

PROCEEDINGS OF SPIE

Second International Conference on Artificial Intelligence and Power System (AIPS 2025)

Qiang Yang
Yuanping Xu
Peng Liu
Editors

9–11 May 2025
Chengdu, China

Organized by
Chengdu University of Information Technology (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13786

Proceedings of SPIE 0277-786X, V. 13786

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Second International Conference on Artificial Intelligence and Power System (AIPS 2025)*, edited by Qiang Yang, Yuanping Xu, Peng Liu, Proc. of SPIE 13786, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

LIBRARY**

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

INTELLIGENT OPERATION AND MAINTENANCE; FAULT DIAGNOSIS OF POWER SYSTEMS

- 13786 02 **Image segmentation method for silkworms based on convSNP** [13786-16]
- 13786 03 **Research on fault diagnosis technology of intelligent substation secondary system**
[13786-43]
- 13786 04 **Deep learning in air quality index prediction** [13786-41]
- 13786 05 **Standardized lossless compression transmission of power load data** [13786-30]
- 13786 06 **Research on risk control of methanol leakage in engine room at high-pressure oil pipes**
[13786-4]
- 13786 07 **Synchronous identification of three-phase opening and closing states of high-voltage
isolation switch based on SOM** [13786-21]
- 13786 08 **Electromagnetic simulation of metal detection based on finite element analysis** [13786-14]
- 13786 09 **Cooperative stability control of charge and storage frequency of microgrid based on FSO
algorithm** [13786-22]
- 13786 0A **Research on optimized control technology for air conditioner load response considering
electric-heat balance under time-of-use pricing** [13786-56]
- 13786 0B **Construction project department of power grid enterprises based on computer data
statistical analysis research on carrying capacity assessment technology** [13786-5]
- 13786 0C **Fault identification and diagnosis for high-voltage direct current transmission systems
based on deep residual shrinkage networks** [13786-18]
- 13786 0D **Simulation and measurement on phase distribution of commutation pulses** [13786-23]
- 13786 0E **Bolt monitoring system for wind turbine based on flange gap** [13786-33]
- 13786 0F **Key technologies of high-voltage switchgear trolley shifting joint device** [13786-52]
- 13786 0G **A digital twin-based collaborative evaluation method for energy savings and cost
budgeting in university classroom lighting systems** [13786-39]

- 13786 OH **User portrait of residents' charging pile based on charging behavior** [13786-19]
- 13786 OI **A comparative study of objective fatigue metrics for electric pole workers** [13786-10]
- 13786 OJ **Research on calculation method of financial evaluation for power project in the new situation** [13786-31]
- 13786 OK **Optimization of power grid metering material distribution based on improved Grey Wolf Optimizer** [13786-9]
- 13786 OL **A transformer fault identification method based on an improved learning numerical spiking neural P system** [13786-13]
- 13786 OM **Road defect detection based on lightweight RT-DETR** [13786-59]

ENERGY SYSTEM OPTIMIZATION AND SUSTAINABLE DEVELOPMENT

- 13786 ON **Effects of heating rate on synergy effects and kinetics during co-pyrolysis of brown coal and wheat straw** [13786-17]
- 13786 OO **Study on wind-induced stability of dry pyramid considering corrosion defects** [13786-37]
- 13786 OP **Research on the construction of LED intelligent lighting system for buildings based on ZigBee** [13786-44]
- 13786 OQ **Research on cost adjustment model for new power system** [13786-57]
- 13786 OR **Design of government authorized contracts for difference for renewable energy** [13786-64]
- 13786 OS **Digital carbon emission monitoring and evaluation method for industrial parks based on energy big data** [13786-20]
- 13786 OT **Integrated energy two-layer active scheduling optimization under multienergy load and storage coordination** [13786-55]
- 13786 OU **Two-stage power optimal control method for energy storage to suppress the dual-time-scale fluctuations of new energy** [13786-45]
- 13786 OV **Analysis of effects of energy-saving technologies on reducing carbon emissions in pursuit of carbon dioxide peaking and carbon neutrality goals** [13786-2]
- 13786 OW **Experimental study on the influence of cryogenic spray on pressure and thermal stratification in storage tanks** [13786-3]
- 13786 OX **Experimental research of thermal stability of biphenyl/diphenyl oxide heat transfer fluid for concentrating solar power systems** [13786-46]

- 13786 0Y **Optimal tracing method of time-varying optimal power flow for distribution network with wind turbines based on time series** [13786-47]
- 13786 0Z **Optimization research on offshore construction technology of submarine cable repair joint box** [13786-26]
- 13786 10 **Analysis and optimization for seasonal thermal energy storage operation of deep borehole heat exchangers heating system** [13786-60]
- 13786 11 **Estimating soil thermal properties in ground source heat pump zones with artificial neural networks and enhanced data techniques** [13786-12]
- 13786 12 **Key technologies and practical applications for construction of ultra-long-distance cross-sea bridge cables** [13786-53]
- 13786 13 **Research on the planning of wind-solar hydrogen storage energy systems based on multienergy complementarity** [13786-42]
- 13786 14 **An optimization method for cooling water system based on BPNN-CPO** [13786-62]
- 13786 15 **Optimized operation strategy for IES considering P2G-CCS coupling and flexible supply-demand responses** [13786-8]
- 13786 16 **A HAG-LiCl composite hygroscopic hydrogel for efficient water harvesting** [13786-51]
- 13786 17 **Comprehensive evaluation of converter station construction plan considering carbon emission reduction goals** [13786-65]
- 13786 18 **Simulation and optimization of factors influencing the performance of Trombe wall** [13786-28]
