

# **Intelligent Systems**

Papers Presented at the AIAA Aviation Forum 2025 and  
ASCEND 2025

Las Vegas, Nevada, USA  
21-25 July 2025

ISBN: 979-8-3313-2795-8

# TABLE OF CONTENTS

|                                                                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Understanding Training Components in Shaping AI for Loss of Control Recovery in Unforeseen Flight Conditions .....                                           | 1   |
| <i>Cynthia Koopman, David Zammit-Mangion</i>                                                                                                                 |     |
| Reinforcement Learning-Based Control of a Moving Mass Coaxial Monocopter Using Soft Actor-Critic (SAC) Algorithm .....                                       | 12  |
| <i>Duc Thien An Nguyen, Rongwei Liang, Mostafa Hassanalain</i>                                                                                               |     |
| Missile Trajectory Prediction Under Diverse Error Conditions Using Hypernetwork-Based Continual Learning .....                                               | 22  |
| <i>SeongMin Kim, Su-Jeong Park, Minchae Kim, Han-Lim Choi</i>                                                                                                |     |
| Real-Time Pose-Aware Dynamic Path Planning .....                                                                                                             | 34  |
| <i>Yixuan Jia, Andrea Tagliabue, Jonathan P. How</i>                                                                                                         |     |
| Instance-Specific Heuristic Learning for Scalable UAV Path Planning .....                                                                                    | 49  |
| <i>Elie Thellier, Adolfo Perrusquia, Antonios Tsourdos</i>                                                                                                   |     |
| Lift+Cruise Small Uncrewed Aircraft System Trajectory Optimization with Flexible Mode Waypoints .....                                                        | 61  |
| <i>Heejin Kim, Akshay Mathur, Ella M. Atkins</i>                                                                                                             |     |
| Markov Decision Process Contingency Landing Management Autonomy for Advanced Air Mobility .....                                                              | 76  |
| <i>Abidemi A. Akinola, Ella M. Atkins</i>                                                                                                                    |     |
| Implementing Multi-Core Algorithms on Single Chip Computers for Low-Cost Fixed-Wing UAV Swarming .....                                                       | 91  |
| <i>Joel Opoku Mintah, Samuel Maimako, Mostafa Hassanalain</i>                                                                                                |     |
| DecABLS: Decentralized Asynchronous Bitwise Level Set Planner .....                                                                                          | 102 |
| <i>Reed Robinson, Evan Thomas, Robert Mar, Patrick Arguello, Katia Estabridis</i>                                                                            |     |
| Autonomous Aerospace Systems with an Understanding of Risk and Uncertainty Using Distributional Ensemble Gaussian Mixture Model Reinforcement Learning ..... | 115 |
| <i>Rahul Krupani, Micah A. Bryant, Joseph Gleason, Thomas Watson, Anastacia Macallister</i>                                                                  |     |
| A Sigma-Point Based Uncertainty-Aware Decision Making Framework for Advanced Air Mobility .....                                                              | 125 |
| <i>Marcela Dittrich Perez, Liang Sun, Jing Chen, Bin Hu, Michael S. Politowicz, Eric T. Chancey</i>                                                          |     |
| Trajectory Analysis of Rockets Using Pseudorange and Terrain-Aided Navigation with Non-Additive Extended Kalman and Particle Filter .....                    | 139 |
| <i>Emanuelle d. Machado, Wilson Luiz de Oliveira Junior, Julia de Albuquerque Guimarães, Marcos R. O. A. Maximo</i>                                          |     |
| Review of Wildfire Detection, Fighting, and Technologies: Future Prospects and Insights .....                                                                | 162 |
| <i>Natnael M. Negash, Liang Sun, Chao Fan, Di Shi, Fengyu Wang</i>                                                                                           |     |
| Viability of NPU-Equipped SBCs for Real-Time Onboard Vision Autonomy on Lighter-Than-Air UAVs .....                                                          | 187 |
| <i>Matthew Widjaja, Caeden Taylor, Andrew Meighan, Or D. Dantsker</i>                                                                                        |     |

|                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------|-----|
| Visual Servoing MPC Framework for Shipboard Autonomous Landing .....                                                  | 199 |
| <i>Luís Gustavo L. de Paula, Vijay S. Dwivedi, Hyo-Sang Shin, Antonios Tsourdos</i>                                   |     |
| Real-Time Surrogate for Quadcopter Attitude Control: A Least-Squares Quadratic Imitation<br>Learning Approach .....   | 215 |
| <i>Sonali Rani, Matthias Gerds, Dmitry Ignatyev</i>                                                                   |     |
| Learning Approach to Efficient Vision-Based Active Tracking of a Flying Target by an Unmanned<br>Aerial Vehicle ..... | 232 |
| <i>Jagadeswara P. Pothuri, Aditya Bhatt, Prajit Krisshna Kumar, Manaswin Oddiraju, Souma<br/>Chowdhury</i>            |     |
| Integrated Guidance and Control of Quasi-Equilibrium Hypersonic Gliding Using Model Predictive<br>Control .....       | 244 |
| <i>Diganta Bhattacharjee, Sam Jaeger, Maziar Hemati</i>                                                               |     |
| Nonlinear Control Laws Design for Generic Fighter Jet in Transonic Regime .....                                       | 265 |
| <i>Júlia Morone Drummond Alves, Antonio Bernardo Guimarães Neto, Marco Aurélio<br/>Guimarães Moreira</i>              |     |
