

PROCEEDINGS OF SPIE

International Conference on Information Optics and Optoelectronics Technology (CIOT 2024)

**Yang Yue
Lingfeng Shi
Manuel Filipe Costa**
Editors

**22–24 November 2024
Dali, China**

Organized by
Xi'an Jiaotong University (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13683

Proceedings of SPIE 0277-786X, V. 13683

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Information Optics and Optoelectronics Technology (CIOT 2024)*, edited by Yang Yue, Lingfeng Shi, Manuel Filipe Costa, Proc. of SPIE 13683, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

FRONTIER ADVANCES IN OPTICAL DETECTION AND IMAGING TECHNOLOGY

- 13683 02 **Analysis of the multi-focus modulation via microlens array and digital micromirror device**
[13683-35]
- 13683 03 **Self-healing ability of rotating light fields** [13683-9]
- 13683 04 **A method for detecting chloride ions in suspended droplets in the atmosphere based on Raman scattering** [13683-19]
- 13683 05 **Comprehensive bilateral and gradient-based least squares circle fitting algorithm for precision circular spot identification** [13683-13]
- 13683 06 **Design of a broadband mid-to-far infrared metamaterial absorber** [13683-34]
- 13683 07 **Optical design of real-time fluorescence detection system** [13683-21]
- 13683 08 **High extinction ratio polarizer based on ECF decorated with graphene/PMMA stack**
[13683-37]
- 13683 09 **Multispectral radiometric thermometry data processing under strong reflective radiation interference** [13683-23]
- 13683 0A **Research on low-pressure air shock wave based on miniature high-sensitivity fiber Fizeau cavity pressure sensor** [13683-16]
- 13683 0B **Anomaly detection based on positive and negative phase angle light intensity templates for satellites** [13683-10]
- 13683 0C **Research on thermal infrared hyperspectral scene simulation** [13683-2]
- 13683 0D **High dynamic range imaging method based on gain factor assisted calibration and gray-level partitioning** [13683-4]
- 13683 0E **Progress in super-resolution imaging based on point spread function engineering**
[13683-28]
- 13683 0F **Reconfigurable photovoltaic modulation based on the MoTe₂ phase transition memristor**
[13683-33]
- 13683 0G **An optogenetic system with high spatiotemporal resolution for brain-on-chips** [13683-17]

- 13683 OH **An improved method for laser spot image restoration in the wavelet domain** [13683-5]
- 13683 OI **Study on the variation of radiation characteristics of optical thick media with species** [13683-32]

OPTOELECTRONICS AND POWER INFORMATION TECHNOLOGY RESEARCH

- 13683 OJ **A study on adaptive value setting technology for full-process distribution networks under shared architecture** [13683-27]
- 13683 OK **AI recognition of electricity meter bar code based on image binarization enhancement processing algorithm** [13683-25]
- 13683 OL **Heat flow calculation for electrically heated molten salt storage tank under operational conditions** [13683-7]
- 13683 OM **Study on the aging characteristics of reactor encapsulating insulation based on time-domain dielectric response** [13683-31]
- 13683 ON **1,4-bis (9,10-anthraquinonyl) benzene (BAQB) organic cathode for K-ion batteries** [13683-26]
- 13683 OO **Amplitude-phase retrieval attack-free asymmetric cryptosystem based on equal modulus decomposition** [13683-24]
- 13683 OP **The study of NOMA-VLC system with the combination of convolutional neural networks and probabilistic shaping** [13683-12]
- 13683 OQ **Generating iso-propagating vortex using dielectric metasurface** [13683-18]
- 13683 OR **Lossy mode resonant sensor with high detection range based on hollow core fiber** [13683-22]
- 13683 OS **A comparison of two-phase retrieval algorithms** [13683-14]
- 13683 OT **Generation and self-healing of serpentine airy beams** [13683-3]
- 13683 OU **Network and frequency separation training for low-dose CT denoising with structural reparameterization** [13683-1]
- 13683 OV **12-bit pipelined SAR ADC with PGA for image sensing signals** [13683-11]
- 13683 OW **Single-phase sinusoidal pulse width modulation inverter power supply design** [13683-38]
- 13683 OX **Substation DC power supply system based on fault self-healing and wave recording technology** [13683-39]
