Contents

Foreword. xix

Program Organizing Committee xxi

Technical Program Committee xxi

Technical Program Committee xxii

International Mineral Processing Councilxxiii

Plenary Program

Critical Minerals for the Energy Transition. 2

A Delivery Pathway to Sustainable Minerals Processing—The Future Impact of Research and Innovation 7

Keynote Presentations

New Strategies for Recovery of Nickel and Cobalt for a Low Carbon Future 23

The Importance of Process Mineralogy and Geometallurgy in Enabling the Energy Transition. 37

How Can We Re-Innovate the Mining Industry?. 46

Application of the Boycott Effect in Maximizing Grade and Recovery 54

Rare Earth Elements Separation Principles Applied Through Innovative Methods 63

The World of Water in Mining. 74

Advances in Model Predictive Control for Flotation 85

Dry Beneficiation 91

Advances in Flotation Which Have the Potential to Address the Challenges Associated with
Energy Transition 99

Changing the Face of Comminution—Insurmountable Hurdles or Just Speed-Humps on the Journey? 112

Embracing New Technology in a Traditional Industry 129

Catching Lightning in a Bottle—The Future of Tailings 137

Development of Sustainable Hydrometallurgical Technologies for Critical Minerals and Precious Metals 145

Critical Skills for Critical Minerals 156

Innovation and R&D

*Carbon Reduction in Comminution and Processing and Novel Applications in Honor of
Professor Hermann Woltruba*

A Carbon/Energy Balance Study—Methodology to Determine the Value of
Carbon Capture Solutions in Mineral Processing. 164

Aluminum Recovery from Hyperaccumulating Plants for Industrial Applications 174

Coarse Gangue Rejection by Selective Comminution 181

Electrify Everything—Designing a Fully Electric Gold Processing Facility for a Low-Carbon Grid. 192

High-Pressure Slurry Ablation (HPSA)—An Innovative Liberation Technology for Improvement of Grade and Recovery in Mineral Processing	196
Ultrasound Technology to Prevent Fouling in Mineral Processing	212

Comminution and Pretreatment

<i>Paper Withdrawn</i>	221
Continuous Treatment of Materials by Electrical Impulses	231
Doing Things Differently: Addressing the Comminution Energy Challenge	248
Scaling Up High Voltage Pulse Technology for the Mining Industry—The Novel JKMRC HVP	
Electrode–Grizzly System: The Path from Concept to Reality	261

Carbon Reduction in Comminution

Aligning Carbon Emission Reduction Initiatives with Financial Performance in the Mining Industry: A Behavioral Analysis	275
Towards Net Zero: Opportunities for CO ₂ Utilization in Nickel Processing	290
Optimizing the Physical Properties of Biochar for CO ₂ Adsorption Using Resonant Vibrations	299
<i>Paper Withdrawn</i>	308

Extreme Environments

Critical Metals Recovery from Cook Islands Polymetallic Nodules	321
Lunar Ice, Characterization, Extraction, and Processing	330
Mineral Processing ... in Space.	340
Mineral Processing on the Moon.	350
Advancements in Microgravity Ore Processing: Customized Ball Milling Techniques for Extraterrestrial In-Situ Resource Utilization	361
Space Mining for Critical Metals to Aid Clean Energy Transition	366

Sensing and Sorting

Benefits of Representative Elemental Analysis of Conveyed Process Feed Flows	392
Beyond Amenability and Technology: Key Constraints in the Wider Deployment of Sorting Systems	398
Bulk Ore Sorting Using Magnetic Resonance Sensing: Kansanshi Mine Case Study	408
Increasing Sorting Efficiency in Ore Pre-Concentration by Applying Smart Combination of X-Ray and Optical Sensors in AI Models.	420
<i>Paper Withdrawn</i>	431
Online Elemental Analysis of Copper Concentrator Feed Utilizing PGNAATechnology	439
Sensor-Based Particle Sorting on Critical Minerals Ore Samples for Lithium, Scandium and Other Rare Earth Elements.	447
Sensor-Based Sorting Applied to the Beneficiation of a Siliceous Limestone	468

Dry Processing

Dry Processing

Mineral Adhesive Forces Measured by Atomic Force Microscopy	476
Optimising Tribocharger Designs for Separating Granular Material Using the Discrete Element Method	483

Beneficiation of Ultrafine Iron Ore Using Tribo-Electrostatic Separator	496
Fine Screening in Dry Mineral Processing	508
Enrichment of Iron-Bearing Phases in Steel-Making Slag Through Dry Magnetic Separation	517
Particle Transport and Separation Using an Electrostatic Traveling Wave	528
Plant Design Comparison of Dry VRM Milling Plus Magnetic Separation with AG and Ball Milling Plus Magnetic Separation for Grange Resources' Southdown Ore	538
The Impact of Innovative Pre-Concentration Techniques on Environmental, Social and Governance (ESG) Performance: A Case Study Using Sensor-Based Sorting	548

Dry Processing—General

A Full-Scale Centrifugal Dry Magnetic Separator for Separation of Fine Magnetite Ore	557
A Practical Approach for Recovering Iron from Waste Rock Dump of Iron Ore Mine Using Novel Dry Magnetic Separation- Industrial Scale Study	564
Dry Beneficiation Studies of Low-Grade Chromite Ore Using Magnetic Separation	571
Research on Dry Fluidization Separation Process from Mesoscale Perspective	583

Water Management

The World of Water in Mining

Determining Water Loss in Mineral Processing— A Thermodynamic Approach	593
Green Mining of Mining Water	602
Water Efficiency Targets Are Insufficient for Good Water Performance in Mining	614
Reducing Water and Energy Consumption Through Innovative Mineral Process Flowsheet Design	621
Treatment of Mining Acid Effluents by Reverse Osmosis.	631

Impact of Water Quality on Mineral and Water Processing I

Flotation of Copper and Copper-Gold Ores Using Non-Conventional Water Sources Including Brackish and Sea Water	648
Implications of Water Quality Variations on the Performance of Rare Earth Mineral Flotation	658
Influence of Anionic Polyacrylamides on Molybdenite Flotation in Waters of Varying Ionic Strength	665
Metallurgical Effects of Milling Media and Water Composition in the Flotation of a Mixed-Mineral Ore	672
Modification and Regulation of Clinoptilolite-Supported Composite Photocatalysts for High-Performance Xanthate Degradation	680
Removal of Thiocyanate from Gold Mining Process Water	692
A Determination of the Effect of Changing Collector Chain Length Under Varying Water Quality	701

Dewatering Advances to Reduce Water Consumption

Optimizing the Flocculation Efficiency of Fine Phosphate Tailings: A Response Surface Methodology Investigation	710
Flotation Reagents on the Coagulation and Dewatering of Flotation Concentrates from a Cu-Ni-PGM Ore	725
Novel, Economic, and Reliable Thickening and Filtration of Tailings	731
Tailings Dewatering: Process Optimisation from a Water Recovery Perspective.	741

Impact of Water Quality on Mineral and Water Processing II

Investigation of Continuous Fixed-Bed Column Adsorption Simulation Using COMSOL Multiphysics for the Removal of Arsenic from Mine Wastewater Using Goethite.	754
---	-----

Management of Thiocyanate and Thiosalts in Gold Extraction Project	762
Effect of Makeup Water Quality and Future Minerals on Flotation Plant Performance.	776

Human Capital

The Changing Environment for Mineral Processing Education

EMJM PROMISE—A Contribution to Sustainable Mineral Processing	787
Understanding the Industry Perspective on the Current U.S. Hardrock Mining Engineering Education	795
Swedish School of Mines (Education, Research, and Infrastructure)	806
Mineral Processing Education in the Philippines	810

Alternative Pathways to Mineral Processing Skills

Empowering Small-Scale Mining Communities Through Education and Technology	814
Providing Authentic Learning Experiences in Process Mineralogy in an Evolving Learner Landscape.	820
Rebuilding the Lost Mineral Process Engineering Competency Base	827

Process Control, Modeling, and Simulation

Advanced Modeling and Control of Comminution

A Computational Method to Determine the Real Time Wear Rate of Grinding Media in Ball Mill	839
A Data-Driven Approach for Optimizing Dry Classification Grinding Circuit Efficiency	848
Digitalizing Conveyed Process Feed Flows for Improved Ore Quality and Process Control.	861
Optimization of a Grinding Circuit Using Physics-Based and Machine Learning Models	870
A Preliminary Non-Linear Model Predictive Control for Pressing Iron Ore Concentrates in an Industrial HPGR.	881

Advanced Modeling and Control of Flotation

Copper Recovery Predictive Performance for Selected Machine Learning Algorithms	893
Development and Trial of an Online Modal Mineralogy Module for Process Plant Slurries	901
Modelling of Mineral Dissolution Occurring During Flotation: Simulation of Water Recycling Scenarios in an Industrial Plant	915
Real-Time Flotation Optimization Using Scientific AI.	927
Robust Expert Control of Entire Pb/Zn/Cu Flotation Plant for Complex Ores based on Dynamic Multivariant Response Surface Methodology, Thermodynamics and Kinetics of Flotation and Reagents at Doe Run's Buick Mill	934
Simulation of Flotation Circuits Using a Model Derived from First Principles	947

Circuit Simulation, Design, and Process Optimization 1

Application of Circuit Analysis to the Simulation of Rare Earth Element Solvent Extraction Circuits	955
<i>Paper Withdrawn</i>	964
PrOMMiS: Applying Novel Modeling Methods to Accelerate Critical Minerals Research, Development, Demonstration, and Deployment (RD3).	980
Remote Integration of Autoclave APC at Pueblo Viejo Mine Amidst the COVID-19 Pandemic.	991

Circuit Simulation, Design, and Process Optimization 2

Defining a Quantitative “Framework” for ESG Optimization of Mineral Processing Plants.	1002
Entropy Analysis for Raw Material Processes	1011

Integration of Process Simulation and Environmental Impact Estimation for Dry Processing Plants in an Online Platform	1018
Liberation Curves: A New Approach to Interpreting Mineral Liberation Data	1027
Technical Evaluation of a Copper Process Plant Expansion While Respecting the Region's Environmental Constraints Using an Integrated Value Chain Flowsheet	1034
Forecasting the Recovery Potential of a Tailings Storage Facility with Particle-Based Separation Models	1045
The Validation of Predictive Metallurgical Simulation Models by Locked Cycle Test Results	1057

Advances and Applications in Machine Learning, Artificial Intelligence, and Digital Twins

Can A.I. Save the Mining Industry?	1071
Digital Helpers in Roller Processing—Examples of IIot Applications and Real Benefits	1083
Digitalization of Centrifugal Slurry Pumps—a Reflection of Innovation, Research & Development Work and Lessons Learned	1092
Digitalization in Mining And Mineral Processing—A New Solution for Potential Increasing the Metals Recovery	1103
Down the Data Drain: How Can We Utilize Quarry Data for Environmental Assessment?	1108
Maximizing Copper Production by Proper Water Management Using a Digital Twin	1116
Pipeline Digital Twin with Power Optimization	1128

Process Control, Modeling, and Simulation—General

Experimental and DEM Investigation of Non-Spherical Particle Dynamics in Pseudo-2D Hopper Discharge	1134
Modelling and Optimization of Sub-Grade Iron Ore Beneficiation Using Response Surface Method with Three Level Three Factor Box Benken Design	1146
Optimizing Physical Separation Through Machine Learning Based Mineralogy Classification	1156
Use of Nanofiltration Membrane Processes to Concentrate Acid Liquors in Extractive Metallurgy: Development of a Reactive Transport Model	1164

Strategic Minerals

Industrial Practice for Primary Minerals

A New Tungsten Process to Reduce Environmental Impact, Improve Grade and Recovery and Facilitate Wastewater Reuse	1173
A Review of the Beneficiation of Bastnaesite and Monazite Rare Earth Bearing Minerals.	1188
Co-Extraction of Tellurium from Gold Ore	1199
Flowsheet Development of Two Distinct Rare Earth Minerals Bearing Heavy Mineral Sand Ores	1208
Gangue Rejection Strategies for Halleck Creek Allanite Beneficiation	1220
Technospheric Mining of Rare Earth Elements from Acid-Crack Leach Tailings	1237

Industrial Practice for Secondary Sources

Characterization and Evaluation of Various Biochar Types as a Green Approach for Lanthanum Recovery from Aqueous Solutions	1246
Extraction of Rare Earth Elements from Nonconventional Resources	1260
Full-Value Copper Mining: A Gateway to Critical Mineral Resources	1269
Processing of a Phosphate Flotation Tails for Recovery of Rare Earths and Phosphate	1278
Production of Critical Minerals from Coal Ash.	1286

Strontium Minerals as Critical Raw Materials—Market Dynamics, Processing Techniques, and Future Challenges	1296
--	------

Separation and Purification Innovations

A New Paradigm for the Recovery of Rare Earth Elements: The High Activity Flowsheet as Applied to the Elk Creek Deposit	1309
A Novel Approach for Separating Iron and Rare Earths from Complex Polymetallic Ores via Hydrogen-Based Mineral Phase Transformation: A Pilot-Scale Study	1324

<i>Paper Withdrawn</i>	1338
----------------------------------	------

Preliminary Investigation of Using Deep Eutectic Solvents for REE Dissolution from Primary Ores and Mine Tailings.	1345
Process Intensification for Rare Earth Elements Adsorption by Resonant Vibratory Mixing	1351
Recovery of Rare Earth Elements by Supercritical CO ₂ : A Mini Review	1365

Geometallurgy and Process Mineralogy

Using Geological Data to inform Metallurgical Processes

Applications of Advanced Gold Deportment Technique for Complex Refractory and Copper Gold Ores . . .	1379
Application of HIT in Orebody Hardness Domain Using Exploration Samples	1390
Geometallurgical Data Mining of Ore Processing Behavior and the Integrated Value Chain	1401
Mineralogy as a Key Indicator for Coal Processing	1409
Maximizing Total Profit Margin by Optimizing Coal Processing Operations.	1423
Process Mineralogy at LKAB: The Connection Between Kirunatype Iron Ore Exploration and Mineral Processing	1434
Applying Geometallurgical Principles for Metallurgical Sample Selection	1442
TIMA Mineralogy and Whole Rock Geochemistry for Resource Characterization of the Copper World Complex (Arizona)	1453

New Tests and Techniques in Geometallurgy

Latest Advances in 3D Characterization of Ore Particles for Mineral Processing by High Resolution X-ray Computed Tomography	1467
Characterization of Carbonaceous Matter to Assess its Influence on Metallurgical Responses in Polymetallic Complex Ores	1477
Chromium Ore Particles Circularity Measurement by Digital Image Processing	1488
Development of a Lab-Scale Test for Pre-Concentration Evaluation	1496
Extensive Validation of New Rock Test Using the Hardgrove Mill with Torque Measurement for the Determination of the Bond Ball Mill Work Index	1507
Integration of Hyperspectral Imaging and Geometallurgy	1516
The Geopyörä Index: A New Instrument for Assessing Comminution and Rock Strength Parameters	1525
Working with Multi-Dimensional Particle Property Distributions	1531

Process Mineralogy

<i>Paper Withdrawn</i>	1537
Exploring Lithium Recovery Through Characterization of Pegmatite Type Ore	1548

Geometallurgy Program at Vargem Grande Iron Ore Complex, Brazil: Enhancing Process Reconciliation and Plant Performance	1558
<i>Paper Withdrawn</i>	1572
Mineralogical Insights in the Recovery of Lepidolite from the Beauvoir (Li, Be, F) Rare Metals Granite: LIBS Imaging as a Tool to Improve Beneficiation Routes.	1577
Process Evaluation of the Rio Tinto Kennecott Underground Expansion—A Case Study	1587
Process Mineralogical Investigation into the Distribution of Silver at Gamsberg Zinc	1595

Extractive Metallurgy

Factors Affecting Mineral Leaching Processes

Multimodal Approach to Obtain Spatiotemporal Insights into Column Leaching Experiments Through Surface-Level Analysis and 3D Imaging.	1605
Efficient Extraction of Vanadium from Vanadium-Bearing Shale by Ultrasound-Assisted Oxidative Acid Leaching	1615
The Colour of Sphalerite, Pyrite and Chalcopyrite and What It Says About Their Leaching Behaviour.	1625
Biosustainable Mining: Unlocking Opportunities in Selective Gangue Removal, Bio-Cementation and Carbon Sequestration Using Microbial Processes	1634
Crystal-Chemical and Analytical Insights into Phyllosilicate Decomposition in Acid Leaching.	1642

Metal Extraction from Secondary Sources

Enhanced Scandium Recovery from Red Mud Using Two-stage Acid Baking and Water Leaching Process.	1651
Combined Pyro and Hydrometallurgical Treatment of EAF Dust for Zinc and Iron Recycling.	1663
<i>Paper Withdrawn</i>	1672
Investigation of Process Intensification Role in Solid–Liquid Separation Techniques for the	
Recyclable Samarium-Cobalt Magnet	1685
Comparative Process Analysis for Extraction of Metallic Values from Indian Red Mud.	1695

Solution Separations

A Comparison of Cloud Point Extraction and Ion Exchange in Recovery of Pt, Pd, and Rh from Spent Autocatalytic Converters Chloride Leach Solutions	1703
Crystallization of Vanadium Salts from Bayer Strip Liquor.	1714
Kinetics of Cobalt and Manganese Precipitation from Acid Mine Drainage Using Ozone	1722
Solvent Extraction of Tantalum and Niobium from Oxalic Leachates: A Novel Technique of Colombo-Tantalite Ores Processing	1733
<i>Paper Withdrawn</i>	1741

Advances in Gold Extraction Methods

A Green Technology to Extract Gold from Refractory Ore: A Combination of Microencapsulation and Thiosulfate Leaching	1749
Establishment of a Sustainable and Eco-Friendly Scheme for Recovery of Gold from Double Refractory Ores	1755
Mechanism of Ultrasound-Intensified Leaching and Its Enhancement on the Cyanidation Process of Gold Refractory Tailings	1764

Optimizing Gold Operation and Cyanide Consumption in Carbon-in-Leach (CIL) Processes	1773
The Role of Magnesium Hydroxide for Optimal Gold Leaching in the Ammonium Thiosulfate	1779
Thiocyanate Leaching of Gold from Refractory Sulfidic Gold Ore Pretreated by Roasting	1791

Poster Session

A New Insight into Enhanced Vanadium Extraction from Shale Ore: Compare Leaching Behavior of Direct Acid Leaching and Suspension Oxidation Roasting-Acid Leaching	1798
A Novel Process of Cascade Suspension Roasting-Acid Leaching for Vanadium Extraction from Carbonaceous Shale	1810
Air-Cooling Technology for Magnetising Roasting of Limonite Ore	1821
Comparison of Two Processing Flowsheets for Production of REEs Using Phosphoric Acid Sludge as a Feedstock.	1829
Preliminary Study on Direct Reduction Technology of Oolitic Hematite by Hydrogen-Based Suspension Roasting	1839
Fluidized Reduction Behaviors of Boron-bearing Iron Concentrate Using Hydrogen as Reductant.	1853
Recovery of Rare Earth Elements from Waste NdFeB Permanent Magnets Using Deep Eutectic Solvents	1867
Recovery of Nickel and Copper from Nickel Sulfide Flotation Tailings: Optimization of Effective Parameters	1874
Selective Removal of Arsenic from Enargite-Scorodite Ore via Alkaline-Hypochlorite Leaching	1893
Sulfide Oxidation and Gold Dissolution of a Refractory Gold-Molybdenum Concentrate Using Hypochlorite Solution	1900
The Use of Amino Acids in Gold Leaching; the FTIR and DFT Approach.	1906
Efficient Enrichment of Iron Concentrate from Oolitic Hematite by Minerals Phase Transformation	1918

Physical Separations

Magnetic Separation

Concentrate Quality Improvement for a Magnetite Ore	1932
Enhancing Flotation Kinetics and Magnetic Separation Efficiency for Iron and Carbon Recovery from Blast Furnace Flue Dust through Particle Liberation	1939
Enhancing Ultrafine Iron Ore Particle Recovery with Extended Height Magnetic Matrices	1957
Research on High Efficiency and Low Consumption Beneficiation Technology of Iron, Copper, and Phosphorus in an Ultra Low grade Magnetite	1963
Study on Enhancing Magnetic Separation Recovery of Ultrafine Specularite by Polymer-Bridging Flocculation	1975

Combination of Physical Separation Techniques

A Computational Study on the Hydrodynamics and Particle Transport in a Laboratory-Scale Reflux Classifier	1986
<i>Paper Withdrawn</i>	1997
<i>Paper Withdrawn</i>	2002

Gravity, DMS, Chemical

Application of Falcon Concentrator to Recover Tin, Niobium and Tantalum as By-Products of Lithium from the Beauvoir Granite	2015
Greener, APEO Free Alternatives for Mining Applications	2025

Investigating the Influence of Ore Properties on Separation Mechanisms in a Pilot Scale DMC Cyclone Using Discrete Phase Model CFD Simulations	2028
Passing Probability Model for Non-Uniform Screen Deck	2038
Study on the Dissociation Characteristics of Low-rank Coal Macerals and Enhanced Gravity Separation	2047
Understanding the Segregation of Multi-Component Particles in a Spiral Concentrator	2060

Classification & Characterisation

Investigating the Multidimensional Separation Behavior of Particles in a Cyclosizer Setting—A Case Study on Calcite, Fluorite and Magnesite	2073
Operating Hydrocyclone Air-Core Analysis Using a Sparsity-Based Electrical Resistance Tomography (ERT) Algorithm.	2084
Preliminary Results from a Start-Up Pilot Plant Processing Heavy Minerals Using Bangladesh River Sands	2092
Studies on Multi-Component Particle Behavior in a Hydrocyclone Classifier—Development of a New Mathematical Model	2102
Superabsorbent Polymer Kinetics Influence in Screen Efficiency in High Moisture Content Ores	2114

Flotation

Surface Chemistry of Sulfide Flotation

Assessment of Depression Methods of Activated Pyrite.	2123
Enrichment Feasibility of Tellurides Hosted in Pyrite: A Copper Processing Tailings Case Study.	2136
First-Principles Study on the Decisive Role of Electronic Structure in the Flotation of Cu-Activated Sphalerite	2148
Electrochemical Controlling Domains for Platinum Group Minerals	2160
Heat of the Matter: Application of Microcalorimetry in Evaluating Interfacial Chemistry for Enhanced Flotation Efficiency	2169
Impact of a Residual Anionic Polyacrylamide and Its Mechanical Degradation Level on Chalcopyrite Flotation	2177
Effects of Divalent Cations on the Flotation Separation of Pentlandite from Magnesium-Bearing Minerals	2186
Selectively Oxidizing and Depressing High-Concentration Pyrite in Copper Flotation.	2202
Review of Surface Activation of Pyrite for Selective Separation of Critical Elements	2210
Two-Liquid Flotation for the Recovery of Ultrafine Particles.	2224

Surface Chemistry in Slag, Industrial Minerals, and Other Flotation

Assessment of Collectors for Reverse Iron Ore Flotation at LKAB	2231
Cooperation of Nanobubbles and Mixed Cationic/Anionic Collector on the Fine Lepidolite Flotation	2237
Effect of Temperature Variation on the Copper Slag Flotation at Aurubis-Bulgaria.	2247
Alkylesteramines—A New Surfactant Family with Improved Environmental Profile for Reverse Flotation of Iron Ore	2257
Flotation of Ultrafine Metal Oxides with Sophorolipids	2263
Fundamentals of Rare Earth Mineral Flotation—Understanding Silicates to Increase Metallurgical Performance	2276
Machine Learning Forcefields for Cutting-Edge Description of Mineral-Water Interfaces	2285
Performance of Sorghum Flour as a Depressant in Reverse Cationic Flotation of Iron Ore.	2295

Sustainable Valorization of Phosphate Waste Rock: Ecofriendly Phosphate Recovery Using Novel Flotation Biobased Reagents	2301
The Emergence of Techniques and Methodologies for Measuring Bubble–Particle Attachment	2315
Unravelling the Interaction Between Amine Collectors and Kaolinite Through Adsorption Isotherms and Molecular Modelling.	2325
<i>Sulfide Flotation Applications I</i>	
A Study of the Pulp Chemistry and Flotation Performance of Two Cu-Ni Ores after Milling Using Different Media	2334
Achieving Operational Excellence by Leveraging Flotation Chemistry and Mineralogy	2341
Effect of Aerosol Collector Dosing on Flotation of a Complex Ore	2350
Switchable Frother Technology For Improved Plant Operations	2358
Investigation of Flotation Kinetics of Agglomerated Fine Copper Minerals in Continuous Column Flotation Tests	2363
Developing a New Sulfidization Process to Improve the Flotation of Oxidized Pyritic Gold Ores	2369
<i>Sulfide Flotation Applications II</i>	
Enhanced Understanding of Telluride Flotation to Improve Gold and Tellurium Recovery.	2379
Enhanced Flotation of Ultramafic Nickel Ores Using CO ₂ as a Flotation Gas and Sodium Tripolyphosphate (STPP) as Serpentine Depressant	2388
Fundamental and Applied Aspects of Alkoxycarbonyl Alkyl Dithiocarbamate Interactions with Sulfides and Precious Metals	2402
Improving Chalcopyrite Recovery from Coarse Copper-Gold Ore with Kerosene	2418
On the Effective Collection Time in Conventional and Intensified Flotation Devices	2427
Selective Copper Flotation from a Copper/Nickel Bulk Flotation Circuit	2435
The Sensitivity of Kinetic Characterizations to the Selection of Flotation Intervals in Batch Tests	2441
Use of Controlled Pulp Potential for the Separation of Millerite from Pentlandite by Froth Flotation	2450
<i>Chemical in Flotation I</i>	
Advances in Collector Application: Chemistry Versus Mineralogical Characteristics During PGE and BMS Flotation.	2463
Assesment of a Novel Strong Frother to Improve Metallurgical Performance Without Over Frothing	2476
Investigation of pH Conditions Effect on Xanthate, Dithiocarbamate and S-Triazine Collectors Performance on Platarsite and Sperrylite Minerals.	2483
Mercaptosuccinic Acid as a Novel Selective Inhibitor for Galena in the Flotation Separation of Molybdenite from Galena	2495
<i>Paper Withdrawn</i>	2505
The Effect of an Anionic Polyacrylamide on the Flotation of Chalcopyrite, Enargite and Bornite	2518
<i>Chemical in Flotation II</i>	
Substitution of Zinc Sulphate with a Biodegradable Nontoxic Reagent.	2528
A <i>Paper Withdrawn</i>	2535
Changes in Physicochemical Properties and Flotation Behavior of Bastnaesite after Mineral Phase Transformation	2544

From Microflotation To Industry—A Methodology for Upscaling and Optimizing Reagent Systems in Froth Flotation	2555
Improving Flotation Using Super Collectors	2567
<i>Paper Withdrawn.</i>	2573
<i>Industrial Minerals Flotation I</i>	
An Innovative Reagent Scheme for Sedimentary Phosphate Flotation	2580
An Investigation of Approaches for Enhanced Reverse Flotation of Refractory Hematite Ore	2589
Effective Recovery of Magnesite from Quartz by Depressant-Free Reverse Flotation with a High-Selectivity Collector	2599
Enhanced Recovery of Ultrafine Apatite from ICS-Senegal Phosphate Slime Tailings Using Eriez CavTube Column Flotation Technology	2609
Effect of Sodium Oleate and Kerosene on Hydrophobic Agglomeration of Fine Cassiterite	2624
Selective Recovery of Scheelite from an Archetypal Tungsten Skarn Using Amine and Fatty-Acid Flotation . .	2629
<i>Industrial Minerals Flotation II</i>	
Beneficiation of Limestone: Synergy Between Sorting and Flotation	2639
Optimization of Lepidolite Recovery from Rare Metal Granites: Case Study of the Beauvoir Granite	2648
Sustainable Collectors for Lithium Flotation	2658
The Big Picture of Iron Ore Flotation: Optimizing the Whole Process	2668
Upgrading Carbon from ASR-Char by Froth Flotation: Model Development and Implementation	2675
<i>Hydrodynamics and Gas Dispersion I</i>	
A Model of Froth Flotation with Drainage: Simulations and Comparison with Experiments.	2682
Evaluation of Turbulence in a NextSTEP™ Flotation Cell Using Piezoelectric Vibration Sensors in Multiphase Flows.	2691
The Behavior of Bubble Clusters at the Pulp-Froth Interface	2700
Exploring Froth Zone Performance in Flotation Circuit Optimization.	2708
Mitigating the Adverse Effect of Salts on the Recovery of Fine Particles in Flotation	2714
Role of Surface Forces in the Kinetics of Film Thinning and Contact Angle Formation	2723
Simulating Flotation Cells Using Smoothed Particle Hydrodynamics (SPH).	2731
<i>Hydrodynamics and Gas Dispersion II</i>	
A First DNS Investigation of Turbulent Collisions in Flotation	2739
Enhanced Flotation Separation of Chlorite and Hematite by Micro-Nano Bubbles	2749
A Study of Nanobubble Pre-Conditioning for Enhanced Fine Particle Flotation	2760
Improving Coarse Particle Flotation by Control of Surface and Hydrodynamic Forces.	2770
Improving Flotation Efficiency with Low-Frequency Acoustic Sound	2775
Influence of Ultrafine Particles on the Floatability of Target Minerals: Particle Attachment Dynamics in a Model Stirred Cell	2785
Turbulence Measurement Techniques for Multiphase Flows in Mechanical Flotation Cells.	2794
<i>Flotation Equipment Design I</i>	
Optimization of Operating Parameters in a Reflux Flotation Cell for Ultrafine Flotation	2806
Jameson Cell Operation: Optimization in Base Metal Scavenging	2815
NovaCell™—Technology to Meet the World's Future Copper Demands.	2827

The Impact of Funnels as Pulp-Froth Interface Retrofit Design Modifications on Froth Flotation	2840
The Value of Pneumatic Flotation Demonstrated with Particle-Based Separation Models: A Case Study on KGHM Copper Ore Using Semi-Industrial Imhoflot G-Cell.	2851
<i>Flotation Equipment Design II</i>	
Coalescence in Fluidized Bed Flotation: Understanding the Interplay Between Chemistry and Hydrodynamics	2859
Reducing Fine Gangue Entrainment in Chalcopyrite Flotation in Reflux Flotation Cell	2870
Metallurgical Performance of the Concorde Cell Depending on Operating and Design Parameters in the Flotation of Complex Copper Tailings	2878
Studying Particle Entrainment Mechanisms in Froth Flotation.	2889
Testing the Scalability of a Small-Scale Fluidised Bed Flotation Device for Coarse Particle Flotation	2900
Test-Work for Assessing Coarse Particle Flotation (CPF) in a Polymetallic Application.	2911
<i>Flotation Equipment Design III</i>	
Application of Hydrodynamic Cavitation Induced from the Mach Reactor to Enhance the Flotation of Fine to Ultra-Fine PGMs from the Great Dyke Orebody	2924
Flotation Recovery of Fine Gold Using Pneumatic Imhoflot™ G-Cells.	2935
Flotation—Is There a Place for a New Flotation Cell?	2945
The Effects of Process Parameters on a Pathbreaking Coarse Particles Flotation Device.	2962
Optimization of Operating Condition of REFLUX Flotation Cell (RFC) for Copper Sulfide Ore	2974
The Role of Pulp Solids And Residence Time on Metallurgical Performance of Concorde Cell™.	2983
<i>Flotation of Complex and Problematic Ores</i>	
Deciphering O-Isopropyl Ethyl Thionocarbamate Adsorption Mechanisms for Improved Arsenopyrite Separation from Pyrite Using Density Functional Theory Calculations.	2993
Depression of Sphalerite in Flotation of Complex Sulfide Ores by Extracting Anglesite as a Pretreatment of Flotation.	3002
Evolution of Dissolved Constituent in Pulp During Marmatite-Pyrite/Pyrrhotite Selective Flotation with Redox Potential Regulation	3009
Flotation of Cu-Zn Ores with Complex Mineralogy and Surface Characteristics.	3018
Impact of Platy Morphology in the Flotability of Gangue Minerals: A Talc Case Study	3027
Influence of Grinding Parameters on the Flotation Separation of Talc-Containing Molybdenum Ore	3035
Research of Flotation Theory/Reagents and Key Technologies for Comprehensive Utilization of Low-Grade Copper-Zinc-Indium-Tin Co-Associated Complex Ore	3041
Surface Chemistry of Disodium Carboxymethyl Trithiocarbonate (Orfom® D8) for Depressing Cu in Chalcopyrite-Molybdenite Separation	3046
<i>Surface Chemistry</i>	
Evaluation of the Use of Mixtures of Recycled Vegetable Oil Esters and Biosolids as Collectors for the Flotation of Copper Sulfides	3056
Enhancing Gold-Tellurium Flotation Performance: A Study from Laboratory to Industrial Scale on Åkulla Kankberg Ore at the Boliden Plant	3063
Impact of Low pH Pit Water Containing Various Ion Species on Copper Sulfide Flotation at Chino Mine	3077

<i>Paper Withdrawn</i>	3086
Reagents Modification Study for Improved Flotation of a Gold Ore at the Dundee Precious Metals Krumovgrad Mine, Bulgaria	3093
Lewis Acid-Base Interactions of Allyl Thionocarbamate with Cu Metal and Cu Sulfides	3106

General

Evaluation of Flotation Performance Using a Novel Collector 2-(Octylthio)Aniline for Copper Sulfide Ore Under Various Flotation Conditions	3119
Flotation Technology Research on a Low-Grade Copper-Molybdenum Ore	3126
The Combined Depression of Calcium Chloride and Sodium Humate in the Flotation Separation of Pyrite from Galena Under Low Alkalinity	3134
The Influence of Pulp Chemistry and Galvanic Interaction on the Flotation Behavior of Chalcopyrite in the Presence of Pyrrhotite Superstructures	3147

Energy Minerals

Application of Flotation for Battery Recycling

Forecasting Graphite Recovery from Spent Lithium-Ion Batteries' Black Mass with Particle-Based Separation Models	3158
Investigating the Influence of Particle Size and Shape on Froth Flotation Based Beneficiation of Lithium-Rich Minerals in Slags	3167
Investigating PVDF Binder Influence on Froth Flotation Efficiency of Black Mass from Lithium Ion Battery Recycling—Cyrene vs. Pyrolysis Treatment	3176
Production of Ultrahigh-Purity of Electrode Active Materials from Spent Lithium-ion Batteries Using Thermal Pyrolysis Coupled with Ultrafine Particle Gravity Separation Technology	3183
Enhancement of Flotation Separation Selectivity of Cathode and Anode Materials from Spent Lithium-Ion Batteries Using Plasma Treatment	3193
Recycling Lithium Iron Phosphate Batteries: Investigation of Fine Particle Flotation Using Flocculants	3203
Spent Lithium-Ion Battery Black Mass Variability on Flotation Response	3211

Recycling I

A Novel Approach for Data-Driven Design of Battery Recycling Processes	3221
Preliminary Investigation of a Novel Process for Recycling Samarium-Cobalt Magnets by Selective Oxidation.	3230
Application of Electrodialysis for the Selective Lithium Extraction from Spent Lithium-Ion Batteries	3235
Influence of Different Cell Types on Mechanical Recycling	3240

Recycling II

Impact of Ionomer Containing Particles on the Selective Mechanical Separation Processes of PEM Water Electrolyzer Recycling for PGM Recovery	3251
Major Barriers and Recent Progress in Silicon Solar Module Recycling.	3260
Mechanical Recycling of Complex Structures of Energy Materials	3266
Recycling of Raw Materials in Solid Oxide Cells: Ultrasonic Decoating for Mechanical Liberation and Separation of Perovskite Materials	3276
Review of Current Battery Recycling Technology Pathways	3284

Lithium Processing

Nickel Recovery from Nickel Sulphide Tailings Using Activated Carbon in Acidic Medium	3298
The Impact of Rosin Content in Fatty Acid Collectors on Spodumene Flotation.	3314
Process Optimization for the Lithium Concentrate Recovery from Spodumene Ore in East Kazakhstan	3324
Near Zero-Waste Processing Routes for the Exploitation of the European Hard Rock Lithium Deposits	3334
Lithium-Aluminum-Layered Double Hydroxide Chloride (LDH) Sorbents: Quasi-Elastic Neutron Scattering Studies.	3343
Recovery of Lithium From Lepidolite by Mechanical Activation and Acid Leaching	3352
The Recovery of Critical Minerals from Pegmatite Dykes	3356
Organic Acid Leaching of a Lithium-Bearing Nevada Sedimentary Claystone	3367

Processing—Energy Storage Minerals

Awaruite Recovery by Magnetic Separation and Flotation: Nickel Concentrate with Outstanding Characteristics	3379
Evaluating Environmentally Friendly Lixivants for Lithium Recovery from Montmorillonite Clays	3387
Flowsheet Options for the Hydrometallurgical Production of Battery-Grade Manganese Salts	3395
Process Optimization for the Direct Extraction of Lithium from α -Spodumene via NaOH-Roasting and Water Leaching.	3406
Production of Battery Grade Manganese Sulfate Monohydrate from High Carbon-Ferromanganese Smelter Waste Streams	3419
Production of High Purity Manganese Sulphate for the Battery Market	3426
The Oxidation of Ferrous Ions as a Limitation to the Purification of Leaching Solutions by Iron Precipitation. .	3436

Tailings

Approaches to Tailings Dewatering

Developments in High Tonnage Paste Thickening	3447
Saving Water and Tailing Dam Space for Medium Size Mines— A Case Study Using Centrifuge Technology to Recover Process Water from Mine Tailings	3451
Tailings Dewatering by Tannic Acid-Mediated Polymeric Flocculation and Pressure Filtration	3461
The Impact of Pressure Filter Media Permeability on Filtrate Suspended Solids	3471
Transforming Tailings Management with the Cavex® DE Classification Technology and Innovative Processing Strategies	3476
Ultrasonic Dispersion as a Tool to Recover Ultrafine Particles from Hydrated Iron Ore	3486

Reprocessing of Tailings I

Conversion of Mine Tailings into Cementitious Materials—A Conceptual Framework	3492
Effect of Inorganic Salts on Direct Mineral Carbonation of Natural Olivine Silicate Minerals	3500
Removal of Pyrite from Mine Tailings by Cementation-Magnetic Separation Method for AMD Prevention.	3509
Unlocking Value and Sustainability: Reprocessing Cantung Historical Mine Tailings for Tungsten and Copper	3514
Utilization of Bayer Process Tailings for Recovery of Base Metals and Critical Elements	3526

Reprocessing of Tailings II

Evaluating the Oxidative Resistance of Co-disposed Coal Waste Beds Augmented via Microbially-Induced Calcite Precipitation	3536
<i>Paper Withdrawn</i>	3543
Conversion of Siliceous Tailings to Permeable Bricks—Optimization of Pore Structure	3551
<i>Paper Withdrawn</i>	3564

Plant Design

Plant Design I

A Review of Beneficiation Practices in the United States Iron Ore Industry	3578
Concentrator Design—A Review of Concentrator Design, Construction and Execution from Our Designs in the Early 1940s to the Present-Day Mega Projects	3587
Driving Stagewise Development of Processing Operations—The Path to Expediting Revenue	3599
Full Component Utilization of a Sedimentary Lead-Zinc Sulfides Ore Based on Multi-Stage Tailings Discarding Technology	3611
The Importance of a Pre-Concentration Stage in a Low-Grade Iron Ore Flowsheet	3623

Plant Design II

Analysis and Improvement of Flotation Circuits for Polymetallic Ores	3637
Integrated Flotation Plant Design: Involving Mechanical and Non-Mechanical Cells	3643
Parallel Testing of a Non-Mercury, Non-Cyanide Pilot Plant and a Traditional Small-Scale Gold Processing Plant in the Philippines	3650

General

Exploring Pelletization as a Method to Use Low-Grade Chromite Overburden in India	3657
High-Purity Iron Preparation Process: Research and Technology	3671

Comminution

SAG Milling Equipment Design and Circuit Analysis—Part I and Part II

A New Model to Predict the Power Draw in Tumbling Mills	3684
Dynamic Simulation for Tumbling Mills Using Analytical Solutions	3691
Energy Efficient Grinding with High Powered Gearless Mills	3701
<i>Paper Withdrawn</i>	3715
Full-Scale SAG Mill Modelling Using DEM-SPH Modelling	3731
Effects of the Discharge Design on Wet Grinding Mill Performance	3738
Optimising SAG Mill Operations: Insights from Real-Time Acoustic Monitoring and Analysis	3744
The Effect of Grates Radial Position on an AG Mill Discharge System Using Coupled DEM SPH Simulations	3755
The Influence of Ball Size Distribution and Mill Diameter on Collision Environment	3768
The Logical Next Step in SAG and Ball Mills with Gearless Mill Drives	3777

HPGR Technology

From Concept to Implementation, a Review of the HPGR Circuit Selection for the Côté Gold Project	3790
--	------

High-Pressure Grinding Rolls' Historical Timeline: Past to Future	3799
Evaluation of Bond Working Indices for HPGR Crushing Products in Relationship to Selected Operational Parameters	3809
Optimization of the Chromium Ore Milling Replacing a Bar Mill by a High-Pressure Grinding Rolls (HPGR)	3817
Predicting the Performance of an Industrial HPGR with Severely Worn Rollers Using DEM	3824
<i>Ball Mill Circuits and Fine Grinding</i>	
Dynamic Simulation of Multicomponent Grinding Circuits Using Dyssol.	3831
Investigating Slurry Viscosity Effects in Tumbling Mills Using Two-Way Coupled SPH-DEM Simulations . .	3838
Optimization and Evolution of Large Ring Geared Mill Drives During the First 10 Years of Operation . . .	3846
Pilot Plant for Wet Grinding with Vertical Roller Mill	3859
Prediction of Vertimill Liner Wear by Using Discrete Element Method	3875
Using Functional Performance Analysis and Apparent Cumulative Grinding Rates to Optimize the Processing Performance of Ball Milling Circuits	3881
Vertimill Wear Sensing	3890
<i>Optimization and Ore Feed Property Implications for Comminution Circuits</i>	
Application of Dynamic Process Simulation for Optimizing Bin Sizes of Crushing Plants	3895
Characterisation, Modelling and Description of Multi-Component Ore Types Using the Extended Drop Weight Test	3905
Characterising Diamond Breakage from the Processing of Kimberlite Ore: A Case Study	3918
Insights into Slag Particle Breakage: Integrating Ex-Situ Experiments with In-Situ Compression via X-Ray Computed Tomography	3929
Real-time Particle Size Distribution System for Cone Crusher Optimization.	3938
Unlocking Real-Time Grinding Optimization: Insights from Inside the Mill	3946
<i>Comminution Technology/Innovation</i>	
<i>Paper Withdrawn</i>	3958
Simulation, Design, and Model Validation for the Conjugate Anvil Hammer Mill (CAHM) Platform Using Rocky DEM.	3967
