

PROCEEDINGS OF SPIE

Second International Conference on Remote Sensing Technology and Survey Mapping (RSTSM 2025)

**Paolo Mercorelli
Zhiyu Jiang
Cong Wang**
Editors

**28 February – 2 March 2025
Beijing, China**

Organized by
Nanchang University (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13802

Proceedings of SPIE 0277-786X, V. 13802

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Second International Conference on Remote Sensing Technology and Survey Mapping (RSTSM 2025)*, edited by Paolo Mercorelli, Zhiyu Jiang, Cong Wang, Proc. of SPIE 13802, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

REMOTE SENSING TECHNOLOGY AND IMAGE PROCESSING

- 13802 02 **CTS-Net: a deep learning network for urban individual tree crown segmentation using high-resolution satellite images** [13802-52]
- 13802 03 **An intelligent interpretation method of SAR images based on forward decomposition and inverse mapping of hidden layer features** [13802-9]
- 13802 04 **Synergistic analysis of habitat quality and urbanization based on InVEST modeling** [13802-27]
- 13802 05 **Research on the application of high-resolution remote sensing images in refined classification of rural landscapes** [13802-37]
- 13802 06 **Extraction of planation surfaces in the southeastern margin of the Tibetan Plateau based on fuzzy logic and analysis of their formation mechanisms** [13802-76]
- 13802 07 **Study on the coupling mechanism between Arctic glacier elevation change and climate change based on ICESat-2 satellite data** [13802-28]
- 13802 08 **Identification and analysis of potential geological hazards in Baihetan Reservoir area: a case study of the Yezhutang to Haozhiba section** [13802-41]
- 13802 09 **Adapting segment anything model for land cover classification: the SA4L model and its applications in remote sensing** [13802-6]
- 13802 0A **Spatiotemporal analysis of eco-environmental quality along rail transit corridors: a remote sensing-based assessment** [13802-31]
- 13802 0B **Spatiotemporal dynamics and driving factors of vegetation coverage in Lebanon based on Landsat imagery** [13802-18]
- 13802 0C **Error analysis of satellite-based 3D wind field inversion using single-beam coplanar method** [13802-19]
- 13802 0D **A method of infrared image nonuniformity correction for rapid imaging tasks** [13802-43]
- 13802 0E **Rapid construction of high-precision regional terrain gravity gradient map** [13802-46]
- 13802 0F **Bayesian network-based modeling and inference of storm-flood geohazard chain** [13802-66]

- 13802 OG **Building extraction from high-resolution remote sensing images based on improved U-Net deep learning model** [13802-48]
- 13802 OH **Highly precision recognition of aircraft based on SAR images considering multiscale and small target problems** [13802-10]
- 13802 OI **Multifeature fusion remote sensing workflow recommendation method based on knowledge graph** [13802-38]
- 13802 OJ **Attention-based multiscale cross-modal fusion network for pansharpening remote sensing images** [13802-25]
- 13802 OK **Lightweight SAR aircraft image classification network based on butterfly transform convolution** [13802-2]
- 13802 OL **Deep semantic dictionary pair learning for remote sensing image classification** [13802-17]
- 13802 OM **Adversarial defense network for hyperspectral image classification** [13802-54]

INTELLIGENT MEASUREMENT AND MONITORING TECHNOLOGY

- 13802 ON **A method for predicting dispersion curves based on improved BP neural network based on Att mechanism** [13802-55]
- 13802 OO **Post-earthquake landslide recognition based on improved DeepLabV3+** [13802-11]
- 13802 OP **Tunnel construction monitoring method based on 3D laser scanning technology** [13802-30]
- 13802 OQ **Realization and application of IoT-based multimodal sensor fusion for intelligent construction site monitoring** [13802-57]
- 13802 OR **Monitoring and analysis of land subsidence in Beihai based on small baseline set interferometry** [13802-7]
- 13802 OS **Comparative analysis of machine learning methods for satellite-derived bathymetry using WorldView-3 imagery** [13802-45]
- 13802 OT **Large scene SAR vehicle detection based on scene prior information** [13802-15]
- 13802 OU **Accuracy determination of radar altimetry considering error correlation** [13802-64]
- 13802 OV **ICESat-2 bathymetry study status** [13802-49]
- 13802 OW **Realistic 3D geo-scene construction combining laser and visual point clouds** [13802-51]
- 13802 OX **Control technology for surface subsidence in coal mine paste filling mining based on deformation prediction** [13802-70]

- 13802 0Y **Research and application of video monitoring and early warning technology for passenger cableway cable position** [13802-39]
- 13802 0Z **Research on all-fiber DC high current measurement technique based on diamond NV center** [13802-74]
- 13802 10 **Application research of handheld 3D laser scanning and oblique photogrammetry in architectural as-built surveying and mapping** [13802-69]
- 13802 11 **Research on environmental risk monitoring during the construction phase of power transmission and substation engineering based on YOLOv8** [13802-16]
- 13802 12 **Flood disaster monitoring in the power grid area of Nanyang, Henan Province based on GF-3 imagery during heavy rainfall** [13802-35]

DATA ANALYSIS AND METHODOLOGICAL RESEARCH

- 13802 13 **Enhancing UAV aeromagnetic data denoising via multitype noise augmentation and deep learning** [13802-47]
- 13802 14 **A sea-land boundary extraction network based on improved spectral water index** [13802-13]
- 13802 15 **A highly efficient synthetic aperture radar simulation algorithm based on the composite scattering model of ship-sea** [13802-33]
- 13802 16 **Research on features fusion recognition of ship targets SAR and optical data** [13802-36]
- 13802 17 **Research on denoising and extraction of forest single-photon point cloud data from ICESat-2** [13802-20]
- 13802 18 **Semantic segmentation of building floor plans based on improved Deeplabv3+** [13802-40]
- 13802 19 **Building extraction method based on improved U-Net with multi-scale perspective and spatial reconstruction** [13802-44]
- 13802 1A **The accuracy optimization of the weighted mean temperature model in the Chongqing region** [13802-5]
- 13802 1B **Crop classification in the Bekaa Valley based on feature importance selection by random forest** [13802-29]
- 13802 1C **A transformer-based approach for multivariate time series forecasting of ozone concentration with MS-transformer** [13802-53]
- 13802 1D **Analysis of evapotranspiration (ET) and its driving factors in the Yanshan-Taihang Mountains region from 2000 to 2020** [13802-23]

- 13802 1E **An online transfer learning architecture for radar target recognition** [13802-34]
- 13802 1F **Research of abnormal eddies based on the mathematical model of vertical temperature profiles** [13802-26]
- 13802 1G **Optimization method for vertical wind velocity retrieval in spaceborne wind field inversion based on the VAD technique** [13802-22]
- 13802 1H **Study on the relationship between grassland coverage and climate factors in northern Xinjiang** [13802-78]
- 13802 1I **Retrieval of aerosol optical depth from directional polarimetric camera based on generalized retrieval of aerosol and surface properties algorithm** [13802-72]
- 13802 1J **Analysis of physical characteristics of convective cloud using Fengyun remote sensing data** [13802-63]
- 13802 1K **Method for analyzing IRI using multiple survey lines based on pavement elevation point cloud data** [13802-4]
- 13802 1L **Research on the relationship between cloud characteristic parameters and precipitation of spring vortex in Liaoning based on FY-2E satellite data** [13802-12]
- 13802 1M **Habitat selection and prediction of potential habitats for the Yunnan snub-nosed monkey in southwestern China** [13802-68]
- 13802 1N **A new method for determining pose of monocular cameras by assistances of unmanned aerial vehicle and rigorous visual geometric model** [13802-75]
- 13802 1O **Modeling spatiotemporal heterogeneity of ground-level NO₂ pollution in Jiangxi Province, China: a geographically weighted regression kriging approach with multisource data fusion** [13802-62]
