

PROCEEDINGS OF SPIE

International Conference on Image Processing and Deep Learning (IPDL 2025)

**Jun Wang
Lu Leng**
Editors

**11–13 April 2025
Chengdu, China**

Organized by
Southwest University (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13707

Proceedings of SPIE 0277-786X, V. 13707

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Image Processing and Deep Learning (IPDL 2025)*, edited by Jun Wang, Lu Leng, Proc. of SPIE 13707, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

DEEP LEARNING TECHNIQUES IN MEDICAL IMAGE ANALYSIS AND PROCESSING

- 13707 02 **Combining deep learning and level set methods for spleen segmentation** [13707-21]
- 13707 03 **End-to-end fully transformer network for low-dose CT denoising** [13707-59]
- 13707 04 **Research on attention enhancement-based image recognition method** [13707-25]
- 13707 05 **HQPC-Net: a study on skin cancer image segmentation based on hybrid quantum pooling and classical neural networks** [13707-46]
- 13707 06 **UAU-Net: uncertainty-based attention U-Net network for multimodal medical image segmentation** [13707-44]
- 13707 07 **Research on virtual try-on technology based on GAN inversion techniques** [13707-49]
- 13707 08 **Research on English teaching performance prediction algorithm based on machine learning** [13707-52]
- 13707 09 **Research on personalized exercise recommendation algorithm based on educational data mining** [13707-57]
- 13707 0A **Lung nodule detection algorithm based on Mamba and global multiscale feature fusion** [13707-31]
- 13707 0B **DVC-StNet: an efficient digital volume correlation method based on deep learning** [13707-18]
- 13707 0C **Research on generative design of residential building layout based on deep learning** [13707-56]
- 13707 0D **Research on skin lesion image segmentation based on dual-branch fusion** [13707-13]
- 13707 0E **Medical image classification network based on coarse-grained projection and multiscale feature fusion** [13707-11]
- 13707 0F **Cartoon face recognition: a multidomain learning approach combined with identity mining** [13707-20]
- 13707 0G **Research on automatic generation of multimodal medical image reports based on semantic retention** [13707-61]

- 13707 OH **Semi-supervised multi-evidence fusion for ship image segmentation** [13707-10]
- 13707 OI **Mask-enhanced steganography for digital seals: a robust and imperceptible approach to copyright protection** [13707-9]
- 13707 OJ **Adversarial contrastive strategy with generative compensation for imbalanced classification** [13707-33]
- 13707 OK **Improved YOLOv11 algorithm for vehicle damage detection** [13707-23]
- 13707 OL **An improved YOLOv11 algorithm for fire image detection** [13707-37]
- 13707 OM **Research on transient stability assessment method of power system based on convolutional neural network** [13707-38]
- 13707 ON **CSRANet: an attention network for segmentation of colorectal polyps** [13707-48]
- 13707 OO **Implicitly-guided space state diffusion model** [13707-53]
- 13707 OP **Analysis of encrypted image based on deep learning** [13707-45]

REMOTE SENSING IMAGE PROCESSING AND ANALYSIS BASED ON DEEP LEARNING

- 13707 OQ **Land surface temperature estimation method based on multisource data** [13707-29]
- 13707 OR **Vehicle target detection based on ConvNext-improved YoloV5** [13707-28]
- 13707 OS **Infrared image enhancement algorithm based on dual-decoding generative adversarial network** [13707-58]
- 13707 OT **Performance analysis of neural networks in signal modulation format recognition technology based on deep learning** [13707-14]
- 13707 OU **An image registration algorithm based on bidirectional fast matching of feature points** [13707-6]
- 13707 OV **Research on optimization of steel plate surface defect detection algorithm based on deep learning** [13707-32]
- 13707 OW **ME-GS: edge-augmented multiexposure Gaussian splatting for space target** [13707-12]
- 13707 OX **Photovoltaic inspection algorithm based on multi-scale attention mechanism** [13707-50]
- 13707 OY **A hybrid MSCNN-transformer approach for rolling bearing fault diagnosis under complex operating conditions** [13707-39]

- 13707 0Z **One-step phase unwrapping method for CASA-UNet network model** [13707-43]
- 13707 10 **Frequency-aware semi-supervised remote sensing image segmentation with weak-to-strong consistency learning** [13707-15]
- 13707 11 **Research progress on additive manufacturing process parameter optimization based on machine learning** [13707-8]
- 13707 12 **Deep lidar-visual odometry: a camera-LiDAR fusion approach using images and sparse point clouds** [13707-19]
- 13707 13 **Design of YOLOv5 hardware accelerator based on FPGA+ARM** [13707-4]
- 13707 14 **SAPDNet: an edge detection method based on self-attention mechanism and post-processing** [13707-30]
- 13707 15 **Path planning of robot arm based on improved RRT* algorithm** [13707-2]
- 13707 16 **Dynamic indicator weighting method for YOLO series algorithms across multiple scenarios** [13707-54]
- 13707 17 **Area positioning method for indoor personnel target tracking based on Ray method** [13707-42]
- 13707 18 **Stochastic distance-based PolSAR change detection with an improved multitemporal framework KLMF** [13707-3]
- 13707 19 **Detection of deformed garments in images based on YOLO-DCN model** [13707-63]
- 13707 1A **The design and implementation of a grassland ecological monitoring system based on remote sensing images and deep learning** [13707-24]
- 13707 1B **Research on fine-grained detection of crop diseases based on deep learning** [13707-22]
- 13707 1C **Underwater acoustic field pressure prediction technology based on physics-informed neural networks** [13707-27]
- 13707 1D **Research on crowd counting based on multiscale feature fusion and dynamic weighting strategy** [13707-34]
- 13707 1E **Swin-DBDC: a hybrid architecture integrating progressive dual-branch fusion and multiscale deformable convolution for image super-resolution** [13707-35]
