

PROCEEDINGS OF SPIE

Metamaterials, Metadevices, and Metasystems 2025

Nader Engheta
Mikhail A. Noginov
Nikolay I. Zheludev
Editors

3–7 August 2025
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 13577

Proceedings of SPIE 0277-786X, V. 13577

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Metamaterials, Metadevices, and Metasystems 2025*, edited by Nader Engheta, Mikhail A. Noginov, Nikolay I. Zheludev, Proc. of SPIE 13577, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

DEVICES I

- 13577 02 **Crystallization kinetic of Ta₂O₅ thin films: engineering amorphous materials for gravitational waves interferometers** [13577-3]
- 13577 03 **Optimizing metalens performance: impact of fabrication non-uniformity on focusing efficiency** [13577-4]
- 13577 04 **Design and characterization of an athermal ENZ-ITO clad, air-core micro-ring resonator** [13577-5]

DEVICES III

- 13577 05 **CMOS-based deep brain imager with a monolithically integrated metasurface** [13577-14]

PRODUCTION AND MANUFACTURING

- 13577 06 **Single-point diamond turning for metasurface fabrication** [13577-33]
- 13577 07 **The light touch: guiding polymer growth with plasmonics** [13577-34]

FUNDAMENTALS III

- 13577 08 **Dual field of view infrared imaging via hybrid meta-optics** [13577-50]

THEORY AND MODELING

- 13577 09 **Nonlinear modes in time-modulated structures (Invited Paper)** [13577-51]

HYPERBOLIC METAMATERIALS

- 13577 0A **Analog optical computing with hyperbolic phonon polaritons** [13577-61]

GAIN AND LASING

13577 OB **Fluctuation-induced forces in systems with optical gain** [13577-63]

POLARITONIC SCIENCE AND ENGINEERING

13577 OC **A non-Lorentzian approach to exciton-plasmon systems at strong coupling (Invited Paper)**
[13577-72]

POSTER SESSION

13577 OD **Mechanism of laser-induced void array formation in fused silica** [13577-76]

13577 OE **Anomalous Brewster and total internal reflection effects in chiral electromagnetic interfaces: dual-interface propagation and tunable applications** [13577-78]

13577 OF **Bezier-curve-optimized ring resonator for enhanced performance on an SOI platform**
[13577-82]

13577 OG **Photovoltages and magnetization-related photoinduced effects in permalloy systems**
[13577-83]

13577 OH **Scalable production of polymer-based high aspect ratio nanopillars using nanoimprint lithography for applications in photonics** [13577-85]

13577 OI **Design of hyperspectral filter based on nanoscale cross-shaped metamaterial resonators in a finite-sized array** [13577-88]

13577 OJ **Geometry and invariant optical properties of dielectric nanofins in geometric phase control**
[13577-90]

13577 OK **Aperiodic transmissive metasurfaces for generating electromagnetic waves carrying OAM**
[13577-92]

13577 OL **Directionally asymmetric Janus metasurfaces for vortex beam and holograms** [13577-94]

13577 OM **Designing electrically tunable multilayered TiN/SiO₂ epsilon-near-zero metamaterials**
[13577-95]

13577 ON **High-Q color selectivity metasurface with 2D topology optimization for AR application**
[13577-97]

13577 OO **Ray tracing-based design and optimization of F-theta metalens** [13577-99]
