2025 21st International Conference on Distributed Computing in Smart Systems and the Internet of Things (DCOSS-IoT)

DCOSS-IoT 2025

Table of Contents

| | |
|--------------------------------------------------------------------|--------|
| Message from Program Chairs and the Steering Committee Chair | xxvi |
| Message from the Workshop Chairs | xxviii |
| Organizing Committee | xxix |
| Technical Programme Committee | xxx |
| Workshop Organizing Committee | xxxi |

Main Event – Regular Papers

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Sensorless Air Temperature Sensing using LoRa Link Characteristics | 1 |
| <i>Aitian Ma (Florida International University), Jean Tonday Rodriguez (Florida International University), Mo Sha (Florida International University), and Dongsheng Luo (Florida International University)</i> | |
| Cupid: Fast and Reliable Convergecast-over-UWB Protocol for Dense Internet of Things | 9 |
| <i>Jimin Park (Seoul National University, Republic of Korea), Geonhee Lee (Seoul National University, Republic of Korea), Jeongyeup Paek (Chung-Ang University, Republic of Korea), and Saewoong Bahk (Seoul National University, Republic of Korea)</i> | |
| Benchmarking Clustered Federated Learning Algorithms for Next-Point Prediction | 18 |
| <i>Sonal Yadav (University of Washington, USA), Yacine Belal (INSA Lyon, France), Brent Lagesse (University of Washington, USA), and Afra Mashhadi (University of Washington, USA)</i> | |
| Efficient and Flexible IoT Communication Through a Plugin-Based MQTT Processing Architecture | 27 |
| <i>Marcello Pietri (University of Modena and Reggio Emilia, Italy), Lorenzo Taccini (University of Modena and Reggio Emilia, Italy), Luca Bedogni (University of Modena and Reggio Emilia, Italy), Marco Picone (University of Modena and Reggio Emilia, Italy), Marco Mamei (University of Modena and Reggio Emilia, Italy), and Franco Zambonelli (University of Modena and Reggio Emilia, Italy)</i> | |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| SOAR: Semantic Multi-User MIMO Communications for Reliable Wireless Edge Computing | 35 |
| <i>Sharon L.G. Contreras (University of California, Irvine), Foysal Haque</i> | |
| <i>Khandaker (Northeastern University), Francesco Restuccia (Northeastern University), and Marco Levorato (University of California, Irvine)</i> | |
| Empowering Resource-Constrained WoT Devices with Lightweight Self-Sovereign Identity (SSI) using Delegation | 43 |
| <i>Biagio Boi (University of Salerno, Italy), Marco De Santis (University of Salerno, Italy), and Christian Esposito (University of Salerno, Italy)</i> | |
| LRHAR: A Lightweight Rule-Based Framework for Human Activity Recognition at the Edge | 51 |
| <i>Mandar Dhake (Indian Institute of Technology Kanpur, India), Shaijal Tripathi (Indian Institute of Technology Kanpur, India), Amitangshu Pal (Indian Institute of Technology Kanpur, India), Shashwati Banerjea (Harcourt Butler Technical University, India), and Rakesh Yamjala (National Institute of Technology Andhra Pradesh, India)</i> | |
| Multi-Objective Feature Selection for User Privacy Protection in Human Daily Activity Recognition | 61 |
| <i>Qiyang Li (Université Bretagne Sud, France), Johanne Vincent (IMT Atlantique, France), David Espes (Université de Bretagne Occidentale, France), and Guy Gogniat (Université Bretagne Sud, France)</i> | |
| X-Cast: Cross-Technology Broadcasts for Enhanced Spectrum Utilization in Low-Power Networks | 69 |
| <i>Rainer Hofmann (Graz University of Technology, Austria), Carlo Alberto Boano (Graz University of Technology, Austria), and Kay Römer (Graz University of Technology, Austria)</i> | |
| An Adaptive Embedded Platform to Enable Real-Time Brain Motor Decoding | 77 |
| <i>Joe Saad (Univ. Grenoble Alpes, France), Adrian Evans (Univ. Grenoble Alpes, France), Victor Roux-Sibillon (Univ. Grenoble Alpes, France), Ivan Miro-Panades (Univ. Grenoble Alpes, France), Tetiana Aksenova (Univ. Grenoble Alpes, France), and Lorena Anghel (Univ. Grenoble Alpes, France)</i> | |
| Distributed Multi-Robot Exploration Approach with Connectivity Maintenance | 85 |
| <i>Hazem Chaabi (Inria, France) and Nathalie Mitton (Inria, France)</i> | |
| Learning-Based Distributed Aerial Shepherding of UGV Swarms | 93 |
| <i>Reda El Marhouch (Mohammed VI Polytechnic University, Morocco), Btissam El Khamlichi (Mohammed VI Polytechnic University, Morocco), and Amal El Fallah Seghrouchni (Mohammed VI Polytechnic University, Morocco; Sorbonne Université, France)</i> | |
| ReinDSplit: Reinforced Dynamic Split Learning for Pest Recognition in Precision Agriculture | 99 |
| <i>Vishesh Kumar Tanwar (Missouri University of Science and Technology, USA), Soumik Sarkar (Iowa State University, USA), Asheesh K. Singh (Iowa State University, USA), and Sajal K. Das (Missouri University of Science and Technology, USA)</i> | |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| RestoreML: Practical Unsupervised Tuning of Deployed Intelligent IoT Systems | 109 |
| <i>Jinyang Li (University of Illinois Urbana-Champaign, USA), Yizhuo Chen (University of Illinois Urbana-Champaign, USA), Ruijie Wang (University of Illinois Urbana-Champaign, USA), Tomoyoshi Kimura (University of Illinois Urbana-Champaign, USA), Tianshi Wang (University of Illinois Urbana-Champaign, USA), You Lyu (University of Illinois Urbana-Champaign, USA), Hongjue Zhao (University of Illinois Urbana-Champaign, USA), Binqi Sun (Technical University of Munich, Germany), Shangchen Wu (University of Illinois Urbana-Champaign, USA), Yigong Hu (University of Illinois Urbana-Champaign, USA), Denizhan Kara (University of Illinois Urbana-Champaign, USA), Beitong Tian (University of Illinois Urbana-Champaign, USA), Klara Nahrstedt (University of Illinois Urbana-Champaign, USA), Suhas Diggavi (University of California, USA), Jae H Kim (Boeing Research & Technology, USA), Greg Kimberly (Boeing Research & Technology, USA), Guijun Wang (Boeing Research & Technology, USA), Maggie Wigness (DEVCOM Army Research Laboratory, USA), and Tarek Abdelzaher (University of Illinois Urbana-Champaign, USA)</i> | |
| FORESEE: ML-Driven, Communication-Efficient Time-Series Forecasting | 118 |
| <i>Tayyaba Zainab (GEOMAR Helmholtz Centre for Ocean Research Kiel, Germany; Kiel University, Germany), Laura Harms (Kiel University, Germany), Jens Karstens (GEOMAR Helmholtz Centre for Ocean Research Kiel, Germany), and Olaf Landsiedel (Hamburg University of Technology, Germany; Kiel University, Germany)</i> | |
| Providing Latency Guarantees in 6G Multi-Domain Networks | 127 |
| <i>Fidan Mehmeti (Technical University of Munich) and Wolfgang Kellerer (Technical University of Munich)</i> | |
| Federated Continual Learning for Monocular Depth Estimation in Dynamic Indoor Environments. | 136 |
| <i>Allen-Jasmin Farcas (The University of Texas at Austin, USA), Hyun Joon Song (The University of Texas at Austin, USA), and Radu Marculescu (The University of Texas at Austin, USA)</i> | |
| SmartDepth: Motion-Aware Depth Prediction with Intelligent Computing for Navigation | 146 |
| <i>Mengting Yang (University of California Irvine, USA), Timothy K Johnsen (University of California Irvine, USA), Ian Harshbarger (University of California Irvine, USA), Matteo Mendula (Centre Tecnològic de Telecomunicacions de Catalunya, Spain), and Marco Levorato (University of California Irvine, USA)</i> | |
| G-DCAP: Stealthy Adversarial Attacks on Multi-Sensor IoT Systems | 154 |
| <i>Ravin Gunawardena (University of New South Wales, Australia), Naveen Karunananayake (University of Sydney, Australia), Suranga Seneviratne (University of Sydney, Australia), Rahat Masood (University of New South Wales, Australia), and Salil Kanhere (University of New South Wales, Australia)</i> | |
| Generalizable Intrusion Detection for IoT: A Cost-Sensitive Multimodal Approach | 163 |
| <i>Tasnimul Hasan (The University of Toledo, USA) and Samia Tasnim (The University of Toledo, USA)</i> | |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Incremental Learning of Image Classification Models over Low Data-Rate Networks | 171 |
| <i>Rakhat Khamitov (Nazarbayev University, Kazakhstan), Amin Kargar (University College Cork, Ireland), Malika Azamat (Nazarbayev University, Kazakhstan), Marko Ristin (Nazarbayev University, Kazakhstan), Brendan O'Flynn (University College Cork, Ireland), and Dimitrios Zorbas (Nazarbayev University, Kazakhstan)</i> | |
| AgroESP: An Edge-Driven Cyber-Physical System for Polyhouse Solar Dryers | 179 |
| <i>Shibi S. Kumar (Amrita Vishwa Vidyapeetham, India), Vidhya Balasubramanian (Amrita Vishwa Vidyapeetham, India), C. Shunmuga Velayutham (Amrita Vishwa Vidyapeetham, India), and Gowtham Ramesh (Amrita Vishwa Vidyapeetham, India)</i> | |
| AJDet: Lightweight Self-Adaptive Jamming Detection for IoT Networks | 187 |
| <i>Shuai Zhu (RISE Research Institutes of Sweden, Sweden; Uppsala University, Sweden), Fatemeh Rahimian (RISE Research Institutes of Sweden, Sweden), Thiemo Voigt (RISE Research Institutes of Sweden, Sweden; Uppsala University, Sweden), and JeongGil Ko (Yonsei University, Korea; POSTECH, Korea)</i> | |
| CoOpTex: Multimodal Cooperative Perception and Task Execution in Time-Critical Distributed Autonomous System | 195 |
| <i>Mohammad Saeid Anwar (University of Maryland Baltimore County), Anuradha Ravi (University of Maryland Baltimore County), Emon Dey (University of Maryland Baltimore County), Gaurav Shinde (University of Maryland Baltimore County), Indrajeet Ghosh (University of Maryland Baltimore County), Jade Freeman (DEVCOMArmy Research Laboratory, USA), Carl Busart (DEVCOMArmy Research Laboratory, USA), André Harrison (DEVCOMArmy Research Laboratory, USA), and Nirmalya Roy (University of Maryland Baltimore County)</i> | |
| Desynchronized Querying of Analog Backscatter Tags | 203 |
| <i>Dilushi Piumwardane (Uppsala University, Sweden), Madhushanka Padmal (Uppsala University, Sweden), Christian Rohner (Uppsala University, Sweden), and Thiemo Voigt (Uppsala University, Sweden; RISE Computer Science, Sweden)</i> | |
| FedX: Adaptive Model Decomposition and Quantization for IoT Federated Learning | 212 |
| <i>Phung Lai (University at Albany, USA), Xiaopeng Jiang (Southern Illinois University, USA), Hai Phan (New Jersey Institute of Technology, USA), Cristian Borcea (New Jersey Institute of Technology, USA), Khang Tran (New Jersey Institute of Technology, USA), An Chen (Qualcomm Incorporated, USA), Vijaya Datta Mayyuri (Qualcomm Incorporated, USA), and Ruoming Jin (Kent State University, USA)</i> | |

Main Event – Short Papers

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| ELA: Secure, Lightweight, and Zero-Touch Enrollment for IoT Devices | 221 |
| <i>Geovane Fedrecheski (Inria, France), Göran Selander (Ericsson, Sweden), Thomas Watteyne (Inria, France), and Mališa Vučinić (Inria, France)</i> | |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Pulse-Fi: A Low Cost System for Accurate Heart Rate Monitoring using Wi-Fi Channel State Information | 226 |
| <i>Pranay Kocheta (Independent, USA), Nayan Sanjay Bhatia (University of California, USA), and Katia Obraczka (University of California, USA)</i> | |
| Hybrid Predictive Modeling for Single-Sensor Data Consistency in Industrial IoT | 231 |
| <i>Tim Ruhland (Siemens AG, Germany; Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany), Kilian Müller (Siemens AG, Germany; Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany), Maximilian Lübke (Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany), Andreas Tobola (Siemens AG, Germany), and Norman Franchi (Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany)</i> | |
| Microcontroller Software Continuous Deployment: Secure Partial Update Realms for RIOT (PURR) | 236 |
| <i>Frédéric Fort (Université de Lille, France), Hugo Forraz (Université de Lille, France), Koen Zandberg (Freie Universität Berlin, Germany), Gilles Grimaud (Université de Lille, France), and Emmanuel Baccelli (Freie Universität Berlin, Germany; Inria, France)</i> | |
| Ariel OS: An Embedded Rust Operating System for Networked Sensors & Multi-Core Microcontrollers | 241 |
| <i>Elena Frank (Freie Universität Berlin, Germany), Kaspar Schleiser (Inria, France; Freie Universität Berlin, Germany), Romain Fouquet (Inria, France), Koen Zandberg (Freie Universität Berlin, Germany), Christian Amsüss (Inria, France; Einstein Center Digital Future, Germany), and Emmanuel Baccelli (Inria, France; Freie Universität Berlin, Germany; Einstein Center Digital Future, Germany)</i> | |
| From the City to the Clouds: An Experimental Performance Evaluation of LR-FHSS | 246 |
| <i>Marcos Rojas Mardones (INSA Lyon, Inria, France; Universidad Técnica Federico Santa María, Chile), Juan A. Fraire (INSA Lyon, Inria, France), Oana Iova (INSA Lyon, Inria, France), Florent Dobler (Univ. Grenoble Alpes, France), Olivier Alphand (Univ. Grenoble Alpes, France), Didier Donsez (Univ. Grenoble Alpes, France), and Martin Heusse (Univ. Grenoble Alpes, France)</i> | |
| LoRaWAN-Based Multicast and Disruption-Tolerant Protocols for Firmware Update Over-the-Air | 251 |
| <i>Huy Dat Nguyen (Université Bretagne Sud, France), Nicolas Le Sommer (Université Bretagne Sud, France), and Yves Mahéo (Université Bretagne Sud, France)</i> | |
| CIAS: An Application-Defined Multi-Connectivity Scheduler for Time-Sensitive Wi-Fi Systems.... | 256 |
| <i>Prince Jose (TU Braunschweig/ Robert Bosch GmbH, Germany), Marie-Theres Suer (Robert Bosch GmbH, Germany), and Lars Wolf (TU Braunschweig, Germany)</i> | |
| Blockchain-Based Decentralized Identity System: Design and Security Analysis | 261 |
| <i>Bilel Zaghdoudi (Sorbonne University, France), Gewu Bu (Université Clermont Auvergne, France), Maria Potop-Butucaru (Sorbonne University, France), and Serge Fdida (Sorbonne University, France)</i> | |
| miniMaP: Adaptive In-Situ Power Monitoring and Profiling for Energy-Constrained IoT Devices | 266 |
| <i>Brendan J. Mackenzie (KU Leuven, Belgium), Sam Michiels (KU Leuven, Belgium), and Danny Hughes (KU Leuven, Belgium)</i> | |

Main Event Posters

(Poster) ARSecure: A Novel End-to-End Encryption Messaging System using Augmented Reality . 271
Hamish Alsop (Edinburgh Napier University, United Kingdom), Douglas Alsop (Edinburgh Napier University, United Kingdom), Joseph Solomon (Edinburgh Napier University, United Kingdom), Liam Aumento (Edinburgh Napier University, United Kingdom), Mark Butters (Edinburgh Napier University, United Kingdom), Cameron Millar (Edinburgh Napier University, United Kingdom), Leandros Maglaras (De Montfort University, United Kingdom), Yagmur Yigit (Edinburgh Napier University, United Kingdom), Berk Canberk (Edinburgh Napier University, United Kingdom), and Naghmeh Moradpoor (Edinburgh Napier University, United Kingdom)

(Poster) NuMuC: Networking in Userspace to Enable Multi-Connectivity 274
Torben Petersen (Technische Universität Braunschweig, Germany), Mojan Wegener (Technische Universität Braunschweig, Germany), Eduard Jorswieck (Technische Universität Braunschweig, Germany), and Lars Wolf (Technische Universität Braunschweig, Germany)

(Poster) Deep Learning Models for Histopathological Classification of Gastric Epithelial Tumors 277
Leonard Florian Nuta (National University of Science and Technology Politehnica Bucharest, Romania), Loretta Ichim (National University of Science and Technology Politehnica Bucharest, Romania), and Dan Popescu (National University of Science and Technology Politehnica Bucharest, Romania)

Poster: Toward a Comprehensive Framework for Evaluating IoT Interfaces 280
Jennifer Horstmann (University of Bremen, Germany) and Anna Förster (University of Bremen, Germany)

(POSTER) Efficient Lane Marking Recognition for Duckietown for Varying Lighting Conditions.... 283
Ilia Nechaev (JetBrains, Cyprus), Michael Georgiades (Neapolis University Pafos, Cyprus), and Kirill Krinkin (Neapolis University Pafos, Cyprus)

(Demo) FlowAR: A Framework for Data-Driven Development of Human Activity Recognition Systems using Binary Sensors 286
Ali Ncibi (Inria Saclay and UVSQ), Luc Bouganim (Inria Saclay and UVSQ), and Philippe Pucheral (Inria Saclay and UVSQ)

Poster: PSO-CATBoost Algorithm Based on Soil Sensor Data Driven: Realizing a New Method of In-Situ Estimate of Field Capacity 289
Xiaoqing Kan (Beijing Academy of Agriculture and Forestry Sciences, China), Jingxin Yu (Beijing Academy of Agriculture and Forestry Sciences, China), Shirui Zhang (National Engineering Research Center for Intelligent Equipment in Agriculture, China), Feifei Shan (Beijing Academy of Agriculture and Forestry Sciences, China), Wengang Zheng (Beijing Academy of Agriculture and Forestry Sciences, China), and Lili Zhangzhong (Beijing Academy of Agriculture and Forestry Sciences, China; Key Laboratory for Quality Testing of Hardware and Software Products on Agricultural Information, Ministry of Agriculture, China)

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Poster: Study on Dynamic Monitoring of Vegetable Planting in Solar Greenhouse Based on Image Recognition Technology | 292 |
| <i>Lili Zhangzhong (Beijing Academy of Agriculture and Forestry Sciences, China), Xinyue Lv (Beijing Academy of Agriculture and Forestry Sciences, China), Youli Li (Beijing Academy of Agriculture and Forestry Sciences, China), Shirui Zhang (Beijing Academy of Agriculture and Forestry Sciences, China), and Jiqing Sun (Beijing Academy of Agriculture and Forestry Sciences, China)</i> | |
| Poster: Design and Development of Low Power Intelligent Irrigation Gateway Based on Multi-Processor Collaboration | 295 |
| <i>Shirui Zhang (Beijing Academy of Agriculture and Forestry Sciences, China), Guangwei Li (Beijing Academy of Agriculture and Forestry Sciences, China), Hanyuan Zhang (Beijing Academy of Agriculture and Forestry Sciences, China), Teng Li (Beijing Academy of Agriculture and Forestry Sciences, China), and Wengang Zheng (Beijing Academy of Agriculture and Forestry Sciences, China)</i> | |
| (Poster) Sheep Behavior Recognition using Sensor Data | 298 |
| <i>Sepideh Shamsizadeh (Zurich University of Applied Sciences, Switzerland) and Josef Spillner (Zurich University of Applied Sciences, Switzerland)</i> | |
| (Poster) Optimized Dataset Synchronization in Named Data Networking | 301 |
| <i>Giannis Savva (University of Cyprus, Cyprus), Troodia Arakleitou (University of Cyprus, Cyprus), Konstantinos Manousakis (University of Cyprus, Cyprus), Panayiotis Kolios (University of Cyprus, Cyprus), and Georgios Ellinas (University of Cyprus, Cyprus)</i> | |
| (Poster) Multi-Sensor IoT Solution for Environmental and Health Monitoring | 304 |
| <i>Anjana Kuruwita Arachchi (Thompson Rivers University, Canada), Sanni Gangwani (Thompson Rivers University, Canada), and Anthony Aighobahi (Thompson Rivers University, Canada)</i> | |

Workshops

Wi-DroIT 2025

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| AI and Vision Based Autonomous Navigation of Nano-Drones in Partially-Known Environments . | 307 |
| <i>Mattia Sartori (KTH Royal Institute of Technology, Sweden), Chetna Singhal (Inria France), Neelabhro Roy (KTH Royal Institute of Technology, Sweden), Davide Brunelli (University of Trento, Italy), and James Gross (KTH Royal Institute of Technology, Sweden)</i> | |
| Environmental Pollution Level Monitoring System using UAV | 315 |
| <i>Marius Adrian Dima (National University of Science and Technology Politehnica Bucharest), Dan Popescu (National University of Science and Technology Politehnica Bucharest), Loretta Ichim (National University of Science and Technology Politehnica Bucharest), and Andrei Vicol (National University of Science and Technology Politehnica Bucharest)</i> | |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Channel State Information Analysis for Jamming Attack Detection in Static and Dynamic UAV Networks – An Experimental Study | 322 |
| <i>Pavlo Mykytyn (IHP GmbH - Leibniz Institute for High Performance Microelectronics, Germany), Ronald Chitauro (IHP GmbH - Leibniz Institute for High Performance Microelectronics, Germany), Zoya Dyka (IHP GmbH - Leibniz Institute for High Performance Microelectronics, Germany; BTU Cottbus-Senftenberg, Germany), and Peter Langendoerfer (IHP GmbH - Leibniz Institute for High Performance Microelectronics, Germany; BTU Cottbus-Senftenberg, Germany)</i> | |
| Power Line Maintenance Using Multi-Package Collaborative Drone-Truck System | 328 |
| <i>Francesco Betti Sorbelli (University of Perugia, Italy), Sajjad Ghobadi (University of Perugia, Italy), Lorenzo Palazzetti (University of Perugia, Italy), and Cristina M. Pinotti (University of Perugia, Italy)</i> | |
| A Method for Assessing the Impact of Altitude on Aerial Imagery for Crop and Weed Detection | 336 |
| <i>Joshua Guess (University of Kentucky, USA), Xu Tao (University of Kentucky, USA), and Simone Silvestri (University of Kentucky, USA)</i> | |
| Task Offloading Strategies for Agricultural UAV Systems in Dynamic Network Environments | 344 |
| <i>Alicia Esquivel Morel (University of Missouri, USA), Prasad Calyam (University of Missouri, USA), and Kannappan Palaniappan (University of Missouri, USA)</i> | |
| Evaluating Millimeter-Wave RADAR for Resource-Efficient Drone Perception | 352 |
| <i>Dnyandeep Mandaokar (University of Klagenfurt, Austria) and Bernhard Rinner (University of Klagenfurt, Austria)</i> | |
| Real-Time Cooperative Trajectory Optimization for 3D Infrastructure Inspection in Mixed Indoor-Outdoor Environments | 360 |
| <i>Antonis Nikolaidis (University of Cyprus, Cyprus), Andreas Anastasiou (University of Cyprus, Cyprus), Christos Laoudias (University of Cyprus, Cyprus), and Panayiotis Kolios (University of Cyprus, Cyprus)</i> | |
| Distributed Cooperative UAV Leader-Follower Strategies in GNSS-Denied Environments | 368 |
| <i>Fadoua Ait Ayane (Mohammed VI Polytechnic University, Morocco), Btissam El Khamlichi (Mohammed VI Polytechnic University, Morocco), and Amal El Fallah Seghrouchni (Mohammed VI Polytechnic University, Morocco; Sorbonne Université, France)</i> | |

IoTI5 2025

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Establishing Trust in Multi-Virtual Machine-Environments: VM Status Legitimization for Industry 4.0 | 375 |
| <i>Jessica Müller (Bosch Rexroth AG, Germany), Steven Dietrich (Bosch Rexroth AG, Germany), and Michael Massoth (Hochschule Darmstadt, Germany)</i> | |
| Optimizing Spectrum and Energy Efficiency in a WiFi-Based Industrial IoT Network | 383 |
| <i>Kamran Zia (EEMCS University of Twente, Netherlands), Bjorn Vuurens (EEMCS University of Twente, Netherlands), and Alessandro Chiumento (EEMCS University of Twente, Netherlands)</i> | |

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Evaluation of Static Analysis and Transformer-Based LLMs for IoT Firmware Security | 389 |
| <i>Ahmad Al-Zuraiqi (Queen's University Belfast, United Kingdom) and Des Greer (Queen's University Belfast, United Kingdom)</i> | |
| Scheduling IoT Applications in Real-Time Control Groups | 397 |
| <i>Yuri Andriaccio (University of Pisa, Italy), Luca Abeni (Scuola Superiore Sant'Anna, Italy), and Massimo Torquati (University of Pisa, Italy)</i> | |
| Runtime Monitoring for Edge Applications | 405 |
| <i>Daniel Casini (Scuola Superiore Sant'Anna, Italy), Luca Abeni (Scuola Superiore Sant'Anna, Italy), Mauro Marinoni (Scuola Superiore Sant'Anna, Italy), and Alessandro Biondi (Scuola Superiore Sant'Anna, Italy)</i> | |
| D-HYDROFLEX: An Architectural Framework for Digitalization, Flexibility and Sustainability on Hydro Power Plants | 413 |
| <i>Pavlos Bouzinis (MetaMind Innovations P.C., Greece), Christos Dalamagkas (MetaMind Innovations P.C., Greece), Katerina Drivakou (UBITECH and UBITECH ENERGY, Belgium), Paula Hernamperez-Manso (Technology Centre CARTIF, Spain), Alejandro Martín-Crespo (Technology Centre CARTIF, Spain), Sergio Rodríguez-Carro (Technology Centre CARTIF, Spain), Cristina Vega-Martínez (Technology Centre CARTIF, Spain), Mario de-la-Rosa-Noriega (Technology Centre CARTIF, Spain), Eduardo Rodríguez Fernández-Arroyo (EnergyLab Reacher and Technological Center, Spain), Alberto Casalderrey Area (EnergyLab Reacher and Technological Center, Spain), Eric De Oliveira (EDF R&D – LNHE (Laboratoire Nationale d'hydraulique et environnement), France), Fabrice Zaoui (EDF R&D – LNHE (Laboratoire Nationale d'hydraulique et environnement), France), Zuzanna Satława (TAURON Ekoenergia sp. z o.o., Poland), Przemysław Janik (TAURON Ekoenergia sp. z o.o., Poland), Artur Machalski (Wroclaw University of Science and Technology, Poland), Alwyn Mathew (University of Cambridge, United Kingdom), Ioannis Brilakis (University of Cambridge, United Kingdom), Weiwei Chen (University College London, London), Yang Su (University College London, London), and Eleni Tsironi (UBITECH, Greece)</i> | |
| Cyber-Physical Interaction Engineering of Industrial Digital Twin Ecosystems | 420 |
| <i>Mattia Fogli (University of Ferrara, Italy), Gaia Mazzotta (University of Ferrara, Italy), Samuele Burattini (University of Bologna, Italy), Marco Picone (University of Modena and Reggio Emilia, Italy), Carlo Giannelli (University of Ferrara, Italy), and Cesare Stefanelli (University of Ferrara, Italy)</i> | |
| Textile Analysis for Recycling Automation using Transfer Learning & Zero-Shot Foundation Models | 428 |
| <i>Yannis Spyridis (Kingston University, UK) and Vasileios Argyriou (Kingston University, UK)</i> | |
| State Management Strategies for Stateful Digital Twin Migration in Industrial Scenarios | 435 |
| <i>Mattia Fogli (University of Ferrara, Italy), Carlo Giannelli (University of Ferrara, Italy), Gaia Rossi (University of Ferrara, Italy), and Cesare Stefanelli (University of Ferrara, Italy)</i> | |

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Enhancing Security in Industry 4.0 / 5.0 Data Sharing: A Risk Modeling Approach | 443 |
| <i>Alexandros Nizamis (National and Kapodistrian University of Athens, Greece; Centre for Research and Technology Hellas, Greece), Nadia Masood Khan (Digital Systems 4.0, Bulgaria), Usman Wajid (Information Catalyst, Spain), Stefano Modafferri (University of Southampton, UK), Nikolay Mehandjiev (Digital Systems 4.0, Bulgaria), and Konstantinos Votis (Centre for Research and Technology Hellas, Greece)</i> | |

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Modular Engineering of Industrial Digital Twins: The WLDT Approach | 451 |
| <i>Matteo Martinelli (University of Modena and Reggio Emilia, Italy), Antonello Barbone (University of Modena and Reggio Emilia, Italy), Riccardo Morandi (University of Modena and Reggio Emilia, Italy), Marco Picone (University of Modena and Reggio Emilia, Italy), Samuele Burattini (University of Bologna, Italy), and Alessandro Ricci (University of Bologna, Italy)</i> | |

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| The Two Faces of Interoperability: Bridging Cyber and Physical Spaces with Digital Twins | 459 |
| <i>Marco Picone (University of Modena and Reggio Emilia, Italy), Matteo Martinelli (University of Modena and Reggio Emilia, Italy), Samuele Burattini (University of Bologna, Italy), Andrea Julianelli (University of Bologna, Italy), and Alessandro Ricci (University of Bologna, Italy)</i> | |

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Multi-Task Learning for Video Processing: Going with the Flow | 467 |
| <i>Efklidis Katsaros (K3Y Ltd, Bulgaria), George Kalitsios (K3Y Ltd, Bulgaria), Anastasia Kazakli (K3Y Ltd, Bulgaria), Panagiotis Radoglou-Grammatikis (K3Y Ltd, Bulgaria; University of Western Macedonia, Greece), and Panagiotis Sarigiannidis (University of Western Macedonia, Greece)</i> | |

SmaCE 2025

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Circul8: Supporting Circularity Decision Making with a Component-Based Real-Time Monitoring Tool for IT Asset Management | 475 |
| <i>Bilal Khan (University of Hull, UK), Baseer Ahmad (University of Hull, UK), Rameez Raja Kureshi (University of Hull, UK), Nour Rteil (Interact, UK), Astrid Wynne (Techbuyer Ltd., UK), Dhavalkumar Thakker (University of Hull, UK), and Nishikant Mishra (University of Hull, UK)</i> | |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| CircularPSP: AI-Powered Platform for Advancing Urban Circular Economy Transitions | 483 |
| <i>Georg Vogt (empirica Communication and Technology Research, Germany), Niklas Schmidt (Nilu - Klimat och Miljöinstitutet, Sweden), Emanuela Vanacore (RISE Research Institutes of Sweden AB, Sweden), and Bart Vilier (empirica Communication and Technology Research, Germany)</i> | |

ISIoT 2025

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Recovery RPL Internet of Things Network under the Jamming Attack | 489 |
| <i>Michael Savva (University of Cyprus), Iakovos Ioannou (University of Cyprus; CYENS Centre of Excellence, Cyprus), and Vasos Vassiliou (University of Cyprus; CYENS Centre of Excellence, Cyprus)</i> | |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Efficient Wi-Fi Sensing for IoT Forensics with Lossy Compression of CSI Data | 499 |
| <i>Paolo Cerutti (Politecnico di Milano, Italy), Fabio Palmese (Politecnico di Milano, Italy), Marco Cominelli (Politecnico di Milano, Italy), and Alessandro E. C. Redondi (Politecnico di Milano, Italy)</i> | |

Guidoni (Federal University of Ouro Preto, Brazil)</i> | |
| U-Track: A Mobile Sensing Fog Platform for Real-Time Urban Monitoring | 665 |
| <i>Ida Falco (University of Sannio, Italy), Carmine Colarusso (University of Sannio, Italy), and Eugenio Zimeo (University of Sannio, Italy)</i> | |
| Detecting Concentric Muscle Failure in Bench Press: A Bag of Patterns Approach using Wearable Data | 673 |
| <i>Arthur S da Costa (University of Campinas, Brazil), Erick Lucena (University of Campinas, Brazil), Judy C. Guevara (University of Campinas, Brazil), Daniel L. Guidoni (Federal University of Ouro Preto, Brazil), Heitor S. Ramos (Federal University of Minas Gerais, Brazil), Nelson L. S. da Fonseca (University of Campinas, Brazil), Marco C. Uchida (University of Campinas, Brazil), and Leandro A. Villas (University of Campinas, Brazil)</i> | |
| A Rust-Based Distributed Execution Platform for Aggregate Computing in Resource-Constrained Environments | 681 |
| <i>Vinaykumar Chitukoori (St. Francis College, New York)</i> | |

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| On Assessing Usability and Reliability of Anonymized Spatio-Temporal Data | 689 |
| <i>Gaelle M. Yonga (Inria & University of Douala), Anne J. Kouam (TU Berlin), Aline C. Viana (Inria), and Auguste V. Noumsi (University of Douala)</i> | |
| Multi-Layered Resource Allocation in IoV Networks using VEC Paradigms | 697 |
| <i>Matheus Leal (São Paulo State University, Brazil), Luis Hideo V. Nakamura (Federal Institute of São Paulo, Brazil), Matheus Sanches Quessada (São Paulo State University, Brazil), Geraldo P. Rocha Filho (State University of Southwest Bahia, Brazil), Daniel L. Guidoni (Federal University of Ouro Preto, Brazil), Robson De Grande (Brock University, Canada), and Rodolfo I. Meneguette (University of São Paulo, Brazil)</i> | |
| Intrusion Detection in IoT Networks using Federated Learning | 705 |
| <i>Neivaldo I. Matos Filho (Federal University of Ouro Preto, Brazil), Alex Vitorino (Federal University of Ouro Preto, Brazil), Muhammad Ahsan (Federal University of Ouro Preto, Brazil), Fernanda S. H. de Souza (Federal University of Ouro Preto, Brazil), and Daniel L. Guidoni (Federal University of Ouro Preto, Brazil)</i> | |

SecRIoT 2025

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Machine Learning for Identifying Cyber Attacks on the Electric Vehicle Power Charging Infrastructure | 713 |
| <i>Fadi N. Sibai (Gulf University for Science & Technology, Kuwait), Ahmad Sibai (University of South Florida, USA), Abu Asaduzzaman (Wichita State University, USA), and Abdullah Abonamah (George Washington University, USA)</i> | |
| A Blockchain-Powered Defence System Against DDoS Attacks with Incentivised Collaboration | 721 |
| <i>Harisankar Rajesh (University of Greenwich, UK), Naghmeh Moradpoor (Edinburgh Napier University, UK), Muhammad Waqas (University of Greenwich, UK), and Leandros Maglaras (De Montfort University, UK)</i> | |
| Defending Federated Learning Against Compound Targeted Attacks | 729 |
| <i>Luca Boschiero (University of Padua, Italy), Mauro Conti (University of Padua, Italy), Federico Corò (University of Padua, Italy), and Mauro Meneghelli (University of Padua, Italy)</i> | |
| A Proposed Continuous Facial Recognition Framework for Adaptive Environmental Detection | 737 |
| <i>Nida Zeeshan (Edinburgh Napier University, UK), Luigi La Spada (Edinburgh Napier University, UK), and Naghmeh Moradpoor (Edinburgh Napier University, UK)</i> | |
| Lich: Enhancing IoT Supply Chain Security Through Automated Firmware Analysis | 747 |
| <i>Alessandro Aldini (Università degli studi di Urbino, Italy), Luca Ardito (Politecnico di Torino, Italy), Giuseppe Marco Bianco (Università degli studi di Urbino, Italy), and Michele Valsesia (Politecnico di Torino, Italy)</i> | |
| Zero Trust Architecture and Digital Twin to Improve the Cybersecurity Posture of Distributed Smart Factory Environments | 755 |
| <i>Mattia Fogli (University of Ferrara, Italy), Carlo Giannelli (University of Ferrara, Italy), Elena Mari (University of Ferrara, Italy), and Cesare Stefanelli (University of Ferrara, Italy)</i> | |

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Ransomware in Resource-Constrained Industrial IoT Networks: There Actually is a Threat | 763 |
| Yuxiang Huang (University of Bristol, UK), Calvin Brierley (University of Kent, UK), Adel ElZemity (University of Kent, UK), James Pope (University of Bristol, UK), Jiteng Ma (University of Bristol, UK), Antonio Di Buono (National Nuclear Laboratory, UK), Budi Arief (University of Kent, UK), and George Oikonomou (University of Bristol, UK) | |
| Constrained Network Adversarial Attacks: Validity, Robustness, and Transferability | 771 |
| Anass Grini (The International Artificial Intelligence Center of Morocco, Morocco), Oumaima Taheri (The International Artificial Intelligence Center of Morocco, Morocco), Btissam El Khamlichi (The International Artificial Intelligence Center of Morocco, Morocco), and Amal El Fallah-Seghrouchni (The International Artificial Intelligence Center of Morocco, Morocco; Sorbonne University, France) | |
| Binus Zero-Knowledge Proofs Meet Multi-Layer Bloom Filters: A Secure and Efficient Protocol for Federated Learning in Autonomous Vehicle Networks | 777 |
| Ny Hasina Andriambelo (University Of Antananarivo, Madagascar) and Naghmeh Moradpoor (Edinburgh Napier University, UK) | |
| Scalable Intrusion Detection in IoT Networks: Evaluating PySpark Pipelines and Design Trade-Offs | 785 |
| Michael Georgiades (Neapolis University & Infostrada Communications, Cyprus), Faisal Hussain (National University of Modern Languages, Pakistan), Lakis Christodoulou (Biomed Medical Systems, Cyprus), Kin-Hon Ho (Hong Kong Shue Yan University, China), Yun Hou (Hang Seng University of Hong Kong, China), and Andreas Gregoriades (Cyprus University of Technology, Cyprus) | |

DISCOLI 2025

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Leveraging UE-Level Collaborative Intelligence for Scalable Jamming Detection in 5G Networks | 793 |
| Jiali Xu (Inria Center at the University of Lille, France) and Valéria Loscri (Inria Center at the University of Lille, France) | |
| Differentiation of Behaviors in Learning Pheromone-Based Communication | 798 |
| Davide Borghi (Consiglio Nazionale delle Ricerche, Italy), Stefano Mariani (Università degli Studi di Modena e Reggio Emilia, Italy), and Franco Zambonelli (Consiglio Nazionale delle Ricerche, Italy; Università degli Studi di Modena e Reggio Emilia, Italy) | |
| AI-Based Concepts for Crisis Propagation Forecasting and Early Warning in Urban Areas | 805 |
| Andrea Tundis (German Aerospace Center (DLR), Germany), Maximilian Hummel (German Aerospace Center (DLR), Germany), Jonas Gunkel (German Aerospace Center (DLR), Germany), and Claudio Savaglio (University of Calabria (UNICAL), Italy) | |
| Aligning Individual Motivation with Collective Goals: A Formal Approach to Collective Gamification | 812 |
| Riccardo Belliato (University of Udine, Italy), Antonio Bucchiarone (University of L'Aquila, Italy), and Annapaola Marconi (Bruno Kessler Foundation, Italy) | |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| FedHeur Multi-Heuristic Client Selection for Task Offloading in Federated Learning | 816 |
| <i>Nawaz Ali (University of Calabria, Italy), Gianluca Aloi (University of Calabria, Italy), Raffaele Gravina (University of Calabria, Italy), Claudio Savaglio (University of Calabria, Italy), Ali Hassan Sodhro (Kristianstad University, Italy), and Giancarlo Fortino (University of Calabria, Italy)</i> | |
| The Roles of Autonomy and Trust in Hybrid Societies: A Simulation-Based Study in the Healthcare Domain | 822 |
| <i>Francesco Stella (National Research Council (CNR), Italy), Alessandro Sapienza (National Research Council (CNR), Italy), and Rino Falcone (National Research Council (CNR), Italy)</i> | |
| Conceptualizing Evolving Interdependence in Groups: Insights from the Analysis of Two-Agent Systems | 828 |
| <i>Paolo Pagliuca (National Research Council (CNR), Italy), Martina Favia (Tangity part of NTT Data Design Network, Italy), Stefano Livi (Università La Sapienza, Italy), and Alessandra Vitanza (National Research Council (CNR), Italy)</i> | |
| Evaluating Distributed MQTT Brokers' Performance for Scalable Augmented Reality IoT Data Visualization Based on Collective Intelligence | 834 |
| <i>Farhad Rostamivand (Universitat Politècnica de València, Spain) and Pietro Manzoni (Universitat Politècnica de València, Spain)</i> | |
| General-Purpose Sensing for Smart Environments: the Smart Museum Use Case | 840 |
| <i>Rafiq Ul Islam (Università della Calabria, Italy), Giovanni Tripicchio (Wish Innovation s.r.l., Italy), Mariangela Viviani (Wish Innovation s.r.l., Italy), Simone Colace (Wish Innovation s.r.l., Italy), Sara Laurita (Wish Innovation s.r.l., Italy), Antonio Guerrieri (ICAR-CNR, Italy), and Claudio Savaglio (Università della Calabria, Italy)</i> | |
| Integrating Collective Computing and the Social Internet of Things for Smart Cities: A Vision | 846 |
| <i>Roberto Casadei (Alma Mater Studiorum–Università di Bologna, Italy), Vittorio Ghini (Alma Mater Studiorum–Università di Bologna, Italy), Roberto Girau (Alma Mater Studiorum–Università di Bologna, Italy), and Giovanni Pau (Alma Mater Studiorum–Università di Bologna, Italy)</i> | |
| Service Continuity in Healthcare Internet of Things (HIoT): An Architectural Solution | 852 |
| <i>Vincenzo Barbuto (Università della Calabria, Italy), Giovanni Tavella (Neosperience S.P.A., Italy), Pasquale Mazzei (Neosperience S.P.L., Italy), Francesco Pupo (Università della Calabria, Italy), Claudio Savaglio (Università della Calabria, Italy), and Giancarlo Fortino (Università della Calabria, Italy)</i> | |

LS-NoT 2025

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Scalability and Performance Evaluation of IEEE 802.11ah IoT Deployments: A Testbed Approach | 858 |
| <i>Kostas Chounos (University of Thessaly, Greece), Katerina Kyriakou (University of Thessaly, Greece), and Thanasis Korakis (University of Thessaly, Greece)</i> | |

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Droopy: A Dynamic Runtime Platform for Micro-Controller Units Supporting Partial and Incremental Updates of Modularized Firmware | 866 |
| <i>Huy Dat Nguyen (Universite Bretagne Sud, France), Nicolas Le Sommer (Universite Bretagne Sud, France), Yves Mah  o (Universite Bretagne Sud, France), and Lionel Touseau (Universite Bretagne Sud, France; Saint-Cyr Coetquidan Military Academy, CReC Saint-Cyr)</i> | |
| Building RPL Multicast Domains for Reliable P2P Traffic in Low-Power Wireless Mesh Networks | 874 |
| <i>Chiara Ciriani (IMT Atlantique, IRISA, UMR CNRS 6074, France; Universidad de Buenos Aires, Argentina), Guillaume Le Gall (University of Rennes, IRISA, UMR CNRS 6074, France), Thibaut Colin (Silicon Laboratories, France), Alberto Blanc (IMT Atlantique, IRISA, UMR CNRS 6074, France), and Georgios Z. Papadopoulos (IMT Atlantique, IRISA, UMR CNRS 6074, France)</i> | |
| Power Consumption Trade-Offs in Secure and Reliable NB-IoT Communication: A Comparative Study of Protocol Configurations | 884 |
| <i>Erik Gottschalk (Technical University of Denmark, Denmark)</i> | |

REFRESH 2025

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| To Scale or not to Scale? Understand the Overhead of Container Scaling Operations | 890 |
| <i>Raffaele Bolla (DITEN – University of Genoa, Italy), Roberto Bruschi (DITEN – University of Genoa, Italy), Alderico Gallo (CNIT – S2N National Lab, Italy), Chiara Lombardo (DITEN – University of Genoa, Italy), and Nicole Simone Martinelli (CNIT – S2N National Lab, Italy)</i> | |
| GCN-Based Throughput-Oriented Handover Management in Dense 5G Vehicular Networks | 895 |
| <i>Nazanin Mehregan (Brock University, Canada) and Robson E. De Grande (Brock University, Canada)</i> | |
| Enabling Network and Energy Measurements in IoT and 5G with Measure-X | 903 |
| <i>Francesco Bruno (Università di Pisa, Italy), Valerio Luconi (Consiglio Nazionale delle Ricerche, Italy), and Alessio Vecchio (Università di Pisa, Italy)</i> | |
| Towards Slice Admission Control and Split in O-RAN using Reinforcement Learning | 907 |
| <i>Giorgos Gotzias (National Technical University of Athens, Greece), Nikolaos Fryganiotis (National Technical University of Athens, Greece), Georgia Bousmpouka (National Technical University of Athens, Greece), Eleni Stai (National Technical University of Athens, Greece), Anastasios Zafeiropoulos (National Technical University of Athens, Greece), and Symeon Papavassiliou (National Technical University of Athens, Greece)</i> | |
| Design and Evaluation of a Network Digital Twin Framework for 5G/6G Architectures | 915 |
| <i>Ioannis Vasilos (NCSR Demokritos, Greece), Maria Christopoulou (NCSR Demokritos, Greece), Averkios Vasilos (NCSR Demokritos, Greece), Michail Alexandros Kourtis (NCSR Demokritos, Greece), Nikos Dimitriou (NCSR Demokritos, Greece), and George Xylouris (NCSR Demokritos, Greece)</i> | |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| THALIS: Trust-Based Heterogeneous Autonomous Localization and Information Spreading | 921 |
| <i>Sean Tsikteris (Arizona State University, USA), Derrick CookII (Morgan State University, USA), John G. Rogers (DEVCOM Army Research Laboratory, USA), and Eirini Eleni Tsiroupolou (Arizona State University, USA)</i> | |

IoT-Green 2025

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Performance Evaluation of LoRaWAN Networks for Smart Water Metering | 929 |
| <i>Spyros Lavdas (American College of Greece (ACG), Greece), George Vardoulas (Hellenic Naval Academy (HNA), Greece), Wassim El Hajj (American University of Beirut Mediterraneo, Cyprus), and Zinon Zinonos (American University of Beirut Mediterraneo, Cyprus)</i> | |
| Open-Source LoRaWAN Sensors for Distributed IoT Networks: Crowdsourced Environmental Data Collection for Climate Resilient Cities | 936 |
| <i>Dongyi Ma (University College London London, United Kingdom), Andrew Hudson-Smith (University College London London, United Kingdom), Martin De Jode (University College London London, United Kingdom), and Lovett Leah (University College London London, United Kingdom)</i> | |
| Performance Evaluation of Nomadic Data Collection with a UAV-LoRa System | 944 |
| <i>Nasrin Ghadami Vaghalandari (Universität Siegen, Germany), Agata Kołakowska (Gdańsk University of Technology, Poland), Christoph Grundig (Greatech GmbH Mülheim an der Ruhr, Germany), Li Dongchen (Universität Siegen, Germany), Bogdan Wiszniewski (Gdańsk University of Technology, Poland), Kai Daniel (University of Applied Sciences Ruhr West, Germany), and Roman Obermaisser (Universität Siegen, Germany)</i> | |
| Satellite-Based Processing Pipeline for Vegetation Assessment in Water Bodies and Urban Landscapes | 952 |
| <i>Giovanni Triboli (University of Modena and Reggio Emilia, Italy), Marco Picone (University of Modena and Reggio Emilia, Italy), and Marko Bertogna (University of Modena and Reggio Emilia, Italy)</i> | |
| Comparative Analysis of Machine Learning Models for Forecasting Urban Air Pollutants | 960 |
| <i>Martina Ivanova (Politecnico di Milano, Italy), Alberto Celani (Politecnico di Milano, Italy), and Luca Mottola (Uppsala University, Sweden)</i> | |
| Counter Measure Against Attacks on LORAWAN Based Devices in IOT Networks | 968 |
| <i>Haidar Safa (American University of Beirut, Lebanon), Maher Jallad (American University of Beirut, Lebanon), and Ali Saab (American University of Beirut, Lebanon)</i> | |
| TARP-LLN: Trust Aware Routing Protocol for Low Power and Lossy Networks | 976 |
| <i>Haidar Safa (American University of Beirut), Hassan Khalil (American University of Beirut), and Christina Teresa El-Sebaaly (American University of Beirut)</i> | |
| Can Cross-Layer Intrusion Detection Secure Agriculture 4.0 Systems? | 984 |
| <i>Christiana Ioannou (UCLan Cyprus) and Chrysostomos Chrysostomou (Frederick University, Cyprus)</i> | |

HIEMI 2025

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| An Overview on Cybersecurity Challenges and Solutions in the Internet of Everything Ecosystem | 991 |
| <i>Enrico Corradini (Polytechnic University of Marche, Italy), Gianluca Bonifazi (Polytechnic University of Marche, Italy), and Francesco Cauteruccio (University of Salerno, Italy)</i> | |
| Distributed Resilience Assessment of Critical Infrastructures with Digital Twins Considering Uncertainty | 997 |
| <i>Tobias Gebhard (German Aerospace Center (DLR), Germany) and Andrea Tundis (German Aerospace Center (DLR), Germany)</i> | |
| Evidence-Based Oracles using Bayesian Network | 1003 |
| <i>Tariq Naeem (Marche Polytechnic University, Italy), Massimiliano Pirani (Pegaso University, Italy), and Luca Spalazzi (Marche Polytechnic University, Italy)</i> | |
| IoE-GraphFormer: A Graph Transformer-Based Framework for Anomaly Detection in Internet of Everything | 1009 |
| <i>Enrico Corradini (Polytechnic University of Marche, Italy), Weisi Chen (Xiamen University of Technology, China), and Francesco Cauteruccio (University of Salerno, Italy)</i> | |
| Multi-Agent Parking in Smart Cities: The ChirpPark Protocol for Connected Vehicles | 1015 |
| <i>Miriana Russo (University of Catania, Italy), Corrado Santoro (University of Catania, Italy), Federico Fausto Santoro (University of Catania, Italy), and Alessio Tudisco (University of Catania, Italy)</i> | |
| Nyx: A Fault-Tolerant Fully Distributed Message Queue for the IoT-Edge-Cloud Continuum | 1021 |
| <i>Juan Aznar Poveda (University of Innsbruck, Austria), Marlon Etheredge (University of Innsbruck, Austria), Stefan Pedratscher (University of Innsbruck, Austria), Patrick Künig (University of Innsbruck, Austria), and Thomas Fahringer (University of Innsbruck, Austria)</i> | |
| On Machine Learning for Digital Forensics Investigation in Network Traffic | 1027 |
| <i>Andrea Tundis (German Aerospace Center (DLR), Germany) and Francesco Cauteruccio (University of Salerno, Italy)</i> | |

TI 2025

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| VirtualXAI: A User-Centric Framework for Explainability Assessment Leveraging GPT-Generated Personas | 1034 |
| <i>Georgios Makridis (University of Piraeus, Greece), Vasileios Koukos (University of Piraeus, Greece), Georgios Fatouros (University of Piraeus, Greece), Dimitrios Kotios (University of Piraeus, Greece), Maria Margarita Separdani (University of Piraeus, Greece), Dimosthenis Kyriazis (University of Piraeus, Greece), and John Soldatos (Innov-Acts Ltd, Cyprus)</i> | |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Combining Explainable Artificial Intelligence (XAI) with Blockchain towards Trustworthy Data-Driven Policies | 1042 |
| <i>Konstantinos Mavrogiorgos (University of Piraeus, Greece), Shlomit Gur (IBM Research, Israel), Nikolaos Kalantzis (Ubitech Limited, Cyprus), Konstantinos Tzelaptis (Ubitech Limited, Cyprus), Xanthi S. Papageorgiou (Ubitech Limited, Cyprus), Andreas Karabetian (University of Piraeus, Greece), Georgios Manias (University of Piraeus, Greece), Argyro Mavrogiorgou (University of Piraeus, Greece), Dimosthenis Kyriazis (University of Piraeus, Greece), and Celia Parralejo Cano (Diputación de Badajoz, Spain)</i> | |
| Bridging Industrial Expertise and XR with LLM-Powered Conversational Agents | 1050 |
| <i>Despina Tomkou (Innov-Acts Ltd., Cyprus), George Fatouros (Innov-Acts Ltd., Cyprus; University of Piraeus, Greece), Andreas Andreou (CYENS Centre of Excellence, Cyprus), Georgios Makridis (University of Piraeus, Greece), Fotis Liarokapis (CYENS Centre of Excellence, Cyprus), Dimitrios Dardanis (University of Piraeus, Greece), Athanasios Kiourtis (University of Piraeus, Greece), John Soldatos (Innov-Acts Ltd., Cyprus), and Dimosthenis Kyriazis (University of Piraeus, Greece)</i> | |
| An Empirical Evaluation of Explainable AI Approaches | 1057 |
| <i>Ioannis T. Christou (NetCompany-Intrasoft, Luxembourg; The American College of Greece, Greece), John Soldatos (NetCompany-Intrasoft, Luxembourg; Glasgow University, Scotland), and Pantelis Lappas (NetCompany-Intrasoft, Luxembourg; University of the Aegean, Greece)</i> | |
| Indicators of External Disruptions in Supply Chains: A Framework for Early Detection and Resilience Planning | 1064 |
| <i>George Bardas (Research and Innovation Department, Greece), Nikos Kefalakis (Research and Innovation Department, Greece), and John Soldatos (Research and Innovation Department, Greece)</i> | |
| Enhancing the Performance of Edge AI Systems via Energy Equilibrium | 1072 |
| <i>Petros Amanatidis (Democritus University of Thrace, Greece), Eleftherios Vagiotas (Democritus University of Thrace, Greece), Athanasios Stamopoulos (Democritus University of Thrace, Greece), George Michailidis (Democritus University of Thrace, Greece), Dimitris Karampatzakis (Democritus University of Thrace, Greece), Panagiotis Sarigiannidis (University of Western Macedonia, Greece; MetaMind Innovations P.C., Greece), and Thomas Lagkas (Democritus University of Thrace, Greece)</i> | |
| Towards Conversational AI for Human-Machine Collaborative MLOps | 1079 |
| <i>George Fatouros (University of Piraeus, Greece), Georgios Makridis (University of Piraeus, Greece), George Kousiouris (Harokopio University, Greece), John Soldatos (Innov-Acts Ltd, Cyprus), Anargyros Tsadimas (Harokopio University Athens, Greece), and Dimosthenis Kyriazis (University of Piraeus, Greece)</i> | |

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| From Static Records to Smart Passports: Evolving Digital Product Passports toward Product-Service System Integration | 1087 |
| <i>Pedro Maló (UNPARALLEL, Portugal), Bruno Almeida (UNPARALLEL, Portugal), Márcio Mateus (UNPARALLEL, Portugal), Fábio Querido (UNPARALLEL, Portugal), Diogo Inácio (UNPARALLEL, Portugal), Tiago Teixeira (UNPARALLEL, Portugal), Giovanni Di Orio (UNPARALLEL, Portugal), and Francisco Marques (UNPARALLEL Labs, Portugal)</i> | |
| Integrating Asset Administration Shell with an IIoT Platform for Human-Centric Digital Twins | 1095 |
