

SENSORCOMM 2025

The Nineteenth International Conference on Sensor Technologies and Applications

October 26th - 30th, 2025

Barcelona, Spain

SENSORCOMM 2025 Editors

Jaime Lloret, Universitat Politècnica de València, Spain

Table of Contents

A Group-Based Access Coordination Scheme for Low-Latency and High-Throughput IoT over IEEE 802.11ah 1
Seung-ha Jee, Yu-ran Jeon, and Il-Gu Lee

A Time based Sensor Data Analysis for Pre-Fall Prediction Using Machine and Deep Learning Approaches 8
Nazia Pathan, Hongnian Yu, Michael Vassallo, and Pelagia Koufaki

Machine Learning-Based Joint TX Power and RX Sensitivity Control for Overlapping Basic Service Set Interference Mitigation in Dense Internet of Things Wireless Networks 14
Jin-Min Lee, Hye-Yeon Shim, and Il-Gu Lee

SCREEN2AIR: Exploiting Screen Savers for Covert Long-Distance Data Exfiltration and Defense 20
Ye-Rim Jeong, Yeon-Jin Kim, Chea-Yeon Park, and Il-Gu Lee

Invisible Watermarking for Image Data Protection in Sensor Network Environments 26
Seo-Yi Kim, Na-Eun Park, and Il-Gu Lee

Prioritized Self-Configuration for Self-Organized Sensor Networks 34
Rui Teng
