Volume 13531

Proceedings of SPIE 0277-786X, V. 13531

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *EUV and X-ray Optics: Synergy between Laboratory and Space IX*, edited by René Hudec, Ladislav Pina, Proc. of SPIE 13531, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ASTRONOMICAL X-RAY OPTICS I

- 13531 02 **Development of the follow-up x-ray telescope onboard the Einstein probe and its preliminary in-orbit performance results (Invited Paper)** [13531-2]
- 13531 03 **Czech contribution to AHEAD2020: a summary** [13531-3]
- 13531 04 **Preliminary measurements of optical performances of lobster eye x-ray optics prototype for nanosatellite missions based on new technology** [13531-4]

LABORATORY X-RAY/EUV OPTICS

- 13531 06 **Optimization of grazing incidence x-ray optics for special applications** [13531-5]
- 13531 07 **Experimental hybrid x-ray optical module with wide spectral coverage** [13531-6]
- 13531 08 **Novel technologies for laboratory Wolter type x-ray optics** [13531-7]

INTEGRATED DEVICES

- 13531 09 **Radiation measurements in the stratosphere by the balloon experiment ASTRABAX** [13531-8]
- 13531 0A **Space radiation monitoring and evaluation with Timepix-family detectors** [13531-9]

ASTRONOMICAL X-RAY OPTICS II

- 13531 0C **Low-energy x-ray to soft gamma-ray high-resolution silicon pore optics (Invited Paper)** [13531-10]
- 13531 0D **Development of the focusing mirrors onboard eXTP** [13531-11]
- 13531 0E **Design of the CCD imaging x-ray Focusing Telescope onboard eXTP** [13531-12]

- 13531 OG **Calculation of effective collecting area of a lobster eye with respect to full point spread function** [13531-14]
- 13531 OH **Polydopamine: a bio-inspired polymer for x-ray mirror coatings and other technical applications** [13531-15]

REFRACTIVE, DIFFRACTIVE, AND MULTILAYER X-RAY OPTICS

- 13531 OK **Development of computational framework for optimizing broadband x-ray multilayer coatings for high-energy astrophysics** [13531-18]
- 13531 OL **Ultra shallow silicon EUV gratings fabricated via ion irradiation** [13531-19]

POSTER SESSION

- 13531 OM **A visitor experiment on astronomical x-ray optics for the “Deutsches Röntgen-museum”** [13531-20]
- 13531 OO **From low-energy x-ray to soft gamma-ray silicon pore optics** [13531-22]
- 13531 OQ **LVICE²: advancing astrophysical plasma and dust dynamics research in the cislunar space** [13531-24]
