

PROCEEDINGS OF SPIE

Fifth International Conference on Computer Vision and Pattern Analysis (ICCPA 2025)

**Chunyi Chen
Tao Lei**
Editors

**16–18 May 2025
Anshan, China**

Organized by
University of Science and Technology Liaoning (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13733

Proceedings of SPIE 0277-786X, V. 13733

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fifth International Conference on Computer Vision and Pattern Analysis (ICCPA 2025)*, edited by Chunyi Chen, Tao Lei, Proc. of SPIE 13733, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

CORE VISION ALGORITHMS FOR DETECTION AND RECONSTRUCTION

- 13733 02 **Steel surface defect detection model based on YOLOv8** [13733-9]
- 13733 03 **Attention fusion-based image super-resolution reconstruction model** [13733-42]
- 13733 04 **Image inpainting based on Gaussian filtering and two-fold Hankel matrix** [13733-2]
- 13733 05 **FF-RTDETR: an improved RTDETR detection model in remote sensing images** [13733-27]
- 13733 06 **Image generation method based on improved diffusion models** [13733-20]
- 13733 07 **Flow-based open-set defect detection and localization in welding ceramic backing**
[13733-46]
- 13733 08 **Edge detection based on multipath refinement network** [13733-47]
- 13733 09 **Research on Chinese herbal medicine image detection based on improved YOLOv8
network** [13733-34]
- 13733 0A **OBTD-Net: oracle bone text detection based on ResNet** [13733-16]
- 13733 0B **Apple maturity analysis algorithm based on machine vision** [13733-14]
- 13733 0C **YOLO-SCSAE: a mixed fire and smoke detection method in natural scenes based on
collaborative spatial attention and channel attention** [13733-32]
- 13733 0D **Efficient task-specific adaptation for dynamic facial expression recognition via
expert-guided VideoMAE fine-tuning** [13733-19]
- 13733 0E **Fine-tuning multimodal large models for bean, strawberry, and tomato disease
identification** [13733-40]
- 13733 0F **Dual-student dynamic distillation for unsupervised domain adaptation** [13733-43]
- 13733 0G **A review of objective point cloud quality assessment methods** [13733-18]
- 13733 0H **A dual-branch improved transformer-based road extraction model** [13733-7]

- 13733 0I **Seismic phase pickup model based on attention mechanism** [13733-8]
- 13733 0J **Road disease detection algorithm based on improved YOLOv11** [13733-4]
- 13733 0K **FDCM: a novel framework integrating frequency and spatial domain features for robust image classification** [13733-10]
- 13733 0L **Small target detection in intelligent driving scene based on improved YOLOv8n** [13733-29]

VISION SYSTEMS AND SENSING APPLICATIONS

- 13733 0M **Multifunctional chili-picking robot based on visual recognition** [13733-26]
- 13733 0N **Optimization of PEDOT: PSS spray coating process based on orthogonal design and its application in flexible transparent corneal sensors** [13733-31]
- 13733 0O **Design and validation of an image-tracking magnetically driven vascular interventional helical microrobot** [13733-22]
- 13733 0P **LSTM-based hazard source detection and risk assessment model for the Shandong Yellow River basin** [13733-13]
- 13733 0Q **Research on emotion recognition method of educational robot based on lightweight neural network** [13733-23]
- 13733 0R **LSTM-based hierarchical situation estimation method for marine multiagents** [13733-12]
- 13733 0S **Dynamic sculpture interactive system based on computer vision** [13733-45]
- 13733 0T **Application and challenges of digital media in sculpture creation** [13733-44]
- 13733 0U **Embedded visual grasping system based on MaixCam and LAB color segmentation** [13733-36]
- 13733 0V **Design and applications of DSA-ResNet network based on ResNet** [13733-3]
- 13733 0W **MFENet: RGB-d salient object detection network with multiscale feature enhancement** [13733-17]
- 13733 0X **Corrosion detection in petrochemical pipelines using distributed acoustic sensing and unsupervised signal analysis** [13733-1]
- 13733 0Y **A comprehensive review on applications of computer vision in medical imaging** [13733-11]

- 13733 0Z **Optimisation of intelligent early warning system for hotel security based on computer vision** [13733-21]
- 13733 10 **Research on lightweight UAV vehicle detection algorithm based on global feature fusion method** [13733-33]
- 13733 11 **A prediction method for milk production of dairy cows based on fine-tuning multimodal large language models** [13733-38]
- 13733 12 **The prediction method of heat transfer coefficient of vacuum glass based on VAR-CGRU aggregation model** [13733-24]
- 13733 13 **Research on the prediction of thermal insulation performance of vacuum glass based on integrated optimization** [13733-30]
- 13733 14 **Channel estimation of 5G system based on deep learning and residual connectivity network** [13733-6]
- 13733 15 **Image augmentation-based dataset construction method for small-sample defect detection in petrochemical explosion-proof equipment** [13733-28]
