**Volume 13582**

Proceedings of SPIE 0277-786X, V. 13582

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Low-Dimensional Materials and Devices 2025*, edited by Nobuhiko P. Kobayashi, A. Alec Talin, Albert V. Davydov, M. Saif Islam, Proc. of SPIE 13582, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## THIN FILMS FOR MEMORY AND COMPUTING APPLICATIONS

---

- 13582 02 **A thermodynamic interpretation of the phase field method for the computational study of memristive electric conduction (Invited Paper)** [13582-1]
- 13582 03 **Interface effects of ideal electrodes on conducting filaments formation in memristive thin films using phase field** [13582-2]
- 13582 04 **Design and optimization of a high-efficiency and robust 2D grating for the magneto-optical trap** [13582-3]
- 13582 05 **Functional oxide thin films for next-generation electronics and photonics: a multi-material perspective (Invited Paper)** [13582-5]

---

## THIN FILMS FOR OPTICAL AND ELECTRONIC APPLICATIONS

---

- 13582 06 **Advancing drug delivery and biosensing with innovative engineered NAA platforms** [13582-6]
- 13582 07 **Synthesis and characterization of carbon-silicon-titanium-aluminum nanostructures doped with nitrogen** [13582-7]
- 13582 08 **Exploring local measurements to investigate the effects of defects and crystallinity on heat flow in polycrystalline materials (Invited Paper)** [13582-10]
- 13582 09 **Low-temperature nano-heteroepitaxy of the entire III-nitride semiconductor family using plasma-ALD (Invited Paper)** [13582-11]
- 13582 0A **Electron channeling contrast imaging of dislocations in epitaxial GaN** [13582-12]

---

## NANOWIRES FOR OPTOELECTRONICS, ENERGY, AND SENSORS

---

- 13582 0B **From (In,Ga)N top-down nanowires to pseudo-substrates (Invited Paper)** [13582-14]

---

#### QUANTUM DOTS AND NANOSTRUCTURES FOR OPTOELECTRONICS I

---

- 13582 0C **Effect of aging on perovskite quantum dots: mechanistic insights into efficiency improvement** [13582-23]
- 13582 0D **Effect of stirring speed on the size distribution and optical properties of ZnInP/ZnS quantum dots** [13582-25]

---

#### QUANTUM DOTS AND NANOSTRUCTURES FOR OPTOELECTRONICS II

---

- 13582 0E **High-purity single and entangled photon emission from droplet-epitaxy quantum dots on GaAs(111)A platform (Invited Paper)** [13582-26]
- 13582 0F **Influence of growth temperature and post-growth annealing on optical emission from GaAsBi/AlGaAs double parabolic quantum well structures** [13582-29]
- 13582 0G **Strain-modulated exciton recombination probability in low-dimensional semiconductors** [13582-30]
- 13582 0H **Enhanced spontaneous emission from nanodiamonds with NV centers integrated to silicon nitride photonic structures** [13582-31]

---

#### CONTROLLED FABRICATION OF 2D AND 1D MATERIALS

---

- 13582 0I **Selective deposition three ways: chemical bath deposition of metal sulfides on organic substrates (Invited Paper)** [13582-32]

---

#### 2D MATERIALS SPECTROSCOPY

---

- 13582 0J **SparseC-AFM: a deep learning method for fast and accurate characterization of MoS<sub>2</sub> with C-AFM (Invited Paper)** [13582-35]
- 13582 0K **Investigation of the generalized Brewster angle effect in MoS<sub>2</sub> thin films** [13582-38]

---

#### 2D MATERIALS AND DEVICES II

---

- 13582 0L **Experimental and theoretical studies of self-heating in III-N power high electron mobility transistors** [13582-44]
- 13582 0M **Computational investigation of electronic and optical properties of 2D metal chalcogenophosphates (Invited Paper)** [13582-45]
