

PROCEEDINGS OF SPIE

Seventeenth International Conference on Quality Control by Artificial Vision

**Tsuyoshi Shimizu
Takuya Akashi
Junya Sato
Chao Zhang**
Editors

**4–6 June 2025
Kofu, Japan**

Sponsored by
The Japan Society for Precision Engineering (Japan)

Published by
SPIE

Volume 13737

Proceedings of SPIE 0277-786X, V. 13737

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Seventeenth International Conference on Quality Control by Artificial Vision*, edited by Tsuyoshi Shimizu, Takuya Akashi, Junya Sato, Chao Zhang, Proc. of SPIE 13737, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	Conference Committee
xi	Introduction

INTERNATIONAL CONFERENCE ON QUALITY CONTROL BY ARTIFICIAL VISION

13737 02	Boosting explainability of visual inspection via multihead vision-language model [13737-6]
13737 03	A visual effector and AI-driven detection system for surface cosmetic defects with augmented reality integration [13737-36]
13737 04	Airplane panels inspection via 3D point cloud segmentation on low-volume training dataset [13737-15]
13737 05	Enhancing image quality and anomaly detection for small and dense industrial objects in nuclear recycling [13737-16]
13737 06	Framework for development of perceptual defect visibility models [13737-17]
13737 07	Spectral learning-based artificial vision for quality control [13737-4]
13737 08	Utilizing large pre-trained monocular depth models for machining setup inspection and measurement [13737-32]
13737 09	Welding process analysis through sequential classification of process images [13737-18]
13737 0A	Assembly progress estimation using instance segmentation with data augmentation considering annotation data [13737-30]
13737 0B	AI-driven surface defect detection in aerospace manufacturing as part of the CASPR cobotized NDT platform, FANTOM project [13737-35]
13737 0C	Digital twins for predictive monitoring and anomaly detection: application to seismic and railway infrastructures [13737-20]
13737 0D	Detection and characterization of damages on mechanical parts via 3D point cloud processing [13737-21]
13737 0E	The relationship between human body keypoints and psychological states with machine learning: a pilot study [13737-25]
13737 0F	Ningyo Joruri puppeteer motion measurement using two types of motion capture devices [13737-33]

- 13737 OG **Automatic sleep database generation using frame subtraction and machine learning**
[13737-26]
- 13737 OH **Differential evolution-based parameter optimization for circle detection by Hough transform** [13737-7]
- 13737 OI **Improving subspace clustering by combining self-expressive and greedy models** [13737-3]
- 13737 OJ **Improving the explainability of neural network by downstream post-optimization** [13737-2]
- 13737 OK **Dynamically adaptive negative pairs for contrastive multiview clustering** [13737-1]
- 13737 OL **Improving monocular visual odometry localization with wheel and inertial measurements**
[13737-23]
- 13737 OM **Hierarchical fine-grained action recognition for manufacturing applications** [13737-12]
- 13737 ON **Safety and control of wheeled mobile robots using differential flatness under disturbances**
[13737-19]
- 13737 OO **A multicriteria navigation framework for robotic missions in complex environments**
[13737-8]
- 13737 OP **Exploiting class vulnerabilities: targeted mislabeling attack in object detection** [13737-27]
- 13737 OQ **A review of real-time object detection for sustainable edge deployment in waste sorting sites** [13737-14]
- 13737 OR **A method for estimating egg weight using image processing** [13737-39]
- 13737 OS **Early control of *spodoptera litura* lotus root pest using image processing** [13737-37]
- 13737 OT **Optical camera-based Boltzmann luminescent thermometer in dark situations** [13737-34]
- 13737 OU **Danger detection in skiing using a helmet-mounted 360-degree camera** [13737-9]
- 13737 OV **Contamination of hospital environments due to droplet dispersion during coughing: visualization of over-table wiping** [13737-13]
- 13737 OW **Digital twin for bin-picking: bridging the gap between 2D image analysis and 3D simulation through stochastic geometry** [13737-29]
- 13737 OX **Proposal for volume estimating of cherry tomatoes based on 3D point cloud** [13737-38]
- 13737 OY **Identification of steel surgical instruments using RGB-D orthoimage** [13737-24]

- 13737 0Z **Multiscale surface matching method for assembly or recognition of 3D archaeological objects** [13737-31]
- 13737 10 **Multimodal object tracking using raw visible and thermal infrared data** [13737-22]
- 13737 11 **Image synthesis using a physics-informed diffusion model for crack detection with laser flying spot thermography** [13737-11]
- 13737 12 **Emotion estimation using emotion maps by generative AI** [13737-10]
- 13737 13 **Makeup transfer based on non-facial area transfer suppression using color channel information** [13737-28]
