

PROCEEDINGS OF SPIE

Digital Optical Technologies 2025

Bernard C. Kress
Jürgen W. Czarske
Editors

23–26 June 2025
Munich, Germany

Sponsored and Published by
SPIE

Volume 13573

Proceedings of SPIE 0277-786X, V. 13573

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Digital Optical Technologies 2025*, edited by Bernard C. Kress, Jürgen W. Czarske, Proc. of SPIE 13573, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

WAVEFRONT SHAPING BY DIGITAL OPTICS

- 13573 02 **Overcoming catastrophic forgetting by rehearsal method in imaging through scattering media by deep learning** [13573-5]

HOLOGRAPHIC IMAGING AND DISPLAY

- 13573 03 **Dual-path holographic laser rendering for fist-sized volumetric graphics in physical space** [13573-7]
- 13573 04 **Improved far field holograms using spatial light modulators and camera-in-the-loop optimization** [13573-9]
- 13573 05 **Compact and effective zero-order noise suppression in Fresnel holography using a lens and lens compensation** [13573-10]

AI-AIDED DESIGN TECHNIQUES FOR DIGITAL OPTICS

- 13573 06 **Nonlinear digital holography for light-speed correction of structured light (Invited Paper)** [13573-34]
- 13573 07 **Optimized scythe-shaped chiroptical metasurface for biosensing application** [13573-64]

DIGITAL OPTICS FOR AR/VR/MR I

- 13573 08 **New high-current WUXGA microLED microdisplay backplane derived from previous OLED microdisplay platform** [13573-17]

FABRICATION AND METROLOGY USING DIGITAL OPTICS

- 13573 09 **Metrology challenges of digital optical technologies** [13573-21]
- 13573 0A **Introducing innovative materials for advanced manufacturing of optical and photonic devices** [13573-24]

DIGITAL OPTICS FOR AR/VR/MR II

- 13573 0B **A virtual reality approach to interactive physics case study on the double-slit experiment** [13573-26]
- 13573 0C **Optical sensor positioning for eye-tracking with numerically efficient raytracing models** [13573-27]

ADAPTIVE OPTICS BY DIGITAL TECHNOLOGIES

- 13573 0E **Adaptive optics-based covert communications in strong atmospheric turbulence regime (Invited Paper)** [13573-32]

DYNAMIC DIGITAL OPTICS

- 13573 0F **Scattering-resistant ghost imaging by direct-deconvolution** [13573-37]
- 13573 0G **Quantum-driven optical security: a hybrid experimental-computational framework for unclonable authentication** [13573-38]

METROLOGY, DISPLAYS AND OPTICAL COMPONENTS FOR DIGITAL TECHNOLOGIES

- 13573 0H **Wide-field polarization measurement of the sky using a fisheye lens** [13573-39]
- 13573 0I **Time-division multiview 3D display based on hyperboloidal mirror reflection** [13573-40]
- 13573 0J **Local and global calibration of liquid crystal spatial light modulators using a single interferometric pattern** [13573-42]
- 13573 0K **Phase stabilization and calibration techniques for high-fidelity integrated photonic processors** [13573-44]

COMPUTATIONAL TECHNIQUES FOR DIGITAL OPTICS

- 13573 0L **Systematic design method of optical system based on off-the-shelf lenses** [13573-45]
- 13573 0M **A large-scale photonic design pipeline for interconnect routing** [13573-48]

POSTER SESSION

- 13573 0N **Mathematical aspects in simulating Lissajous laser scanning** [13573-51]

- 13573 OO **Using simulation-based inference (SBI) for optical imaging** [13573-52]
- 13573 OP **Investigations of vibration regimes of optical choppers** [13573-53]
- 13573 OQ **A deep learning approach for the prediction of process parameters in the additive manufacturing of microlenses** [13573-54]
- 13573 OR **Evaluating machine learning with simulated Lissajous scans for fast object recognition and rotation estimation** [13573-55]
- 13573 OS **Compact multichannel imaging system with wide FOV and 4x optical magnification** [13573-56]
- 13573 OT **Characterization of pulsed ultraviolet laser micromachining operation for rapid prototyping of microfluidic devices** [13573-57]
- 13573 OU **Microresonator-enhanced graphene-based electro-optic modulator with near-zero power consumption** [13573-59]
- 13573 OV **Predictive analysis of manufacturing and long-term variations in a laser combining system** [13573-60]
- 13573 OW **A compact wearable device for correcting ocular aberrations** [13573-61]
- 13573 OX **Generating and sensing synthetic parasitic data of lymphatic filariasis using diffusion models and generative adversarial networks** [13573-62]
- 13573 OY **Nonlinear holography for efficient frequency conversion of structured light** [13573-63]
- 13573 OZ **The ore content estimation in the mineral processing plant with the aid of the ML process: from classification to measurement** [13573-66]
