

PROCEEDINGS OF SPIE

Fourth International Conference on Optics and Machine Vision (ICOMV 2025)

**Fengde Liu
Changxi Xue**
Editors

**11–13 April 2025
Changchun, China**

Organized by
Changchun College of Electronic Technology (China)

Published by
SPIE

Volume 13732

Proceedings of SPIE 0277-786X, V. 13732

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourth International Conference on Optics and Machine Vision (ICOMV 2025)*, edited by Fengde Liu, Changxi Xue, Proc. of SPIE 13732, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

OPTICAL TECHNOLOGY IN MACHINE VISION AND ARTIFICIAL INTELLIGENCE

13732 02	The prospective prediction of thermal error of NC machine tools based on neural network algorithm [13732-84]
13732 03	Research on heterogeneous images fusion method based on electro-optical system [13732-64]
13732 04	Adaptive semantic-enhanced spatial-temporal graph network for traffic prediction [13732-56]
13732 05	Design of an urban solid waste classification system based on deep learning algorithm [13732-10]
13732 06	Visual-based joint calibration method for multirobot systems [13732-63]
13732 07	Vision-based calibration method for spraying tools [13732-62]
13732 08	Target distance measurement method in automotive assisted driving based on improved Yolov8 [13732-26]
13732 09	Perceptual fusion-based target detection model for YOLOv8 autopilot [13732-89]
13732 0A	WUE-Net: a wavelet and EUCB enhanced framework for accurate building change detection in remote sensing imagery [13732-57]
13732 0B	Research on improved SURF feature point matching algorithm [13732-54]
13732 0C	Improved target tracking method based on ECO-HC [13732-51]
13732 0D	Insulator localization and defect detection in multispectral images based on improved YOLOv11s [13732-82]
13732 0E	Semiconductor wafer chip defect detection algorithm based on improved YOLOV8 [13732-19]
13732 0F	Real-time object detection in dynamic scenes using recurrent convolutional neural networks [13732-49]
13732 0G	DualFormer: dual-branch transformer for industrial defect detection [13732-29]

- 13732 OH **YOLOv8-CLS: an improved model for floating waste detection on water surfaces** [13732-70]
- 13732 OI **Design and practice of smart community management algorithm based on image classification and fire detection** [13732-43]
- 13732 OJ **Emotion- and lip-aware monocular 3D face capture with transformers** [13732-67]
- 13732 OK **Micro-expression recognition algorithm based on improved repVGG** [13732-35]
- 13732 OL **AD-DETR: an improved autonomous driving small object detection model based on RT-DETR** [13732-11]
- 13732 OM **RGB-T salient object detection based on progressive alignment and multiscale fusion** [13732-17]
- 13732 ON **An improved target detection with vision and millimeter-wave radar fusion for YOLOv5** [13732-41]
- 13732 OO **AA-NuSeg: a fully automated and adaptive framework for accurate nuclei segmentation** [13732-45]
- 13732 OP **A lightweight YOLOv8-based UAVs detection with dual-path optimization and attention mechanism** [13732-44]
- 13732 OQ **CEST-adapter: dynamic channel-aware adaptation for efficient video activity recognition** [13732-66]
- 13732 OR **A lightweight tunnel lining crack detection system deployed in Raspberry PI 5** [13732-80]
- 13732 OS **Research on deep learning-based automatic monitoring technology of chicken cough in caged chicken house** [13732-85]
- 13732 OT **Design and implementation of industrial defect detection system based on EfficientNets** [13732-15]

OPTICS AND LASER TECHNOLOGY IN ADVANCED MANUFACTURING

- 13732 OU **Study on plasmonic effects at the cutting interface of microtextured tools based on laser excitation** [13732-73]
- 13732 OV **A study of the interaction between the number of aluminum film layers and temperature on the plasticity of raster scratching into grooves** [13732-72]
- 13732 OW **Enhancing laser-assisted machining of difficult to machine materials using microtextured cutting tools with integrated cooling** [13732-90]
- 13732 OX **Correlation parameter analysis of laser and ablation-driven plasma** [13732-6]

- 13732 0Y **High-resolution optical frequency domain reflectometry using a charge-pump assisted active linearized DFB laser chirp** [13732-9]
- 13732 0Z **Research on rapid focusing strategies for stereomicroscopes** [13732-48]
- 13732 10 **Design and fabrication of high-Q and low-loss ZnMgO optical microring resonators** [13732-34]
- 13732 11 **Particle capture analysis based on fiber optical tweezers** [13732-36]
- 13732 12 **Rigorous and efficient diffraction modeling between tilted planes** [13732-47]
- 13732 13 **2D diamond x-ray kinoform lenses made by high re-frequency ultrafast laser** [13732-31]
- 13732 14 **Study on the impact resistance performance of a new type of gated photomultiplier tube** [13732-13]
- 13732 15 **Twisted bilayer gratings for high-efficiency circular polarization detection in the infrared spectrum** [13732-24]
- 13732 16 **Moiré fringe-based offset control method for overlay grating alignment using substrate grating and experimental verification** [13732-21]
- 13732 17 **Design and reliability verification of an automated testing system for high-speed optical transceiver modules** [13732-27]
- 13732 18 **Research on hinge shaft workpiece feature positioning method based on automatic door assembly** [13732-28]
- 13732 19 **Single-shot measurement of spatiotemporal coupling characteristics in ultrafast and ultraintense lasers** [13732-59]
- 13732 1A **A 3-DOF space microvibration measurement method based on geometric optics** [13732-22]
- 13732 1B **Curved multifilaments generated by introducing gas lattice medium** [13732-46]
- 13732 1C **Manipulation of the length of Bessel femtosecond laser filamentation** [13732-69]
- 13732 1D **Cascaded-crystal optical parametric amplifier for broadband near-infrared pulse generation** [13732-52]

OPTICAL IMAGING AND DETECTION TECHNOLOGY AND APPLICATIONS

- 13732 1E **A fast mask three-dimensional model based on multidirectional filtering** [13732-2]

- 13732 1F **Design of large field-of-view digital head-mounted night vision optical system based on low-light-level CMOS device** [13732-4]
- 13732 1G **The main factors limiting the measurement distance of DAS system and improvement methods** [13732-39]
- 13732 1H **Research on immersive dining experience design based on AR holographic projection** [13732-71]
- 13732 1I **Spherical dimension measurement of oil distribution pan based on structured light projection** [13732-65]
- 13732 1J **Research on simulation model of two-wavelength digital holography for measuring microstructures based on Zemax** [13732-74]
- 13732 1K **A dual attention mechanism-based key frame extraction method for thyroid dynamic ultrasound: a multicenter study** [13732-16]
- 13732 1L **High-precision 3D laser projection calibration method based on vision measurement** [13732-53]
- 13732 1M **Density peak clustering improved by quantity particle swarm optimization** [13732-87]
- 13732 1N **High-precision binocular calibration algorithm integrating defocus blur modeling and adaptive normalization** [13732-7]
- 13732 1O **Stray light analysis and suppression in microlens array-based spatial heterodyne Raman spectrometer** [13732-18]
- 13732 1P **Physics-constrained neural networks for rapid performance evaluation of laser atmospheric propagation** [13732-23]
- 13732 1Q **Construction and realization of microprocessor pipeline virtual reality system** [13732-42]
