2025 IEEE International Conference on Web Services (ICWS) **ICWS 2025**

Table of Contents

Message from the 2025 Congress Steering Committee Chair	xxv
Message from the 2025 Congress General Chairs	xxvi
Message from the 2025 Congress Program Chairs	xxviii
Message from the ICWS 2025 Chairs	xxix
ICWS 2025 Organizers	xxxi
ICWS 2025 Program Committee	xxxiii

ICWS 2025

S1: Service Discovery, Selection and Recommendation

TDIC: Time-Aware Disentanglement of Interest and Conformity in Mobile APP Recommendations ..	1
<i>Qibo Li (Central China Normal University, China), Yuqi Zhao (Central China Normal University, China), and Yutao Ma (Central China Normal University, China)</i>	
Personalized Product Customization Service Based on Fine-Grained and Precise Perception of Supply and Demand	11
<i>Kai Zhang (Harbin Institute of Technology, China), Yuchen Li (Harbin Institute of Technology, China), Bohai Zhao (Harbin Institute of Technology, China), Yongchao Xing (Harbin Institute of Technology, China), Hongliang Sun (Harbin Institute of Technology, China), Zhiying Tu (Harbin Institute of Technology, China; Shandong Key Laboratory of Digital Service Computing Technology and Systems, China), and Dianhui Chu (Harbin Institute of Technology, China; Shandong Key Laboratory of Digital Service Computing Technology and Systems, China)</i>	
Accurate Mobile App Recommendation via Hypergraph Contrastive Collaborative Filtering	22
<i>Mingdong Tang (Guangdong University of Foreign Studies, China), Yinglin Huang (Guangdong University of Foreign Studies, China), and Fenfang Xie (Guangdong University of Foreign Studies, China)</i>	

A Weighted Preference Optimization Service Recommendation Method Based on Knowledge Graph and Large Language Model	33
--	----

Hongliang Sun (Harbin Institute of Technology, China), Feiyang Wang (Harbin Institute of Technology, China), Zhiying Tu (Harbin Institute of Technology, China; Shandong Key Laboratory of Digital Service Computing Technology and Systems, China), Dianbo Sui (Harbin Institute of Technology, China), Yongchao Xing (Harbin Institute of Technology, China), Kai Zhang (Harbin Institute of Technology, China), Bohai Zhao (Harbin Institute of Technology, China), and Xiaofei Xu (Harbin Institute of Technology, China)

S2: Service Discovery, Selection and Recommendation

Relation-Aware Contrastive Learning for Knowledge-Based Recommendation	41
--	----

Yu Zhang (Nanjing University of Science and Technology, China), Shunmei Meng (Nanjing University of Science and Technology, China), Jielong Zhou (China Mobile (Hangzhou) Information Technology Company Ltd., China), and Shanming Wei (Nanjing University of Science and Technology, China)

LLMGCL: Graph Contrastive Learning with Large Language Models for Recommendation	48
--	----

Shiqi Ge (Nanjing University of Science and Technology, China), Shunmei Meng (Nanjing University of Science and Technology, China), Jielong Zhou (China Mobile Information Technology Company Ltd, China), Lianying Qi (China University of Petroleum, China), Xiaolong Xu (Nanjing University of Information Science and Technology, China), and Xuyun Zhang (Macquarie University, Australia)

Graph Neural Networks for Incremental Service Recommendation with Dynamic Interest Alignment	58
--	----

Yaocheng He (Tianjin University, China), Zhiyong Feng (Tianjin University, China), Hongqi Chen (Tianjin University, China), Jingyu Li (Tianjin University, China), Qinghang Gao (Tianjin University, China), Houwen Yi (Tianjin University, China), and Haoran Zhang (Tianjin University, China)

Recognition Service for Named Entities via Multilayer Feature Learning for Large Web Knowledge Bases	68
--	----

Chan Li (Qinghai Normal University, China; Shaanxi Vocational and Technical College, China), Rui Li (Xidian University, China; Qinghai Normal University, China), Yinru Ma (Xidian University, China), Xinkui Zhao (Zhejiang University, China), Lei Hei (Xidian University, China), Yuyu Yin (Hangzhou Dianzi University, China), Yueshen Xu (Xidian University, China), and Yi Yang (Xidian University, China)

S3: Service Discovery, Selection and Recommendation

Efficient Federated Learning with Encrypted Data Sharing for Data-Heterogeneous Edge Devices	76
<i>Hangyu Li (Tianjin University, China), Hongyue Wu (Tianjin University, China; Nanjing University, China; Yunnan University of Finance and Economics, China), Guodong Fan (Tianjin University, China), Zhen Zhang (Tianjin University, China), Shizhan Chen (Tianjin University, China), and Zhiyong Feng (Tianjin University, China)</i>	
Quality of Service Prediction via Large Language Models	87
<i>Huiying Liu (Anhui University, China), Zekun Zhang (Stony Brook University, USA), Lei Sang (Anhui University, China), Qilin Wu (Chaohu University, China), and Yiwen Zhang (Anhui University, China)</i>	
Autocompletion Service for Temporal Web Knowledge Bases via Multisource Semantic Feature Learning	96
<i>Chan Li (Qinghai Normal University, China; Shaanxi Vocational and Technical College, China), Rui Li (Xidian University, China; Qinghai Normal University, China), Linfang Wang (Xidian University, China), Chen Zhi (Zhejiang University, China), Lei Hei (Xidian University, China), Junfeng Xing (Xidian University, China), Yueshen Xu (Xidian University, China), and Sirui Yang (Xidian University, China)</i>	
PUKF: Enhanced Vehicle Localization Services through Tightly-Coupled GNSS/INS Integration ...	106
<i>Yipeng Li (Zhongnan University of Economics and Law, China), Binglei Yue (University of Electronic Science and Technology of China, China), Jiawei Song (SiChuan Crungoo Information Engineering Co., Ltd., China), and Yin Zhang (University of Electronic Science and Technology of China, China)</i>	

S4: Microservices

Robust and Lightweight Root Cause Analysis for Microservice Metrics	109
<i>Nobukazu Fukuda (NTT Corporation, Japan), Haruhisa Nozue (NTT Corporation, Japan), Haruo Oishi (NTT Corporation, Japan), and Kenichi Tayama (NTT Corporation, Japan)</i>	
ReconRCA: Root Cause Analysis in Microservices with Incomplete Metrics	116
<i>Zekun Zhang (Wuhan University, China), Jian Wang (Wuhan University, China), Bing Li (Wuhan University, China), and Liuxiaoxiao Zhang (TaiKang Insurance Group, China)</i>	
Are GNNs Actually Effective for Multimodal Fault Diagnosis in Microservice Systems?	127
<i>Fei Gao (IEIT SYSTEMS Co., Ltd., China), Ruyue Xin (China University of Geosciences, China), Xiaocui Li (China University of Geosciences, China; Peking University, China), and Yaqiang Zhang (IEIT SYSTEMS Co., Ltd., China)</i>	

S5: Services Security, Privacy and Trust

UIFV: Data Reconstruction Attack in Vertical Federated Learning	130
<i>Jirui Yang (Fudan University, China), Peng Chen (Nanjing University of Information Science and Technology, China), Zhihui Lu (Fudan University, China), Qiang Duan (Pennsylvania State University, USA), and Yubing Bao (Fudan University, China)</i>	
FedMLU: Mitigating Source Inference Attacks in Federated Learning without Losing Utility for Secure IoT Services	141
<i>Mengmeng Cui (Nanjing University of Information Science and Technology, China), Hao Cheng (Nanjing University of Information Science and Technology, China), Xuanru Guo (Nanjing University of Information Science and Technology, China), Haolong Xiang (Nanjing University of Information Science and Technology, China), Kun Yi (Beijing Institute of Technology, China), Xiaoyong Li (National University of Defense Technology, China), and Xiaolong Xu (Nanjing University of Information Science and Technology, China)</i>	
Privacy-Preserving and Efficient Offloading for Cooperative Vehicle Infrastructure Systems	150
<i>Jie Zhang (Hohai University, China), Huiying Jin (Nanjing University of Posts and Telecommunications, China), Jingyi Zhao (Hohai University, China), Hai Dong (RMIT University, Australia), and Pengcheng Zhang (Hohai University, China)</i>	

S6: Services Security, Privacy and Trust

Ensuring Trust Information Availability for Ubiquitous Trustworthy IoT Services	162
<i>Thilina Lokuruge (The University of Sydney, Australia) and Athman Bouguettaya (The University of Sydney, Australia)</i>	
Privacy-Preserving Authentication using Blockchain and Implicit Certificates for Internet of Vehicles	173
<i>Donghang Li (Beijing Jiaotong University (BJTU), China), Li Duan (Beijing Jiaotong University (BJTU), China), Wen Zhang (Beijing Jiaotong University (BJTU), China), Yanan Wang (Beijing Jiaotong University (BJTU), China), Chao Li (Beijing Jiaotong University (BJTU), China), and Wei Ni (CSIRO, Australia)</i>	
Program Verification to Defend Chain-of-Thought Attacks for LLM Services	183
<i>Shuo He (Fudan University, China), Jiawei Jiang (Fudan University, China), HongBao Liu (Fudan University, China), and Tao Tang (Fudan University, China)</i>	
TS-GNN: A Temporal-Spatial Graph Neural Network for Anomaly Detection in Multiplex Industrial Information Services	190
<i>Pan Li (Zhejiang Normal University, China), Tienyu Zuo (Southeast University, China), Yuanshuang Jiang (Southeast University, China), Fulin Chen (Southeast University, China), Kai Di (Zhejiang Normal University, China), and Yichuan Jiang (Southeast University, China)</i>	

S7: Services Security, Privacy and Trust

HashMVT: Accelerating Parallel Networking Services with Hardware Offloaded Hash-Based Match-Value Tables	197
<i>Wendi Feng (Beijing Information Science and Technology University (BISTU), China; Beijing University of Posts & Telecommunications, China) and Wei Zhang (Beijing Information Science and Technology University (BISTU), China)</i>	
Towards Adaptive Privacy-Preserving Information Diffusion in Online Social Networks	207
<i>Yuzi Yi (China University of Petroleum, China), Yehong Luo (Beijing University of Technology, China), Jingsha He (Beijing University of Technology, China), Zhongqi Lu (China University of Petroleum, China), and Jiwei Huang (China University of Petroleum, China)</i>	
Follow Your Hidden Traces: Underground Forum-Based Darknet Market Sybil Detection	218
<i>Minjae Kim (Korea University, Korea), Yerim Kim (Korea University, Korea), and Junbeom Hur (Korea University, Korea)</i>	
ACCESS-FL: Agile Communication and Computation for Efficient Secure Aggregation in Stable Networks for FLaaS	225
<i>Niousha Nazemi (The University of Sydney, Australia), Omid Tavallaie (University of Oxford, United Kingdom), Shuaijun Chen (The University of Sydney, Australia), Anna Maria Mandalari (University College London (UCL), United Kingdom), Kanchana Thilakarathna (The University of Sydney, Australia), Ralph Holz (University of Münster, Germany), Hamed Haddadi (Imperial College London, United Kingdom), and Albert Y. Zomaya (The University of Sydney, Australia)</i>	

S8: Services Security, Privacy and Trust

Dynamic Model and Node Selection for Collaborative Inference of Large/Small Models in Vehicular Networks	232
<i>Mengke Zheng (Fudan University, China), Zhihui Lu (Fudan University, China), Qiang Duan (Pennsylvania State University, USA), Baoqi Huang (Inner Mongolia University, China), and Shijing Hu (Fudan University, China)</i>	
Servitizing Image Provenance for Fake Image Detection	244
<i>Ethan Katte (The University of Sydney, Australia), Muhammad Umair (The University of Sydney, Australia), and Athman Bouguettaya (The University of Sydney, Australia)</i>	
RepuFL: Reputation-Aware Client Selection in Federated Learning for Mobile Networks	255
<i>Subhash Sagar (UIT University, Pakistan; Macquarie University, Australia) and Adnan Mahmood (Macquarie University, Australia)</i>	

S9: Services Security, Privacy and Trust

A Framework for Data Quality and Protection Management in Service-Based Data Pipelines	258
<i>Antongiacomo Polimeno (Università degli Studi di Milano, Italy), Marco Luzzara (Università degli Studi di Milano, Italy), Marco Anisetti (Università degli Studi di Milano, Italy), Claudio A. Ardagna (Università degli Studi di Milano, Italy), and Chirine Ghedira-Guegan (Univ. of Lyon 3, France)</i>	

Service-Based Interference Resolution in Multi-Drone Skyway Networks	269
<i>Syeda Amna Rizvi (The University of Sydney, Australia) and Athman Bouguettaya (The University of Sydney, Australia)</i>	
Robust Evaluation of LLM-Generated GraphQL Queries for Web Services	276
<i>Vansika Sonthalia (SRM Institute of Science and Technology, India), Manish Kesarwani (IBM Research, India), and Sameep Mehta (IBM Research, India)</i>	
Foe for Fraud: Transferable Adversarial Attacks in Credit Card Fraud Detection	286
<i>Jan Lum Fok (The University of Sydney, Australia; Constantinople, Australia), Qingwen Zeng (The University of Sydney, Australia), Shiping Chen (CSIRO, Australia), Oscar Fawkes (Constantinople, Australia), and Huaming Chen (The University of Sydney, Australia)</i>	

S10: Generative AI

LLM4Load: An LLM Prompt-Driven Framework for Multi-Scale Workload Prediction	293
<i>Zeyuan Ding (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Trusted Data Circulation and Governance, China), Dian Ding (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Trusted Data Circulation and Governance, China), Han Zhang (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Trusted Data Circulation and Governance, China), Jianmang Cao (The Hong Kong Polytechnic University, China), and Guangtao Xue (Shanghai Jiao Tong University, China; Shanghai Key Laboratory of Trusted Data Circulation and Governance, China)</i>	
ServerlessPD: Fast RDMA-Codesigned Disaggregated Prefill-Decoding for Serverless Inference of Large Language Models	305
<i>Mingxuan Liu (Northwestern Polytechnical University, China), Jianhua Gu (Northwestern Polytechnical University, China), and Tianhai Zhao (Northwestern Polytechnical University, China)</i>	
CE-CoLLM: Efficient and Adaptive Large Language Models Through Cloud-Edge Collaboration ..	316
<i>Hongpeng Jin (Florida International University, USA) and Yanzhao Wu (Florida International University, USA)</i>	

S11: Service Applications beyond the Web

Privacy-Aware IoT Fall Detection Services for Aging in Place	324
<i>Abdallah Lakhdari (The University of Sydney, Australia), Jiajie Li (ETH Zürich, Switzerland), Amani Abusafia (The University of Melbourne, Australia), and Athman Bouguettaya (The University of Sydney, Australia)</i>	
Service-Oriented Kinesthetic Interaction: A Grid Optimization Investigation for Eyes-Free 3D Interfaces	335
<i>Daojun Gong (Northwestern Polytechnical University, China), Yiran Peng (Macau University of Science and Technology, China), and Xuwen Wang (Northwestern Polytechnical University, China)</i>	

GIWiD: Gait-Based User Identification Services with WiFi Device-Free Sensing	342
<i>Binglei Yue (University of Electronic Science and Technology of China, China), Junwei Lei (University of Electronic Science and Technology of China, China), Heng Liu (University of Electronic Science and Technology of China, China), Chun Yang (University of Electronic Science and Technology of China, China), Aili Jiang (University of Electronic Science and Technology of China, China), and Yin Zhang (University of Electronic Science and Technology of China, China)</i>	

S12: Service Applications beyond the Web

Consensus-Based Decentralized Federated Learning for Model Training Services in IoV	349
<i>Xiaoyan Liu (China University of Petroleum, China), Zhiwei Xu (Laboratory of ITAI, China), and Jiwei Huang (China University of Petroleum, China)</i>	
GCA-YOLO: An Edge-Optimized Traffic Sign Detection Model	359
<i>Peiyan Yuan (Henan Normal University, China), Yifan Pei (Henan Normal University, China), Chenyang Wang (Shenzhen University, China; Guangdong Laboratory of Artificial Intelligence and Digital Economy (SZ), China), Xiaoyan Zhao (Henan Normal University, China), Zhou Liu (Guangdong Laboratory of Artificial Intelligence and Digital Economy (SZ), China), Xiaoqiang Zhu (Beijing Jiaotong University, China), and Tarik Taleb (Ruhr University Bochum, Germany)</i>	
ReIDFaaS: An Energy-Efficient Serverless Person Re-Identification System Across the Edge-Cloud Continuum	365
<i>Jianping Pei (Harbin Institute of Technology, China), Yanjun Shu (Harbin Institute of Technology, China), Zhuangyu Ma (Harbin Institute of Technology, China), Decheng Zuo (Harbin Institute of Technology, China), and Zhan Zhang (Harbin Institute of Technology, China)</i>	

S13: Service Applications beyond the Web

Dynamic Community Interest-Aware Caching in Vehicular Edge Computing: A Spatio-Temporal Topic Modeling and Potential Game-Based Approach	372
<i>Han Zhao (Chongqing University, China), Yong Ma (Jiangxi Normal University, China), Kunyin Guo (Chongqing University, China), Yunni Xia (Chongqing University, China), Yuyin Ma (Xinjiang University, China), Peng Chen (Xihua University, China), and Yunye Wan (Chongqing University, China)</i>	
Causal Reasoning on Temporal Knowledge Graph with Fuzzy Logic and Graph Attention Network ...	383
<i>Shixiang Cai (Central South University, China), Zhirui Kuai (Central South University, China), Li Kuang (Central South University, China), and Zhifang Liao (Central South University, China)</i>	
Deep Reinforcement Learning-Empowered Task Offloading for Efficient DNN Partition in Vehicular Edge Computing	392
<i>Huaming Wu (Tianjin University, China), Fengyu Li (Tianjin University, China), and Huijun Tang (Hangzhou Dianzi University, China)</i>	

USFCF: Unified State-Space Feedback Control Framework for Robust Privacy-Conscious Federated Learning in Vehicular Service Networks	399
<i>Chen Li (University of Technology Sydney, Australia), Xuelei Qi (Northeastern University, China; Macquarie University, Australia), Xin Yuan (Commonwealth Scientific and Industrial Research Organisation (CSIRO), Australia), Kai Wu (University of Technology Sydney, Australia), Yang Zhang (University of North Texas, USA), Wei Ni (Commonwealth Scientific and Industrial Research Organisation (CSIRO), Australia), Ren Ping Liu (University of Technology Sydney, Australia), and Quan Z. Sheng (Macquarie University, Australia)</i>	

S14: Service Applications beyond the Web

EdgeIM: An Efficient Edge-Based Process Model Discovery Technique	404
<i>Xuan Su (Shandong University of Science and Technology, China), Cong Liu (Shandong University of Technology, China; Nova University of Lisbon, Portugal), Faming Lu (Shandong University of Science and Technology, China), Long Cheng (North China Electric Power University, China), Qingtian Zeng (Shandong University of Science and Technology, China), and Shouli Zhang (Shandong Agricultural University, China)</i>	
Enhancing Freshness and Energy Efficiency in Asynchronous Federated Learning: An AoI-Aware Online Approach	411
<i>Jiebei Shi (China University of Petroleum, China), Jie Chen (China University of Petroleum, China), Ying Chen (Beijing Information Science and Technology University, China), and Jiwei Huang (China University of Petroleum, China)</i>	
Resource-Aware CNN Framework for Visual Services on IoT Devices	414
<i>Jinhui Yu (Ministry of Education; Beijing Jiaotong University), Chuntao Ding (Beijing Normal University), and Yidong Li (Ministry of Education; Beijing Jiaotong University)</i>	

S15: Service Applications beyond the Web

Heterogeneous Resources Adaptive Co-Optimization in Edge Networks	420
<i>Yihong Yang (China University of Geosciences (Beijing), China), Zhangbing Zhou (China University of Geosciences (Beijing), China; TELECOM SudParis, France), and Lin Meng (Ritsumeikan University, Japan)</i>	
Enhancing Manufacturing Process Discovery through Sub-Process Optimization	428
<i>Jiaxin Yan (Shandong University of Technology, China), Cong Liu (Shandong University of Technology, China; Nova University of Lisbon, Portugal), Long Cheng (North China Electric Power University, China), Jiuju Cheng (Tongji University, China), Weijian Ni (Shandong University of Science and Technology, China), and Qingtian Zeng (Shandong University of Science and Technology, China)</i>	

A Framework for Object-Centric Predictive Process Monitoring using Graph-Based Process Executions	435
<i>Wissam Gherissi (Université Paris-Dauphine-PSL, France), Joyce El Haddad (Université Paris-Dauphine-PSL, France), and Daniela Grigori (Université Paris-Dauphine-PSL, France)</i>	

S16: Services Security, Privacy and Trust

D ³ : Delayed Default-Intention Based Default Prediction in Financial Loan Service	442
<i>Mengying Zhu (Zhejiang University, China), Mengyuan Yang (Zhejiang University, China), Guanjie Cheng (Zhejiang University, China), and Guofang Ma (Zhejiang Gongshang University, China)</i>	
BSTL: Bayesian Signal Temporal Logic for Predictive Edge Service Monitoring	453
<i>Deng Zhao (China University of Geosciences (Beijing), China), Zhangbing Zhou (China University of Geosciences (Beijing), China; TELECOM SudParis, France), Shuiguang Deng (Zhejiang University, China), Xiao Xue (Tianjin University, China), Ruixi Pan (China University of Geosciences (Beijing), China), Jiangwei Li (China University of Geosciences (Beijing), China), and Sami Yangui (University of Toulouse, France)</i>	
Service-Oriented Computation for Insider Trading Detection in Multiplex Networked Industrial Chains	463
<i>Fulin Chen (Southeast University, China), Tienyu Zuo (Southeast University, China), Kai Di (Southeast University, China), Yuanshuang Jiang (Southeast University, China), Pan Li (Southeast University, China), and Yichuan Jiang (Southeast University, China)</i>	

S17: Service Applications beyond the Web

DAG-FGL: An Enhanced Approach for Accurate Workflow Task Execution Time Prediction with Complex Dependencies	466
<i>Changhong Tai (Hohai University, China), Huiying Jin (Nanjing University of Posts and Telecommunications, China), Qi Wang (Hohai University, China), Hai Dong (RMIT University, Australia), and Pengcheng Zhang (Hohai University, China)</i>	
Enhancing Healthcare Process Model Discovery through Duplicate Task Identification	477
<i>Xuan Su (Shandong University of Science and Technology, China), Cong Liu (Shandong University of Technology, China; Nova University of Lisbon, Portugal), Faming Lu (Shandong University of Science and Technology, China), Long Cheng (North China Electric Power University, China), Qingtian Zeng (Shandong University of Science and Technology, China), and Jiehan Zhou (Shandong University of Science and Technology, China)</i>	

A Framework for Analyzing Abnormal Emergence in Service Ecosystems Through LLM-Based Agent Intention Mining	484
---	-----

Yifan Shen (Tianjin University, China; Tianjin Key Laboratory of Healthy Habitat and Smart Technology, China), Zihan Zhao (Tianjin University, China; Tianjin Key Laboratory of Healthy Habitat and Smart Technology, China), Xiao Xue (Tianjin University, China; Tianjin Key Laboratory of Healthy Habitat and Smart Technology, China), Yurwei Guo (Tianjin University, China; Tianjin Key Laboratory of Healthy Habitat and Smart Technology, China), Qun Ma (Tianjin University, China; Tianjin Key Laboratory of Healthy Habitat and Smart Technology, China), Deyu Zhou (Shandong University, China), and Ming Zhang (Exeter University, United Kingdom)

S18: Generative AI in Web Services

Supervised Pretraining for In-Context Decision in Conversational Service Recommendation	491
---	-----

Tienyu Zuo (Southeast University, China), Kai Di (Southeast University, China), Yuanshuang Jiang (Southeast University, China), Fulin Chen (Southeast University, China), Pan Li (Southeast University, China), and Yichuan Jiang (Southeast University, China)

Unlocking Hidden Capabilities: A Self-Improving Workflow for Chatbots to Utilize Unintegrated Services	498
--	-----

Can Wang (Harbin Institute of Technology, China), Hao Ding (Harbin Institute of Technology, China), Yongchao Xing (Harbin Institute of Technology, China), Bohai Zhao (Harbin Institute of Technology, China), Dianbo Sui (Harbin Institute of Technology, China), and Zhiying Tu (Harbin Institute of Technology, China)

A Dynamic Inference Method for Autoregressive Transformer Models	501
--	-----

Hao Tian (Nanjing University, China), Sheng Lu (Nanjing University, China), Hua Deng (Nanjing University, China), Zheng Li (Nanjing University, China), and Wanchun Dou (Nanjing University, China)

Generative AI-Based Adaptation in Microservices Architectures: A Systematic Mapping Study	512
---	-----

Brell Sanwouo (INRIA / Univ. Lille, France), Paul Temple (Univ. Rennes, France), and Clement Quinton (Univ. Lille, France)

S19: Service Applications beyond the Web

A Verifiable and Low-Latency Cross-Chain IoT Service Query Scheme with Collaborative Indexing	520
---	-----

Jiamei Liu (University of Science and technology Beijing, China), Chang-ai Sun (University of Science and technology Beijing, China), Tong Wu (University of Science and technology Beijing, China), and Marco Aiello (University of Stuttgart, Germany)

An Explainable Emotion Alignment Framework for LLM-Empowered Agent in Metaverse Service Ecosystem	531
<i>Qun Ma (Tianjin University, China; Tianjin Key Laboratory of Healthy Habitat and Smart Technology, China), Xiao Xue (Tianjin University, China; Tianjin Key Laboratory of Healthy Habitat and Smart Technology, China), Ming Zhang (Exeter University, United Kingdom), Yifan Shen (Tianjin University, China; Tianjin Key Laboratory of Healthy Habitat and Smart Technology, China), and Zihan Zhao (Tianjin University, China; Tianjin Key Laboratory of Healthy Habitat and Smart Technology, China)</i>	
UAV-Mesh: A Graph-Based Decentralized Service Mesh Framework for UAV Swarms	538
<i>Chengchang Liu (Shanghai Jiao Tong University, China), Han Yu (Shanghai Jiao Tong University, China), Nuo Chen (Shanghai Jiao Tong University, China), Bingqing Shen (Shanghai International Studies University, China), and Hongming Cai (Shanghai Jiao Tong University, China)</i>	
AeroDaaS: Towards an Application Programming Framework for Drones-as-a-Service	545
<i>Suman Raj (Indian Institute of Science, India), Rajdeep Singh (Indian Institute of Science, India), Kautuk Astu (Indian Institute of Science, India), and Yogesh Simmhan (Indian Institute of Science, India)</i>	

S20: Generative AI in Web Service

Scenario Generator Design Method for Service Ecosystem Governance Driven by LLM-Empowered Agents Simulation	552
<i>Deyu Zhou (Shandong University, China), Yugi Hou (Shandong University, China), Xiao Xue (Tianjin University, China; Tianjin Key Laboratory of Healthy Habitat and Smart Technology, China), Xudong Lu (Shandong University, China), Qingzhong Li (Shandong University, China; ShanDa Dareway Software Co. Ltd, China), and Lizhen Cui (Shandong University, China)</i>	
CPP: Compensated Post-Training Pruning Approach for On-Device Large Language Model Services	563
<i>Junna Zhang (Henan Normal University, China), Yifei Hu (Henan Normal University, China), Chuntao Ding (Beijing Normal University, China), Xiaoyan Zhao (Henan Normal University, China), Peiyan Yuan (Henan Normal University, China), and Shangguang Wang (The State Key Laboratory of Networking and Switching Technology, China)</i>	
IntentContinuum: using LLMs to Support Intent-Based Computing Across the Compute Continuum...	573
<i>Negin Akbari (Monash University, Australia), John Grundy (Monash University, Australia), Aamir Cheema (Monash University, Australia), and Adel N. Toosi (Monash University, Australia; The University of Melbourne, Australia)</i>	
Revisiting Lemos' Taxonomy for Service Compositions with Large Language Models	584
<i>Robin D. Pesl (University of Stuttgart, Germany) and Marco Aiello (University of Stuttgart, Germany)</i>	

S21: Service Applications beyond the Web [IoT Services]

- SeFA: A Seed-Filter Adaptation Method for Robust Vision Services in IoT Devices 587
Chuntao Ding (Beijing Normal University, China), Longquan Zhang (Beijing Jiaotong University, China), Junna Zhang (Henan Normal University, China), Zonghui Li (Beijing Jiaotong University, China), and Li Zhang (Soochow University, China)
- Adaptive Composition of Machine Learning as a Service (MLaaS) for IoT Environments 597
Deepak Kanneganti (Curtin University, Australia), Sajib Mistry (Curtin University, Australia), Sheik Mohammad Mostakim Fattah (Curtin University, Australia), Aneesh Krishna (Curtin University, Australia), and Monowar Bhuyan (Umeå University, Sweden)
- SAGELY - Context-Aware Holistic Service Policy Enforcement Across Swarm-Edge Continuum ... 607
Hong-Tri Nguyen (Aalto University, Finland), Liang Yuan (Adelaide University, Australia), Anh-Dung Nguyen (Aalto University, Finland), M. Ali Babar (Adelaide University, Australia), and Hong-Linh Truong (Aalto University, Finland)
- Minimizing the Number of Mobile Chargers in Wireless Rechargeable Sensor Networks 618
Ting Li (Zhejiang Normal University, China), Quanlong Niu (Zhejiang Normal University, China), Riheng Jia (Zhejiang Normal University, China), Zhonglong Zheng (Zhejiang Normal University, China), and Minglu Li (Zhejiang Normal University, China)

S22: Services Composition

- Data Service Composition in Cyber-Physical Systems Adopting LLMs 625
Adriano Izzi (Sapienza Università di Roma, Italy), Jerin George Mathew (Sapienza Università di Roma, Italy), Flavia Monti (Sapienza Università di Roma, Italy), Donatella Firmani (Sapienza Università di Roma, Italy), Francesco Leotta (Sapienza Università di Roma, Italy), Federica Mandreoli (Università di Modena e Reggio Emilia, Italy), and Massimo Mecella (Sapienza Università di Roma, Italy)
- Cross-Chain IoT Service Composition: An Adaptive QoS Constraint-Based Approach 637
Jiamei Liu (University of Science and Technology Beijing, China), Chang-ai Sun (University of Science and Technology Beijing, China), Tong Wu (University of Science and Technology Beijing, China), and Marco Aiello (University of Stuttgart, Germany)
- WebCoder: Multimodal Approach for Automated Web Service UI Code Generation 644
Huafeng Su (Inner Mongolia University, China; Ministry of Education Engineering Research Center for Ecological Big Data, China), Lei Yu (Inner Mongolia University, China), and Conghui Yang (Inner Mongolia University, China)

S23: Service Applications beyond the Web

A Novel Self-Attention-Enhanced Multi-Neighborhood PPO Scheduling Approach for Satellite Edge Computing	651
<i>Xifeng Xu (Chongqing University, China), Yunni Xia (Chongqing University, China), Qinglan Peng (Henan University, China), Xingli Zhong (CISDI R & D co. Ltd, China), Song Zhou (CISDI R & D co. Ltd, China), Kai Peng (Huaqiao University, China), Mengdi Wang (Chongqing University of Posts and Telecommunications, China), and Jiale Zhao (Chongqing University, China)</i>	
Enhancing Conditional Diffusion Model Robustness in Inference with Optimal Combination Factor	661
<i>Weifeng Xu (National University of Defense Technology, China), Xiang Zhu (National University of Defense Technology, China), and Xiaoyong Li (National University of Defense Technology, China)</i>	
SABER: A MAPE-K-Based Self-Adaptive Framework for Microservice Bad Smell Refactoring	673
<i>Yongchao Xing (Harbin Institute of Technology, China), Yiming Lv (Harbin Institute of Technology, China), Xianglin Zeng (Harbin Institute of Technology, China), Bohai Zhao (Harbin Institute of Technology, China), Kai Zhang (Harbin Institute of Technology, China), Hongliang Sun (Harbin Institute of Technology, China), Weipan Yang (Harbin Institute of Technology, China), and Zhiying Tu (Harbin Institute of Technology, China; Shandong Key Laboratory of Digital Service Computing Technology and Systems, China)</i>	
Backoff Reveals Priority: A Distributed Status-Aware Response Method for Device-Assisted Task Offloading	685
<i>Tianchun Gan (Beihang University, China), Shan Zhang (Beihang University, China), Wenbin Xu (Beihang University, China), Xiang Li (Beihang University, China), Zhiyuan Wang (Beihang University, China), and Hongbin Luo (Beihang University, China)</i>	

S24: Machine Learning and AI in Service Systems

Layer-Wise Decoupling for Personalized Federated Learning in Web-Sourced Non-IID Data	692
<i>Yong Cheng (Nanjing University of Information Science and Technology, China), Fengyu Dong (Nanjing University of Information Science and Technology, China), Ruoshui Wang (Nanjing University of Information Science and Technology, China), Haolong Xiang (Nanjing University of Information Science and Technology, China), Guoqiang Liu (Nanjing University of Information Science and Technology, China), Xiaoyong Li (National University of Defense Technology, China), and Xiaolong Xu (Nanjing University of Information Science and Technology, China)</i>	
FedSKC: Federated Learning with Non-IID Data via Structural Knowledge Collaboration	702
<i>Huan Wang (University of Wollongong, Australia), Haoran Li (University of Wollongong, Australia; The University of Queensland, Australia), Huaming Chen (The University of Sydney, Australia), Jun Yan (University of Wollongong, Australia), Lijuan Wang (Xidian University, China), Jiahua Shi (The University of Queensland, Australia), Shiping Chen (CSIRO Data61, Australia), and Jun Shen (University of Wollongong, Australia)</i>	

HAPFL: Heterogeneity-Aware Personalized Federated Learning via Hierarchical RL and Model Distillation	713
<i>Xi Chen (East China Normal University, China), Ting Wang (East China Normal University, China), Qin Li (East China Normal University, China), and Haibin Cai (East China Normal University, China)</i>	

S25: Services QoS Management

POI-Based Edge Service Deployment with Topology-Aware Optimization	720
<i>Guobing Zou (Shanghai University, China), Mengjia Yang (Shanghai University, China), Song Yang (Shanghai University, China), Shengye Pang (Shanghai University, China), Sen Niu (Shanghai Polytechnic University, China), Yanglan Gan (Donghua University, China), and Bofeng Zhang (Shanghai Polytechnic University, China)</i>	
MGG-AD: Multi-Granularity Graph-Based Anomaly Detection in IoT Systems	732
<i>Yi Li (China University of Geosciences (Beijing), China), Zhangbing Zhou (China University of Geosciences (Beijing), China; TELECOM SudParis, France), Boris Sedlak (TU Wien, Austria), and Schahram Dustdar (TU Wien, Austria)</i>	
EdgePro: Adaptive Edge Service Provision via Safe Deep Reinforcement Learning	742
<i>Lu Zhao (Nanjing University of Posts and Telecommunications, China), Zhuang Wu (Nanjing University of Posts and Telecommunications, China), Jian Zhou (Nanjing University of Posts and Telecommunications, China), Hui Cai (Nanjing University of Posts and Telecommunications, China), Bo Li (Victoria University, Australia), and Fu Xiao (Nanjing University of Posts and Telecommunications, China)</i>	

S26: Service Adaptability and Management

PreFabric: Eliminating Conflicts for High-Throughput Permissioned Blockchains	753
<i>Junxiong Lin (Fudan University, China), Zhihui Lu (Fudan University, China), Yiguang Zhang (Fudan University, China), Ruijun Deng (Fudan University, China), Qiang Duan (Pennsylvania State University, USA), Hengqi Guo (Fudan University, China), Xu Guo (Fudan University, China), and Baoqi Huang (Inner Mongolia University, China)</i>	
Learning-Based Automated Generation of Critical Workload Configurations for Microservices Performance Testing	764
<i>Cristian Mascia (Università degli Studi di Napoli Federico II, Italy), Luca Giamattei (Università degli Studi di Napoli Federico II, Italy), Antonio Guerriero (Università degli Studi di Napoli Federico II, Italy), Roberto Pietrantuono (Università degli Studi di Napoli Federico II, Italy), and Stefano Russo (Università degli Studi di Napoli Federico II, Italy)</i>	
ServerlessLSM: Fast RDMA-Codesigned Disaggregated Compaction for Elastic Serverless LSM-Tree Key-Value Store	775
<i>Mingxuan Liu (Northwestern Polytechnical University, China), Jianhua Gu (Northwestern Polytechnical University, China), and Tianhai Zhao (Northwestern Polytechnical University, China)</i>	

S27: Services QoS Management

In ³ Edge: Interest-Driven Service Incentive Mechanism Based on Stackelberg Game in Edge-Empowered IIoT	782
<i>Bohai Zhao (Harbin Institute of Technology, P.R.China), Zhiying Tu (Harbin Institute of Technology, P.R.China; Shandong Key Laboratory of Digital Service Computing Technology and Systems, P.R.China), Kai Peng (Huaqiao University, P.R.China), Yongchao Xing (Harbin Institute of Technology, P.R.China), Kai Zhang (Harbin Institute of Technology, P.R.China), Hongliang Sun (Harbin Institute of Technology, P.R.China), and Dianhui Chu (Harbin Institute of Technology, P.R.China; Shandong Key Laboratory of Digital Service Computing Technology and Systems, P.R.China)</i>	
Reliability-Aware Resource Allocation for Vehicular Services in Mobile Edge Computing	793
<i>Lipei Yang (Beijing University of Posts and Telecommunications, China), Sisi Li (Beijing University of Posts and Telecommunications, China), Ao Zhou (Beijing University of Posts and Telecommunications, China), Xiao Ma (Beijing University of Posts and Telecommunications, China), Yiran Zhang (Beijing University of Posts and Telecommunications, China), and Shangguang Wang (Beijing University of Posts and Telecommunications, China)</i>	
A Two-Stage Predictive Process Monitoring Approach with Enabled State Filtering for Variable Suffix Scenarios	804
<i>Chao Zheng (Wuhan University, China), Jian Wang (Wuhan University, China), Chong Wang (Wuhan University, China), and Bing Li (Wuhan University, China)</i>	

S28: Microservices

AMSES: A Novel Autonomic Model Construction Framework for System Fault Diagnosis of Microservice Architecture	814
<i>Yujia Song (Chongqing University, China), Peng Chen (Xihua University, China), Yunni Xia (Chongqing University, China), Hui Liu (Beijing Institute of Technology, China), Yong Ma (Jiangxi Normal University, China), and Xiqiao Lin (Guangxi Power Grid Co., Ltd., China)</i>	
DistriAD: Distributed Anomaly Detection for Large-Scale Microservice Systems	825
<i>Yaxiao Li (Xidian University), Qingshan Li (Xidian University), Chenxi Zhang (Xidian University), Lu Wang (Xidian University), Chenyi Wang (Xidian University), Zhongliang Bai (China Mobile Communication Group), Haixing Luo (China Mobile Communication Group), Tianyuan Gao (Xidian University), Kun Ma (Xidian University), and Lingfeng Pan (Xidian University)</i>	
Log-Driven Testing of Microservice Systems with Transformers	835
<i>Raffaele Della Corte (Università degli Studi di Napoli Federico II, Italy), Roberto Pietrantuono (Università degli Studi di Napoli Federico II, Italy; Consorzio Interuniversitario Nazionale per l'Informatica, Italy), and Stefano Russo (Università degli Studi di Napoli Federico II, Italy)</i>	

S29: Services Composition

liBERTa: Local Intelligence via Browser Extensions for Real-Time Applications	838
<i>Francesco De Feudis (Polytechnic University of Bari, Italy), Ivano Bilenchi (Polytechnic University of Bari, Italy), Corrado Fasciano (Polytechnic University of Bari, Italy), Filippo Gramegna (Polytechnic University of Bari, Italy), Floriano Scioscia (Polytechnic University of Bari, Italy), and Michele Ruta (Polytechnic University of Bari, Italy)</i>	
APICoder: A Multi-Role Large Language Model Framework for API Service Call Code Generation	849
<i>Conghui Yang (Inner Mongolia University, China), Lei Yu (Inner Mongolia University, China), Huafeng Su (Inner Mongolia University, China), and Xiang Zhou (Inner Mongolia University, China)</i>	
ServerlessIE: A Reusable Information Extraction System with Serverless Function	852
<i>Jingru Yang (National Key Laboratory of Data Space Technology and System, China), Lingran Bu (Beijing Jiaotong University, China), Di Wu (Peking University, China), Jinfeng Wen (Beijing University of Posts and Telecommunications, China), and Yi Liu (National Key Laboratory of Data Space Technology and System, China)</i>	

S30: Services Security, Privacy and Trust

KubeGuard: A Systematic Permission-Oriented Risk Detection Approach for Kubernetes Applications	855
<i>Chang-ai Sun (University of Science and Technology Beijing, China), Xiaoyang Han (University of Science and Technology Beijing, China), and Yufei Gong (University of Science and Technology Beijing, China)</i>	
SAGA: A Lightweight Authentication and Key Agreement Protocol for Resource-Asymmetric Smart Environments with Safe Service	866
<i>Junfeng Tian (Hebei University School of CyberspaceSecurity and Computer, China), Jian Geng (Hebei University School of CyberspaceSecurity and Computer, China), and Siyi Zhang (Hebei University School of CyberspaceSecurity and Computer, China)</i>	
Revisiting NFT Transactions in Web 3.0 Service Through the Lenses of Higher-Order Network	873
<i>Hao Ding (Harbin Institute of Technology, China), Can Wang (Harbin Institute of Technology, China), Jiasi Li (Harbin Institute of Technology, China), Hongmei Ren (Shanghai Jiao Tong University, China), Xuefeng Piao (Harbin Institute of Technology, China), Huihui Song (Harbin Institute of Technology, China), and Zhenzhou Ji (Harbin Institute of Technology, China)</i>	
Enhancing Service Observability Through Bytecode-Level Variable Monitoring	880
<i>Taizheng Wang (Hainan University, China), Chunyang Ye (Hainan University, China), Hui Zhou (Hainan University, China), Wei Chang (Hainan University, China), and Chaoyi Li (Hainan University, China)</i>	

S31: Services Composition

S32: Service Optimization

- FedDSSL: Decentralized Federated Semi-Supervised Learning for Limitedly Annotated Data 883
Yue Huang (*Shandong University, China*), Baochen Zhang (*Shandong University, China*), Lanju Kong (*Shandong University, China*), Qingzhong Li (*Shandong University, China*), and Lizhen Cui (*Shandong University, China*)
- STGNN-Based Microservice Autoscaling and Placement for Fast QoS Recovery at the Edge 892
Yue Wu (*Beijing University of Posts and Telecommunications, China*), Haitao Zhang (*Beijing University of Posts and Telecommunications, China*), and Yepeng Zhang (*Beijing University of Posts and Telecommunications, China*)
- Scheduling Strategy for Deep Learning Training Jobs Based on Multi-Resource Interleaving 899
Yuheng Zheng (*Fuzhou University, China*), Jienan Lin (*Fuzhou University, China*), Xing Chen (*Fuzhou University, China*), Bin Lin (*Fujian Normal University, China*), and Yun Ma (*Peking University, China*)

S33: Service Optimization

- Cross-Chain Options: A Bridgeless, Universal, and Efficient Approach 902
Zifan Peng (*The Hong Kong University of Science and Technology (Guangzhou), China*), Yingjie Xue (*The Hong Kong University of Science and Technology (Guangzhou), China; University of Science and Technology of China, China*), and Jingyu Liu (*The Hong Kong University of Science and Technology (Guangzhou), China*)
- DecoupleChain: A Two-Layer Blockchain Sharding System Enabling Frequent Shard Reconfiguration 913
Huawei Huang (*Sun Yat-Sen University, China*), Miaoyong Xu (*Sun Yat-Sen University, China*), Chenlin Wu (*Sun Yat-Sen University, China*), Xiaofei Luo (*Sun Yat-Sen University, China*), Jian Zheng (*Sun Yat-Sen University, China*), Jianru Lin (*Sun Yat-Sen University, China*), and Zibin Zheng (*Sun Yat-Sen University, China*)
- Scalable Policy-as-Code Decision Points for Data Products 924
Matteo Brambilla (*Politecnico di Milano, Italy*) and Pierluigi Plebani (*Politecnico di Milano, Italy*)

S34: Services Discovery, Selection and Recommendation

- Hypergraph-Based De-Conjecture Knowledge Tracing for Intelligent Educational Services 931
Chenyu Hou (*Zhejiang University of Technology, China*), Aochen You (*Zhejiang University of Technology, China*), Bin Cao (*Zhejiang University of Technology, China*), Dongjing Wang (*Hangzhou Dianzi University, China*), and Jing Fan (*Zhejiang University of Technology, China*)

HGAE: Heterogeneous Graph Autoencoder-Based Service Bundle Recommendations for Efficient Mashup Development	943
<i>Kaipu Sun (Zhejiang University), Xuanye Wang (Zhejiang University), Meng Xi (Zhejiang University), Yangyang Wu (Zhejiang University), Xiaohua Pan (Binjiang Institute of Zhejiang University), Jinshan Zhang (Zhejiang University), Ying Li (Zhejiang University), Kun Ma (Qingdao Branch of China E-port Data Center), and Jianwei Yin (Zhejiang University)</i>	

S35: Generative AI in Web Services

EvoAPR: Enhancing Large Language Models for Automatic Program Repair with Genetic Algorithm and Dynamic LoRA	946
<i>Huan Zhang (Central South University, China), Qingyang Yan (Central South University, China), Weihuan Min (Central South University, China), Chenyuan Zhang (Central South University, China), Li Kuang (Central South University, China), and Yingjie Xia (Hangzhou Dianzi University, China)</i>	
ChainAttack: Black-Box Adversarial Attacks on Generative AI Services via Chain-of-Thought	957
<i>Xixi Zheng (Beijing Institute of Technology, China), Zihao Xu (Changchun University, China), Xuhao Ren (Beijing Institute of Technology, China), Chuan Zhang (Beijing Institute of Technology, China), and Liehuang Zhu (Beijing Institute of Technology, China)</i>	
A Hybrid Approach Combining LLMs and Web-Based Information for Automated Fact-Checking	960
<i>Kenji Oki (Fujitsu Limited, Japan), Kazuhiro Yamashita (Fujitsu Limited, Japan), and Shinya Kitajima (Fujitsu Limited, Japan)</i>	
AI-Assisted Data Governance with Data Mesh Manager	963
<i>Arif Wider (Hochschule für Technik und Wirtschaft, Germany), Simon Harrer (innoQ Deutschland GmbH, Germany), and Linus W. Dietz (King's College London, United Kingdom)</i>	

S36: REST Services

A Word is Worth 4-bit: Efficient Log Parsing with Binary Coded Decimal Recognition	966
<i>Prerak Srivastava (SAP Labs, France), Giulio Corallo (SAP Labs, France), and Sergey Rybalko (SAP Labs, France)</i>	

S37: Service Recommendation & Classification

Managing Hybrid Dynamics in Multiplex Service Networks: A Group-Based Task Migration Approach	969
<i>Kai Di (Zhejiang Normal University, China), Tienyu Zuo (Southeast University, China), Pan Li (Zhejiang Normal University, China), Yuanshuang Jiang (Southeast University, China), Fulin Chen (Southeast University, China), and Yichuan Jiang (Southeast University, China)</i>	

GGRME: A GGNN-Based Graph Reconstruction Method for Microservice Extraction	976
<i>Ying Xu (Zhejiang University, China), Ying Li (Zhejiang University, China), Suxiang Wu (Zhejiang University, China), Linghao Li (Zhejiang University, China), Xinzhou Zhu (Zhejiang University, China), Meng Xi (Zhejiang University, China), and Jianwei Yin (Zhejiang University, China)</i>	
Availability Guaranteed and Resource Efficient VNF Placement in SDN/NFV-Enabled Network Through Traffic Forecasting	983
<i>Yi Yue (China Unicom Research Institute, China), Bo Cheng (Beijing University of Posts and Telecommunications, China), Shiding Sun (China Unicom Research Institute, China), Wencong Yang (China Unicom Research Institute, China), and Xiongyan Tang (China Unicom Research Institute, China)</i>	

S38: Services Security, Privacy and Trust

Knowledge-Augmented Contrastive Learning and Multi-Modal Fusion for Fake News Detection Service in Social Network	984
<i>Zhen Xia (Beijing University of Posts and Telecommunications, China), Shuai Zhao (Beijing University of Posts and Telecommunications, China), Jiale Han (Hong Kong University of Science and Technology, Hong Kong), and Junliang Chen (Beijing University of Posts and Telecommunications, China)</i>	
StealthHub: UTXO-Based Stealth Address Protocol	996
<i>Hanze Guo (University College London, United Kingdom; DLT Science Foundation, United Kingdom), Yebo Feng (Nanyang Technological University, Singapore; DLT Science Foundation, United Kingdom), Cong Wu (The University of Hong Kong, China; DLT Science Foundation, United Kingdom), Zengpeng Li (Shandong University, China), and Jiahua Xu (University College London, United Kingdom; DLT Science Foundation, United Kingdom)</i>	

S39: Generative AI

S40

Latent Graph Structure Learning for Service-Oriented Complex Network: Task Definition, Data Simulation, and Applications in Service Ecosystem	1004
<i>Tianyu Jiang (Harbin Institute of Technology, China), Zhongjie Wang (Harbin Institute of Technology, China), and Mingyi Liu (Harbin Institute of Technology, China)</i>	

ICWS 2025 Symposium on Graph Data Mining for Services

LLM-CoSR: Noise-Resistant Service Recommendation via LLM-Augmented Graph Contrastive Learning	1014
<i>Yeqi Zhu (Harbin Institute of Technology, China), Zeyu Lin (Southwest Jiaotong University, China), Jingyu Fan (State Grid Shandong Electric Power, China), Mingyi Liu (Harbin Institute of Technology, China), and Zhongjie Wang (Harbin Institute of Technology, China)</i>	
Graph-Based Intelligent Wrapping Framework for Industrial Control Program Snippets Based on Service Computing and LLMs	1024
<i>Huifeng Wu (Hangzhou Dianzi University, China), Yingzhe Bao (Hangzhou Dianzi University, China), Junjie Hu (Hangzhou Dianzi University, China), Liutao Xiang (Hangzhou Dianzi University, China), Danfeng Sun (Hangzhou Dianzi University, China), Baiping Chen (Hangzhou Dianzi University, China), and Zhiguo Shi (Zhejiang University, China)</i>	
Graph-Structured Small Molecule Drug Discovery Through Deep Learning: Progress, Challenges, and Opportunities	1033
<i>Kun Li (Wuhan University, China), Yida Xiong (Wuhan University, China), Hongzhi Zhang (Wuhan University, China), Xiantao Cai (Wuhan University, China), Jia Wu (Macquarie University, Australia), Bo Du (Wuhan University, China), and Wenbin Hu (Wuhan University, China)</i>	
GWise: A Graph-Structured Multi-Agent Framework for Service-Oriented and Generative AI-Enabled Financial Trading Analytics	1043
<i>Hirad Rezaei (University of New South Wales (UNSW)), Fethi Rabhi (University of New South Wales (UNSW)), and Amin Beheshti (Macquarie University)</i>	
From Dispersed Records to Structured Knowledge: A Graph-Based Knowledge Modeling Framework for Archival Resources	1053
<i>Zhaoyang Zhang (Macquarie University, Australia; Wuhan University, China), Yang Zhang (University of North Texas, USA), Quan Z. Sheng (Macquarie University, Australia), Jia Wu (Macquarie University, Australia), and Yaolin Zhou (Wuhan University, China)</i>
