

# 10th International Conference on Formal Structures for Computation and Deduction

FSCD 2025, July 14–20, 2025, Birmingham, UK

Edited by

Maribel Fernández

*Editors*

**Maribel Fernández** 

King's College London, UK  
maribel.fernandez@kcl.ac.uk

*ACM Classification 2012*

Theory of computation; Computing methodologies; Software and its engineering

**ISBN 978-3-95977-374-4**

**PRINT ISBN 979-8-3313-2434-6**

*Published online and open access by*

Schloss Dagstuhl – Leibniz-Zentrum für Informatik GmbH, Dagstuhl Publishing, Saarbrücken/Wadern, Germany. Online available at <https://www.dagstuhl.de/dagpub/978-3-95977-374-4>.

*Publication date*

July, 2025

## Contents

|                                |      |
|--------------------------------|------|
| Preface                        |      |
| <i>Maribel Fernández</i> ..... | 0:ix |
| Committees                     |      |
| .....                          | 0:xi |
| List of Authors                |      |
| .....                          | 0:xv |

### Invited Talks

|                                                                                                                         |          |
|-------------------------------------------------------------------------------------------------------------------------|----------|
| Computation First: Rebuilding Constructivism with Effects                                                               |          |
| <i>Liron Cohen</i> .....                                                                                                | 1:1–1:20 |
| Vehicle: Bridging the Embedding Gap in the Verification of Neuro-Symbolic Programs                                      |          |
| <i>Matthew L. Daggitt, Wen Kokke, Robert Atkey, Ekaterina Komendantskaya, Natalia Slusarz, and Luca Arnaboldi</i> ..... | 2:1–2:20 |
| Unsolvable Terms in Filter Models                                                                                       |          |
| <i>Mariangiola Dezani-Ciancaglini, Paola Giannini, and Furio Honsell</i> .....                                          | 3:1–3:24 |

### Regular Papers

|                                                                                                          |            |
|----------------------------------------------------------------------------------------------------------|------------|
| Substructural Parametricity                                                                              |            |
| <i>C. B. Aberlé, Karl Crary, Chris Martens, and Frank Pfenning</i> .....                                 | 4:1–4:21   |
| The Cost of Skeletal Call-By-Need, Smoothly                                                              |            |
| <i>Beniamino Accattoli, Francesco Magliocca, Loïc Peyrot, and Claudio Sacerdoti Coen</i> .....           | 5:1–5:22   |
| Weighted Rewriting: Semiring Semantics for Abstract Reduction Systems                                    |            |
| <i>Emma Ahrens, Jan-Christoph Kassing, Jürgen Giesl, and Joost-Pieter Katoen</i> ....                    | 6:1–6:21   |
| Combining Generalization Algorithms in Regular Collapse-Free Theories                                    |            |
| <i>Mauricio Ayala-Rincón, David M. Cerna, Temur Kutsia, and Christophe Ringeissen</i> .....              | 7:1–7:18   |
| The Unification Type of an Equational Theory May Depend on the Instantiation Preorder                    |            |
| <i>Franz Baader and Oliver Fernández Gil</i> .....                                                       | 8:1–8:24   |
| A Zoo of Continuity Properties in Constructive Type Theory                                               |            |
| <i>Martin Baillon, Yannick Forster, Assia Mahboubi, Pierre-Marie Pédrot, and Matthieu Piquerez</i> ..... | 9:1–9:20   |
| Categorical Continuation Semantics for Concurrency                                                       |            |
| <i>Flavien Breuwart and Hugo Paquet</i> .....                                                            | 10:1–10:21 |
| Impredicative Encodings of Inductive and Coinductive Types                                               |            |
| <i>Steven Bronsveld, Herman Geuvers, and Niels van der Weide</i> .....                                   | 11:1–11:22 |

10th International Conference on Formal Structures for Computation and Deduction (FSCD 2025).
