# TABLE OF CONTENTS

## **SESSION 1: CCUS INFRASTRUCTURE, POLICY AND TECHNOLOGY PERSPECTIVES**

|                                                                           |   |
|---------------------------------------------------------------------------|---|
| CO2 Transport using Ships or Subsea Pipelines and Their Implications..... | 1 |
| <i>R. Varghese, F. Sinclair</i>                                           |   |

## **SESSION 2: RESERVOIR CHARACTERIZATION FOR SCALABLE CO2 STORAGE**

|                                                                                                                                             |    |
|---------------------------------------------------------------------------------------------------------------------------------------------|----|
| Evaluating the Penyu Basin for Carbon Capture and Storage: A Comprehensive Seismic Study .....                                              | 5  |
| <i>D. Barlass, M. Matta</i>                                                                                                                 |    |
| [Invited Talk] Advancing CO <sub>2</sub> Storage Readiness: Insights from Asia, Oceania, and the Global<br>Storage Resource Landscape ..... | 10 |
| <i>S. A. M. Hatta, K. Evans, E. Firth, C. Consoli, S. Thibeau, I. Barranco, L. Seldon</i>                                                   |    |
| CO <sub>2</sub> Storage Capacity Assessment and Selection of Depleted Oil and Gas Fields for Carbon<br>Sequestration in Europe.....         | 15 |
| <i>I. Rahim, F. Games, A. Borodin, R. Mohamad</i>                                                                                           |    |
| Mega Carbonate Platform Seismic Reservoir Characterization for CCS Storage Capacity<br>Assessment .....                                     | 19 |
| <i>N. Nguyen, S. M. T. M. Eldin, N. F. Zawri, M. Z. B. Zamanshah, S. Rajput</i>                                                             |    |

## **SESSION 3A: DATA-DRIVEN RESERVOIR CHARACTERIZATION**

|                                                                                                                                           |    |
|-------------------------------------------------------------------------------------------------------------------------------------------|----|
| CO2 Storage Site Assessment from Hydrocarbon Field Revision using a High-Resolution<br>Stratigraphic Framework and Machine Learning ..... | 22 |
| <i>N. Daynac</i>                                                                                                                          |    |
| Fast Track CO2 Storage Screening Workflow Based on a Rich Geological Database .....                                                       | 26 |
| <i>E. Shepherd, S. Otto</i>                                                                                                               |    |
| Carbonate Saline Aquifer Characterization for Carbon Storage Complex .....                                                                | 30 |
| <i>T. E. Putra, F. Rabia, N. Desiani</i>                                                                                                  |    |

## **SESSION 3B: NEXT-GENERATION MONITORING AND RISK ASSESSMENT**

|                                                                                                                                                                                          |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Revolutionizing CCS Monitoring: DAS, Elastic FWI, and Microseismic for Enhanced CO <sub>2</sub> Plume<br>Tracking.....                                                                   | 34 |
| <i>P. Bettinelli, J. Le Calvez, K. Jansen, G. Orbelli</i>                                                                                                                                |    |
| Bridging the Data Gap: CO <sub>2</sub> Storage Evaluation in Saline Aquifers Through Integrated Static and<br>Dynamic Scenarios .....                                                    | 38 |
| <i>M. P. T. Nguyet, S. Sanjal, J. N. Escamilla, M. N. Mohamad, V. Supilin, R. Ranjan, R.<br/>Mohamad, K. Mohamad, P. Narayanan, S. Majidaie, S. A. A. Rasid, N. Anasir, Z. Zamanshah</i> |    |
| Developing DAS Technology for CCS Monitoring and Subsurface Properties Assessment using<br>Underground and Submarine Dark-Fiber .....                                                    | 42 |
| <i>B. Yoon, S. Choi, H. Lim, Y. Seong, K. G. Park, C. Lee, K. Yang, M. Son, K. Yun, Y. Cho</i>                                                                                           |    |

#### **SESSION 4: FROM CAPTURE TO CONTAINMENT: ENABLING CCS THROUGH STRATEGIES AND GOVERNANCE**

|                                                                                                               |    |
|---------------------------------------------------------------------------------------------------------------|----|
| Pioneering CO <sub>2</sub> Capture and Geological Storage Seal Integrity and Overburden Risk Assessment ..... | 45 |
| <i>D. Das, P. Tiwari, Z. A. A. Bakar, S. Salwani, F. H. Kasim, P. Chidambaram, M. Sajid</i>                   |    |
| Mitigating Emissions from Acid Gas Fields Monetization: CCS Source-To-Sink Analysis in Southeast Asia .....   | 48 |
| <i>T. Abednego, N. Z. M. Razali, Z. Nie, A. H. Adnan, C. Kennett</i>                                          |    |

#### **SESSION 5: ADVANCEMENTS IN CO<sub>2</sub> INJECTION, STORAGE AND SEQUESTRATION**

|                                                                                                                                       |    |
|---------------------------------------------------------------------------------------------------------------------------------------|----|
| Optimizing Carbon Capture and Storage (CCS) in Multiple Reservoirs: Advanced Completion Design with Flow Control Valves.....          | 53 |
| <i>C. K. Kwok, C. W. Cavalieri, F. H. Reyes, E. Gomez, H. C. Enriquez, S. Lee, J. Poizat, R. Salter</i>                               |    |
| Assessing CO <sub>2</sub> Injection Effects in Depleted Clastic Gas Fields, Offshore Malaysia: A Geochemical Perspective.....         | 58 |
| <i>M. Z. Kashim, S. S. M. Shah, P. K. Tewari</i>                                                                                      |    |
| Optimizing Injection Strategies for High-Performance CO <sub>2</sub> Storage: Insights from Lab Experiments and Field Monitoring..... | 65 |
| <i>Z. Xue, H. Park</i>                                                                                                                |    |

#### **SESSION 6A: ADVANCED MONITORING AND RISK MANAGEMENT**

|                                                                                                                          |    |
|--------------------------------------------------------------------------------------------------------------------------|----|
| Full-Waveform Adaptive Monitoring for CCS.....                                                                           | 69 |
| <i>D. Halliday, R. Fletcher, M. Branston</i>                                                                             |    |
| Understanding Uncertainty in CO <sub>2</sub> Plume Migration: Improving Predictions of Geological Containment Risk ..... | 74 |
| <i>A. Skorstad, J. Mukherjee, G. Williams, S. Ducroux, A. Olariu, P. Gautam</i>                                          |    |
| CCS MMV May Learn from an UGS Case Implementing Trinity Integrity Risk Management .....                                  | 78 |
| <i>H. Yu, Y. Wang, H. Jiang, Y. Yang, L. Li, X. Ma</i>                                                                   |    |

#### **SESSION 6B: SUBSURFACE INTEGRITY AND FLUID BEHAVIOR**

|                                                                                                                    |    |
|--------------------------------------------------------------------------------------------------------------------|----|
| Mineralogical Analyses for Reservoir and Caprock Integrity Study of a Potential CO <sub>2</sub> Storage Site ..... | 82 |
| <i>W. M. L. B. Sazali</i>                                                                                          |    |
| Comparing Life Cycle Emissions of CO <sub>2</sub> and Water Flood EOR for Depleted Fields in India.....            | 87 |
| <i>Y. Verma, R. Srivastava, V. Vishal</i>                                                                          |    |
| Mechanistic Study on CO <sub>2</sub> -N <sub>2</sub> Chromatographic Partitioning in Saline Aquifers .....         | 90 |
| <i>M. Wang, M. Gao, Z. Ji, C. He, Z. Zuo, Y. Zhang, Y. Yang</i>                                                    |    |

## **SESSION 7: INNOVATIVE INFRASTRUCTURE AND MONITORING STRATEGIES**

|                                                                                                                                                 |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Induced Seismicity Monitoring—Comparison of Surface Deployed DAS Arrays Versus Other<br>Common Seismicity Monitoring Techniques .....           | 94  |
| <i>K. Galybin, M. Branston, M. L. Khaitan</i>                                                                                                   |     |
| Geomechanical and Geochemical Considerations for Geologic Storage of Carbon Dioxide in the<br>Utsira Formation, Sleipner .....                  | 99  |
| <i>E. Pratama, I. T. A. Praja</i>                                                                                                               |     |
| Advances in Attribution Monitoring Techniques for CO <sub>2</sub> Anomalies: Discriminating Injection<br>Leakage from Natural Variability ..... | 102 |
| <i>C. He, X. Geng, M. Gao, Z. Ji, M. Wang, K. Cui, Y. Yang</i>                                                                                  |     |

## **SESSION 8: RISK MITIGATION, WELL INTEGRITY, AND INTEGRATED MONITORING STRATEGIES**

|                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------|-----|
| Modelling-Based Quantitative Leakage Risk Analysis for Enhanced CCS Monitoring,<br>Measurement and Verification Plans ..... | 106 |
| <i>C. Sorgi, V. De Gennaro, S. Yoon, R. Prioul</i>                                                                          |     |
| Impacts of Thermally Induced Stresses on Caprock Integrity in Depleted Hydrocarbon Reservoirs<br>for CCS Projects .....     | 112 |
| <i>A. Chatterjee, A. Younessi, M. K. Hamdan</i>                                                                             |     |

## **SESSION 9A: ADVANCED MODELING AND MONITORING**

|                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------|-----|
| Optimizing Carbon Capture and Storage (CCS) Design using Multi-Objective Optimization and<br>Dynamic IPR-OPR Nodal Analysis..... | 116 |
| <i>T. Kim</i>                                                                                                                    |     |
| An Example of Adaptive Seismic Monitoring of CCS using the SEAM CO <sub>2</sub> Model.....                                       | 119 |
| <i>M. Branston, D. Halliday, R. Bachrach, R. Fletcher</i>                                                                        |     |

## **SESSION 9B: FLUID FLOW, ROCK BEHAVIOR, AND MINERAL INTERACTIONS**

|                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------|-----|
| Carbon Dioxide Sequestration Through Carbon Mineralization using pH-Swing Treatment: A Case<br>Study of Mae Tha Basalt ..... | 124 |
| <i>K. Teerapong, S. Thiteja, T. Taksavas, S. Tangparitkul</i>                                                                |     |
| Permeability Changes of Rocks and Their Replicas Under Cyclic Loading .....                                                  | 129 |
| <i>M. Turbakov, E. Kozhevnikov, E. Riabokon, M. Guzev, Z. Ivanov, C. Qi</i>                                                  |     |
| Effect of Microfractures on the Seepage Characteristics of Hydrate Bearing Rocks Under<br>Confining Pressure .....           | 134 |
| <i>E. Kozhevnikov, M. Turbakov, E. Riabokon, M. Guzev, Z. Ivanov, L. Yu</i>                                                  |     |
| Observation of Brine Backflow and Salt Precipitation During Brine Drying in Fractured Porous<br>Media.....                   | 139 |
| <i>W. Susanto, M. Nasir, B. Wang, S. Sin, K. Wang, A. Patmonoaji, S. Matsushita, T. Suekane</i>                              |     |

## **SESSION 10: INTEGRATED SYSTEM DESIGN AND MONITORING**

|                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------|-----|
| Integrated Workflow for CO <sub>2</sub> Storage Monitoring: From Reservoir Simulation to Gravity Modeling .....                   | 144 |
| <i>Y. Kozlov, L. De Luca</i>                                                                                                      |     |
| Insights and Strategies for Surface Facility and Well Designs for Maximizing CO <sub>2</sub> Storage While Minimizing Risks ..... | 149 |
| <i>E. Pratama</i>                                                                                                                 |     |
| Research on Microbial Methanogenesis in CO <sub>2</sub> Storage in a Low Temperature Oil Reservoir.....                           | 152 |
| <i>L. Wang, M. Gao, Y. Shi, Z. Ji, X. Song, X. Wu</i>                                                                             |     |

## **AM BREAK & POSTER PRESENTATION DAY 1**

|                                                                                                                             |     |
