

PROCEEDINGS OF SPIE

# ***Optical Manipulation and Structured Materials Conference 2025***

**Takashige Omatsu  
Kishan Dholakia  
S  le Nic Chormaic**  
*Editors*

**21–25 April 2025  
Yokohama, Japan**

*Organized by*  
OPTICS & PHOTONICS International Council

*Published by*  
SPIE

**Volume 13703**

Proceedings of SPIE 0277-786X, V. 13703

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Manipulation and Structured Materials Conference 2025*, edited by Takashige Omatsu, Kishan Dholakia, Sile Nic Chormaic, Proc. of SPIE 13703, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii Conference Committee

## OPTICAL MANIPULATION AND STRUCTURED MATERIALS CONFERENCE 2025

---

- 13703 02 **Construction of three-dimensional helical structures of nanoparticles using a Laguerre-Gaussian beam** [13703-2]
- 13703 03 **Optical manipulation of fluorescent nanoparticles bound to lipid membrane by optical vortex** [13703-3]
- 13703 04 **Designing DUV chiral plasmonic nanostructures via aluminum-based topology optimization** [13703-4]
- 13703 05 **Analyzing the dynamics of complex particles in a hybrid trapping system** [13703-5]
- 13703 06 **Laser-induced microdroplets: generation, self-propelled motion, and manipulation via the solutal Marangoni effect** [13703-6]
- 13703 07 **Quantitative phase imaging around water vapor microbubbles under pulsed laser illumination** [13703-7]
- 13703 08 **Optical nanofibers: a powerful tool for manipulating and trapping cold atoms and microparticles** [13703-8]
- 13703 09 **Laser refrigeration and anti-Stokes luminescence of Ytterbium-doped YVO<sub>4</sub> and CaF<sub>2</sub> microcrystals** [13703-9]
- 13703 0A **Instant computational tool for laser-induced heat and fluid flows: application to a point-like heat source** [13703-10]
- 13703 0B **Helical periodic relief on two-photon polymerized microstructures formed by femtosecond optical vortex** [13703-11]
- 13703 0C **Fractional optical vortex induced chiral surface reliefs in azopolymer** [13703-13]
- 13703 0D **Cyanobacteria cells array fabricated with optical vortex induced forward transfer** [13703-14]
- 13703 0E **Evaluation of optical gradient and thermophoretic force under optical trapping conditions using Brownian dynamics simulation** [13703-15]
- 13703 0F **Optical manipulation of aggregation-induced emission in polymers containing tetraphenylethylene derivatives** [13703-16]

- 13703 OG **Optical trapping with gold nanoparticles for chiral crystallization: size-dependent enantioselectivity switch** [13703-17]
- 13703 OH **Optical trapping controls supramolecular assembly and enantioselective photocyclodimerization of 2-anthracenecarboxylic acid with  $\gamma$ -cyclodextrin** [13703-18]
- 13703 OI **Towards optically driven dynamics of metallo-dielectric Janus particles using a nanofiber** [13703-19]
- 13703 OJ **Interaction of unconventional Airy beams with optically induced waveguide arrays in a nonlinear crystal** [13703-20]
- 13703 OK **Vortex beam generation using metamaterials for chiral particle trapping and manipulation** [13703-21]
- 13703 OL **Selective transport of fluorescent nanodiamonds based on nonlinear resonant optical response** [13703-22]
- 13703 OM **Control of nanoparticle rotation direction using recoil force generated by stimulated emission** [13703-24]
- 13703 ON **Enhancement and control of spin angular momentum in plasmonic near-fields** [13703-25]
- 13703 OO **Analytical study of electric field spin skyrmions in the evanescent field of a plasmonic nanogap antenna** [13703-26]
- 13703 OP **Evaluating the spatial resolution of Stokes camera II** [13703-27]
- 13703 OQ **Power-frequency electric field sensor based on nanomechanical resonator** [13703-29]
- 13703 OR **Pulsed geometric modes with switchable orthogonal polarization by an Nd:YVO<sub>4</sub>/Cr<sup>4+</sup>:YAG laser in a concave-convex resonator** [13703-30]
- 13703 OS **Second harmonic generation of optical skyrmions** [13703-31]
- 13703 OT **Switching of surface temperature of plasmonic titanium nitride nanostructures by circularly polarized light** [13703-34]
- 13703 OU **Fabrication of a two-dimensional array of luminescent materials using optical vortex laser-induced forward transfer** [13703-35]
- 13703 OV **Control of plasmonic optical fields excited in a single gold nanoplate by helical light** [13703-36]
- 13703 OW **Possibility of enantioselective optical force exerted on chiral crystalline clusters near a Si metasurface as a cause of the large crystal enantiomeric excess** [13703-37]
- 13703 OX **Structural transitions between achiral and chiral crystal structures of planar or axially chiral molecules controlled by light irradiation** [13703-38]

13703 0Y **Chiroptical response of a plasmonic particle array with a chiral arrangement under modal coupling regime** [13703-39]
