PROCEEDINGS OF SPIE

International Conference on Optoelectronics and Information Technology (ICOIT 2025)

Robertas Damaševičius
Shi-Kuo Chang
Junsheng Shi
Peng Geng
Editors

7–9 March 2025
Wellington, New Zealand

Organized by
Yunnan Normal University (China)

Sponsored by
Kaunas University of Technology (Lithuania)
Shenyang Normal University (China)

Published by
SPIE

Volume 13665

Proceedings of SPIE 0277-786X, V. 13665

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Optoelectronics and Information Technology (ICOIT 2025)*, edited by Robertas Damaševičius, Shi-Kuo Chang, Junsheng Shi, Peng Geng, Proc. of SPIE 13665, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

PHOTOVOLTAIC TECHNOLOGY AND ELECTROMAGNETIC WAVES

13665 02 **Impact of C-class solar storms on low-frequency signal strength: patterns and variations** [13665-6]

13665 03 **Simulation of radio wave propagation characteristics in complex environment** [13665-19]

13665 04 **Seasonal distributed photovoltaic power forecasting method considering spatial-temporal climate factors** [13665-30]

13665 05 **The modeling application of second-order dynamic parameter RC model in SOC prediction of lithium battery** [13665-31]

13665 06 **Design and analysis of winding rotary transmitter of aerospace servo system** [13665-43]

13665 07 **Design and application of intelligent sensing terminal for low-voltage distributed photovoltaic systems** [13665-46]

13665 08 **Research on optimization of photovoltaic panel recognition and localization algorithm based on UAV imagery** [13665-52]

13665 09 **Influence of atmospheric humidity and aerosol on infrared stealth performance of aircraft** [13665-59]

13665 0A **Characterization of suspended discharges in SF6/N2 insulated GIS at different air pressures** [13665-67]

13665 0B **IP and optical network collaboration under hierarchical control models using deep reinforcement learning** [13665-72]

13665 0C **Analysis and application of semi-enclosed bay sedimentary system based on optical remote sensing and seismic sedimentology** [13665-90]

13665 0D **Design study of ultra-compact sub-wavelength grating polarization rotators in integrated photonics systems** [13665-92]

13665 0E **Electromagnetic analysis for optimized design of MOGA-based coreless disk motor** [13665-95]

13665 0F **A comb array antenna in the band of 77GHz** [13665-109]

13665 0G **Optimized output power research based on the fuzzy algorithm** [13665-114]

ELECTRONIC CIRCUITS AND ELECTRICAL ENGINEERING

13665 0H **A design study of a distribution cable connection auxiliary device applicable to smart grid** [13665-3]

13665 0I **Integrated design for the electric servo actuator and driver of gimbaled nozzle** [13665-7]

13665 0J **Research on multi-objective optimization and resource allocation strategies for satellite communication based on the dual-exclusion zone model** [13665-25]

13665 0K **Research on extension design of airborne electronic equipment audio management module cabin environment oxygen supply and purification system** [13665-44]

13665 0L **Research on edge intelligent gateway for unmanned substations based on ARM processor** [13665-54]

13665 0M **Data encryption and security protection technology for electric power system** [13665-56]

13665 0N **Multilevel microgrid interactive integration and intelligent scheduling system** [13665-57]

13665 0O **Multiparameter perception and transmission technology for near electric operation safety based on 3D radar** [13665-61]

13665 0P **Application of wind lidar in detection of low level wind shear** [13665-76]

13665 0Q **Design and optimization of smart home system based on sensor network** [13665-78]

13665 0R **Optimal design of GaN bi-directional three-phase ANPC inverter based on intelligent control** [13665-81]

13665 0S **Development and test of insulation recovery device for overhead wires in distribution networks based on UAV** [13665-88]

13665 0T **Innovation of electromechanical equipment and automation control technology for intelligent poultry farming industry** [13665-89]

13665 0U **Design and implementation of prefetchable asynchronous FIFO** [13665-91]

13665 0V **Research on the smart firefighting real-time monitoring and response system based on 5G technology** [13665-93]

13665 0W **Structural optimisation of a low-frequency wireless energy transmission system applied to linear motors** [13665-94]

13665 0X **Intelligent adaptive design of brush cleaning machine** [13665-97]

13665 0Y **Research on quantitative evaluation method of external corrosion state of buried steel pipeline affected by HVDC transmission system** [13665-99]

13665 0Z **Research on global power equipment trade prediction and logistics optimization based on 5G and edge computing** [13665-103]

13665 10 **Synergistic design and simulation of optical and semiconductor materials in integrated circuits** [13665-104]

13665 11 **Simulation and transmission analysis of wind-induced noise in an SUV** [13665-106]

13665 12 **Research on detection method for abnormal discharge in switchgear based on dual-spectral radiation characteristics** [13665-111]

13665 13 **The design and implementation of a resource scheduling and management system for electric vehicle charging stations** [13665-112]

13665 14 **The fault ride-through capability of PCS based on optimization control method** [13665-113]

13665 15 **Analysis of the application of satellite remote sensing imaging technology in remote supervision of power grid infrastructure projects** [13665-115]

13665 16 **Operational state inspection strategy of transmission line based on remote sensing satellite intelligent recognition** [13665-116]

IMAGE ANALYSIS AND PROCESSING

13665 17 **Surface defect detection of strip steel based on improved Yolov5 algorithm** [13665-8]

13665 18 **Small target detection from UAV based on ACW-YOLOv8** [13665-9]

13665 19 **Complex weather target detection based on ASF-YOLOv10** [13665-10]

13665 1A **Research and implementation of intelligent license plate recognition algorithm based on improved BP neural network** [13665-11]

13665 1B **High-fidelity face image inversion and generation algorithm** [13665-13]

13665 1C **Visual recognition system of crop diseases based on intelligent machine learning** [13665-15]

13665 1D **Research on visualization of crop growth combined with intelligent image analysis technology** [13665-16]

13665 1E **AI-based video action recognition and analysis of teachers and students in smart classroom** [13665-23]

13665 1F **Multiscale SAM for cell segmentation** [13665-27]

13665 1G **Research on local feature extraction model for image retrieval based on attention mechanism** [13665-34]

13665 1H **Research and development of mobile app for editing maps of intelligent cleaning robots** [13665-47]

13665 1I **Application of image processing technology in unmanned aerial vehicle (UAV) power line inspection** [13665-49]

13665 1J **Design of substation video surveillance system and research on efficient video compression based on cloud computing technology** [13665-50]

13665 1K **Intelligent detection and localization system for photovoltaic project components based on image recognition** [13665-53]

13665 1L **UAV path planning for power inspection and 3D modelling technology of image data** [13665-62]

13665 1M **Study of spectral image extraction and component identification of insulator surface contamination** [13665-65]

13665 1N **Application of computer vision in indoor and outdoor environment design of energy stations** [13665-75]

13665 1O **Automatic analysis and diagnosis of clinical pathological images based on big data and artificial intelligence** [13665-79]

13665 1P **Medical imaging automated diagnosis system based on deep learning** [13665-80]

13665 1Q **Deep practice of cross-modal semantic segmentation in image recognition with computer assistance** [13665-86]

13665 1R **An innovative left ventricle image segmentation approach based on magnetic resonance images** [13665-96]

13665 1S **Radar video fusion vehicle detection based on improved YOLOV5** [13665-98]

13665 1T **An improved image sharpness assessment method based on secondary blurring** [13665-102]

13665 1U **High-resolution rainfall radar image analysis and heavy rainstorm prediction based on convolutional neural networks** [13665-105]

INTELLIGENT SIGNAL PROCESSING

13665 1V **Application and algorithm optimization of time-frequency analysis-based millimeter-wave radar in power infrastructure protection against external damage** [13665-12]

13665 1W **Intelligent information management system of mining area safety combined with intelligent automation technology** [13665-14]

13665 1X **Personalized travel route recommendation combined with intelligent terminal communication technology and intelligent sensing technology** [13665-17]

13665 1Y **Analysis of UAV intelligent communication methods based on crowd sensing** [13665-18]

13665 1Z **Research on cybersecurity situation prediction based on fusion model** [13665-20]

13665 20 **Research on flow monitoring based on mixed sampling network** [13665-21]

13665 21 **Optimization and implementation of vehicle speed detection algorithm for roadside monocular cameras in intelligent transportation** [13665-24]

13665 22 **Research on encrypted traffic classification method based on generative adversarial networks** [13665-28]

13665 23 **Generalization method of power customer service knowledge recommendation model based on language model+GraphRAG** [13665-29]

13665 24 **Research on wind power load forecasting based on deep learning** [13665-32]

13665 25 **Research on the method of risk analysis for power cost control based on deep fusion of multisource heterogeneous data** [13665-33]

13665 26 **ACGAN-based radar emitter recognition under small sample conditions** [13665-35]

13665 27 **A novel RSSI fingerprint localization method based on feature learning** [13665-36]

13665 28 **Research on intelligent detection method for wave-making wake of underwater vehicle** [13665-42]

13665 29 **A composite network model for GIS insulation defect identification model considering the spatiotemporal PRPD pattern** [13665-45]

13665 2A **Research on lightweight visual autonomous navigation and AI recognition technology of unmanned aerial vehicles based on fuzzy PID algorithm** [13665-48]

13665 2B **Power maintenance site safety production control improvement measures and practice research** [13665-51]

13665 2C **State estimation and anomaly detection of power system based on deep learning** [13665-55]

13665 2D **Research and application on key technologies of microgrid cluster cooperative scheduling control** [13665-58]

13665 2E **Design and implementation of an intelligent grass-square grid planting robot for desert wind control** [13665-64]

13665 2F **Utilizing deep learning for the accurate and integrated management of single-row soybean seeding machinery** [13665-74]

13665 2G **Application research of large language models for power grid load forecasting** [13665-77]

13665 2H **Research on a data-driven privacy protection model for electric power data based on data classification** [13665-82]

13665 2I **Fault diagnosis model of main transformer based on acoustic monitoring** [13665-83]

13665 2J **Modeling and simulation of underwater ultrasound energy transfer and its application in communication systems** [13665-84]

13665 2K **Health status assessment and fault diagnosis system for main transformer equipment based on acoustic signals** [13665-85]

13665 2L **Research on power grid real-time condition monitoring and adaptive control strategy based on edge computing** [13665-87]

13665 2M **Millimeter wave radar path optimization and obstacle avoidance technology research in UAV navigation systems** [13665-100]

13665 2N **Construction of an online water quality monitoring system using spectral analysis and deep learning** [13665-101]

13665 2O **Research on cloud computing resource optimization scheduling based on artificial intelligence** [13665-107]

13665 2P **Simplified algorithm for buried pipe system of heat pump based on microcontroller** [13665-108]

13665 2Q **TRFSA-HQS: transformer-based MRI compressed sensing network with frequency domain self-attention** [13665-110]
