

PROCEEDINGS OF SPIE

International Conference on Computer Vision and Augmented Reality (CVAR 2025)

**Weichuan Zhang
Jiaxin Han**
Editors

**16–18 May 2025
Xi'an, China**

Organized by
Xi'an University of Technology (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13801

Proceedings of SPIE 0277-786X, V. 13801

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Computer Vision and Augmented Reality (CVAR 2025)*, edited by Weichuan Zhang, Jiaxin Han, Proc. of SPIE 13801, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

INTELLIGENT SENSING AND DETECTION SYSTEMS

- 13801 02 **An approach for anomaly identification and handling in manufacturing execution scenario based on knowledge graphs** [13801-50]
- 13801 03 **Shared manufacturing-based active sensing and integration of equipment operation and maintenance data** [13801-46]
- 13801 04 **Deformation assessment for local-loaded stiffened panels using physical-informed neural network** [13801-64]
- 13801 05 **Research on lidar pedestrian detection based on support vector machine** [13801-6]
- 13801 06 **Bearing fault diagnosis based on simplified segmentation empirical wavelet transform** [13801-28]
- 13801 07 **Anomaly detection based on spatiotemporal LSTM with Transformer-AE generative adversarial networks** [13801-9]
- 13801 08 **Impulse component separation based on matrix factorization of multiple time-frequency spectrums** [13801-86]
- 13801 09 **Design of a multiparameter water quality in situ monitoring sensor for groundwater** [13801-36]
- 13801 0A **PCB defect detection method based on improved YOLOv10** [13801-77]
- 13801 0B **Local phase shift tuning method based on mechanical microstrain control phase shift fiber Bragg grating sensor** [13801-47]
- 13801 0C **Research on marine engine fault early warning based on MIC-informer** [13801-95]
- 13801 0D **Application of improved wavelet threshold denoising to bearing fault diagnosis** [13801-38]
- 13801 0E **Three-dimensional recognition method of steelmaking area based on PointNet++** [13801-96]
- 13801 0F **Improving face recognition with ensemble learning: a comparative study of EigenFace, FisherFace, and ResNet-18** [13801-14]
- 13801 0G **Enhancing zero-shot object counting via ViT and BERT integration** [13801-22]

- 13801 OH **Research on anomaly detection of ore particle size based on YOLOv10** [13801-3]
- 13801 OI **Converter installation position deviation detection method with application of point cloud processing** [13801-34]
- 13801 OJ **Bearing fault diagnosis method based on interpretable temporal logical network** [13801-85]
- 13801 OK **Communication test and verification of microwave-based passive electronic transformer** [13801-87]
- 13801 OL **A LiDAR SLAM based on multifeature fusion for unstructured environments** [13801-13]
- 13801 OM **Coronary artery segmentation based on edge contour attention mechanism U-Net network** [13801-53]
- 13801 ON **Reflective clothing detection algorithm based on the improved YOLO** [13801-81]
- 13801 OO **An improved lightweight YOLOv11 algorithm for efficient fire detection** [13801-63]
- 13801 OP **Research on seafloor sediment classification methods based on multibeam bathymetric sonar** [13801-70]
- 13801 OQ **Online detection and quantitative analysis of tobacco cut morphological features based on machine vision** [13801-33]
- 13801 OR **Nap-of-the-object photogrammetry application technology for house physical examination** [13801-31]
- 13801 OS **Eye-tracking-based identification of reading difficulty areas** [13801-51]
- 13801 OT **Application of improved YOLOv11 network combining SDI and ASF-YOLO in security monitoring scenarios** [13801-4]
- 13801 OU **Side-scan sonar sea bottom line extraction based on Segment Anything Model 2** [13801-76]
- 13801 OV **FA-transformer: a remote sensing image captioning framework integrating multiscale features and enhanced attention mechanisms** [13801-24]
- 13801 OW **Voids filling of DEM with global diffusion filling model** [13801-74]
- 13801 OX **Spatial-temporal transformation analysis of vegetation coverage based on prediction model** [13801-65]
- 13801 OY **Research on entity recognition based on relative position information and boundary perception enhancement** [13801-44]

- 13801 0Z **Visual orientation system under big data science and artificial intelligence** [13801-57]
- 13801 10 **FFE-YOLO: fuzzy feature enhancement-based YOLOv8 for small object detection in UAV infrared images** [13801-79]
- 13801 11 **Design and optimization of intelligent machine vision model for the defect detection of bushing based on machine learning** [13801-75]

AUTONOMOUS CONTROL AND INTELLIGENT SYSTEMS

- 13801 12 **A multi-robot collaborative task allocation approach based on alternating direction method of multipliers** [13801-26]
- 13801 13 **The application of intelligent control in the field of entertainment and education: research on a self-playing tic-tac-toe robot** [13801-10]
- 13801 14 **Design and research of PLC/DCS/SCADA integrated monitoring system for rail transit** [13801-80]
- 13801 15 **Intelligent agricultural tree planting robot** [13801-103]
- 13801 16 **Energy recovery of flapping-wing aircraft based on triboelectric nanogenerator** [13801-58]
- 13801 17 **Research on industrial robot information modeling and communication based on OPC UA** [13801-11]
- 13801 18 **Application of artificial intelligence technology in the design and manufacturing of civil aircraft** [13801-100]
- 13801 19 **Small sample reliability analysis of machining center subsystem** [13801-17]
- 13801 1A **Design and implementation of a PV panel cleaning robot based on BIPV** [13801-15]
- 13801 1B **Electromagnetic coupling sliding ring for power supply and communication of intelligent drill pipe** [13801-71]
- 13801 1C **Improving entity and relationship extraction method in product concept design based on Casrel model knowledge graph** [13801-12]
- 13801 1D **High-security path planning and tracking control for intelligent vehicle with wheel corner modules** [13801-45]
- 13801 1E **Human-machine collaborative regulation and control algorithm for unmanned vehicles based on dynamic programming** [13801-78]
- 13801 1F **Research on coordinated control method of trajectory tracking for wheel corner module articulated vehicle** [13801-5]

- 13801 1G **The overall structural design of a UAV-mounted dual-band antenna SAR system** [13801-18]
- 13801 1H **Research and analysis of frequency conversion tensioning device for mining belt conveyor** [13801-35]
- 13801 1I **Multi-USV finite-time formation control based on intermittent communication** [13801-89]
- 13801 1J **Research on vibration energy collection circuit of transmission line based on triboelectric nanogenerator** [13801-27]
- 13801 1K **Control strategy of ship new energy grid-connected inverter based on virtual synchronous generator** [13801-61]
- 13801 1L **Automated management and scheduling of intelligent unmanned aerial systems in disaster rescue** [13801-52]
- 13801 1M **Construction of carbon footprint accounting and certification platform for electrical equipment products based on the lifecycle assessment approach** [13801-97]
- 13801 1N **Robotic control optimization based on receptance-weighted reinforcement learning** [13801-30]
- 13801 1O **Three-closed-loop clamping force control strategy of electro-mechanical brake system based on fuzzy theory** [13801-68]
- 13801 1P **Research on simulation testing of control strategy for adaptive cruise control system in electric vehicle** [13801-55]
- 13801 1Q **Language to prompts: self-optimize instructions for robotics skills learning** [13801-41]
- 13801 1R **The control method for constant-force operation of the robot based on gravity compensation and stiffness prediction** [13801-62]
- 13801 1S **Structural vibration control based on reinforcement learning** [13801-7]
- 13801 1T **Structural design and optimization of deep-sea ROV electronics module based on MIGA** [13801-32]
- 13801 1U **Simulation of thermal management of lithium-ion battery based on two-dimensional symmetry model** [13801-94]
- 13801 1V **Water circulation system design of supercritical boiler** [13801-49]
- 13801 1W **A method of predicting polished film thickness in IC fabrication based on machine learning** [13801-104]
- 13801 1X **Design and research of a tracker for the entire process supervision of divided narcotic and psychotropic drugs** [13801-56]

- 13801 1Y **TSRA-net: temporal and relational patterns-aware TKGR for intelligent robot question-answering systems** [13801-23]
- 13801 1Z **Research on the development of a 3D park visualization system based on UE5** [13801-37]
- 13801 20 **SLAM and deep reinforcement learning-based autonomous navigation delivery robot** [13801-73]
