2025 IEEE International Conference on Source Code Analysis & Manipulation (SCAM)

SCAM 2025

Table of Contents

Organizing Committee ..... **viii**
Steering Committee ..... **ix**
Program Committee ..... **x**

Research Track / Engineering Track

Detecting Exception-Related Behavioural Breaking Changes with UnCheckGuard 1
Vinayak Sharma (University of Waterloo, Canada) and Patrick Lam (University of Waterloo, Canada)

Handling Cyclic Reinforcement of Lattice Values in Incremental Dependency-Driven Static Analysis 13
Jens Van der Plas (Vrije Universiteit Brussel, Belgium), Quentin Stiévenart (Université du Québec à Montréal, Canada), and Coen De Roover (Vrije Universiteit Brussel, Belgium)

Refactoring-Aware Patch Integration Across Structurally Divergent Java Forks 25
Daniel Ogenrwot (University of Nevada Las Vegas, USA) and John Businge (University of Nevada Las Vegas, USA)

Insights into Optimizing Research Software: A Case of an Architecture-Smell Detection Tool..... 37
Philipp Gnoyke (Otto-von-Guericke University, Germany), Sandro Schulze (Anhalt University of Applied Sciences, Germany), and Jacob Krüger (Eindhoven University of Technology, The Netherlands)

Exploring the Potential of Large Language Models in Fine-Grained Review Comment Classification 43
Linh Nguyen (The University of Melbourne, Australia), Chunhua Liu (The University of Melbourne, Australia), Hong Yi Lin (The University of Melbourne, Australia), and Patanamon Thongtanunam (The University of Melbourne, Australia)

Language-Agnostic Generation of Header Comments Using Large Language Models 55
Nathanael Yao (Queen's University, Canada), Juergen Dingel (Queen's University, Canada), Ali Tizghadam (TELUS Communications Inc, Canada), and Ibrahim M. Amer (Queen's University, Canada)

Smelling Secrets: Leveraging Machine Learning and Language Models for Sensitive Parameter Detection in Ansible Security Analysis 66
Ruben Opdebeeck (Vrije Universiteit Brussel, Belgium), Valeria Pontillo (Vrije Universiteit Brussel, Belgium; Gran Sasso Science Institute, Italy), Camilo Velázquez-Rodríguez (Vrije Universiteit Brussel, Belgium), Wolfgang De Meuter (Vrije Universiteit Brussel, Belgium), and Coen De Roover (Vrije Universiteit Brussel, Belgium)

Testing the Untestable? An Empirical Study on the Testing Process of LLM-Powered Software Systems 78
Cleyton Magalhaes (UFRPE, Brazil), Italo Santos (University of Hawai'i at Mānoa, USA), Brody Stuart-Verner (University of Calgary, Canada), and Ronnie de Souza Santos (University of Calgary, Canada)

On the Need to Perform Comprehensive Evaluations of Automated Program Repair Benchmarks: Sorald Case Study 89
Sumudu Liyanage (University of Otago, New Zealand), Sherlock A. Licorish (University of Otago, New Zealand), Markus Wagner (Monash University, Australia), and Stephen G. MacDonell (Victoria University, New Zealand)

Static Analysis as a Feedback Loop: Enhancing LLM-Generated Code Beyond Correctness 100
Scott Blyth (Monash University, Australia), Sherlock A. Licorish (University of Otago, New Zealand), Christoph Treude (Singapore Management University, Singapore), and Markus Wagner (Monash University, Australia)

FaaSGuard: Secure CI/CD for Serverless Applications – An OpenFaaS Case Study 110
Amine Barrak (Oakland University, USA), Emna Ksontini (University of North Carolina Wilmington, USA), Ridouane Atike (University of Quebec at Chicoutimi, Canada), and Fehmi Jaafar (University of Quebec at Chicoutimi, Canada)

llvm-Dimeta: A Library for Extracting Source-Level Type Information in LLVM IR Using Debug Metadata 116
Alexander Hück (Technical University of Darmstadt, Germany), Sebastian Kreutzer (Technical University of Darmstadt, Germany), and Christian Bischof (Technical University of Darmstadt, Germany)

Configurable Ensembles for Software Similarity: Challenging the Notion of Universal Metrics 122
Shujun Huang (Delft University of Technology, The Netherlands) and Sebastian Proksch (Delft University of Technology, The Netherlands)

Challenging Bug Prediction and Repair Models with Synthetic Bugs 133
Ali Reza Ibrahimzada (University of Illinois Urbana-Champaign, USA), Yang Chen (University of Illinois Urbana-Champaign, USA), Ryan Rong (Stanford University, USA), and Reyhaneh Jabbarvand (University of Illinois Urbana-Champaign, USA)

Plaintext in the Wild: Investigating Secure Connection Label Accuracy for Android Apps 145
Yusei Sakuraba (Okayama University, Japan), Hiroki Inayoshi (Okayama University, Japan), Shoichi Saito (Nagoya Institute of Technology, Japan), and Akito Monden (Okayama University, Japan)

Author Index **157**
