PROCEEDINGS OF SPIE

International Conference on Physics and Quantum Computing (ICPQC 2025)

Kehao Wang
Lin Chen
Editors

18–20 April 2025
Hangzhou, China

Organized by
Zhejiang University of Water Resources and Electric Power (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13708

Proceedings of SPIE 0277-786X, V. 13708

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Physics and Quantum Computing (ICPQC 2025)*, edited by Kehao Wang, Lin Chen, Proc. of SPIE 13708, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

QUANTUM COMPUTING AND MULTIPHYSICS INNOVATIONS IN ADVANCED MATERIAL SYSTEMS

13708 02 **Three-dimensional numerical simulation of typical foreign object's motion trajectory and distribution in nuclear reactors** [13708-6]

13708 03 **Research on mechanical properties of ABS materials and specimens in 3D printing process** [13708-12]

13708 04 **Interface control and thermodynamic behavior of nanocomposites under solution chemistry control** [13708-21]

13708 05 **Failure analysis of cracking in glass-enclosed diodes** [13708-20]

13708 06 **Multi-physics field simulation of mechanical and thermal properties in semiconductor nanomaterials** [13708-11]

13708 07 **Synthesis and luminescence properties of $CaMoO_4$: Eu^{3+} phosphor with high thermal stability for UV-excited WLEDs application** [13708-10]

13708 08 **Improving the kinetic hydrogen storage performance of MgH_2 through catalytic modification with macroporous TiO_2** [13708-16]

13708 09 **Study on calculation method of starting limit of polymer flooding based on complex fracture structure model** [13708-17]

13708 0A **Design and application of layered hierarchically porous carbon in supercapacitors** [13708-14]

13708 0B **Controlled remote implementation of operations with two controllers** [13708-7]

13708 0C **Quantum machine learning for sleep staging of EEG signals** [13708-1]

13708 0D **Block-positivity determination of diagonal-type entanglement witness operators based on tensor copositivity** [13708-2]

13708 0E **BAE-QCGAN: a hybrid quantum-classical generative adversarial network** [13708-9]

13708 0F **The mass of neutrinos** [13708-15]

13708 0G **Computationally discovered stable high-hardness SiN structures via high-pressure methods** [13708-4]

13708 0H **Critical screening parameters and critical behaviors of He with screened Coulomb potentials** [13708-3]

13708 0I **The transformation mechanism between the wave nature and particle nature of an elementary particle** [13708-8]
