

**Proceedings of ASME 2025  
International Design Engineering  
Technical Conferences and  
Computers and Information in  
Engineering Conference**

**(IDETC-CIE2025)**

**Volumes 1-6**

**27<sup>th</sup> International Conference on Advanced Vehicle Technologies  
(AVT)**

**45<sup>th</sup> Computers and Information in Engineering Conference (CIE)**

**51<sup>st</sup> Design Automation Conference (DAC)**

**22<sup>nd</sup> International Conference on Design Education (DEC)**

**30<sup>th</sup> Design for Manufacturing and the Life Cycle Conference  
(DFMLC)**

**37<sup>th</sup> International Conference on Design Theory and  
Methodology (DTM)**

# TABLE OF CONTENTS

|                                                                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Global Limit Points Behaviour and Global Tristable Thresholds in Electrostatically Actuated and Weakly Coupled Double Micro-Beam Structures .....           | 1   |
| <i>Arava Korakh, Lior Medina</i>                                                                                                                            |     |
| Nonlinear Dynamics of Electrostatically Coupled MEMS Resonators Under 2:1:3 Internal Resonance.....                                                         | 11  |
| <i>Rongjian Sun, Jian Zhao, Najib Kacem, Zeyuan Dong, Junjie Wang, Pengbo Liu</i>                                                                           |     |
| Enhancing Chaos Immunity of a Vibrating MEMS Based on Parametrically Excited Mode-Localized Resonators.....                                                 | 17  |
| <i>Rui Jin, Jian Zhao, Najib Kacem, Zeyuan Dong, Rongjian Sun, Pengbo Liu</i>                                                                               |     |
| Biosensing Angled NEMS Cantilever Resonators Under Electrostatic Actuation: Amplitude-Voltage Response of Primary Resonance to Include Casimir Effect ..... | 24  |
| <i>Dumitru I. Caruntu, Benjamin M. Huerta</i>                                                                                                               |     |
| Thermal Properties of Defective Graphene: Insights From Molecular Dynamics With Machine Learning Potential .....                                            | 33  |
| <i>Shijie Sun, Yumeng Li</i>                                                                                                                                |     |
| Viscoelastic Effects on Wet-Spun PVDF Microfilaments: Damping and Frequency Shifts in Sequential Tests .....                                                | 42  |
| <i>Luis Alexandrino, Giulia Lanzara</i>                                                                                                                     |     |
| A Piezoelectric Sensor Web for Nonlinear Vibrations Monitoring of a Magnetic Cantilever .....                                                               | 48  |
| <i>Ginevra Hausherr, Alessandro Porrari, Giulia Lanzara</i>                                                                                                 |     |
| Real-Time Monitoring of Biochemical Synthesis Using Electrochemical Impedance Spectroscopy (EIS) and MEMS Interdigitated Sensors .....                      | 53  |
| <i>Mohammad Shavezipur, Kylie Raasch, Alexandra Bequette, Mina Sumita</i>                                                                                   |     |
| Design and Simulation of Novel Parallel-Plate MEMS Tunable Capacitors With Improved Tunability and Linearity .....                                          | 58  |
| <i>Lithun Reddy Adla, Mohammed Samuel Aliyu, Mohammad Shavezipur</i>                                                                                        |     |
| A Minimal Low-Dimension Model Simulating the Nonlinear Dynamics of Pretensioned Textile Metamaterials .....                                                 | 65  |
| <i>Andrea Arena, Marco Lepidi</i>                                                                                                                           |     |
| Controllable Piecewise Linear Dual Piezoelectric Cantilever Beams for Energy Harvesting.....                                                                | 73  |
| <i>Yueqin Guan, Kiran D'Souza</i>                                                                                                                           |     |
| Dynamic Response Prediction Model for Hysteretic System With Real-Time Parameter Update Mechanism .....                                                     | 83  |
| <i>Ningning Huangfu, Ying Zhang, Pengfei Jiang, Zhongyang Wang, Junyi Cao</i>                                                                               |     |
| Spatiotemporal Analysis of Intrinsically Curved Photomechanical Fibers.....                                                                                 | 91  |
| <i>Alireza Ahmadi, Neda Maghsoodi</i>                                                                                                                       |     |
| Nonlinear Normal Mode Analysis of Aircraft Control Surfaces .....                                                                                           | 101 |
| <i>Chin-Yi Chang, Meng-Hsuan Tien</i>                                                                                                                       |     |

|                                                                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| MEMS Angled Uniform Cantilever Resonators Under Electrostatic Actuation: Amplitude-Frequency Response of Primary Resonance.....                                               | 109 |
| <i>Dumitru I. Caruntu, Benjamin M. Huerta</i>                                                                                                                                 |     |
| Nonlinear Dynamic Simulation of Revolute Joint of Piston Slider-Crankarm Linkage Mechanism .....                                                                              | 116 |
| <i>Louay S. Yousuf</i>                                                                                                                                                        |     |
| Characteristic Oscillations in Delay Differential Equations .....                                                                                                             | 125 |
| <i>Mark Walth, Richard H. Rand</i>                                                                                                                                            |     |
| Analytical Exploration of the Nonlinear Dynamics of a Hand-Arm System Coupled With a Tool Exhibiting Non-Smooth Ground Interaction .....                                      | 135 |
| <i>Oreoluwa Alabi, Sunit Kumar Gupta, Oumar Barry</i>                                                                                                                         |     |
| Rolling Resistance Model for Forced and Unforced Systems .....                                                                                                                | 145 |
| <i>Tyler Rome, Aldo Ferri, Christopher Adams, William Singhose</i>                                                                                                            |     |
| On the Use of Continuous Sigmoid Functions to Smooth Out the Coulomb Friction Force Law for Dynamical Systems .....                                                           | 153 |
| <i>Paulo Flores, Hamid M. Lankarani</i>                                                                                                                                       |     |
| Investigation on the Evolution Mechanism of Surface Micro-Pitting for Spur Gear Under Mixed EHL Conditions .....                                                              | 162 |
| <i>Zedong Li, Huifang Xiao, Fan Zhang, Xiaofan Chen</i>                                                                                                                       |     |
| Deep Learning Techniques for Design of Locally Resonant Metamaterials .....                                                                                                   | 170 |
| <i>Riccardo Grammatico, Giuseppe Quaranta, Walter Lacarbonara</i>                                                                                                             |     |
| Simulation of an Upper Limb Exoskeleton to Assist Persons With Disabilities.....                                                                                              | 179 |
| <i>Eduardo P. Okabe, Jose Brittes, Pedro Brito</i>                                                                                                                            |     |
| Virtual Reality Time-Delay Manipulation for Balance: Sway Patterns As Indicators of Stability and Fall Risk .....                                                             | 187 |
| <i>Srihari Mahesh, James R. Chagdes</i>                                                                                                                                       |     |
| Bridging Computational Gait Analysis and Clinical Insights: Enhancing Parkinson's Disease Diagnosis With Nonlinear Dynamics and a Novel Framework.....                        | 198 |
| <i>Ranjan Das, Sachin Goyal</i>                                                                                                                                               |     |
| Design of a 3-DOF Translational Parallel Shock Manipulator for Shock Isolation .....                                                                                          | 204 |
| <i>Muhammed Emin Dogan, Ali Serhat Yilmaz</i>                                                                                                                                 |     |
| Input Shaping for Overhead Cranes With Flexible Beams: Multi-Mode Vibration Control .....                                                                                     | 214 |
| <i>Faisal Alobaid</i>                                                                                                                                                         |     |
| Simulation of a WLAM Printer on Flexible Support Structure .....                                                                                                              | 222 |
| <i>Eduardo P. Okabe, Jaime H. Izuka, Enzo I. Kawamura</i>                                                                                                                     |     |
| Analysis of Crane Tip-Over Online Videos and Reporting .....                                                                                                                  | 232 |
| <i>Ethan Stone, Margarita Caulfield, Christopher Adams, William Singhose</i>                                                                                                  |     |
| Generalized Symplectic Integrators.....                                                                                                                                       | 239 |
