

PROCEEDINGS OF SPIE

Seventh International Conference on Intelligent Medicine and Image Processing (IMIP 2025)

Mohd Shafry Mohd Rahim
Editor

28–31 March 2025
Kyoto, Japan

Sponsored by
Ritsumeikan University (Japan)

Cosponsored by
Tiangong University (China)

Published by
SPIE

Volume 13658

Proceedings of SPIE 0277-786X, V. 13658

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Seventh International Conference on Intelligent Medicine and Image Processing (IMIP 2025)*, edited by Mohd Shafry Mohd Rahim, Proc. of SPIE 13658, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MEDICAL IMAGE DETECTION AND MODEL DESIGN

- 13658 02 **Application of the YOLOv5-MC model integrating contextual information in embryo image detection** [13658-17]
- 13658 03 **Hip fracture detection in x-ray images using deep learning** [13658-15]
- 13658 04 **Consistency of along-tract-quantification between ex-vivo and in-vivo human brain** [13658-29]
- 13658 05 **Enhanced detection of lung nodules in complex chest x-rays using YOLO models and weighted box fusion** [13658-9]
- 13658 06 **A low-complexity LSTM model for real-time fall detection by a video camera** [13658-25]
- 13658 07 **Research on epilepsy detection method based on spatiotemporal feature fusion and LASSO optimization** [13658-14]

MEDICAL IMAGE SEGMENTATION AND ALGORITHMS

- 13658 08 **Automatic segmentation for wrist x-ray based on nnU-Net** [13658-30]
- 13658 09 **Towards accurate breast tumor segmentation in ultrasound images using center representation learning** [13658-31]
- 13658 0A **Attention Res-UNet for coronary CPR image stenosis assessment** [13658-12]
- 13658 0B **An automated system for chromosome instance segmentation and pair matching using YOLOv8-Seg** [13658-8]

MEDICAL IMAGE ANALYSIS AND PROCESSING METHODS

- 13658 0C **AGEM-Net: optimization method for subtype classification of liver tumors via adaptive gamma transform for dark region enhancement, improved metabolic differentiation, and enhanced edges** [13658-23]
- 13658 0D **Counterfeit medicine detection by visual inspection of package design using multimodal LLMs with text and image prompt engineering** [13658-5]

- 13658 OE **Detection network for low contrast organs in mouse micro-CT images with prior knowledge of inter-organ spatial relationship** [13658-7]
- 13658 OF **Revisit SwinIR with entropy-based training scheme** [13658-4]
- 13658 OG **Virtual reality headset devices: user experience and device optimization for the Apple Vision Pro** [13658-28]

COMPUTER AIDED DISEASE DIAGNOSIS AND IMAGING ANALYSIS

- 13658 OH **Biomimetic olfactory neural network-enhanced electronic nose for early lung cancer detection** [13658-10]
- 13658 OI **Multitask learning approach for colorectal polyp screening via tongue image analysis** [13658-3]
- 13658 OJ **Deep learning radiopathology based on the enhanced twins-SVT model predicts the effect of neoadjuvant therapy for rectal cancer** [13658-26]
- 13658 OK **Hierarchical spatial attention Mamba network for predicting pathological complete response to neoadjuvant chemotherapy from breast DCE-MRI** [13658-1]
- 13658 OL **A machine learning model based on multimodal features of ultrasound videos for predicting postoperative pregnancy** [13658-11]
- 13658 OM **An efficient automated diagnosis of kidney tumors by integrating image processing based localization and enhanced U-Net-based semantic segmentation** [13658-16]

APPLICATION OF MACHINE LEARNING IN INTELLIGENT MEDICAL SYSTEMS

- 13658 ON **Research on identifying lung and bronchial diseases based on machine learning methods** [13658-21]
- 13658 OO **A hip fracture prediction model for Chinese middle-aged and elderly people based on the CHARLS2020 database** [13658-24]
- 13658 OP **Psychological stress indicator using heart rate variability (HRV)** [13658-18]
- 13658 OQ **Breast cancer diagnosis and risk factor analysis based on machine learning** [13658-27]
- 13658 OR **A method for real-time detection of patient's anger levels** [13658-13]
