SHOCK-TO-DETONATION TRANSITION

General Session

Cochairmen: Philip Howe and Mohammad Chaudhri

Combined Pressure Shear Ignition of Explosives V. Boyle, R. Frey, and O. Blake	3
Particular Aspect of the Explosive Particle Size Effect on Shock Sensitivity of Cast PBX Formulations H. Moulard	18
Particle Size Effects in the Initiation of Explosives Containing Reactive and Non-Reactive Continuous Phases R. L. Simpson, F. H. Helm, P. C. Crawford, and J. W. Kury	25
In-Situ Study of the Chemically Driven Flow Fields in Initiating Homogeneous and Heterogeneous Nitromethane Explosives S. A. Sheffield, R. Engelke, and R. R. Alcon	39
Decomposition of High Explosives in Shock and Detonation Waves V. E. Fortov, G. I. Kanel, T. N. Fortova, S. I. Malyrenko, and A. V. Utkin	50

Specialist Session

Cochairmen: Randall Simpson and Peter Haskins

Initiation of Explosive Crystals by Shock or Impact C. S. Coffey	58
Initiation Threshold of High Explosives in Small Flyer Plate Experiments H. R. Kleinhanß, F. Lungenstraß, and H. Zöllner	66
A Two-Dimensional Lagrangian Technique for Shock Initiation Diagnosis Huan Shi and Ding Jing	77
Influence of RDX Crystal Shape on the Shock Sensitivity of PBXs A. C. van der Steen, H. J. Verbeek, and J. J. Meulenbrugge	83
A Lagrange Gauge Study of the Shock Initiation Process in an Intermolecular Explosive EAK M. Cowperthwaite, J. T. Rosenberg, and A. G. Taliancich	89

VOLUME I
CONTENTS (Cont.)

	<u>Page</u>
Specialist Session Cochairmen: Jerry Wackerle and Robert Setchell	
Anomalous Shock Sensitivity/Density Relationship for Pressed Booster Explosives from a Small-Scale Gap Test	
R. J. Spear and V. Nanut	98
Shock Initiation of LX-17 as a Function of Its Initial Temperature	
P. A. Urtiew, L. M. Erickson, D. F. Aldis, and C. M. Tarver	112
Initiation and Detonation Properties of the Insensitive High Explosive TATB/Kel-F 800 95/5	
C. D. Hutchinson, G. C. W. Foan, H. R. Lawn, and A. G. Jones	123
Fabry Perot Velocimetry on Detonating LX-17 in Planar and Spherically Divergent Geometries	
K. L. Bahl, R. D. Breithaupt, C. M. Tarver, and W. G. Von Holle	133
Reaction Rates of PBH-9D Explosive	
Zhao Feng, Sun Chengwei, Chen Peiqi, and Ouyang Denghuan	142

TIME RESOLVED CHEMISTRY

General Session Cochairmen: Anatolij Dremin and William Von Holle	
Pulsed-Laser-Excited Raman Spectra of Shock-Compressed Triaminotrinitrobenzene	
W. M. Trott and A. M. Renlund	153
Laser Ignition of Explosives: A Mass Spectroscopic Study of the Pre-ignition Reaction Zone	
H. Östmark and H. Nilsson	162
The Use of Time-Resolved Spectrometries in the Study of Initiation of Explosives at Molecular Level	
A. E. Delpuech	172
Vibrational Spectroscopic Investigations of Shock-Compressed Liquid Nitrogen and Shock-Compressed Liquid Nitromethane	
D. S. Moore and S. C. Schmidt	180
Absorption Spectroscopy of Shocked Benzene	
N. C. Holmes, G. Otani, P. McCandless, and S. F. Rice	190

VOLUME I
CONTENTS (Cont.)

Page

INITIATION MODELING

General Session

Cochairmen: Pier Tang and John Field

Reaction Rates and the Charge Diameter Effect in Heterogeneous Explosives G. A. Leiper and J. Cooper	197
A Shock Initiation Model for Fine-Grained Hexanitrostilbene M. E. Kipp and R. E. Setchell	209
A Theoretical Picture of Shock-to-Detonation Transition in a Homogeneous Explosive A. K. Kapila and J. W. Dold	219
Chemical Phenomena Associated with the Initiation of Thermal Explosions T. B. Brill and P. J. Brush	228

Specialist Session

Cochairmen: Kibong Kim and Graeme Leiper

The Lattice Density of States Concept and its Role in Determining the Shock Sensitivity of PETN and Nitromethane R. D. Bardo	235
Unified Formulation of the Reactivity of Condensed Explosives R. Cheret	246
The Choice Problem of Equation Determining the Condensed Reacting Media Characteristics in Numerical Modeling of Shock Processes V. S. Trofimov	250
Global Calibration of Constitutive Relationships in Explosive Reaction Zone Huan Shi and Ding Jing	252

DEFLAGRATION-TO-DETONATION TRANSITION

General Session

Cochairmen: Richard Bernecker and Albert van der Steen

DDT - Determination of the Successive Phases of Phenomena M. Samirant	259
---	-----

VOLUME I

CONTENTS (Cont.)

	<u>Page</u>
Deflagration to Detonation in Granular HMX J. M. McAfee, B. W. Asay, A. W. Campbell, and J. B. Ramsay	265
Model Calculations and Experimental Measurements of the Response of HMX Porous Beds to Deflagration and Shock D. F. Aldis, E. L. Lee, R. L. Simpson, and A. M. Weston	280
Compressive Combustion of Granular Materials Induced by Low-Velocity Impact M. R. Baer and J. W. Nunziato	293
Compaction Wave Acceleration in Granular Energetic Material: Simulation with a Reactive Shock Wave Model D. E. Kooker	306
Specialist Session Cochairmen: Douglas Kooker and Henry Moulard	
Combined Experimental and Theoretical Investigations into the Deflagration-to-Detonation Transition H. J. Verbeek and A. C. van der Steen	320
Numerical Simulation of Deflagration-to-Detonation Transition for TS 3659 Propellants T. Hsieh and K. Kim	329
Dynamic Compaction and Compressive Reaction Studies for Single and Double-Base Ball Propellants B. C. Glancy, H. W. Sandusky, P. J. Miller, and A. D. Krall	341
DDT Studies of a High Energy Spherical Ball Propellant R. R. Bernecker	354
An Improved Model of the Deflagration-to-Detonation Transition in Porous Beds C. F. Price, A. I. Atwood, and T. L. Boggs	363

EQUATION OF STATE

General Session
Cochairmen: Claude Fauquignon and Milton S. Shaw

Shock Behavior of Explosives about the C-J Point P. W. Cooper	379
---	-----

VOLUME I
CONTENTS (Cont.)

	<u>Page</u>
Electrically Enhanced Detonation and Equations of State for Detonation Products	
M. Cowperthwaite	388
The Measurement of Electrical Conductivity in Detonating Condensed Explosives	
D. G. Tasker and R. J. Lee	396
Synthesis of Ultrafine Diamonds in Detonation Waves	
V. M. Titov, V. F. Anisichkin, and I. Yu. Mal'kov	407
Carbon in Detonations	
J. D. Johnson	417
Phase Changes in Carbon and Nitrogen Systems: Their Effects on the Detonation Properties of High Explosives	
F. H. Ree and M. van Thiel	425
Specialist Session Cochairmen: Francis Ree and Katsumi Tanaka	
The Detonation Parameters of New Powerful Explosive Compounds Predicted with a Revised VLW Equation of State	
Wu Xiong, Sun Jian, and Xiao Lianjie	435
Theoretical Model of Explosive Detonation Products: Tests and Sensitivity Studies	
G. I. Kerley	443
A New Simulation Method for the Efficient Calculation of Benchmarks for Detonation Products Equations of State	
M. S. Shaw	452
Calculations of Detonation Pressures for a Homologous Series of Polynitroaliphatic Explosives Using a Fluid Perturbation Equation of State and a New Chemical Equilibrium Computer Program	
F. J. Zerilli and H. D. Jones	461
Specialist Session Cochairmen: LeRoy Green and Manfred Held	
A Detonation Pressure Measurement System Employing High Resistance Manganin Foil Gauge	
S. Y. Song and J. W. Lee	471

VOLUME I
CONTENTS (Cont.)

	<u>Page</u>
Heat of Detonation, the Cylinder Test, and Performance in Munitions	
I. B. Akst	478
Theoretical Prediction of High Explosives Efficiency: Application to NTO	
F. Bugaut, S. Bernard, and R. Chirat	489
Determining JWL Equation of State Parameters Using the Gurney Equation Approximation	
P. J. Miller and K. E. Alexander	498
Specialist Session Cochairmen: Gerald Kerley and Douglas Tasker	
Studies about the Equations of State of the Detonation Products	
N. Carion, J. Aveille, P. Andriot, F. Chaisse, G. Guri, M. T. Kerihuel, and M. Leroy	506
Sensitivities of Adiabatic and Gruneisen Gammas to Errors in Molecular Properties of Detonation Products	
W. Byers Brown and M. Braithwaite	513
Reactive Flow Measurements and Calculations for ZrH₂-Based Composite Explosives	
M. J. Murphy, R. L. Simpson, R. D. Breithaupt, and C. M. Tarver	525

COMPOSITES AND EMULSIONS

General Session Cochairmen: Ding Jing and Raymond McGuire	
Detonation Characteristics of Gun Propellants	
B. W. Asay, A. W. Campbell, M. J. Ginsberg, and J. B. Ramsay	537
Detonation Properties of Mixtures of HMX and Emulsion Explosives	
J. D. Renick, P. A. Persson, and J. A. Sanchez	545
The Prospects for Composite Explosive	
Guo Yuxian	554
Detonation Velocity and Pressure of the Non-Ideal Explosive Ammonium Nitrate	
A. Miyake, A. C. van der Steen, and H. H. Kodde	560

VOLUME I
CONTENTS (Cont.)

	<u>Page</u>
Specialist Session Cochairmen: Herbert Richter and James Short	
Shock Sensitivities of Energetically Substituted Benzofuroxans	
M. L. Chan, C. D. Lind, and P. Politzer	566
Detonation and Shock Initiation Properties of Emulsion Explosives	
J. Lee, F. W. Sandstrom, B. G. Craig, and P.-A. Persson	573
Effect of Pressure on Shock Sensitivity of Emulsion Explosives	
G. Om Reddy and F. P. Beitel, Jr.	585
Development of a Model of Reaction Rates in Shocked Multicomponent Explosives	
K. Kim	593
A Model for the Initiation of Heterogeneous High Explosives	
Subject to General Compressive Loading	
J. Starkenberg	604

COMPOSITES AND EMULSIONS/UNDERWATER EXPLOSIVES

Specialist Session Cochairmen: Leslie Roslund and Algot Persson	
Calculation of Detonation Properties of Emulsion Explosives	
K. Tanaka, M. Iida, Y. Nakayama, N. Ishikawa, M. Yoshida, and S. Fujiwara	621
Chemistry of Underwater Explosive Detonations	
D. Carlson, R. Doherty, V. Ringbloom, J. S. Deiter, and G. B. Wilmot	626
Estimation of Performance of Underwater Explosives	
D. A. Cichra and R. M. Doherty	633
Underwater Explosion of Emulsion Explosives	
K. Hattori, Y. Kato, K. Tokita, Y. Fukatsu, N. Mori, and A. Torii	640
The Fundamentals of Metal Combustion in Composite Explosives	
Revealed by High Speed Microphotography	
W. C. Tao, A. M. Frank, R. E. Clements, and J. E. Shepherd	641

VOLUME I

CONTENTS (Cont.)

Page

REACTION ZONE

General Session

Cochairmen: William Davis and Joseph Foster

Detonation Reaction-Zone Structure for PBX 9502 W. L. Seitz, H. L. Stacy, R. Engelke, P. K. Tang, and J. Wackerle	657
Reaction Zone Structure in Supracompressed Detonating Explosives L. G. Green, C. M. Tarver, and D. J. Erskine	670
Lagrangian Analysis of MIV Gauge Experiments on PBX 9502 Using the Mass-Displacement Moment Function C. A. Forest, J. Wackerle, J. J. Dick, S. A. Sheffield, and D. R. Pettit	683
The Heterogeneous Explosive Reaction Zone C. L. Mader and J. D. Kershner	693
Using Small Scale Tests to Estimate the Failure Diameter of a Propellant C. M. Tarver and L. G. Green	701

DETONATION WAVE PROPAGATION

General Session

Cochairmen: Roger Cheret and Michael Cowperthwaite

Molecular Dynamics Simulation of the Effect of Molecular Dissociation and Energy Absorption on Detonation Structure in Energetic Solids S. G. Lambrakos, M. Peyrard, and E. S. Oran	713
Multiprocess Detonation Model A. N. Dremin, V. Yu. Klimenko, O. N. Davidova, and T. A. Zoludeva	724
Detonation Shock Dynamics: A New Approach to Modeling Multi-Dimensional Detonation Waves J. B. Bdzil, W. Fickett, and D. S. Stewart	730
Nonequilibrium Effects of Slow Diffusion Controlled Reactions on the Properties of Explosives M. van Thiel and F. H. Ree	743
Computation of a Diverging Comp-B Detonation B. G. Bukiet	751

VOLUME I
CONTENTS (Cont.)

	<u>Page</u>
A Theoretical Analysis of the Sonic Point Properties in a Plane Detonation Wave L. Brun and F. Chaisse	757
Specialist Session Cochairmen: Craig Tarver and Patrick Gimenez	
Investigations of the Influence of Polymorphous Transformation on the Process of Detonation of Mixtures Containing HE and Substances Undergoing Transformation E. Wlodarczyk, R. Trebinski, W. Trzcinski, and W. Witkowski	766
Examples of Detonation Shock Dynamics for Detonation Wave Spread Applications D. S. Stewart and J. B. Bdzil	773
Application of Whitham's Shock Dynamics Theory to the Propagation of Divergent Detonation Waves B. D. Lambourn and D. C. Swift	784
Propagation of Detonation Waves from an Impact Region R. S. Lee, W. C. Tao, and L. D. Crouch	798
Detonation Wave Propagation in PBXW-115 J. W. Forbes, E. R. Lemar, and R. N. Baker	806
Specialist Session Cochairmen: Jerry Forbes and James Kennedy	
Non-Steady Flow in a Detonator Jia Quansheng, Chen Fumei, and Wang Tinzhen	816
Polysulfone SIP Gage for Flying Plate Explosive Components T. W. Warren and R. R. Weinmaster	822
The Effects of Inert Walls on the Velocity of Detonation in EDC35, an Insensitive High Explosive G. Eden and R. A. Belcher	831
Experimental and Numerical Study of Oblique Interactions of Detonation Waves with Explosive/Solid Material Interfaces J. Aveillé, N. Carion, J. Vacellier, and J. M. Servas	842
Experimental and Numerical Study of Corner-Turning Detonation A. W. Gibb	853

VOLUME II

CONTENTS

Page

HOT SPOTS

General Session

Cochairmen: Charles Coffey and Per-Anders Persson

The Initiation of Fast Decomposition in Solid Explosives by Fracture, Plastic Flow, Friction, and Collapsing Voids M. M. Chaudhri	857
Characterization of Defect Microstructure in High Explosives Single Crystals by Synchrotron X-Ray Tomography W. C. Tao and J. H. Kinney	868
Cavity Collapse in a Heterogeneous Commercial Explosive N. K. Bourne and J. E. Field	869
Response of Composite Propellants to Shock Loading Bai Chunhua and Ding Jing	879
Deformation and Explosive Properties of HMX Powders and Polymer Bonded Explosives J. E. Field, M. A. Parry, S. J. P. Palmer, and J. M. Huntley	886

Specialist Session

Cochairmen: Paul Cooper and Hyla Napadensky

Physical and Chemical Nature of Hot Spots in TATB and HMX J. Sharma, B. C. Beard, J. Forbes, C. S. Coffey, and V. M. Boyle	897
Hot Spot Formation in a Collapsing Void of Condensed-Phase, Energetic Material P. B. Butler, J. Kang, and M. R. Baer	906
Broad Bandwidth Study of the Topography of the Fracture Surfaces of Explosives M. Y. D. Lanzerotti, J. J. Pinto, and A. Wolfe	918
Effects of Microballoon Concentration on the Detonation Characteristics of Nitromethane-PMMA Mixtures H. N. Presles, J. Campos, O. Heuzé, and P. Bauer	925

VOLUME II
CONTENTS (Cont.)

Page

DETONATION PRODUCTS

Specialist Session
Cochairmen: Anita Renlund and Gert Bjarnholt

Detonation Characteristics of Dense Gaseous Explosive Mixtures P. Bauer, M. Dunand, H. N. Presles, and O. Heuzé	933
Detonation Temperature of Some Liquid and Solid Explosives Y. Kato, N. Mori, H. Sakai, T. Sakurai, and T. Hikita	939
The Studying of Detonation Temperatures of Solid High Explosives Shi Huisheng, Han Chengbang, Kang Shufang, and Huang Lihong	947
Free-Expansion Experiments and Modeling in Detonation: Chemistry and Hydrodynamics on a Laboratory Scale N. R. Greiner and N. Blais	953
Detonation Products of Less Sensitive High Explosives Formed Under Different Pressures of Argon and in Vacuum F. Volk and F. Schedlbauer	962
Explosive Potential of Carbohydrate-Metal Composites A. J. Tulis, J. L. Austing, W. K. Sumida, D. E. Baker, and D. J. Hrdina	972

CHEMISTRY AND COMPOSITION

Specialist Session
Cochairmen: Tom Larson and Fritz Schedlbauer

A Review of Paramagnetic Resonance Products in Condensed Phase Energetic Materials M. D. Pace	987
Properties of Bis(2,2,2-Trinitroethyl-N-Nitro) Ethylenediamine and Formulations Thereof Dong Haishan	995
NTO Development at Los Alamos L. B. Chapman	1001
Use of Oxynitrotriazole to Prepare an Insensitive High Explosive A. Becuwe and A. Delclos	1008

VOLUME II
CONTENTS (Cont.)

	<u>Page</u>
Effects of Binder Concentration on the Properties of Plastic-Bonded Explosives	
R. D. Steele, L. A. Stretz, G. W. Taylor, and T. Rivera	1014

Specialist Session
Cochairmen: Horst Adolph and Fred Volk

Chemistry of Nitromethane at Very High Pressure	
S. F. Agnew, B. I. Swanson, J. Kenney, and I. Kenney	1019
Decomposition Mechanisms and Chemical Sensitization in Nitro, Nitramine, and Nitrate Explosives	
M. D. Cook and P. J. Haskins	1027
Decomposition of Energetic Materials on the Drop-Weight-Impact Machine	
G. A. Buntain, T. L. McKinney, T. Rivera, and G. W. Taylor	1037

SPECIAL INITIATION

Specialist Session
Cochairmen: Pai Lu and Christopher Hutchinson

Behavior of an Unreacted Composite Explosive on Low Velocity Impact	
C. Loupias and A. Fanget	1047
Response of Rocket Propellants to Projectile Impact	
S. Y. Ho	1052
Characterization of Booster-Rocket Propellants and Their Simulants	
L. J. Weirick	1060
Experimental Study and Numerical Modeling of Thermal Initiation and Combustion of High Heterogeneous Explosives	
C. Castille, D. Bainville, P. Reynier, and R. Belmas	1070

Specialist Session
Cochairmen: Edward Lee and Krishna Mohan

Electrostatic Sensitivity Testing of Explosives at Los Alamos	
T. E. Larson, P. Dimas, and C. E. Hannaford	1076

VOLUME II
CONTENTS (Cont.)

	<u>Page</u>
Molecule-Surface Collision Induced Excitation and Dissociation: n,i-C₃F₇NO, C₆F₅NO, 2-Methyl, 5-Vinyl Tetrazole and C(NO₂)₄ with MgO(100) Surfaces at E_{incident} ≤ 7.5 eV	
K. Kolodney, P. S. Powers, L. Iwata, H. Reisler, C. Wittig, I. B. Mishra, and C. Capellos	1084
Initiation and Propagation in Primary Explosives	
P. M. Dickson, M. A. Parry, and J. E. Field	1100
Prompt Detonation of Secondary Explosives by Laser	
D. L. Paisley	1110
Laser Initiation of Secondary Explosives	
A. M. Renlund, P. L. Stanton, and W. M. Trott	1118

POSTER PAPERS

Organizer and Chairman: Robert Frey
Cochairmen: Harold Sandusky, John Kury, Philip Stanton,
Allan Anderson, Michel Samirant, and Thomas Boggs

Intense Electron Beam Detonation of TATB Explosives	
D. Demske, N. Brazell, W. E. Farley, S. Miller, and R. Warnes	1131
Time-Resolved Mass Spectrometry Technique for Studying Fast Transient CHNO Explosive Decomposition Kinetics	
R. D. Skocypec and K. L. Erickson	1140
Laser Ignition of Explosives: Raman Spectroscopy of the Ignition Zone	
H. Nilsson and H. Östmark	1151
The Effect of the Pentafluorothio (SF₅) Group on the Properties of Explosive Nitro Compounds: New SF₅ Explosives	
M. E. Sitzmann and D. L. Ornellas	1162
Chemistry of Detonation Soot: Diamonds, Graphite, and Volatiles	
N. R. Greiner and R. Hermes	1170
Molecular Models for Explosives: Applications to NTO	
J. P. Ritchie and E. M. Kober	1185
Reaction and Diffusion in Detonation	
N. J. B. Green, M. J. Pilling, and S. H. Robertson	1193

VOLUME II
CONTENTS (Cont.)

	<u>Page</u>
A Thermochemical Model for Shock-Induced Chemical Reactions in Porous Solids: Analogs and Contrasts to Detonation	
M. B. Boslough	1199
Reactive Modeling in Shock Initiation of Heterogeneous Explosives	
M. Quidot and J. Groux	1217
Reactive Flow Analysis and Its Applications	
G. A. Leiper and D. L. Kennedy	1224
Physical Evidence of Different Chemical Reactions in Explosives as a Function of Stress	
T. P. Liddiard, J. W. Forbes, and D. Price	1235
Towards Developing the Capability to Predict the Hazard Response of Energetic Materials Subjected to Impact	
C. S. Coffey, D. F. DeVost, and D. L. Woody	1243
"Frozen Hot Spots" in Shocked EDC35, an Insensitive High Explosive	
G. Eden, R. A. Belcher, M. I. Andrew, and W. R. Marlow	1253
Deformation and Shock Loading Studies on Single Crystals of Ammonium Perchlorate Relating to Hot Spots	
H. W. Sandusky, B. C. Glancy, D. W. Carlson, W. L. Elban, and R. W. Armstrong	1260
The Influence of Grain Morphology on the Behavior of Explosives	
S. Dufort, H. Cherin, and P. Gohar	1271
Role of Adiabatic Shear Bands in Initiation of Explosives by Drop-Weight Impact	
V. Krishna Mohan, V. C. Jyothi Bhasu, and J. E. Field	1276
Gap Tests as a Method of Discriminating Shock Sensitivity	
S. A. Aubert, G. H. Parsons, J. G. Glenn, and J. L. Thoreen	1284
Shock Sensitivity of Damaged Energetic Materials	
H. P. Richter, L. R. Boyer, K. J. Graham, A. H. Lepie, and N. G. Zwierzchowski	1295
Burning Rates of Two Cast Nitramine Explosives Using a Hybrid Closed Bomb-Strand Burner	
W. C. Tao, M. S. Costantino, and D. L. Ornellas	1310
Explosiveness and Shock-Induced Deflagration Studies of Large Confined Explosive Charges	
P. J. Hubbard and R. Tomlinson	1322

VOLUME II
CONTENTS (Cont.)

	<u>Page</u>
Initiation and Detonation Measurements on Liquid Nitric Oxide	
G. L. Schott, W. C. Davis, and W. C. Chiles	1335
Mechanisms of Detonation and Failure in Weak Chemically Sensitized Mining Safety Explosives	
M. Kennedy and I. D. Kerr	1351
Experimental Studies on the Detonation of an Explosive by Multi-Point Initiation	
Yu Jun, Fu Xinghai, and Zhang Guanren	1360
Detonation Properties of Explosive Foams	
C. J. Anderson, K. Von Rosen, A. W. Gibb, and I. O. Moen	1364
F.P.I. Velocimetry Techniques Applied to Various Problems in Detonics	
P. Gimenez, J. P. Bedoch, C. Saint-Martin, G. Baudin, and Y. de Longueville	1371
Detonation Product Equation of State for Baratol	
J. W. Kury and R. D. Breithaupt	1378
Design and Development of Precision Linear Shaped Charges	
M. G. Vigil	1385
Jet Initiation Mechanisms and Sensitivities of Covered Explosives	
M. Chick, T. J. Bussell, R. B. Frey, and A. Bines	1404
Initiation Phenomena with Shaped Charge Jets	
M. Held	1416
Spherical Projectile Impact on Explosives	
E. N. Ferm and J. B. Ramsay	1427
Projectile Impact Initiation of Explosive Charges	
M. D. Cook, P. J. Haskins, and H. R. James	1441
Correlation of Explosive Sensitivity to Compressional Inputs	
M. Kornhauser	1451
Sensitivity of Several Explosives to Ignition in the Launch Environment	
J. Starkenberg, D. L. McFadden, D. L. Pilarski, K. J. Benjamin, V. M. Boyle, and O. R. Lyman	1460
Study of Explosive Shell Fillings with Defects in Simulated Gun Launch Conditions	
C. Bélanger	1480

VOLUME II
CONTENTS (Cont.)

	<u>Page</u>
A Computational Assessment of the Role of Shielding in Preventing the Sympathetic Detonation of Munitions	
J. Starkenberg, T. M. Dorsey, K. J. Benjamin, and A. L. Arbuckle	1489
Output Measurements and Modeling of HNS Mild Detonating Fuse	
R. G. Jungst and M. E. Kipp	1510
Detonator Response Measurements with a Standardized Piezoelectric Polymer (PVDF) Gauge	
L. M. Moore, R. A. Graham, and R. P. Reed, and L. M. Lee	1529
Indexes for the Proceedings of the Symposia (International) on Detonation--1951 through 1985	
S. L. Crane, W. E. Deal, J. B. Ramsay, and B. E. Takala	1543
Author Index	I-1
