

PROCEEDINGS OF SPIE

Multimodal Sensing and Artificial Intelligence for Sustainable Future

Francesco Soldovieri
Pascal Picart
Vittorio Bianco
Claas Falldorf
Editors

24–27 June 2025
Munich, Germany

Sponsored and Published by
SPIE

Volume 13570

Proceedings of SPIE 0277-786X, V. 13570

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Multimodal Sensing and Artificial Intelligence for Sustainable Future*, edited by Francesco Soldovieri, Pascal Picart, Vittorio Bianco, Claas Falldorf, Proc. of SPIE 13570, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

ENVIRONMENTAL MONITORING I

- 13570 03 **Correlation of refractive index to morphology for polystyrene nanospheres by optical modelling of UV-VIS spectra** [13570-1]
- 13570 04 **Machine learning for scalable and adaptive estuarine modeling: understanding dynamics and environmental patterns** [13570-2]
- 13570 05 **Detection of blue nanoplastics using resonance Raman spectroscopy coupled with plasmonic nanostructured substrates** [13570-3]
- 13570 06 **AI-enabled monitoring of water pollutants by clusters of optical microresonators** [13570-4]
- 13570 07 **Polarization digital holography for advanced classification of microplastic particles** [13570-5]

ADVANCED MICROSCOPY

- 13570 09 **In-flow digital holographic tomography for 3D phytoplankton visualization and characterization** [13570-8]
- 13570 0A **Fluorescence and quantitative phase imaging combination using a cost-effective imaging platform (Invited Paper)** [13570-9]
- 13570 0B **Physics-driven polarization-sensitive holographic denoising for microplastic detection** [13570-10]

REMOTE SENSING

- 13570 0E **Enhancing marine ecosystem monitoring using machine learning: addressing autocorrelation in cetacean feeding behavior prediction** [13570-13]
- 13570 0F **Detecting the content of water in agricultural soils by GPR data and autoencoders** [13570-14]
- 13570 0G **Amplitude inversion analysis to estimate the soil permittivity from UAV-based GPR data sets** [13570-15]
- 13570 0H **UAV-based GPR and microwave tomography: 2D and 3D results** [13570-16]

ADVANCES IN OPTOFLUIDICS I

- 13570 0I **Advancing Raman imaging in opto-acousto-fluidic microchips (Invited Paper)** [13570-17]
- 13570 0J **Smart deep learning application for single cell classification** [13570-21]
- 13570 0K **Deep learning-based optical metrology for real-time sensing: optical flow estimation** [13570-19]
- 13570 0L **Continuous flow technology for particle focusing in microscopy** [13570-20]

ADVANCES IN OPTOFLUIDICS II

- 13570 0M **Machine-learning-based measurement of fluid properties through observation of particle train evolution in microchannels** [13570-18]
- 13570 0N **High-speed sCMOS acquisition with optical pixel reassignment** [13570-22]

ENVIRONMENTAL MONITORING II

- 13570 0Q **Dose-dependent effects of copper pollution on living diatoms by label-free Fourier ptychographic microscopy and fractal analysis** [13570-25]
- 13570 0S **A portable AI-powered rotifer-tracking system for in-situ water quality assessment** [13570-27]

JOINT SESSION: MULTIMODAL QUANTITATIVE PHASE BIOIMAGING I

- 13570 0U **A self-reference approach to synthetic aperture digital holographic microscopy** [13570-29]
- 13570 0W **Non-interferometric phase imaging by speckle correlation** [13570-31]

MULTIMODAL COMPUTATIONAL MICROSCOPY

- 13570 0X **Self-supervised defocus blur kernel estimation with symmetry and smoothness constraints** [13570-32]
- 13570 0Z **Dynamic characterization of MEMS-SPM in liquid for biomechanical phenotyping using fiber interferometry** [13570-34]
- 13570 10 **Artificial neural network supported multimodal analysis of living cells using simultaneous bright field and off-axis digital holographic microscopy** [13570-35]

NONDESTRUCTIVE TESTING

- 13570 12 **Model updating of structures with uncertain multiple parameters: from traditional trial-and-error approaches to autonomous intelligent agents (Invited Paper)** [13570-36]
- 13570 13 **Fizeau type polarization electronic speckle pattern interferometry for deformation studies** [13570-37]
- 13570 14 **Shearography and thermography non-destructive testing of composite materials using embedded carbon nanotube (CNT) strips as heaters** [13570-38]
- 13570 15 **Addressing scanning and imaging distortions in decryption of secured computer-generated holograms using convolutional neural networks** [13570-39]
- 13570 16 **Full-aperture reflective remote Fourier ptychography with sample match** [13570-40]

JOINT SESSION: MULTIMODAL QUANTITATIVE PHASE BIOIMAGING II

- 13570 17 **A high-resolution digital holographic microscope for space flight (Invited Paper)** [13570-41]
- 13570 18 **High-content in vitro nanotoxicity assessment with enhanced throughput utilizing automated multimodal digital holographic microscopy** [13570-42]
- 13570 19 **Towards an explainable automatic phenotypic characterization of hereditary anemias** [13570-43]

ARTIFICIAL INTELLIGENCE FOR NONDESTRUCTIVE SENSING: MEMORIAL SESSION IN HONOR OF DR. ETTORE STELLA

- 13570 1B **Lensless sideways imaging with digital holography for in-line process monitoring in additive manufacturing** [13570-45]
- 13570 1C **Enhancing railway infrastructure monitoring using hybrid VTOL drones: a case study on inspection and surveillance using custom YOLOv12 object detector** [13570-46]
- 13570 1D **Skeleton-based human action recognition for manufacturing in assembly task by deep learning** [13570-47]

MULTIMODAL SENSING FOR INDUSTRIAL APPLICATIONS

- 13570 1F **A decision support system for damage identification in RC bridges using deep neural networks** [13570-53]
- 13570 1H **A deep learning-based brain computer interface for eye movement decoding using QVAR sensors** [13570-50]

- 13570 1I **Multimodal characterization of fasteners enables quantitative modeling and evaluation**
[13570-51]
- 13570 1J **Phase extraction and denoising through deep learning-based interference pattern analysis**
[13570-52]

POSTER SESSION

- 13570 1L **Laser-based mobile railway measurement systems: an overview** [13570-55]
- 13570 1M **Online 3D reconstruction of parts printed by LP-DED via data fusion of coaxial and off-axis camera images** [13570-56]
- 13570 1O **Demonstration of optical metrology for rail vehicle and track condition monitoring**
[13570-58]
- 13570 1P **A probabilistic approach for evaluating crack defects in reinforced concrete bridges**
[13570-59]
- 13570 1Q **High density polyurethane blocks handling with an AI-powered multimodal vision system on a custom compact omnidirectional mobile robot: a case study** [13570-60]
- 13570 1R **Unsupervised learning techniques for finding missing bolts in railways combining 3D data, deep learning, and weighted content loss** [13570-61]
- 13570 1S **Automated quality inspection of fastening screws for furniture using 3D computer vision and data analysis techniques** [13570-62]
- 13570 1T **Efficient averaging for enhanced resolution with acceptable quality in laser speckle imaging** [13570-64]
- 13570 1U **Biophilic elements for employee well-being through extended reality solutions: creating digital plants** [13570-65]
- 13570 1V **Super-resolution microsphere digital holographic microscopy imaging based on phase-intensity feature fusion** [13570-66]
- 13570 1W **Using floral bract withering to identify green-ripe pineapples with deep learning** [13570-69]
- 13570 1X **Open-source framework for multimodal microscopy** [13570-70]
- 13570 20 **3D tracking and behavioral analysis of *Tetraselmis* as a bioindicator of copper pollution in marine environment** [13570-73]
- 13570 21 **Motility-based scrutiny of probiotic bacteria in vitro digestive environment achieved by an all-optical platform** [13570-74]
- 13570 22 **Detection and recognition of drones by using coherent micro Doppler LiDAR sensor**
[13570-76]

- 13570 23 **Hyperspectral imaging system with switchable spontaneous Raman spectroscopy and broadband CARS** [13570-77]
- 13570 25 **Evaluation of damage in composite panels using NDI techniques** [13570-79]
- 13570 26 **Multimodal optical non-destructive evaluation of impact damage in composite materials** [13570-80]
- 13570 27 **Coherence effects in off-axis holography: simulations and experiment** [13570-81]
