

PROCEEDINGS OF SPIE

Fourth Conference on Biomedical Photonics and Cross-Fusion (BPC 2025)

**Junle Qu
Xunbin Wei**
Editors

**27–29 June 2025
Shanghai, China**

Organized by
Chinese Laser Press

Published by
SPIE

Volume 13785

Proceedings of SPIE 0277-786X, V. 13785

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourth Conference on Biomedical Photonics and Cross-Fusion (BPC 2025)*, edited by Junle Qu, Xunbin Wei, Proc. of SPIE 13785, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

FOURTH CONFERENCE ON BIOMEDICAL PHOTONICS AND CROSS-FUSION (BPC 2025)

- 13785 02 **Model-based azimuth misalignment mitigation in polarimetric imaging of layered birefringent structures** [13785-2]
- 13785 03 **Optimized self-registration method for pseudo-depolarization calibration in Mueller matrix imaging** [13785-3]
- 13785 04 **Complex spatial illumination optimization method for backscattering Mueller matrix polarized light tissue imaging** [13785-4]
- 13785 05 **Rapid, label-free diagnosis of thyroid cancer using SHG imaging** [13785-5]
- 13785 06 **Blood oxygen calibration in deep-tissue photoacoustic tomography based on prior information** [13785-12]
- 13785 07 **Multi-stencil fast-marching-based method for three-dimensional image reconstruction in ultrasound computed tomography** [13785-13]
- 13785 08 **Dual-angle Mueller matrix polarimetry with digital filtering for single-cell analysis** [13785-14]
- 13785 09 **Label-free, rapid diagnosis of pancreatic cancer using multiphoton imaging** [13785-15]
- 13785 0A **Multiphoton-microscopy-based imaging analysis of lung adenocarcinoma** [13785-16]
- 13785 0B **Label-free melanoma boundary identification: a multiphoton-imaging-based approach** [13785-18]
- 13785 0C **Dynamic monitoring of mitotic cell rounding based on Fourier ptychographic microscopy** [13785-20]
- 13785 0D **Deconvolution-based compensation of ultrasonic transducer impulse response in photoacoustic tomography** [13785-21]
- 13785 0E **A multi-grid method for joint reconstruction of initial pressure and speed of sound in photoacoustic tomography** [13785-23]
- 13785 0F **Rapid mapping of fiber network reorganization by multiphoton imaging reveals histopathological signatures in unprocessed lung tumor tissue** [13785-26]
- 13785 0G **Portable dual-modal infrared-RGB imaging for automated classification of skin lesions** [13785-28]

- 13785 OH **AI-assisted cervical lesions assessment and classification based on optical colposcopy** [13785-32]
- 13785 OI **Predicting the efficacy of neoadjuvant chemotherapy for breast cancer based on dynamic diffuse spectral imaging** [13785-33]
- 13785 OJ **Fractional-Fourier-transform-based Michelson interferometric measurement** [13785-38]
- 13785 OK **Visualizing deuterated lipids via stimulated Raman scattering microscopy** [13785-39]
- 13785 OL **Monitoring the responses of *Haematococcus pluvialis* under different culture conditions by using FLIM** [13785-41]
- 13785 OM **AI-based image analysis and detection of microalgae** [13785-42]
