SPIE

Volume 13583

Proceedings of SPIE 0277-786X, V. 13583

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *UV and Higher Energy Photonics: From Materials to Applications 2025*, edited by Gilles Lérondel, Yong-Hoon Cho, Atsushi Taguchi, Satoshi Kawata, Proc. of SPIE 13583, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

UV AND HIGHER ENERGY MICROSCOPY AND SPECTROSCOPY

- 13583 02 **Ultra-high damage threshold gas optics generated by UV pulse laser for high energy lasers (Invited Paper)** [13583-3]

UV AND HIGHER ENERGY NANOMATERIALS I

- 13583 03 **Theory of ultraviolet defect emitters in hexagonal boron nitride (Invited Paper)** [13583-6]

UV AND HIGH ENERGY LIGHT SOURCES

- 13583 04 **Reliable high-power and narrow-angle UVC-LED light source with chip-level hermetic sealing (Invited Paper)** [13583-10]

APPLICATIONS OF UV, DEEP UV, VACUUM UV, AND EXTREME UV PHOTONICS I

- 13583 05 **X-ray tomosynthesis techniques for breast imaging (Invited Paper)** [13583-13]
- 13583 06 **Vacuum measurements of anti-resonant hollow-core optical fibers for transmission in the far-ultraviolet regime** [13583-15]

UV AND DEEP UV BIOSENSING-, ANALYSIS-, AND ENVIRONMENTAL-RELATED APPLICATIONS

- 13583 07 **UV synchrotron radiation chiral spectroscopy to characterize the structure of biomolecules (Invited Paper)** [13583-18]
- 13583 08 **UV photocatalysis of ZnO nanowires: the issues of polarity and doping (Invited Paper)** [13583-20]

UV AND DEEP UV PHOTONIC NANOSTRUCTURES

- 13583 09 **UV-based lithography and nano-imprint lithography for the fabrication of functionalized micro-nano sol-gel structures** [13583-23]

APPLICATIONS OF UV, DEEP UV, VACUUM UV, AND EXTREME UV PHOTONICS II

- 13583 0A **Room-temperature deposition of large-area dielectric thin films via vacuum ultraviolet (VUV) photo-processes synthesis** [13583-26]
- 13583 0B **Investigation of the electronic states of materials with attenuated total reflection in the far-ultraviolet region (Invited Paper)** [13583-27]
- 13583 0C **Towards defect-free lithography: study of process instabilities for efficient lithography-based patterning** [13583-24]

UV AND HIGHER ENERGY NANOMATERIALS II

- 13583 0D **Synthesis and optical characterization of high-quantum-yield UV-emitting MXene quantum dots** [13583-30]
- 13583 0E **Coupled experimental and TCAD analysis of NiO/Ga₂O₃ photodiodes for UV-C detection applications** [13583-31]

POSTER SESSION

- 13583 0F **Development and evaluation of TiO₂-enhanced mortars for the protection of surfaces exposed to UV radiation** [13583-32]
