2025 11th International Conference on Computing and Artificial Intelligence (ICCAI)

ICCAI 2025

Table of Contents

Preface ..... **xix**
Conference Committee ..... **xx**
Technical Committee ..... **xxi**
Sponsors ..... **xxv**

Machine Learning and Algorithms in Image Processing

Rel-UNet: Reliable Tumor Segmentation via Uncertainty Quantification in nnU-Net 1
Seyed Sina Ziaee (University of Calgary, Canada), Farhad Maleki (University of Calgary, Canada), and Katie Ovens (University of Calgary, Canada)

Refining Deep Active Learning Pipelines: Leveraging Pseudo-Labeling and Label Calibration for Enhancing Dataset Quality 9
Tomoya Kasuga (IVIS Co., Ltd., Japan), Gongye Jin (NTT DATA Group Corporation, Japan), Akira Yuasa (NTT DATA Group Corporation, Japan), Daria Vazhenina (Woven by Toyota, Japan), and Narimasa Watanabe (Woven by Toyota, Japan)

A Comparative Constraint Deep Learning Model for Blood Vessel Segmentation in OCTA Images .. 16
Xiaozhong Xue (Kyoto Institute of Technology, Japan), Weiwei Du (Kyoto Institute of Technology, Japan), Nao Yanagihara (Kyoto Institute of Technology, Japan), Masahiro Miyake (Kyoto University Hospital, Japan), Keina Sado (Kyoto University Hospital, Japan), and Jianming Wang (Tiangong Univerisity, China)

A Novel Deep Learning Framework for Cactus Species Classification 23
Sarunya Kanjanawattana (Suranaree University of Technology, Thailand), Bhuwadol Sriton (Suranaree University of Technology, Thailand), Peeranut Sangkhawasee (Suranaree University of Technology, Thailand), Komsan Srivisut (Suranaree University of Technology, Thailand), Supaporn Bunrit (Suranaree University of Technology, Thailand), and Nuntawut Kaoungku (Suranaree University of Technology, Thailand)

FusionMapper Vectorized Map Construction by Multi-Modal and Temporal Fusion Based on Transformer 31
Haoxiang Jie (Neusoft Reach Automotive Technology Ltd., China), Yaoyuan Yan (Neusoft Reach Automotive Technology Ltd., China), and Xinyi Zuo (Chinese Academy of Sciences, China)

Deep Learning Techniques for Identifying Slope Anomalies in Multi-Resolution Aerial Images..... 39
Chwen-Huan Wang (Chung Yuan Christian University, Taiwan), Chiung-Yun Hu (Chung Yuan Christian University, Taiwan), and Yu Chieh Li (Chung Yuan Christian University, Taiwan)

Object Detection and Image Modeling

An Improved RT-DETR Model for Small Object Detection on Construction Sites 47
Gan Zhang (Wuhan University of Technology, China) and Xi Zhao (Wuhan University of Technology, China)

Appearance Defect Detection and Localisation using a Lightweight CNN-Based Detector 55
Rémi Cogranne (Troyes University of Technology, France) and Lucien Derouet (Troyes University of Technology, France)

Sparse Deep Interaction Fusion for 3D Object Detection 64
Yaoyuan Yan (Neusoft Reach Automotive Technology Ltd., China) and Haoxiang Jie (Neusoft Reach Automotive Technology Ltd., China)

Advancing Industrial Safety: A Spatio-Temporal Framework for PPE Detection using YOLOv11 70
Teeraphat Inta (Silpakorn Uiversity, Thailand) and Choosak Pornsing (Silpakorn Uiversity, Thailand)

CeMDISC-ViT: Cerebral Microbleed Detection using Inter-Slice Context via Vision Transformers 75
Alessandro Andrei A. Araza (University of Santo Tomas, Philippines), Joshua Kyle K. Entrata (University of Santo Tomas, Philippines), Lex Zedrick M. Lorenzo (University of Santo Tomas, Philippines), Nigel Haim N. Sebastian (University of Santo Tomas, Philippines), and Jessie James P. Suarez (University of Santo Tomas, Philippines)

Research on the Application of Large Language Models with Modular Knowledge Enhancement in Automated Project Proposal Generation 83
Chengwei Li (Shanghai Normal University, China), Yijun Ling (Shanghai Normal University, China), Wei Shen (Shanghai Sheneng Investment Development Co., Ltd., China), Xufeng Ling (Shanghai Normal Universtiy Tianhua College AI school, China), and Jie Yang (Shanghai Jiaotong University, China)

Research and Implementation of Parallel Detection and Tracking Algorithm Based on Embedded Processor 88
Zhaoyang Han (Beijing University of Technology, China), Qiang Wu (Beijing University of Technology, China), Xin Zheng (Beijing University of Technology, China), and Wei He (Beijing University of Technology, China)

Horizon Line Detection Algorithm Based on Interference-Aware Scene Perception 94
Yushuo Li (Beijing University of Technology, China), Qiang Wu (Beijing University of Technology, China), Xin Zheng (Beijing University of Technology, China), and Jinling Cui (Beijing University of Technology, China)

Computer Vision and Image Analysis

Localization of Deepfake Facial Images Through U-NET Architecture 102
Khushi Kiran Sheelavantmath (PES University, India), Vaibhav Isloor (PES University, India), B Sheetal (PES University, India), N Bhuvisha (PES University, India), and B J Sandesh (PES University, India)

Regression-Based and Isophote-Constrained Cloud Removal for Time-Series Remote Sensing Imagery 108
YinNing Huang (Nanjing University of Science & Technology, China), YaXing Sun (Nanjing University of Science & Technology, China), and Hao Zheng (Nanjing University of Science & Technology, China)

A Multi-Stage Deep Learning Pipeline for 3D Coronary Artery Reconstruction from X-Ray Angiograms 113
Sai Harshith Narra (PES University, India), Sarthak Aryan (PES University, India), Shreya Gunnan Ramkumar (PES University, India), Shreya Prasad (PES University, India), Madhusudan Raikar (Aster CMI Hospital, India), and R Jayashree (PES University, India)

A Mixed-Supervision Spectral Super-Resolution Methodology for Multispectral Image 118
Shuo Wang (Beijing University of Technology, China), Ting Hu (Beijing University of Technology, China), Zhe Li (Beijing University of Technology, China), Siyuan Cheng (Space star technology co., LTD, China), Kebin Jia (Beijing University of Technology, China), and Jinchao Feng (Beijing University of Technology, China)

Age Prediction from Fundus Images by a Multi-Branch Swin-Transformer Model 122
Xiaozhong Xue (Kyoto Institute of Technology, Japan), Weiwei Du (Kyoto Institute of Technology, Japan), Yusuke Fujiwara (Kyoto Institute of Technology, Japan), Masahiro Miyake (Kyoto University Hospital, Japan), Keina Sado (Kyoto University Hospital, Japan), and Jianming Wang (Tiangong University, China)

Enhanced Realism in Virtual Try-On Tasks using Diffusion Methods 128
Saris Kiattithapanayong (Chulalongkorn University, Thailand) and Suronapee Phoomvuthisarn (Chulalongkorn University, Thailand)

Intelligent Image Recognition and Application Technology

An Innovative Approach for Vehicle Speed Recognition through Noise Emission Analysis by using Machine Learning 134
Pengfei Fan (Xi'an Jiaotong-Liverpool University, China), Yuli Zhang (Xi'an Jiaotong-Liverpool University, China), Ruiyuan Jiang (Xi'an Jiaotong-Liverpool University, China), Xinheng Wang (Xi'an Jiaotong-Liverpool University, China), Chengming Wang (Xi'an Jiaotong-Liverpool University, China), Shangbo Wang (University of Sussex, UK), Benson Zhu (University of Sussex, UK), and Chenhao Wen (University of Sussex, UK)

Joint Pre-Training Based on Hybrid Contrast and Feature Fusion for Unsupervised Domain Adaptive Person Re-Identification 142
Xiaohong Li (Hefei University of Technology, China), Jing Wang (Hefei University of Technology, China), Shijie Hao (Hefei University of Technology, China), Shuo Zhuang (Hefei University of Technology, China), and Meibin Qi (Hefei University of Technology, China)

Identification Method of Poisonous Mushroom Based on Graph Neural Network 148
Ju Feng (Shanghai Normal University Tianhua College, China), Yubo Wang (Chinese Academy of Sciences, China), Xufeng Ling (Shanghai Normal University Tianhua College, China), Hao Yuan (Shanghai Normal University Tianhua College, China), and Wangtao Li (Shanghai Normal University Tianhua College, China)

Neural Network Augmentation: Generating Palm Vein for Effective Recognition 153
Yihan Guan (Tiangong University, China), Qiang Gao (Tiangong University, China), Yinping Wang (Tiangong University, China), Jianfeng Chen (Tiangong University, China), Wenhui Zhang (Tiangong University, China), and Guangxu Li (Tiangong University, China)

Plastering Location Recognition System with a Robot Arm 157
Weiwei Du (Kyoto Institute of Technology, Japan), Rihito Morimoto (Kyoto Institute of Technology, Japan), Ikumi Noborio (Kyoto Institute of Technology, Japan), and Nakoto Muramoto (Kyoto Institute of Technology, Japan)

The FER-Based Module Embedded in SenGAware Tool: A Group Emotion Awareness Perspective in CSCL 162
JiaWen Chen (Shanghai Normal University Tianhua College, China), YuXuan Guan (Jilin University, China), XuFeng Ling (Shanghai Normal University Tianhua College, China), YanHao Lee (ValueApex (Shanghai) Information Technology Co., Ltd., China), and YaNan Hu (Shanghai Normal University Tianhua College, China)

Enhancing Bidirectional Sign Language Communication: Integrating YOLOv8 and NLP for Real-Time Gesture Recognition & Translation 168
Hasnat Jamil Bhuiyan (BRAC Univeristy, Bangladesh), Mubtasim Fuad Mozumder (BRAC Univeristy, Bangladesh), Md. Rabiul Islam Khan (BRAC Univeristy, Bangladesh), Md. Sabbir Ahmed (BRAC Univeristy, Bangladesh), and Nabuat Zaman Nahim (BRAC Univeristy, Bangladesh)

A Machine Learning-Based Calligraphy Font Recognition System using HOG Features and Support Vector Machine 175
Chenfei Xu (Shanghai Normal University, China), Jingxin Liang (Shanghai Normal University, China), and Xufeng Ling (Shanghai Normal University, China)

Digital Image and Multimedia Applications

Design and Implementation of High-Speed Camera Concurrent Network and Multi-Core System Based on XCZU7EV 181
Jiapei He (Beijing University of Technology, China), Qiang Wu (Beijing University of Technology, China), Jinling Cui (Beijing University of Technology, China), and Xin Zheng (Beijing University of Technology, China)

Single-View 3D Generation via Related Structure Pattern Matching 187
Junnosuke Takarabe (Kyoto Institute of Technology, Japan), Irawati Nurmala Sari (Brawijaya University, Indonesia), Weiwei Du (Kyoto Insitute of Technology, Japan), and Emiko Horikawa (Kyoto Insitute of Technology, Japan)

Single 2D Image Inpainting for Sparse-View 3D Reconstruction using Expanded-Scale Stable Diffusion 195
Irawati Nurmala Sari (University of Brawijaya, Indonesia) and Weiwei Du (Kyoto Institute of Technology, Japan)

SMCA: Movie Trailer Audience-Suitability Rating Classification using Staged Multimodal Cross-Attention 201
Kyle Andre S. Castro (University of Santo Tomas, Philippines), Carl Mitzchel Padua (University of Santo Tomas, Philippines), Edjin Jerney H. Payumo (University of Santo Tomas, Philippines), Nathaniel David P. Samonte (University of Santo Tomas, Philippines), and Jessie James P. Suarez (University of Santo Tomas, Philippines)

MULTILEAK: A Multi-Modal Feature Fusion Network for Information Leakage Detection in Short Videos 209
Songyu Zou (State Grid Corporation of China Hami Coal&Energy Co.,Ltd, China), Yue Zhu (State Grid Corporation of China Hami Coal&Energy Co.,Ltd, China), Jun Xing (State Grid Corporation of China Hami Coal&Energy Co.,Ltd, China), and Li Zhang (State Grid Corporation of China Hami Coal&Energy Co.,Ltd, China)

Identifying Ovarian Cancer Subtypes in a Multiple-Instance Learning Approach 219
Zhefeng Ren (Huazhong University of Science and Technology, China), Haonan Wang (Huazhong University of Science and Technology, China), Xiaojun Hei (Huazhong University of Science and Technology; Hubei Key Laboratory of Intelligent Internet, China), and Yuan Tian (Huazhong University of Science and Technology, China)

Enhancing English Pronunciation and Word Differentiation Through Virtual Reality: A Study on Interactive Learning and Training 224
Yingling Chen (National Defense University, Taiwan) and Chinlun Lai (Asia Eastern University of Science and Technology, Taiwan)

Agent AI Becomes Next Addictive Disorder 229
Abbott Po Shun Chen (Chaoyang University of Technology, Taiwan)

Improved Multi-Category Classification of Breast Cancer Histopathology Images using Weighted Cross-Entropy Loss and Convolutional Block Attention Module 234
Chenchen Yue (University of Electronic Science and Technology of China, China) and Jiajun Zhou (University of Electronic Science and Technology of China, China)

Advanced Neural Network Theory and Computation

Integrating Embedding Representations with Graph Convolutional Networks for Enhanced Sentiment Analysis 243
Aref Motamedi (University of Calgary, Canada) and Katie Ovens (University of Calgary, Canada)

Smart-Init of Neural Networks 250
David Denisov (University of Haifa, Israel), Dan Feldman (University of Haifa, Israel), Shlomi Dolev (Ben-Gurion University of the Negev, Israel), and Michael Segal (Ben-Gurion University of the Negev, Israel)

Multimodal Social Relation Extraction Based on Hypergraph Attention Neural Networks 256
Zijian Wu (Guangdong University of Technology, China) and Ling Zhang (Guangdong University of Technology, China)

GENIE: GENetIc Algorithm-Based REliability Assessment Methodology for Deep Neural Networks.... 264
Samira Nazari (University of Zanjan, Iran), Mahdi Taheri (Tallinn University of Technology, Brandenburgische Technische Universität Cottbus, Germany), Ali Azarpeyvand (University of Zanjan, Tallinn University of Technology, Estonia), Mohsen Afsharchi (University of Zanjan, Iran), Christian Herglotz (Brandenburgische Technische Universität Cottbus, Germany), and Maksim Jenihhin (Tallinn University of Technology, Estonia)

Numerical Simulation of Liquid Tank Sloshing Based on Graph Neural Network with Self-Attention Mechanism 272
Wenkang Zhang (Dalian Maritime University, China), Xiaofeng Sun (Dalian Maritime University, China), Yiping Zhong (Dalian Maritime University, China), and Hai Wei (Yantai University, China)

Progressive Generation of Electrocardiogram Signals Based on Generative Adversarial Networks 280
Guangqi Chen (Huazhong University of Science and Technology, China), Qiang Li (Huazhong University of Science and Technology, China), and Peng Zhang (Huazhong University of Science and Technology, China)

A Hybrid Architecture Combining CNN, LSTM, and Attention Mechanisms for Automatic Speech Recognition 285
Wenye Song (Emory University, USA) and Ian Deng (Vigitron and UCSD, USA)

REMOC: A CNN-Based Framework for Automated Rehabilitation Movement Classification 293
Fadilla 'Atyka F. A. N. R. Nor Rashid (Universiti Kebangsaan, Malaysia), Ezzati E. B. Baharom (Universiti Kebangsaan, Malaysia; University of Malaya, Malaysia), Nurhidayah N. B. Bahar (Universiti Kebangsaan, Malaysia), and Nor Surayahani N. S. S. Suriani (Universiti Tun Hussein Onn, Malaysia)

Large Scale Language Models and Natural Language Processing

Getting LLM to Think and Act Like a Human Being: Logical Path Reasoning and Replanning 301
Lin Zhang (Southwestern University of Finance and Economics, China), Qing Li (Southwestern University of Finance and Economics, China), Yang Wang (Southwestern University of Finance and Economics, China), and Jingmei Zhao (Southwestern University of Finance and Economics, China)

Enhancing Telecom Operation Support Systems with Multi-Agent Large Language Models 309
Kuan-Yin Lee (Chunghwa Telecom Laboratories, Taiwan), Po-An Tseng (Chunghwa Telecom Laboratories, Taiwan), and Wei-Cheng Chen (Chunghwa Telecom Laboratories, Taiwan)

Fine-Tuned Mistral Model for Multi-Agent Mental Health Counseling System 317
Ankit Patel (Accrete AI, India), Pratyush Lohumi (Accrete AI, India), Vishank Shah (Accrete AI, India), Madhumita Dash (Accrete AI, India), and Meenakshi Sumeet Arya (Accrete AI, India)

Tailored Tales: Enhancing Children's Reading Comprehension with Preference-Tuned Automatic Story Generation 325
Aadhith Shankarnarayanan (American University of Sharjah, UAE), Taufiq Syed (American University of Sharjah, UAE), Salsabeel Shapsough (American University of Sharjah, UAE), Imran Zualkernan (American University of Sharjah, UAE), and Ekaterina Kochmar (Mohamed bin Zayed University of Artificial Intelligence, UAE)

Sentiment and Response Priority Detection in Latvian E-Mails using Large Language Models: A Case Study for Low-Resource Languages 333
Ilze Birzniece (Riga Technical University, Latvia), Ilze Andersone (Riga Technical University, Latvia), Janis Bicans (Riga Technical University, Latvia), and Signe Balina (Datorzinibu centrs, Latvia)

An AI-Powered Patent Document Generation System Based on Large Language Model 342
Wanghe Gao (Shanghai Normal University, China), Jie Yang (Shanghai Jiaotong University, China), Qian Yu (Shanghai Electric Distributed Energy Technology Co., Ltd., China), Xingang Shangguan (Shanghai Fengxian Gas Turbine Power Generation Co., Ltd., China), Ning Xiao (Shanghai Fengxian Gas Turbine Power Generation Co., Ltd., China), and Xufeng Ling (Shanghai Normal University Tianhua College, China)

Natural Language Processing and Machine Learning for Detecting Harmful Speech in Kazakh Social Media 347
Sagynay Moldir (al-Farabi Kazakh National University, Kazakhstan), Milana Bolatbek (al-Farabi Kazakh National University, Kazakhstan), Shynar Mussiraliyeva (al-Farabi Kazakh National University, Kazakhstan, Almaty, Kazakhstan), and Kymbat Baisylbayeva (al-Farabi Kazakh National University, Kazakhstan, Almaty, Kazakhstan)

LLMs Can Overcome Lack of Embodied Context Through Explicit Prompting 352
Pattaradanai Lakkananithiphan (Chulalongkorn University, Thailand), Warisa Sritriratanarak (Chulalongkorn University, Thailand), and Paulo Garcia (Chulalongkorn University, Thailand)

Exploration of Computer Programming Teaching Reform Based on Large Language Models 359
Yanni Zhao (Shanghai Normal University, China), Xufeng Ling (Shanghai Normal University, China), Huaizhong Zhu (Shanghai Normal University, China), Feng Zhou (Shanghai Normal University, China), and Zhiruo Deng (Shanghai Normal University, China)

LLM-NER: Advancing Named Entity Recognition with LoRA+ Fine-Tuned Large Language Models ... 364
Yuanjing Zhu (Duke University, USA) and Yunan Liu (Duke University, USA)

ChemAI: Empowering Robots to Automate Chemical Experiments with Large Language Models .. 369
Yefan Lin (Huazhong University of Science and Technology), Ziyuan Wang (Huazhong University of Science and Technology), Lujia Zhang (Huazhong University of Science and Technology), Chengwei Zhang (Huazhong University of Science and Technology; Hubei Key Laboratory of Intelligent Internet, China), and Xiaojun Hei (Huazhong University of Science and Technology; Hubei Key Laboratory of Intelligent Internet, China)

Student Use of Accurate and Inaccurate Chatbot Content: An Empirical Study 374
John S. Y. Lee (City University of Hong Kong, China)

Optimizing Small-Scale Language Models for Robotic Task Planning: Insights into Prompt Design 380
Fan Wu (Beijing University of Technology, China), Zhigang Wang (Intel, China), Yikang Li (Kunming University of Science and Technology, China), and Qiang Wu (Beijing University of Technology, China)

Intelligent Optimization and Application of Digital Information Systems Based on AI

An Adaptive Multi-Source Correlation Fusion Approach for Lane-Level Traffic Flow Prediction 386
Ruiyuan Jiang (Xi'an Jiaotong-Liverpool University, China), Pengfei Fan (Xi'an Jiaotong-Liverpool University, China), Chengming Wang (Xi'an Jiaotong-Liverpool University, China), Yuli Zhang (Xi'an Jiaotong-Liverpool University, China), Shangbo Wang (University of Sussex, UK), and Dongyao Jia (Xi'an Jiaotong-Liverpool University, China)

SignaShield: Guarding Your Signature via Font Style Watermarking 393
*Rensong Wang (University of Science and Technology of China, China), Jie Zhang (A*STAR, Singapore), Zhiwen Ren (University of Science and Technology of China, China), Weiming Zhang (University of Science and Technology of China, China), and Nenghai Yu (University of Science and Technology of China, China)*

MarineCrewScenes: A Dataset for Multi-Scale Crew Monitoring in Ship Bridges 401
Kewei Deng (Wuhan University of Technology, China) and Xi Zhao (Wuhan University of Technology, China)

A Data-Aware and Adaptability-Enhanced Framework for Cardinality Estimation 409
Wei Liu (UESTC, China), Wenlong Dong (UESTC, China), Hangzhe Cai (CDUT, China), Rui Xi (UESTC, China), and Mengshu Hou (UESTC, China)

Development of the Truku Language Text-to-Speech Model and its Application in Digital Audiobook Conversion 418
Yi-Hao Hsiao (National Center for High-performance Computing, Taiwan), Yi-Ting Guo (National Center for High-performance Computing, Taiwan), Meng-Chi Huang (National Center for High-performance Computing, Taiwan), and Wen-Yi Chang (National Center for High-performance Computing, Taiwan)

Optimization of Gmapping Algorithm Based on Fusion of IMU and Odometer in Multiple Scenarios 424
Wei Dai (Xi'an Jiaotong-Liverpool University, China), Lin Zhang (Xi'an Jiaotong-Liverpool University, China), and Limin Yu (Xi'an Jiaotong-Liverpool University, China)

A Katz-Attention Enhanced Decomposition-Fusion Framework for Robust Traffic Forecasting 429
Hu Yanzan (Chongqing University of Posts and Telecommunications, China) and He Pan (Chinese Academy of Sciences, China)

Bundle Service Recommendation Based on Graph Representation Learning 436
Gang Xiao (China Jiliang University, China), Wanchuang Cai (China Jiliang University, China), Duanni Li (Zhejiang University of Technology, China), Jiankun Lai (Zhejiang New Zailing Technology CO., LTD, China), Jun Xu (Zhejiang University of Technology, China), and Jiawei Lu (China Jiliang University, China)

Research on Task Correlation of Artificial Intelligence Datasets Based on Stacked Sparse Auto Encoder Networks 444
Shaoshi Wu (Academy of Military Science, China), Yan He (Academy of Military Science, China), Zhenwei Hou (Academy of Military Science, China), Yishan Ding (Academy of Military Science, China), and Xiaofei Zhang (Academy of Military Science, China)

A Bibliometric Analysis of Trust in Conversational Agents over the Past Fifteen Years 451
Meltem Aksoy (Research Center Trustworthy Data Science and Security of the University Alliance Ruhr, Technical University Dortmund, Germany) and Annika Bush (Research Center Trustworthy Data Science and Security of the University Alliance Ruhr, Technical University Dortmund, Germany)

Theory and Application of Next Generation Artificial Intelligence

CogniLearn: Integrating AI-Powered Insights for Class 10 Syllabus 465
B K Bhoomika (PES University, India), L Brunda (PES University, India), K H Chandan (PES University, India), Prachi Shivanand Anure (PES University, India), and Sujatha R Upadhyaya (PES University, India)

RJ-AI: A Radio Jockey Agent Developed using Markov Models and Personality Fine-Tuning 473
Darsh Agarwal (PES University, India) and Ramamoorthy Srinath (PES University, India)

A Path Planning Method for UAV Target Detection Based on Improved Genetic Algorithm 482
Shufang Xu (Hohai University, China), Heng Li (Hohai University, China), and Hongmin Gao (Hohai University, China)

GPT as a Reviewer: Automatic Evaluation of Academic Papers 487
Berfin Tas (Technical University of Dortmund, Germany) and Meltem Aksoy (Research Center Trustworthy Data Science and Security of the University & Technical University Dortmund, Germany)

Voice Cloning Method Based on Speaker Encoding with Global Timbre Constraints 497
Baixu Chen (Huazhong University of Science and Technology, China), Yangui Fang (Huazhong University of Science and Technology, China), Chengwei Zhang (Huazhong University of Science and Technology, China), and Guohui Zhong (Huazhong University of Science and Technology, China)

Assymetric Fusion of Heterogeneous Occupancy Grid Maps 503
Ilze Andersone (Riga Technical university, Latvia)

How CAI Impacts FOMO: The Stimulus-Response-Action View 512
Yi Jie Lin (Chaoyang University of Technology, Taiwan) and Abbott Po Shun Chen (Chaoyang University of Technology, Taiwan)

Kissat_MAB_CoRephase: Combining Different Rephasing Heuristics using MAB in SAT 517
Jinjin Liu (National University of Defense Technology, China), Jianmin Zhang (National University of Defense Technology, China), Yan Sun (National University of Defense Technology, China), and Tiejun Li (National University of Defense Technology, China)

Systematic Survey of Various Prompt Optimization Methods and Their Classifications 524
Aditi M Jain (Independent Researcher, USA) and Mayank Jindal (Independent Researcher, USA)

Sensor Based IoT System and Mobile Communication

Learning Encoding Phasors with Fractional Power Encoding 537
Pere Vergés (University of California, USA), Alexandru Nicolau (University of California, USA), and Tony Givargis (University of California, USA)

Automatic Smoke/Forest Fire Detecting System Based on Visual IoT 544
Kanokvate Tungpimolrut (National Electronics and Computer Technology Center, Thailand), Jessada Karnjana (National Electronics and Computer Technology Center, Thailand), Montri Chatpoj (National Electronics and Computer Technology Center, Thailand), Nathavuth Kitbutrawat (National Electronics and Computer Technology Center, Thailand), Praphan Pavarangkoon (King Mongkut's Institute of Technology Ladkrabang, Thailand), and Ken T. Murata (National Institute of Information and Communicaitons Technolgy, Japan)

Comparing CNN and LSTM Networks for Magnetic Localization of IoT Devices and Pedestrian Tracking 549
Konstantin Klipp (Technical University Berlin, Germany), Edgar Blumenthal (Technical University Berlin, Germany), Marten Eckardt (Technical University Berlin, Germany), Jasper Windirsch (Technical University Berlin, Germany), Bernd Schäufele (Fraunhofer Institute for Open Communication Systems (FOKUS), Germany), Johannes Wortmann (Fraunhofer Institute for Open Communication Systems (FOKUS), Germany), and Ilja Radusch (Fraunhofer Institute for Open Communication Systems (FOKUS), Germany)

Inter-Domain Handover Based on Blockchain for SDN-Based Network Mobility 556
Parin Sornlertlamvanich (Suranaree University of Technology, Thailand)

Evaluation of Multi-Armed Bandit Decision Making in Multi-Agent Cyber Physical Games 561
Nutthapong Dissanont (Chulalongkorn University, Thailand), Paulo Garcia (Chulalongkorn University, Thailand), and Warisa Sritriratanarak (Chulalongkorn University, Thailand)

Load and Fragmentation-Aware Demand Routing on Hybrid Single/Multi-Band EONs 566
Der-Rong Din (National Changhua University of Education, Taiwan)

Review of Research on Time-Sensitive Networking Testing 571
Ran Guan (Beijing University of Technology, China), Qiang Wu (Beijing University of Technology, China), Lei Chen (Beijing Institute of Control & Electronics Technology, China), and Pengyun Liu (Beijing Institute of Control & Electronics Technology, China)

Enhancing Wi-Fi in Dynamic Interference Environments: A Joint Rate Adaptation and Channel Access Approach via Deep Reinforcement Learning 579
Shangwen Zhuang (Huazhong University of Science and Technology, China), Chengxiang Mi (Huazhong University of Science and Technology, China), Yayu Gao (Huazhong University of Science and Technology, China), and Chengwei Zhang (Huazhong University of Science and Technology, China)

Utilizing a Cross-Silo Federated Learning Approach with Wireless Backhaul VPN in Computer-Aided Healthcare System 585
Atif Mahmood (INTI International University, Malaysia), Saaidal Razalli Azzuhri (Universiti Malaya, Malaysia), Zati Hakim Azizul Hasan (Universiti Malaya, Malaysia), and Laiha Mat Kiah (Universiti Malaya, Malaysia)

Design of Dual Redundancy MLVDS System Based on FPGA 591
Donghai Yuan (Beijing University of Technology, China), Jinling Cui (Beijing University of Technology, China), Xin Zheng (Beijing University of Technology, China), and Qiang Wu (Beijing University of Technology, China)

A Survey on RL-Based Approaches for Traffic Signal and Joint Vehicle-Signal Control 597
Yuli Zhang (Xi'an Jiaotong-Liverpool University, China), Pengfei Fan (Xi'an Jiaotong-Liverpool University, China), Ruiyuan Jiang (Xi'an Jiaotong-Liverpool University, China), Hankang Gu (Xi'an Jiaotong-Liverpool University, China), Chengming Wang (Xi'an Jiaotong-Liverpool University, China), Shangbo Wang (University of Sussex, UK), and Dongyao Jia (Xi'an Jiaotong-Liverpool University, China)

Smart Stroller Design Based on STM32 605
Yuyang Hu (Wuhan Business University, China), Jiaxin Chen (Wuhan Business University, China), Bingying Jia (Wuhan Business University, China), and Xiao Huang (Wuhan Business University, China)

System Model and Simulation in Intelligent Control Systems

Autoencoder-Based Model of Nuclear Power Plant Core Temperature for Blockage Event Detection 611
Rémi Cogranne (Troyes University of Technology, France)

A Multimodal Perception System for Wheeled Robots Combining Vision and LiDAR 621
Ding Yang (Southwest Forestry University, China) and Zhang Qinghui (Southwest Forestry University, China)

Modeling and Simulation of Intelligent Vehicle Systems using Simulink and MATLAB Programming for Advanced Automotive Application 627
Wenjun Guo (Aston University, UK), Yan He (Shanghai Normal University Tianhua College, China), and Xufeng Ling (Shanghai Normal University Tianhua College, China)

Functional Type Expressions of Sequential Circuits with the Notion of Referring Forms 632
Shunji Nishimura (National Institute of Technology, Oita College, Japan)

Material Supplier Selection using Fuzzy Analytic Hierarchy Process: A Case Study of Rattan Basket Manufacturing Business in Chiang Rai Province 637
Supansa Chaising (Mae Fah Luang University, Thailand) and Wanus Srimaharaj (Payap University, Thailand)

Data driven Data Model and Privacy Protection

Gradient Descent Based Vertical Auto-Scaling Algorithm for Microservices 643
Hsuan-Zong Wu (National Taichung University of Education, Taiwan) and Kuan-Chou Lai (National Taichung University of Education, Taiwan)

Regularized Tensor Completion for Structural Health Monitoring Data Imputation 648
Shenghao Xia (University of Arizona, USA), Tahsin Afroz Hoque Nishat (University of Arizona, USA), Hongki Jo (University of Arizona, USA), and Jian Liu (University of Arizona, USA)

Deep Temporal Clustering for Long-Term Gait Recovery Patterns of Post-Stroke Patients using Joint Kinematic Data 654
Teh-Hao Teng (Sungkyunkwan University, South Korea), Gyeongmin Kim (Sungkyunkwan University, South Korea), Hyungtai Kim (Sungkyunkwan University, South Korea), and Mun-Taek Choi (Sungkyunkwan University, South Korea)

A Tree-Based RAG-Agent Recommendation System: A Case Study in Medical Test Data 659
Yahe Yang (George Washington University, USA), Chengyue Huang (University of Iowa, USA), and Cailian Ruan (Medical School of Yan'an University, China)

Smart Predictive Modeling in Mobile Banking: Improving Customer Satisfaction through Cybersecurity, Data Privacy, and Best Practices 665
Alexander V. Gutierrez (Our Lady of Fatima University, Phillippines), Arsenia U. Gallardo (Our Lady of Fatima University, Phillippines), Elna H. Barrantes (Our Lady of Fatima University, Phillippines), and Rommel Joseph G. Lazatin (Our Lady of Fatima University, Phillippines)

Designing a Blockchain-Based Thai Lottery System 672
Sirapat Boonkrong (Suranaree University of Technology, Thailand)

Representation Alignment for Deepfake Detection 677
Zifeng Li (Beihang University, China), Wenzhong Tang (Beihang University, China), Shijun Gao (Beihang University, China), Yanyang Wang (Beihang University, China), and Shuai Wang (Beihang University, China)

Comprehensive Analysis of Security Risks in Android File Sharing Applications: Reverse Engineering, Methodologies, and Optimization 687
Zhirui Wang (Huazhong University of Science and Technology, China), Chengwei Zhang (Huazhong University of Science and Technology, China), and Guohui Zhong (Huazhong University of Science and Technology, China)

TimesFNP: Contrastive Learning for Financial Domain with Noise-Resilient Prediction 697
Shaofei Shen (Southwestern University of Finance and Economics, China), Qing Li (Southwestern University of Finance and Economics, China), Yan Chen (Southwestern University of Finance and Economics, China), Rui Cheng (Southwestern University of Finance and Economics, China), and Yu Zheng (Southwestern University of Finance and Economics, China)

Structural Line Detection for Room Layout Estimation from a Painting 705
Kanako Endo (Kyoto Institute of Technology, Japan) and Weiwei Du (Kyoto Institute of Technology, Japan)

Machine Learning Models and Intelligent Computing

Improving Fault Localization with Semantic Enhancement and Decision Fusion 711
Benyu Liu (Chongqing University of Posts and Telecommunications, China) and Pan He (Chinese Academy of Sciences, China)

Portfolio Rebalancing using Deep Reinforcement Learning 718
Trakal Kum (St. Joseph's Institution, Singapore), Ethan Koay (St. Joseph's Institution, Singapore), Douglas Maskell (Nanyang Technological University, Singapore), and Chai Quek (Nanyang Technological University, Singapore)

Lowering the Barrier of Machine Learning: Achieving Zero Manual Labeling in Review Classification using LLMs 727
Yejian Zhang (Keio University, Japan) and Shingo Takada (Keio University, Japan)

Generative and Evolutionary Approaches for Safe and Sustainable by Design Material Development: A Case Study on Acid Alternatives for Advanced Material Coatings 736
Andrea Gregores Coto (AIMEN Technology Centre, Spain), Christian Eike Precker (AIMEN Technology Centre, Spain), Leticia Hernando Rodrígúez (University of the Basque Country, Spain), and Santiago Muiños Landín (AIMEN Technology Centre, Spain)

Predicting Operating Cash Flows: A Comparative Study of Machine Learning Algorithms 746
Ubolkarn Petchluan (Mae Fah Luang University, Thailand), Supansa Chaising (Mae Fah Luang University, Thailand), Kasidit Saraphon (Mae Fah Luang University, Thailand), and Muhammad Syukur (Mae Fah Luang University, Thailand)

A Data-Driven Machine Learning Approach for Reservoir Water Level Forecasting 752
Seubsuang Kachapornkul (National Electronics and Computer Technology Center, Thailand), Rangsarit Vanijjirattikhan (National Electronics and Computer Technology Center, Thailand), Jittiwut Suwatthikul (National Electronics and Computer Technology Center, Thailand), Kanokvate Tungpimolrut (National Electronics and Computer Technology Center, Thailand), Toshiyuki Miyachi (National Institute of Information and Communications Technology, Japan), and Shinsuke Miwa (National Institute of Information and Communications Technology, Japan)

Train Everything, Everywhere, All at Once: A Version Control Convention for Training Multiple Deep Learning Models 757
Neil Patrick Del Gallego (De La Salle University, Philippines)

Enhance Social Network Bullying Detection using Transfer Learning with Random Forest Classifier 764
Sathit Prasomphan (King Mongkut's University of Technology North Bangkok, Thailand)

Predicting Droughts: A Comparative Study of ARIMAX, LSTM, XGBoost, and Random Forest Models 772
Yashnil Mohanty (Westmont High School, CA, USA)

GSQLi: A GAN-Based Approach for Adversarial SQL Injection Sample Generation against WAF .. 788
Le Minh Khan (University of Information Technology, Vietnam National University, Vietnam), Hien Do Hoang (University of Information Technology, Vietnam National University, Vietnam), Khoa Ngo-Khanh (University of Information Technology, Vietnam National University, Vietnam), Phan The Duy (University of Information Technology, Vietnam National University, Vietnam), and Van-Hau Pham (University of Information Technology, Vietnam National University, Vietnam)

Automated ICD-9 and ICD-10 Coding with Machine Learning: A Real-World Study using Electronic Medical Record Text from Udon Thani Cancer Hospital, Thailand 794
Kanokwong Chuabsombat (Khon Kaen University, Thailand) and Praisan Padungweang (Khon Kaen University, Thailand)

Urban Traffic Accident Severity Prediction and Influencing Factors Analysis Based on Machine Learning 802
Xuehui Hou (University of Electronic Science and Technology of China, China), Binbin He (University of Electronic Science and Technology of China, China), Jihong Liu (University of Electronic Science and Technology of China, China), and Yuhua Feng (Xinjiang Police College, China)
