

PROCEEDINGS OF SPIE

Tenth International Conference on Multimedia and Image Processing (ICMIP 2025)

Yen-Wei Chen
Editor

26–28 April 2025
Okinawa, Japan

Co-sponsored by
University of the Ryukyus (Japan)
Ritsumeikan University (Japan)

Supported by
Universiti Malaysia Sarawak (Malaysia)
Wawasan Open University (Malaysia)
Gebze Technical University (Turkey)

Published by
SPIE

Volume 13701

Proceedings of SPIE 0277-786X, V. 13701

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Tenth International Conference on Multimedia and Image Processing (ICMIP 2025)*, edited by Yen-Wei Chen, Proc. of SPIE 13701, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committees*

COMPUTER VISION AND IMAGE PROCESSING BASED ON MACHINE LEARNING MODELS

- 13701 02 **Smooth deep saliency** [13701-3]
- 13701 03 **Machine learning-based prediction of cattle body condition score using 3D point cloud surface features** [13701-15]
- 13701 04 **WTUNet: minimize your U-Net through wavelet transformation for lung nodules segmentation** [13701-14]
- 13701 05 **MSADNet: enhancing bronchial segmentation via multiscale features and attention distillation** [13701-16]
- 13701 06 **A smart machine learning-based training system for simulating natural disasters using 3D modelling and the Internet of Things** [13701-17]
- 13701 07 **Performance comparison of machine learning algorithms for forest fire detection in Peninsular Malaysia** [13701-1]

IMAGE ANALYSIS AND COMPUTATIONAL MODELS

- 13701 08 **Text-driven 3D scene generation by panoramic neural radiance fields** [13701-6]
- 13701 09 **Jumping beyond limits: a comprehensive dataset for long jump analysis** [13701-5]
- 13701 0A **Analysis of shoreline changes using CCTV imagery** [13701-2]
- 13701 0B **Minimizing resource usage for real-time network camera tracking of black cows** [13701-13]
- 13701 0C **A temporal information-based network model for vehicle lane-change behavior recognition** [13701-7]

MULTIMEDIA INFORMATION RETRIEVAL AND IMAGE SECURITY

- 13701 0D **STHAPATI AI: generating temple architecture and designs** [13701-19]
- 13701 0E **Privacy in image transmission** [13701-8]
- 13701 0F **Spatio-temporal transformers and semantic insights: redefining video anomaly detection** [13701-18]
- 13701 0G **ChromAdapt: a dual-clustering framework for personalized enhancement of color vision deficiency images** [13701-10]
- 13701 0H **Real-time audio-visual deepfake detection using multimodel pipeline in video conference** [13701-4]
