Nicolas Aubert, Vincent Baumann, Aghiad Khadour	233
S6 - OMA for digital twins	241
Cable tensioning during retrofitting of a suspension bridge: a case study on the use of updated nonlinear models	
Santiago Bertero, Agustin Bertero, Raúl Bertero	241
Combined Geometrical and Modal Model Calibration via Reality Capture and Geometrical Modal Analysis: Application to a Steel Building	
Yunus Kantekin, Rodrigo Sarlo	250
Integrated structural condition assessment of an ancient Mayan Temple	
C. E. Ventura, T. Nunez, M. Motamedi, V.C. Hernandez, S. R. Hernandez, D. Bautista	260
Efficient system identification, model updating, and virtual sensing in the Digital-Twin-as-a-Service software platform	
Dmitri Tcherniak, Prasad Talasila, Martin Dalgaard Ulriksen, Giuseppe Abbiati, Swarup Mahato, Anders Malund Dammark Jensen	271
S7 - Bayesian approaches for engineering dynamics	280
Improving Bayesian filters for structural health monitoring applications with subspace-based noise covariance estimates	
Neha Aswal, Szymon Greś, Laurent Mevel, Qinghua Zhang	280
A Gibbs sampler for removing environmental effects in structural health monitoring features	
Max D. Champneys, Tim J. Rogers, Elizabeth J. Cross, Keith Worden	288
Probabilistic Damage Detection in a Post-Tensioned Concrete Bridge Using Bayesian Neural Networks for Continuous Model Updating: a Numerical Study	
Francesco Mariani, Laura Ierimonti, Filippo Ubertini, Ilaria Venanzi	296
Exploring physically meaningful prior distributions for OMA	
Brandon J. O'Connell, Timothy J. Rogers	304
Probabilistic Super-Resolution for High-Fidelity Physical System Simulations with Uncertainty Quantification	
Pengyu Zhang, Connor Duffin, Alex Glyn-Davies, Arnaud Vadeboncoeur, Mark Girolami	312

S8 - Modeling and computational methods for physical model-based identification	320
Design optimisation of lightweight aerospace structures for vibration fatigue Stefan Anderson, Jonathan Cooper, Fabrizio Scarpa, Brano Titurus	320
Wave-based modelling of arbitrarily complex periodic waveguides with nonlinear boundaries Vincent Mahé, Adrien Mélot, Benjamin Chouvion, Christophe Droz	331
An efficient neural network-based surrogate model for predicting static gear contact conditions Valentin Mouton, Adrien Mélot, Emmanuel Rigaud, Joël Perret-Liaudet	339
Computational methods for whirl flutter analysis Charles Jacquet, Camille Denoël, Loïc Salles	340
Detection of Stall Induced Vibrations in Standstill Wind Turbines Chandramouli Santhanam, Torben Knudsen, David John Laino	351
Subspace-based wavenumber identification in periodic waveguides adapted to full-field vibration measurements Alvaro Gavilán Rojas, Qinghua Zhang, Olivier Robin, Christophe Droz	360
1D-CAE model building and simulation based on modal parameter identification of Electrical-Mechanical coupling system Soichiro Takata	367
S9 - Physics-enhanced learning for structural health monitoring tasks	375
Physics-aware neural network integrated with stochastic subspace identification for quantification of physical changes Nikhil Mahar, Nikesh Yadav, Gajendra Yadav, Subhamoy Sen, Laurent Mevel . .	375
Application of pseudo-anomaly generation in unsupervised fault diagnosis of wind turbine bearings under changing operating conditions Magnus Munk Jensen, Szymon Greś, Rafał Wiśniewski, Dorte Hammershøi . . .	383
Feasibility study of utilising modal-based features for finite element model-informed artificial neural network-based damage identification Bing Zhen Cheah, Zhi Chao Ong, Shin Yee Khoo, Pei Yi Siow, Zainah Ibrahim, Chee Ghuan Tan	392
Damage Identification in Rotary Shafts via Vibration Monitoring and Physics-Informed Neural Networks Vasiliki Panagiotopoulou, Konstantinos Vlachas, Marco Giglio, Claudio Sbaruffatti, Eleni Chatzi	400
Robustness vs. effectiveness of transfer learning in damage identification depending on feature selection Andrea Venturi, Daniele Dessi, Giuseppe Ruta	408
Stochastic modal analysis of pipe wall thinning structure based on Generative Adversarial Net (GAN) associated with interfacial roughness model Banri Yamamoto, Soichiro Takata	417
S10 - Vibration-based assessment and monitoring for wind energy structures	425
First steps towards the development of structural health monitoring approaches for wind turbines in seismic-prone areas Mona Amer, Tomás Núñez, Carlos E. Ventura	425

Identification and long-term tracking of modal parameters of a 150m wind measurement mast using ambient excitation Kevin Gnebner, Yves Govers, Julian Sinske, Ralf Buchbach, Philipp Kober, Giulia Jelacic	434
Reliable damping ratio estimates from a 50m+ wind turbine rotor blade as a guide for prototype testing in the low frequency regime Yves Govers, Kevin Gnebner, Philipp Kober, Giulia Jelacic	445
Analysis of the aerodynamic damping in the modal parameter estimation of wind turbines Javier Ibarrola Chamizo, Iñigo Vilella, Gorka Gainza, Miroslav Zivanovic, Aitor Plaza, Xabier Iriarte, Alfonso Carlosena	455
Measuring displacements and vibration frequencies of wind towers by means of a ground-based radar interferometer Giovanni Nico, Olimpia Masci	463
Finite element model updating of a small-scale wind turbine blade using strain-based pull-and-release test data Silvia Vettori, André Tavares, Mirco Giorgi, Emilio Di Lorenzo, Giuliano Coppotelli	471
S11 - Bayesian filters for identification and infrastructure monitoring	479
Compensating Low Instrumentation for Mode Shape Estimation in Bayesian Filtering with Time-Delayed Data Embedding Ananay Thakur, Shereena O A, Subhamoy Sen, and Laurent Mevel	479
A comparison of subspace-based and maximum likelihood noise covariance estimation within Kalman filtering for virtual sensing applications Andriana Georgantopoulou, Szymon Greś, Luis David Avendaño-Valencia	487
A novel lagged estimation framework for sparsely observed systems supplemented with virtual measurements sampled in delayed time Shereena O A , Subhamoy Sen, Laurent Mevel	495
Identifiability Analysis of the Input Excitation of two Mechanical Systems using the Lie-derivative and the Empirical Gramian Method Mathias Thing, Giuseppe Abbiati	503
Subspace System Identification with Unknown Disturbance Rejection Qinghua Zhang	511
Advanced signal processing methods	519
Using Scanning Laser Doppler Vibrometry for Experimental Frequency-based Substructuring Marie Brøns	519
Definition of a single axis excitation set-up for a multi-axial random fatigue assessments Luca Campello, Raffalla Sesana, Vivien Denis, Cristiana Delprete, Roger Serra .	528
A Deep Learning Model for Cross-Building Seismic Response Sequence Reconstruction Hongyu Huang, Yuxin Pan, Teng Li	536

Analysis of brake squeal using the Harmonic Balance Vector (HBV) signal model: dependence of squeal frequency, fundamental and harmonic shapes on operational parameters Guillaume Martin, Etienne Balmes, Guilherme Malacrida Alves, Guillaume Ver- mot des Roches	544
Civil structures applications	553
Evaluation of a low-cost instrument for ambient vibration testing of concrete gravity dams Michael Dupuis	553
Vibration and Modal Analysis of the Roman Wall of Lugo Manuel Aenlle López, Natalia García Fernández, Pelayo Fernández, José Ignacio López Rego Uriarte	561
Vibration based early scour detection for multi-pier bridges Solaine Hachem, Frédéric Bourquin, Dominique Siegert	570
Damage detection	579
Proportional flexibility matrices using modal parameters estimated with operational modal analysis Manuel Aenlle, Natalia García Fernández, Pelayo Fernández	579
Structural damage detection on a full scale masonry cross vault subjected to quasi-static cyclic loading tests Alejandro Bendezu, Daniele Pellegrini, César Chácara	589
Robust data-driven health monitoring of full-scale concrete dam structures via stochastic ML schemes Simona Bogoevska, Eleni Chatzi	597
Use of ensemble learning in damage identification based on curvature analysis Daniele Dessi, Andrea Venturi, Fabio Passacantilli	605
Operational Strain Modal Analysis and Wavelet Analysis for Damage Detection in Glass Beams Josué Pacheco-Chérrez	613
Influence of Optimised Sensor Placements on Multi-Objective Model Updating for Damage Localisation Jasper Ragnitz, Clemens Jonscher, Benedikt Hofmeister, Clemens Hübler, Raimund Rolfes	620
OMA for FEM-based assessment	628
Reviving the I-40 Structural Deficit Paradigm: An Online Computational Behavioural Study Under Imposed Traffic Loads Anshu Sharma, Lakhadive Mehulkumar Rajkumar, Agnivesh Pani, Basuraj Bhowmik	628
Applying Operational Modal Analysis to rammed earth buildings for seismic assessment: an exploratory study Guillaume Candoni, Michel Vanwolleghem, Youness Azzouz, Stéphane Hans, Antonin Fabbri	636
OMA of a school building damaged by the Illapel earthquake (Chile 2015) Juan Patricio Reyes, Galo Valdebenito, Elena Oliver-Saiz, Francisco López-Almansa	645

Dynamic Identification and Finite Element Model calibration of the Santa Ana church in Seville Estefanía Chaves, Nuno Mendes, Alberto Barontini, Víctor Compán	654
The ROTMAC concept: an experimental application Natalia García Fernández, Pelayo Fernández, Manuel Aenlle	662
Long-term dynamic monitoring of the Leaning Tower of Pisa Laura Vignali, Anna De Falco, Kristof Maes, Edwin Reynders	674
OMA software	682
Easy automated OMA with open source software Dag Pasquale Pasca, Angelo Aloisio, Marco Civera, Matteo Verzeroli	682
New software for dynamic identification and optimal sensor placement of civil structures and infrastructures Simone Quarchioni, Vanni Nicoletti, Fabrizio Gara	691
A Comparative Study of OMA Techniques Using a Novel Python Library for Structural Health Monitoring Amir Shamsaddinlou, Dario De Domenico, Monica Longo, Dario La Mazza, Giuseppe Mancini, Antonino Recupero	699
Uncertainty quantification	708
About the uncertainty of modal parameters estimated in Operational Modal Analysis Javier Cara	708
Enhancing Dynamic Identification in Heritage Buildings: A Comparative Study of Optimal Sensor Placement Metrics Estefanía Chaves, Nuno Mendes, Alberto Barontini, Víctor Compán	715
Uncertainty Quantification of the Modal Rotation Shape Sensing Method for Geometrically Non-Linear Deformation Janto Gundlach, Marc Böswald, Martin Tang, Jurij Sodja	724
Cross-Validation in Stochastic Subspace Identification Simon Marwitz, Tom Lahmer, Volkmar Zabel	732
Confidence Intervals for Conditional Covariances of Natural Frequencies Lizzie Neumann, Philipp Wittenberg, Jan Gertheiss	742
Quantification of errors in frequency-domain inverse force estimation due to measurement and model noise Christof Van Zijl, Jovana Jovanova, Apostolos Grammatikopoulos	750
IOMAC editorial	759
20 Years of IOMAC Rune Brincker, Carmelo Gentile, Manuel Aenlle, Jörg Bienert, Carlo Rainieri, Michael Döhler	759
Author Index	771
