

PROCEEDINGS OF SPIE

International Conference on Optoelectronic Information and Communication Technology (OICT 2025)

Giuseppe Buja

Hai-Han Lu

Editors

21–23 February 2025

Singapore

Organized by

National Taipei University of Technology (China)

Sponsored by

Huazhong University of Science and Technology (China)

Xinjiang University (China)

SPIE

Volume 13684

Proceedings of SPIE 0277-786X, V. 13684

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Optoelectronic Information and Communication Technology (OICT 2025)*, edited by Giuseppe Buja, Hai-Han Lu, Proc. of SPIE 13684, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510693142

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

INTERNATIONAL CONFERENCE ON OPTOELECTRONIC INFORMATION AND COMMUNICATION TECHNOLOGY

- 13684 02 **Intelligent perception and regulation of fragmented flexible load resources in microgrid based on deep learning** [13684-1]
- 13684 03 **Research on building and landscape protection of traditional villages in Conghua based on machine learning and remote sensing observation** [13684-2]
- 13684 04 **Construction of business Korean intelligent Q&A system based on knowledge graph** [13684-3]
- 13684 05 **Research on performance optimization of ultra-high-speed backbone network transmission based on optical communication hardware** [13684-4]
- 13684 06 **Research on the application and innovation mode of Internet of Things technology in enterprise digital supply chain** [13684-5]
- 13684 07 **Exploring blockchain technology for data security research: distributed ledger technology** [13684-6]
- 13684 08 **Application of intelligent infrared thermal imager in thermal image feature recognition of power equipment in substation** [13684-7]
- 13684 09 **Application of multispectral infrared thermal imager in infrared imaging accurate recognition of substation equipment under complex conditions** [13684-8]
- 13684 0A **Open circuit fault diagnosis technique of charging pile IGBT based on improved sliding mode observer** [13684-9]
- 13684 0B **Application of DC resistance tester in circuit resistance measurement of relay protection device in substation** [13684-11]
- 13684 0C **Research on identification technology of power user load characteristics based on cluster analysis** [13684-12]
- 13684 0D **Research on constructing risk characteristic analysis model of power spot market based on data clustering method** [13684-13]
- 13684 0E **5G power virtual private network test service management platform resource scheduling and optimization algorithm** [13684-14]
- 13684 0F **Automatic positioning and 3D scanning of parts based on point laser scanning** [13684-15]

- 13684 OG **Intelligent optimization of Y2O3-doped AgSnO2 electrical contact materials: a machine learning and finite element analysis approach [13684-16]**
- 13684 OH **Grid connected frequency regulation control algorithm based on scale energy storage participation [13684-17]**
- 13684 OI **Real-time scheduling optimization of smart grid based on deep reinforcement learning [13684-18]**
- 13684 OJ **Research on power grid demand side management planning method considering distributed generation and interruptible load [13684-19]**
- 13684 OK **Research on access control model of conference system in small LAN environment [13684-20]**
- 13684 OL **Cryptography solutions for power system data security and access control [13684-21]**
- 13684 OM **Design of an information system for the integration of outdoor sports and intelligent devices in northern Guangxi [13684-22]**
- 13684 ON **Construction of power grid data security protection system based on commercial cryptography technology [13684-23]**
- 13684 OO **Research on the construction and application of product evaluation system based on LDA and optimized FAHP model [13684-24]**
- 13684 OP **Research on load forecasting and scheduling optimization algorithm of power system based on artificial intelligence [13684-25]**
- 13684 OQ **Intelligent decision-making method of UAV cooperative operation based on situation awareness [13684-26]**
- 13684 OR **Research on standardized optimization and intelligent decision-making of power dispatching operation based on reinforcement learning [13684-27]**
- 13684 OS **Multi-input multioutput dual estimation network for atmospheric turbulent image restoration [13684-28]**
- 13684 OT **Design and practice research of intelligent delivery system of biological natural enemies based on UAV [13684-29]**
- 13684 OU **AIGC-driven optoelectronic information processing technology helps vocational colleges transform the cultivation of cross-media creative talents in animation majors [13684-30]**
- 13684 OV **Modeling and simulation of communication processes in the Starlink system [13684-31]**
- 13684 OW **Research on classification and recognition of electronic warfare signals based on neural network [13684-32]**
- 13684 OX **Research on throughput calculation algorithms for low Earth orbit satellite constellations [13684-33]**

- 13684 0Y **Research on polarization-independent spatial light modulator in all-optical switching networks based on metasurface technology** [13684-34]
- 13684 0Z **High-performance thin-film lithium niobate modulator with periodic capacitively loaded traveling-wave electrodes** [13684-35]
- 13684 10 **Research on information extraction and sentiment data mining method based on neural network** [13684-36]
- 13684 11 **Dynamic update and feedback mechanism of building three-dimensional model based on Internet of Things** [13684-37]
- 13684 12 **Design of remote nursing system for patients with chronic diseases based on Internet of Things** [13684-38]
- 13684 13 **Real-time optimization and resource scheduling system for carbon emission disclosure in thermal power industry based on adaptive computing** [13684-39]
- 13684 14 **Research and application of emergency system for power optical cable transmission faults based on dynamic self-regulation technology** [13684-40]
- 13684 15 **Rapid detection method for edible oil adulteration based on hyperspectral imaging and transformer** [13684-41]
- 13684 16 **Research on network security situation awareness algorithm based on deep learning** [13684-42]
- 13684 17 **A hierarchical fault location method for power lines based on instantaneous phase consistency** [13684-43]
- 13684 18 **Design of electric power training remuneration management system based on MVC model** [13684-44]
- 13684 19 **Research on microcontrol technology of gas insulated switch solenoid valve based on environmental monitoring characteristics** [13684-45]
- 13684 1A **Modular adaptation and networking technology of AI-based video analysis systems in telecommunications** [13684-46]
- 13684 1B **Research and design implementation of payload interface testing equipment** [13684-47]
- 13684 1C **Application of big data analysis in anomaly detection of communication networks** [13684-48]
- 13684 1D **A study on the restoration of mural painting images in Fujian palace temples based on improved recurrent generative adversarial networks** [13684-49]
- 13684 1E **A study of the business parameter matching model for backbone transmission networks and data networks based on reinforcement learning** [13684-50]
- 13684 1F **Fault detection method of power iot terminal communication link based on traffic** [13684-52]
