SPIE

Volume 13563

Proceedings of SPIE 0277-786X, V. 13563

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonics for Quantum 2025*, edited by Michael Reimer, Nir Rotenberg, Proc. of SPIE 13563, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

QUANTUM PHOTONIC CIRCUITS

- 13563 02 **Broadband electro-optic modulation at blue wavelengths in thin-film lithium niobate**
[13563-7]

QUANTUM SENSING

- 13563 03 **Sensing strain with individual NVs utilizing an inverse-design photonic structure** [13563-11]
- 13563 04 **Advancing Rydberg atom-based RF sensors: integrated dielectric amplifiers in MEMS atomic vapor cells** [13563-13]

QUANTUM OPTICS

- 13563 05 **Finding the perfect quantum dot for a quantum repeater** [13563-15]

DEFECTS IN SILICON

- 13563 06 **Exploring the feasibility of various quantum gates between T-centers in silicon** [13563-18]
- 13563 07 **Design parameters of the silicon nanocavities for single photon sources emitting in telecom wavelength** [13563-19]

ATOMS AND IONS

- 13563 08 **Low-loss telecom-band optical nanofiber cavities for interfacing with Yb atomic qubits**
[13563-21]

QUANTUM COMMUNICATION

- 13563 09 **Experimental quantum strong coin flipping using single-photon states (Invited Paper)**
[13563-23]
- 13563 0A **Integrated quantum photonic transceiver: applications to quantum communication and imaging** [13563-25]

QUANTUM DOT SINGLE-PHOTON AND ENTANGLED PHOTON SOURCES

- 13563 0B **Fiber-pigtailed quantum dots in hCBG cavities: plug-and-play quantum light sources for indistinguishable photons at GHz clock-rates** [13563-33]

PHOTONIC STRUCTURES

- 13563 0C **Optimization of circular gratings via guided-mode-expansion-method-based inverse design** [13563-36]

QUANTUM SOURCES AND DETECTORS II

- 13563 0D **Polarization-entangled photon source on a silicon chip for ultra-low-loss fiber transmission** [13563-43]
- 13563 0E **Generation of few-mode photon triplets in high-index-contrast optical fibers** [13563-88]

QUANTUM SENSING AND IMAGING

- 13563 0F **Photon-to-digital converters: a 3D integrated digital SPAD array designed for precise timing applications (Invited Paper)** [13563-44]
- 13563 0G **2GHz single photon avalanche diode detector for quantum key distribution applications** [13563-46]
- 13563 0H **Machine-learning-enhanced quantum state tomography on FPGA** [13563-47]
- 13563 0I **Numerical simulation of classical and quantum ghost imaging in atmospheric turbulence** [13563-48]

QUANTUM MEMORIES AND NONLINEAR OPTICS

- 13563 0J **On-chip generation of photon-added two-mode squeezed thermal states of light** [13563-50]

POSTER SESSION

- 13563 0K **Micro-integrated photonic modules for quantum technology applications** [13563-53]
- 13563 0L **Generating virtual non-Gaussian state via quasi-probability simulation** [13563-54]

- 13563 OM **Quantum dynamics of coupled quasi-normal mode cavities with significant time delays** [13563-55]
- 13563 ON **Towards a portable two-photon cesium optical clock** [13563-56]
- 13563 OO **3D computational imaging for photonic LiDAR with high noise resilience and photon efficiency** [13563-61]
- 13563 OP **3D point cloud object classification with PointNet-Lite and data augmentation** [13563-62]
- 13563 OQ **Metasurface-based mesoscale cavities for enhanced light-matter interaction** [13563-63]
- 13563 OR **An agile laser system for Rydberg atom-based sensing** [13563-64]
- 13563 OS **Measurement of photon number statistics using photon-number resolving detectors** [13563-66]
- 13563 OT **Quantum light generation and characterization via cascaded single-photon Raman interactions** [13563-67]
- 13563 OU **H₂-optimized software-defined laser for quantum technologies in space** [13563-72]
- 13563 OV **The role of entanglement in quantum reservoir computing with coupled Kerr nonlinear oscillators** [13563-73]
- 13563 OW **Bayesian inference of cat-state degradation via machine learning** [13563-87]
