# TABLE OF CONTENTS

## PART 1

### AAAI TECHNICAL TRACK ON MACHINE LEARNING III

|                                                                                                                              |       |
|------------------------------------------------------------------------------------------------------------------------------|-------|
| TimeDP: Learning to Generate Multi-Domain Time Series with Domain Prompts .....                                              | 17520 |
| <i>Yu-Hao Huang, Chang Xu, Yueying Wu, Wu-Jun Li, Jiang Bian</i>                                                             |       |
| COMMIT: Certifying Robustness of Multi-Sensor Fusion Systems Against Semantic Attacks .....                                  | 17528 |
| <i>Zijian Huang, Wenda Chu, Linyi Li, Chejian Xu, Bo Li</i>                                                                  |       |
| Geodesic Flow Kernels for Semi-Supervised Learning on Mixed-Variable Tabular Dataset.....                                    | 17537 |
| <i>Yoon-tae Hwang, Yongjae Lee</i>                                                                                           |       |
| SkipPool: Improved Sparse Hierarchical Graph Pooling with Differentiable Exploration .....                                   | 17546 |
| <i>Sarith Imaduwwage</i>                                                                                                     |       |
| Approximate State Abstraction for Markov Games .....                                                                         | 17555 |
| <i>Hiroki Ishibashi, Kenshi Abe, Atsushi Iwasaki</i>                                                                         |       |
| Self-attention-based Diffusion Model for Time-series Imputation in Partial Blackout Scenarios.....                           | 17564 |
| <i>Mohammad Rafid Ul Islam, Prasad Tadepalli, Alan Fern</i>                                                                  |       |
| Discovering Options That Minimize Average Planning Time .....                                                                | 17573 |
| <i>Alexander Ivanov, Akhil Bagaria, George Konidaris</i>                                                                     |       |
| TAIL-MIL: Time-Aware and Instance-Learnable Multiple Instance Learning for Multivariate Time Series Anomaly Detection .....  | 17582 |
| <i>Jaeseok Jang, Hyuk-Yoon Kwon</i>                                                                                          |       |
| Read, Watch and Scream! Sound Generation from Text and Video .....                                                           | 17590 |
| <i>Yujin Jeong, Yunji Kim, Sanghyuk Chun, Jiyoung Lee</i>                                                                    |       |
| Association Pattern-enhanced Molecular Representation Learning .....                                                         | 17599 |
| <i>Lingxiang Jia, Yuchen Ying, Tian Qiu, Shaolun Yao, Liang Xue, Jie Lei, Jie Song, Mingli Song, Zunlei Feng</i>             |       |
| Balancing Privacy and Performance: A Many-in-One Approach for Image Anonymization .....                                      | 17608 |
| <i>Xuemei Jia, Jiawei Du, Hui Wei, Ruinian Xue, Zheng Wang, Hongyuan Zhu, Jun Chen</i>                                       |       |
| Collaborative Similarity Fusion and Consistency Recovery for Incomplete Multi-view Clustering .....                          | 17617 |
| <i>Bingbing Jiang, Chenglong Zhang, Xinyan Liang, Peng Zhou, Jie Yang, Xingyu Wu, Junyi Guan, Weiping Ding, Weiguo Sheng</i> |       |
| Active Symbolic Discovery of Ordinary Differential Equations via Phase Portrait Sketching .....                              | 17626 |
| <i>Nan Jiang, Md Nasim, Yexiang Xue</i>                                                                                      |       |
| AIQViT: Architecture-Informed Post-Training Quantization for Vision Transformers.....                                        | 17635 |
| <i>Runqing Jiang, Ye Zhang, Longguang Wang, Pengpeng Yu, Yulan Guo</i>                                                       |       |
| M3Net: Efficient Time-Frequency Integration Network with Mirror Attention for Audio Classification on Edge.....              | 17644 |
| <i>Xuanming Jiang, Baoyi An, Guoshuai Zhao, Xueming Qian</i>                                                                 |       |

|                                                                                                                   |       |
|-------------------------------------------------------------------------------------------------------------------|-------|
| A Knowledge Distillation-Based Approach to Enhance Transparency of Classifier Models .....                        | 17653 |
| <i>Yuchen Jiang, Xinyuan Zhao, Yihang Wu, Ahmad Chaddad</i>                                                       |       |
| FedCFA: Alleviating Simpson’s Paradox in Model Aggregation with Counterfactual Federated Learning .....           | 17662 |
| <i>Zhonghua Jiang, Jimin Xu, Shengyu Zhang, Tao Shen, Jiwei Li, Kun Kuang, Haibin Cai, Fei Wu</i>                 |       |
| Learning Complexity of Gradient Descent and Conjugate Gradient Algorithms .....                                   | 17671 |
| <i>Xianqi Jiao, Jia Liu, Zhiping Chen</i>                                                                         |       |
| Backdoor Attack on Propagation-based Rumor Detectors .....                                                        | 17680 |
| <i>Di Jin, Yujun Zhang, Bingdao Feng, Xiaobao Wang, Dongxiao He, Zhen Wang</i>                                    |       |
| BigMac: A Communication-Efficient Mixture-of-Experts Model Structure for Fast Training and Inference .....        | 17689 |
| <i>Zewen Jin, Shengnan Wang, Jiaan Zhu, Hongrui Zhan, Youhui Bai, Lin Zhang, Zhenyu Ming, Cheng Li</i>            |       |
| IsUMap: Manifold Learning and Data Visualization Leveraging Vietoris-Rips Filtrations .....                       | 17699 |
| <i>Parvaneh Joharinad, Hannaneh Fahimi, Lukas Silvester Barth, Janis Keck, Jürgen Jost</i>                        |       |
| Dimension Reduction for Symbolic Regression.....                                                                  | 17707 |
| <i>Paul Kahlmeyer, Markus Fischer, Joachim Giesen</i>                                                             |       |
| Discovering Symmetries of ODEs by Symbolic Regression.....                                                        | 17715 |
| <i>Paul Kahlmeyer, Niklas Merk, Joachim Giesen</i>                                                                |       |
| Equal Merit Does Not Imply Equality: Discrimination at Equilibrium in a Hiring Market with Symmetric Agents ..... | 17724 |
| <i>Serafina Kamp, Benjamin Fish</i>                                                                               |       |
| AudioGenX: Explainability on Text-to-Audio Generative Models .....                                                | 17733 |
| <i>Hyunju Kang, Geonhee Han, Yoonjae Jeong, Hogun Park</i>                                                        |       |
| VarDrop: Enhancing Training Efficiency by Reducing Variate Redundancy in Periodic Time Series Forecasting .....   | 17742 |
| <i>Junhyeok Kang, Yooju Shin, Jae-Gil Lee</i>                                                                     |       |
| Efficient Training of Neural Fractional-Order Differential Equation via Adjoint Backpropagation .....             | 17750 |
| <i>Qiyu Kang, Xuhao Li, Kai Zhao, Wenjun Cui, Yanan Zhao, Weihua Deng, Wee Peng Tay</i>                           |       |
| Task-Specific Preconditioner for Cross-Domain Few-Shot Learning .....                                             | 17760 |
| <i>Suhyun Kang, Jungwon Park, Wonseok Lee, Wonjong Rhee</i>                                                       |       |
| Semi-Supervised Online Cross-Modal Hashing.....                                                                   | 17770 |
| <i>Xiao Kang, Xingbo Liu, Xuening Zhang, Wen Xue, Xiushan Nie, Yilong Yin</i>                                     |       |
| A Unified Framework for Human-Allied Learning of Probabilistic Circuits .....                                     | 17779 |
| <i>Athresh Karanam, Saurabh Mathur, Sahil Sidheekh, Sriraam Natarajan</i>                                         |       |
| Nearly Tight Bounds for Exploration in Streaming Multi-Armed Bandits with Known Optimality Gap .....              | 17788 |
| <i>Nikolai Karpov, Chen Wang</i>                                                                                  |       |
| GenPlan: Generative Sequence Models as Adaptive Planners .....                                                    | 17797 |
| <i>Akash Karthikeyan, Yash Vardhan Pant</i>                                                                       |       |

|                                                                                                                                      |       |
|--------------------------------------------------------------------------------------------------------------------------------------|-------|
| Don't Think It Twice: Exploit Shift Invariance for Efficient Online Streaming Inference of CNNs .....                                | 17805 |
| <i>Christodoulos Kechris, Jonathan Dan, Jose Miranda, David Atienza</i>                                                              |       |
| On the Asymptotic Optimality of Confidence Interval Based Algorithms for Fixed Confidence<br>MABs .....                              | 17814 |
| <i>Kushal Kejriwal, Nikhil Karamchandani, Jayakrishnan Nair</i>                                                                      |       |
| ExPERT: Modeling Human Behavior Under External Stimuli Aware Personalized MTPP .....                                                 | 17822 |
| <i>Subhendu Khatuya, Ritvik Vij, Paramita Koley, Samik Datta, Niloy Ganguly</i>                                                      |       |
| Learning Structural Causal Models from Ordering: Identifiable Flow Models.....                                                       | 17831 |
| <i>Minh Khoa Le, Kien Do, Truyen Tran</i>                                                                                            |       |
| Configuring Data Augmentations to Reduce Variance Shift in Positional Embedding of Vision<br>Transformers.....                       | 17840 |
| <i>Bum Jun Kim, Sang Woo Kim</i>                                                                                                     |       |
| T-MDML: Triplet-based Multiple Distance Metric Learning for Multi-Instance Multi-Label<br>Classification with Label Correlation..... | 17850 |
| <i>Dongyeon Kim, Yejin Kan, Gangman Yi</i>                                                                                           |       |
| Singular Value Scaling: Efficient Generative Model Compression via Pruned Weights Refinement .....                                   | 17859 |
| <i>Hyeonjin Kim, Jaejun Yoo</i>                                                                                                      |       |
| Battling the Non-stationarity in Time Series Forecasting via Test-time Adaptation.....                                               | 17868 |
| <i>HyunGi Kim, Siwon Kim, Jisoo Mok, Sungroh Yoon</i>                                                                                |       |
| Accurate Link Prediction for Edge-Incomplete Graphs via PU Learning .....                                                            | 17877 |
| <i>Junghun Kim, Ka Hyun Park, Hoyoung Yoon, U Kang</i>                                                                               |       |
| To Predict or Not to Predict? Proportionally Masked Autoencoders for Tabular Data Imputation .....                                   | 17886 |
| <i>Jungkyu Kim, Kibok Lee, Taeyoung Park</i>                                                                                         |       |
| Salient Frequency-aware Exemplar Compression for Resource-constrained Online Continual<br>Learning .....                             | 17895 |
| <i>Junsu Kim, Suhyun Kim</i>                                                                                                         |       |
| Diffusion-Based Active Learning for Distributed Client Manifolds.....                                                                | 17904 |
| <i>Kwang In Kim</i>                                                                                                                  |       |
| A Stochastic Approach to Bi-Level Optimization for Hyperparameter Optimization and Meta<br>Learning .....                            | 17913 |
| <i>Minyoung Kim, Timothy Hospedales</i>                                                                                              |       |
| Super-Class Guided Transformer for Zero-Shot Attribute Classification.....                                                           | 17921 |
| <i>Sehyung Kim, Chanhyeong Yang, Jihwan Park, Taehoon Song, Hyunwoo J. Kim</i>                                                       |       |
| SAP: Corrective Machine Unlearning with Scaled Activation Projection for Label Noise<br>Robustness.....                              | 17930 |
| <i>Sangamesh Kodge, Deepak Ravikumar, Gobinda Saha, Kaushik Roy</i>                                                                  |       |
| Sample-aware Adaptive Structured Pruning for Large Language Models .....                                                             | 17938 |

| Pareto Continual Learning: Preference-Conditioned Learning and Adaption for Dynamic Stability-Plasticity Trade-off..... | 18008 |
| <i>Song Lai, Zhe Zhao, Fei Zhu, Xi Lin, Qingfu Zhang, Gaofeng Meng</i>                                                  |       |
| CoffeeBoost: Gradient Boosting Native Conformal Inference for Bayesian Optimization.....                                | 18017 |
| <i>Yuanhao Lai, Pengfei Zheng, Chenpeng Ji, Cheng Qiu, Tingkai Wang, Songhan Zhang, Zhengang Wang, Yunfei Du</i>        |       |
| De-singularity Subgradient for the $q$ -th-Powered $l_p$ -Norm Weber Location Problem .....                             | 18026 |
| <i>Zhao-Rong Lai, Xiaotian Wu, Liangda Fang, Ziliang Chen, Cheng Li</i>                                                 |       |
| Retrieval-Augmented Dynamic Prompt Tuning for Incomplete Multimodal Learning .....                                      | 18035 |
| <i>Jian Lang, Zhangtao Cheng, Ting Zhong, Fan Zhou</i>                                                                  |       |
| Explainable Neural Networks with Guarantee: A Sparse Estimation Approach.....                                           | 18044 |
| <i>Antoine Ledent, Peng Liu</i>                                                                                         |       |
| Kolmogorov-Arnold Networks Still Catastrophically Forget but Differently from MLP .....                                 | 18053 |
| <i>Anton Lee, Heitor Murilo Gomes, Yaqian Zhang, W. Bastiaan Kleijn</i>                                                 |       |
| Regret Analysis of Multi-task Representation Learning for Linear-Quadratic Adaptive Control .....                       | 18062 |
| <i>Bruce D. Lee, Leonardo F. Toso, Thomas T. Zhang, James Anderson, Nikolai Matni</i>                                   |       |
| Truncated Gaussian Policy for Debiased Continuous Control .....                                                         | 18071 |
| <i>Ganghun Lee, Minji Kim, Minsu Lee, Byoung-Tak Zhang</i>                                                              |       |

## PART 2

|                                                                                                                   |       |
|-------------------------------------------------------------------------------------------------------------------|-------|
| TimeCAP: Learning to Contextualize, Augment, and Predict Time Series Events with Large Language Model Agents..... | 18082 |
| <i>Geon Lee, Wenchao Yu, Kijung Shin, Wei Cheng, Haifeng Chen</i>                                                 |       |

|                                                                                                                          |       |
|--------------------------------------------------------------------------------------------------------------------------|-------|
| RILQ: Rank-Insensitive LoRA-Based Quantization Error Compensation for Boosting 2-Bit Large Language Model Accuracy ..... | 18091 |
| <i>Geonho Lee, Janghwan Lee, Sukjin Hong, Minsoo Kim, Euijai Ahn, Du-Seong Chang, Jungwook Choi</i>                      |       |
| HYBOOD: A Hybrid Generative Model for Out-of-Distribution Detection with Corruption Estimation.....                      | 18101 |
| <i>Giwoong Lee, Jiseung Ahn, Jeongyeol Choe</i>                                                                          |       |
| Fourier Guided Adaptive Adversarial Augmentation for Generalization in Visual Reinforcement Learning .....               | 18110 |
| <i>Jeong Woon Lee, Hyoseok Hwang</i>                                                                                     |       |
| DomCLP: Domain-wise Contrastive Learning with Prototype Mixup for Unsupervised Domain Generalization .....               | 18119 |
| <i>Jin-Seop Lee, Noo-ri Kim, Jee-Hyong Lee</i>                                                                           |       |
| DiffIM: Differentiable Influence Minimization with Surrogate Modeling and Continuous Relaxation.....                     | 18128 |
| <i>Junghun Lee, Hyunju Kim, Fanchen Bu, Jihoon Ko, Kijung Shin</i>                                                       |       |
| Q-MAML: Quantum Model-Agnostic Meta-Learning for Variational Quantum Algorithms .....                                    | 18137 |
| <i>Junyong Lee, Jeihee Cho, Shiho Kim</i>                                                                                |       |
| CG-TGAN: Conditional Generative Adversarial Networks with Graph Neural Networks for Tabular Data Synthesizing.....       | 18145 |
| <i>Seungcheol Lee, Moohong Min</i>                                                                                       |       |
| Maximizing the Position Embedding for Vision Transformers with Global Average Pooling .....                              | 18154 |
| <i>Wonjun Lee, Bumsub Ham, Suhyun Kim</i>                                                                                |       |
| Learning Strategy Representation for Imitation Learning in Multi-Agent Games .....                                       | 18163 |
| <i>Shiqi Lei, Kanghoon Lee, Linjing Li, Jinkyoo Park</i>                                                                 |       |
| MGDA: Model-based Goal Data Augmentation for Offline Goal-conditioned Weighted Supervised Learning .....                 | 18172 |
| <i>Xing Lei, Xuetao Zhang, Donglin Wang</i>                                                                              |       |
| Mining In-distribution Attributes in Outliers for Out-of-distribution Detection .....                                    | 18181 |
| <i>Yutian Lei, Luping Ji, Pei Liu</i>                                                                                    |       |
| Real-Time Recurrent Reinforcement Learning .....                                                                         | 18189 |
| <i>Julian Lemmel, Radu Grosu</i>                                                                                         |       |
| Towards Trustable SHAP Scores.....                                                                                       | 18198 |
| <i>Olivier Létoffé, Xuanxiang Huang, Joao Marques-Silva</i>                                                              |       |
| Distributionally Robust Policy Evaluation and Learning for Continuous Treatment with Observational Data .....            | 18209 |
| <i>Cheuk Hang Leung, Yiyang Huang, Yijun Li, Qi Wu</i>                                                                   |       |
| Frame Order Matters: A Temporal Sequence-Aware Model for Few-Shot Action Recognition.....                                | 18218 |
| <i>Bozheng Li, Mushui Liu, Gaoang Wang, Yunlong Yu</i>                                                                   |       |
| Unlocking Better Closed-Set Alignment Based on Neural Collapse for Open-Set Recognition.....                             | 18227 |
| <i>Chaohua Li, Enhao Zhang, Chuanxing Geng, Songcan Chen</i>                                                             |       |

|                                                                                                                         |       |
|-------------------------------------------------------------------------------------------------------------------------|-------|
| Tilted Quantile Gradient Updates for Quantile-Constrained Reinforcement Learning .....                                  | 18236 |
| <i>Chenglin Li, Guangchun Ruan, Hua Geng</i>                                                                            |       |
| FedMSGL: A Self-Expressive Hypergraph Based Federated Multi-View Learning .....                                         | 18244 |
| <i>Daoyuan Li, Zuyuan Yang, Shengli Xie</i>                                                                             |       |
| Marginal Benefit Driven RL Teacher for Unsupervised Environment Design .....                                            | 18253 |
| <i>Dexun Li, Wenjun Li, Pradeep Varakantham</i>                                                                         |       |
| AIA: Autoregression-Based Injection Attacks Against Text2SQL Models .....                                               | 18262 |
| <i>Deyin Li, Xiang Ling, Changjiang Li, Xiang Chen, Chunming Wu</i>                                                     |       |
| k-HyperEdge Medoids for Clustering Ensemble .....                                                                       | 18271 |
| <i>Feijiang Li, Jieting Wang, Liuya Zhang, Yuhua Qian, Shuai Jin, Tao Yan, Liang Du</i>                                 |       |
| AdvDisplay: Adversarial Display Assembled by Thermoelectric Cooler for Fooling Thermal<br>Infrared Detectors.....       | 18279 |
| <i>Hao Li, Fanggao Wan, Yue Su, Yue Wu, Mingyang Zhang, Maoguo Gong</i>                                                 |       |
| A Sample-Level Evaluation and Generative Framework for Model Inversion Attacks .....                                    | 18287 |
| <i>Haoyang Li, Li Bai, Qingqing Ye, Haibo Hu, Yaxin Xiao, Huadi Zheng, Jianliang Xu</i>                                 |       |
| Efficient Event-Based Semantic Segmentation via Exploiting Frame-Event Fusion: A Hybrid<br>Neural Network Approach..... | 18296 |
| <i>Hebei Li, Yansong Peng, Jiahui Yuan, Peixi Wu, Jin Wang, Yueyi Zhang, Xiaoyan Sun</i>                                |       |
| Learning Causal Transition Matrix for Instance-dependent Label Noise .....                                              | 18305 |
| <i>Jiahui Li, Tai-Wei Chang, Kun Kuang, Ximing Li, Long Chen, Jun Zhou</i>                                              |       |
| HEP-NAS: Towards Efficient Few-shot Neural Architecture Search via Hierarchical Edge<br>Partitioning .....              | 18314 |
| <i>Jianfeng Li, Jiawen Zhang, Feng Wang, Lianbo Ma</i>                                                                  |       |
| Modeling All Response Surfaces in One for Conditional Search Spaces .....                                               | 18323 |
