

# **32nd CIRP Conference on Life Cycle Engineering (LCE2025)**

Procedia CIRP Volume 135

Manchester, United Kingdom  
7-9 April 2025

Part 1 of 2

**Editors:**

**Paul Mativenga  
Alejandro Gallego-Schmid**

ISBN: 979-8-3313-2396-7

# TABLE OF CONTENTS

## PART 1

|                                                                                                                                                                                   |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Environmental Impacts of Extended Producer Responsibility Programs for Plastic Sachets.....                                                                                       | 1  |
| <i>Famela Rose Lacang, Andrea Isabel Medina, Lance Dominic Tria, Jhud Mikhail Aberilla</i>                                                                                        |    |
| A Posthumanist Social Approach to Energy Transition.....                                                                                                                          | 8  |
| <i>Khaled Aboalez</i>                                                                                                                                                             |    |
| A Review of Circular Business Models for Zero Carbon, Zero Waste and Zero Material Extraction<br>in the Building Sector.....                                                      | 14 |
| <i>Adeyemi Adelekan, Maria Sharmina</i>                                                                                                                                           |    |
| Design Interventions to Reduce Embodied Emissions and In-Use Energy Losses of Radial<br>Switched Reluctance Motors for Electric Vehicles.....                                     | 21 |
| <i>Frederick Follows, Julian M. Allwood</i>                                                                                                                                       |    |
| Accelerating the Decarbonization of Incumbent Firms Through Progressive Resource Efficiency<br>Entrepreneurship .....                                                             | 27 |
| <i>Camilla F. Hurst, Julian M. Allwood</i>                                                                                                                                        |    |
| Effect of Cutting Tools and Machine Tools in the Energy Footprint in Turning Operations.....                                                                                      | 33 |
| <i>Haitham M. Alswat, Paul T. Mativenga</i>                                                                                                                                       |    |
| A Review of Movable Factory Sustainability: A Triple Bottom Line Perspective .....                                                                                                | 39 |
| <i>Rasmus Andersen, Filip Skärin, Ann-Louise Andersen, Alessia Napoleone, Kjeld Nielsen</i>                                                                                       |    |
| Electrification of the French Automotive Industry: Modeling the Influence of Main Parameters of<br>the Lithium Extraction and Electric Vehicle Industries .....                   | 45 |
| <i>Edouard Millet, Tom Bauer, Gabriel Banvillet, Tatiana Reyes</i>                                                                                                                |    |
| Evaluating the Carbon Impacts of VSEs and SMEs: A Simplified Multi-Sector Tool Through<br>France and Italy .....                                                                  | 51 |
| <i>Joachim Jusselme, Liam Piasek, Tom Bauer</i>                                                                                                                                   |    |
| Towards More Sustainable Photovoltaics: Reducing Environmental Impact at the Laboratory Scale .....                                                                               | 57 |
| <i>Bethany L Willis, Michael D K Jones, Oliver M Rigby, Lewis C R Jones, Neil S Beattie</i>                                                                                       |    |
| Industry 5.0 Competence Model for Production Companies.....                                                                                                                       | 63 |
| <i>Olivia Bernhard, Emanuele Scammacca, Marc Wegmann, Michael F. Zaeh</i>                                                                                                         |    |
| Automation in LCA, Reconciliation of Inventory Data: Case Study on Manufactured Products<br>Subject to the French RE2020 Building Regulation to Validate the Proposed Method..... | 69 |
| <i>A. Bertrand, T. Bauer, C. Charbuillet, M. Bonte, N. Perry</i>                                                                                                                  |    |
| Re-Investment Rebound Dynamic in the Cement Industry .....                                                                                                                        | 76 |
| <i>Tripta Bhattacharjee, John Mulrow, Heather P. H. Liddell</i>                                                                                                                   |    |
| Assessment of Recyclability with Philips' Tool and Ease of (robotic) Disassembly of a Siemens<br>Soft Starter.....                                                                | 83 |
| <i>Núria Boix Rodríguez, Lucas Janisch, Mark-Olof Dirksen, Terrin Pulikottil, Jef R. Peeters</i>                                                                                  |    |

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Design for Repair: Insights to Develop Functional Modules in Household Appliances .....                                                            | 89  |
| <i>Núria Boix Rodríguez, Jef R. Peeters, Claudio Favi</i>                                                                                          |     |
| Proposal of a Design Tool Combining Performance Criteria and Circularity Potential Flexible Film Packaging Application.....                        | 95  |
| <i>Celina V. De Melo, Talissa G. Albertini, Alex C. Bottene, Daniel G. Da Costa</i>                                                                |     |
| LCA Comparison of Freestanding Kitchens Adopting Three Technologies: Electric, Gas and Induction.....                                              | 101 |
| <i>Sarra Brahem, Claudio Favi</i>                                                                                                                  |     |
| Merging Sustainability Strategies of Efficiency, Consistency and Sufficiency with Corporate Climate Protection Measures.....                       | 106 |
| <i>Felix Budde, Benjamin Gellert, Ronald Orth</i>                                                                                                  |     |
| From Data to Durability: Manufacturer-Agnostic Monitoring to Enhance Washing Machine Repair and Maintenance.....                                   | 112 |
| <i>Alex Bunodiére, Joost R. Duflou</i>                                                                                                             |     |
| An Integrated Framework for Post-Consumer Plastic Waste Management in Europe: Indicators and Macro-Environmental Barriers.....                     | 118 |
| <i>Cristian Caceres Mendoza, Fabio A. Cruz Sanchez, François Cluzel, Yann Leroy, Hakim Boudaoud</i>                                                |     |
| Selecting Suitable Indicators for the Design of Eco-Labels for the European Railway Sector: A Case Study.....                                      | 124 |
| <i>Célia Cannappah, Shantal Kartoidjojo, Willem Haanstra, Jan Braaksma</i>                                                                         |     |
| Product as a Service of Household Appliances – Making the Use of Critical Raw Materials More Efficient.....                                        | 130 |
| <i>Annelie Carlson, Tomohiko Sakao, Srinivas Akkala</i>                                                                                            |     |
| Adaptive LCI Data Completion: Integrating Neural Processes and Active Learning for Enhanced Life Cycle Assessment .....                            | 136 |
| <i>Wei W. Xing, Hong Chen, Zidong Chen, Zhishan Quan, Jose L. Casamayor</i>                                                                        |     |
| Four Decades of Magnets: How Literature Has Addressed Their Sustainability .....                                                                   | 142 |
| <i>Jéssica Prats Raspini, Gisele De Lorena Diniz Chaves, Lucila Maria De Souza Campos</i>                                                          |     |
| The Zimbabwean Iron and Steel Strategy Towards Net Zero Emission.....                                                                              | 149 |
| <i>Edson Kugara Chiwandika, Steven Maritsa, Shebar Matron Masuka, Quinton Kanhukamwe</i>                                                           |     |
| Comparative Life Cycle Assessment of Structural Filling Materials for Sustainable Roads.....                                                       | 155 |
| <i>Kailash Choudhary, Gourav Gill</i>                                                                                                              |     |
| Effect of Cell Size on the Environmental Impact of Gyroid Lattice Structures .....                                                                 | 161 |
| <i>Giulia Colombini, Mauro Giacalone, Federico Torri, Fabio Berni, Elena Bassoli</i>                                                               |     |
| An Exploratory Study into the Economic and Environmental Impacts of Additively Manufactured Modular Tooling for Wind Turbine Blade Production..... | 167 |
| <i>Jackson O'Connell, Jiankan Liao, Zhuoer Li, Jason Williams, Daniel R. Cooper</i>                                                                |     |
| Bayesian Optimal Experimental Design for Intelligent Data Collection in Material Flow Analysis .....                                               | 175 |
| <i>Jiankan Liao, Xun Huan, Daniel Cooper</i>                                                                                                       |     |

|                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Multi-Fidelity Machine Learning Framework for Life Cycle Assessment: A Manufacturing Case Study on Aluminum Rolling.....                          | 181 |
| <i>Muhammad Umar Farooq, Daniel Cooper</i>                                                                                                        |     |
| Assessing the Potential for Closed Loop Recycling of End-Of-life Aerospace Aluminum Alloys in the United States.....                              | 187 |
| <i>Anya Wasilenski, Daniel Cooper</i>                                                                                                             |     |
| Quantifying the Environment Impact of Metal Powder Production for Additive Manufacturing .....                                                    | 195 |
| <i>Peter Fabe, Tracy Ziev, Parth Vaishnav, Daniel Cooper</i>                                                                                      |     |
| A Typology of Scalability Strategies of Circular Startups.....                                                                                    | 201 |
| <i>Carolina De Sousa Resende, Ricardo Zimmermann, Ana Inês, Gustavo Dalmarco</i>                                                                  |     |
| Increase in Import Tax on Electric Vehicles in Brazil: A System Dynamics Prediction of Impacts on EV Adoption.....                                | 207 |
| <i>Maurílio Eduardo Daros, Gisele De Lorena Diniz Chaves</i>                                                                                      |     |
| Investigation of Different Forecasting Methods and Models Using a Forecast Support System to Forecast Spare Parts Demand in the MRO Industry..... | 213 |
