

PROCEEDINGS OF SPIE

Eighth International Conference on Machine Vision and Applications (ICMVA 2025)

**Wolfgang Osten
Xudong Jiang
Kemao Qian**
Editors

**12–14 June 2025
Melbourne, Australia**

Organized by
Swinburne University of Technology (Australia)

Sponsored by
Swinburne University of Technology (Australia)
University of Stuttgart (Germany)
University of Tartu (Estonia)

Published by
SPIE

Volume 13734

Proceedings of SPIE 0277-786X, V. 13734

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Eighth International Conference on Machine Vision and Applications (ICMVA 2025)*, edited by Wolfgang Osten, Xudong Jiang, Kemao Qian, Proc. of SPIE 13734, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

FEATURE ANALYSIS AND FEATURE FUSION

- 13734 02 **IFCNet: integrated feature and cost fusion for stereo matching** [13734-8]
- 13734 03 **Morphological feature measurement of specific locations using image processing** [13734-17]
- 13734 04 **Feature fusion for advancing land-use scene classification** [13734-18]

IMAGE SEGMENTATION

- 13734 05 **Feature-based graph convolutional neural network on point cloud for semantic segmentation** [13734-15]
- 13734 06 **Urban scene segmentation and cross-dataset transfer learning using SegFormer** [13734-16]
- 13734 07 **Land use land cover segmentation using synthetic aperture radar data on Dhaka division, Bangladesh** [13734-23]

IMAGE DETECTION AND COMPUTER VISION

- 13734 08 **BEWSAT: blockchain-enabled watermarking for secure authentication and tamper localization in industrial visual inspection** [13734-11]
- 13734 09 **A conceptual framework for integrating machine vision system and statistical process control chart for monitoring manufacturing processes** [13734-7]
- 13734 0A **MoVE: multi-expert vision encoder fusion for zero-shot species classification in camera trap images** [13734-4]
- 13734 0B **SYNAD: A synthetic object injection methodology for enhanced anomaly detection** [13734-13]
- 13734 0C **Leveraging chimera states for enhanced detection of epileptic seizure in short-term intracranial EEG recordings** [13734-1]
- 13734 0D **DPA-YOLO: a lightweight and efficient method for small object detection** [13734-5]

13734 0E **A vision-language approach for detecting and classifying floating debris on aquatic surfaces** [13734-12]

MACHINE LEARNING MODELS AND ALGORITHMS IN DIGITAL IMAGE PROCESSING

13734 0F **Ship classification using optical camera and deep learning for coastal surveillance** [13734-22]

13734 0G **DipteroScan: a machine learning-based leaf scanner for *Dipterocarpaceae* family identification in Mt. Makiling** [13734-2]

13734 0H **Machine learning informed derivation of colour mix for a materials design tool** [13734-21]

13734 0I **Expanding emotion recognition: FER system with music recommendation using deep learning and Spotify API** [13734-10]

IMAGE MODELING AND DIGITAL IMAGING TECHNOLOGY

13734 0J **Stenosis segment estimation in coronary arteries using ensemble learning of 3D CNN models** [13734-24]

13734 0K **Towards efficient reflection removal: lightweight modeling with linearized loss functions** [13734-20]

13734 0L **Multidimension-multiplexed holography with daily-use light** [13734-3]
