

PROCEEDINGS OF SPIE

Second International Conference on Electronics, Electrical, and Control System (EECS 2025)

**Ljiljana Trajkovic
Zhe Chen**
Editors

**7–8 March 2025
Dali, China**

Organized by
Wuhan Institute of Technology

Published by
SPIE

Volume 13659

Proceedings of SPIE 0277-786X, V. 13659

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Second International Conference on Electronics, Electrical, and Control System (EECS 2025)*, edited by Ljiljana Trajkovic, Zhe Chen, Proc. of SPIE 13659, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

ELECTRONIC AND ELECTRICAL SYSTEMS

- 13659 02 **Grid reactive power optimization based on tabu search optimization of the most valuable player algorithm** [13659-10]
- 13659 03 **Research on distributed PV monitoring and control strategy based on NB-IoT** [13659-18]
- 13659 04 **Research on effective equivalent salt deposit density for silicone rubber composite insulator in western inner Mongolia** [13659-20]
- 13659 05 **High-precision data synchronization and time alignment method based on power line carrier communication** [13659-71]
- 13659 06 **Dynamic fault tree and Bayesian network risk assessment model for power Internet of Things terminal** [13659-29]
- 13659 07 **Research on the control strategy of solar photovoltaic wall electricity sales based on improved variable step disturbance observation method** [13659-34]
- 13659 08 **Defect detection in transmission line scenarios based on TL-YOLO** [13659-12]
- 13659 09 **Research on the auxiliary decision-making method for photoelectric equipment based on the solar irradiance calculation model** [13659-30]
- 13659 0A **Design method of power supply cable interference filter used for underwater motors** [13659-14]
- 13659 0B **Bio-inspired hybrid power generation from vehicle suspension vibration energy recovery** [13659-27]
- 13659 0C **Electro-optic imaging-based optimization of insulation structure in high-voltage bushings** [13659-42]
- 13659 0D **Intelligent joint debugging and acceptance method for portable substation monitoring information based on machine learning** [13659-36]
- 13659 0E **Optimization configuration for distributed photovoltaic and storage coordination based on cluster control** [13659-37]
- 13659 0F **Adaptive control framework for intelligent water treatment plants integrating optical sensing and reinforcement learning** [13659-50]

- 13659 OG **Reinforcement learning-based optimization for power system scheduling under renewable energy uncertainty** [13659-38]
- 13659 OH **Electrochemical model-based fast charging strategy for lithium-ion batteries with lithium plating constraints** [13659-39]
- 13659 OI **Model predictive control method for improving the frequency response of photovoltaic-storage virtual synchronous generator (VSG) under islanded grid conditions** [13659-58]
- 13659 OJ **A load shedding method driven by dynamic optimization and spatio-temporal modeling of new energy grid connection** [13659-49]
- 13659 OK **Optical sensing-imaging fusion with dynamic visualization for enhancing spatiotemporal resolution in power dispatch automation systems** [13659-62]
- 13659 OL **Insulator defect detection algorithm based on improved YOLOv5n** [13659-51]
- 13659 OM **Transmission line digital design technology and its application cases: integrating optical sensing and monitoring** [13659-63]
- 13659 ON **Expectation and status key technology of 3D model design for substation** [13659-75]
- 13659 OO **Design of object-oriented power dispatch automated communication system with optical integration** [13659-80]
- 13659 OP **Research on risk assessment method of power grid equipment for dispatching big data** [13659-78]
- 13659 OQ **Method for optimizing voltage quality in feeder areas with distributed resource collaborative control** [13659-13]
- 13659 OR **Short-term power load forecasting method based on SSA for optimizing CNN-GRU combination model** [13659-25]
- 13659 OS **Research on power system scheduling based on cuckoo algorithm and optical optimization** [13659-52]
- 13659 OT **Optimization of power business query and identification method for mobile counter intelligent interactive system** [13659-41]
- 13659 OU **Application of risk identification and control algorithms in power grid dispatch operations: innovative practices integrating optical sensing technologies** [13659-54]
- 13659 OV **Design of adaptive filtering algorithm for SOC estimation in electrochemical battery management systems** [13659-44]
- 13659 OW **Design and implementation of power dispatch optimization based on dynamic programming algorithm integrated with optical sensing technology** [13659-55]
- 13659 OX **A meta-learning-driven approach for optimizing grid start-up schemes** [13659-48]

- 13659 0Y **Ordered charging strategy for electric vehicles integrating optical technologies under demand response mechanism** [13659-60]
- 13659 0Z **The correlation analysis and error prevention technology of power outage and restoration regulation behavior based on big data** [13659-77]

INTELLIGENT CONTROL SYSTEM

- 13659 10 **Data analysis of CosmicWatch muon detector under different pressures and zenith angles** [13659-1]
- 13659 11 **Spot pattern recognition and optimization of semiconductor lasers based on computer vision and deep learning** [13659-22]
- 13659 12 **Influence of non-central temperature control on the heat treatment effect of pipeline** [13659-2]
- 13659 13 **An improved fast convergent sliding mode control design of a cascade system based on the hierarchical structure and an adaptive PID sliding surface** [13659-6]
- 13659 14 **Intelligent optimization of variational mode decomposition for ultrasonic signal processing in optical interference noise suppression** [13659-67]
- 13659 15 **The optimization of principal component analysis algorithm through multiscale local binary pattern feature extraction** [13659-74]
- 13659 16 **Structural design and motion trajectory planning of a four-degree-of-freedom meal assistance robot** [13659-16]
- 13659 17 **Low-power embedded control system for tea machinery based on spiking neural networks (SNN)** [13659-64]
- 13659 18 **Hexapod robotic agricultural crop growth monitoring system: applications of digital twins and energy optimization** [13659-32]
- 13659 19 **A multisource information fusion layering method for penetration fuzes based on fuzzy weighting algorithm and backpropagation** [13659-43]
- 13659 1A **Study on the influence of salt spray environment on the friction and wear performance of bow net system and its optical characterization** [13659-3]
- 13659 1B **A novel optimal design of IMC-PID controller incorporating PSO and predictive functional control framework** [13659-9]
- 13659 1C **Optimization strategy for smooth torque distribution in switched reluctance motors based on offline optimization** [13659-69]
- 13659 1D **Development of filter based on UV failure mechanism** [13659-4]

- 13659 1E **Research on vocal music visualization technology based on FFT and ESP32** [13659-68]
- 13659 1F **Design and analysis of a multifunctional pet companion robot based on Fusion 360**
[13659-79]
- 13659 1G **A novel non-invasive approach for estimating cardiac output using photoplethysmography**
[13659-26]
- 13659 1H **A lightweight multisensor data fusion framework for embedded electromechanical systems
based on optimized Dempster-Shafer theory** [13659-35]
- 13659 1I **Design of model car based on STM32F411 series-chip microcomputer and ASRPRO
graphical programming sound control board** [13659-31]
- 13659 1J **Adaptive gait planning for quadruped robots in complex environments** [13659-15]
- 13659 1K **Denoising method for CSEM signals based on sparse representation and its application in
underground electromagnetic imaging** [13659-8]
- 13659 1L **The design and research of six-legged robot based on traveling on supporting pillar of wind
turbine and electromagnet** [13659-23]
- 13659 1M **Design and research of an integrated navigation system for intelligent shore power robots**
[13659-24]
- 13659 1N **Design and optimization of a wall-climbing robot with multisurface adaptation** [13659-47]
- 13659 1O **Path planning for arc-shaped external track welding robots based on RRT*** [13659-59]
- 13659 1P **A federated learning framework integrating optical imaging technologies for tea leaf
sorting quality assessment** [13659-66]
- 13659 1Q **Technology research on embedded real-time multicore processor based on RISC-V
architecture** [13659-40]
- 13659 1R **Research on intelligent prediction system for massive multiuser access load
based on deep learning** [13659-11]
- 13659 1S **Design of a measurement performance testing system for fiber grating pressure instruments
in high-temperature working condition** [13659-70]
- 13659 1T **Kinematic simulation analysis of section cutting of cantilever roadheader** [13659-28]
- 13659 1U **Design and implementation of a simulation process efficiency improvement AI agent
based on one-dimensional simulation software** [13659-56]
- 13659 1V **Harmonic suppression algorithm for permanent magnet synchronous motors based on the
improved low-pass filter method** [13659-73]

- 13659 1W **Satellite spot beam coverage algorithm under interference conditions** [13659-81]
- 13659 1X **Fixed clustering consistency of multiagent systems based on event triggering** [13659-76]
- 13659 1Y **Construction of visualization analysis model of holographic monitoring data based on deep learning** [13659-5]
- 13659 1Z **Research on the jumper disconnecting/connecting robotic system in 220kV substations** [13659-72]
- 13659 20 **Hardware-in-loop simulation of high-speed maglev vehicle based on HiGale** [13659-7]
- 13659 21 **Research on the state detection of transmission line fittings of wiring robot based on integrated x-ray and infrared fusion digital imaging technology** [13659-61]
- 13659 22 **Design and application of spacecraft overall harness digital system** [13659-17]
- 13659 23 **Research of robot for detecting bushing in enclosed busbar of hydropower station** [13659-65]
