Contents

Keynote

- Out from underground – planning to produce: operational ESG for mine development and operations 3
B Harvey and G Deans

Case studies and operating practice

- Overslept sublevel cave production rings – a post-weather event analysis 21
M Bouwmeester
- Mine-scale subsidence at Cannington Mine 41
A Clarkson, C Hall and M Sandy
- Innovative geotechnical management at the Wira Shaft 53
R Coad, C Scott, C Hill and D Lagacé
- Expanding Prominent Hill 71
A M Ebbels
- The Site Operations Centre – a Carrapateena story 79
B Edwards, T Webley, A Schmidt and E Law
- Establishing a strategic mine plan for a multi-centuries-old mine – challenges, implementations and optimisation process 91
B Fresia and G Calzada
- Twin strand cables replaced with Falcon Bolts at Tomingley Gold Operations 107
R Galluzzi, C Rademeyer, A Brown and C Kenny
- Ventilation challenges and opportunities at tunnelling construction operation – Snowy 2.0 Powerhouse Complex Ventilation 125
M Jamieson, C Giordano and M Hooman
- Prominent Hill Wira Shaft sink 135
D Lagacé, D Kilkenny and C Hill
- Considerations for paste fill inrush exclusion zones 159
L Maia, J Percy and B Barsanti
- Managing large open voids throughout the production cycle at Olympic Dam 171
G Mungur, C Alberto and B Stevenson
- Hydropower energy recovery in mines using pump as turbine technology – three case studies 189
D Novara, M Crespo Chacon, M Pedley, A McNabola, P Coughlan and J Warren
- Managing operator fatigue underground – the importance of management of change 197
J Savit, A Heieis and M Quintela

Enhancing raise boring stability assessments through back analysis of overbreak <i>D Sidea and C Scott</i>	205
Remediation of collapsed steel portal tunnel at Yaramoko Mine <i>C Thomson, J Player, R Moyle and A Baro</i>	213
The Stope Soaker 2000 – a DIY stope dust suppression system <i>D Tomek and C Miles</i>	221
Implementation of a first principles approach to mine scheduling at Caijiaying Underground Mine, China – a case study <i>D Varley, C Wang and S Guiulfo</i>	235
Improving underground development efficiency by optimising tunnelling drilling and blasting processes <i>E Wargem and D Tozer</i>	247
Learnings from reorientating the Ernest Henry sublevel cave <i>E Zhang, M Spurway and M Bouwmeester</i>	263

Collaboration between suppliers, operations, and alternative industries

Application of tunnel boring machines for rapid underground mine development with civil contractor early involvement <i>P Anthony, A Hargreaves and A Lehr</i>	281
Drill safety systems improvement through collaboration – Epiroc and BHP Olympic Dam <i>J Quigley, D Woolmer, R Hermann and A Harris</i>	297
A practical guide to collaborative contracting in the mining industry <i>M S Radi, T M Hall, S Perkins and S Rodda</i>	305
New way of dewatering mines <i>J Wikström, T Elkins and R MacDonald</i>	321

Feasibility studies and mine design

Simulation evaluation of haulage capability for the Carrapateena Mine <i>C Eustace, T van der Weegen, R Mills and J Wellington</i>	337
Striving to re-enter the 500 orebody – informing project and operational risk with trial development <i>A Grubb, C Curtis-Morar, R Bedggood and E Nyakwenga</i>	351
The impact of enhanced ESG outcomes on the optimal open pit to underground transition <i>A Hall, D Lee, M Flanagan, T Sharman and F Grobler</i>	371
Stoping under paste – the dilution versus binder trade-off <i>M Helinski</i>	387
Probabilistic development rates – using data and stochastic modelling to integrate contingency <i>B Hesse, H Wooders and C Te Kloot</i>	397

Optimising transverse stoping at the Musselwhite Mine <i>İ Ö Özen</i>	407
 Technology and innovation	
Establishing a comprehensive underground geotechnical convergence monitoring program using the latest SLAM technology <i>M Burns, K H B Chu, G Davis and E Jones</i>	427
Subtek™ 4D™ – Optimised underground blasting performance through improved energy distribution and control <i>S Evans, B Taylor and M Brayshaw</i>	443
Hatch Mine VisionAI for underground productivity tracking <i>V Fitzmaurice and J Selby</i>	455
Advancing In-Place Recovery (IPR) – innovations in underground leaching operations for sustainable mineral extraction <i>A Hassanvand, P Dare-Bryan, Z Wang, D Hunter and A Scott</i>	469
Unlocking potential of the Gold Fields St Ives Gold Mine using wireless blasting technology <i>B Jesionek and R Massabki</i>	485
Author index	493
