**Volume 13592**

Proceedings of SPIE 0277-786X, V. 13592

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Molecular and Nanophotonic Machines, Devices, and Applications VIII*, edited by Zouheir Sekkat, Takashige Omatsu, Proc. of SPIE 13592, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## OAM AND STRUCTURING OF MATTER

---

- 13592 02 **Chiral surface reliefs in azopolymer with hybrid optical vortex possessing a half-integer orbital angular momentum** [13592-2]
- 13592 03 **Construction of three-dimensional helical structures of nanoparticle building blocks manipulated by optical vortices** [13592-4]

---

## OPTICAL MANIPULATION AND HOLOGRAPHY

---

- 13592 04 **Nanomanipulation of materials with optical quasiparticles (Invited Paper)** [13592-9]
- 13592 05 **Drug delivery in mesostructured SiO<sub>2</sub> films doped with Rhodamine B using femtosecond infrared laser pulses** [13592-11]
- 13592 06 **A rigorous coupled-wave analysis of birefringent holographic gratings with periodically-modulated dielectric tensor along an in-plane direction and tensor variations in the thickness direction** [13592-12]

---

## OPTICAL MANIPULATION AND NANOPHOTONIC MACHINES: JOINT SESSION WITH CONFERENCES 13580 AND 13592

---

- 13592 07 **Exploring unconventional optical matter: from within to beyond the photon beam (Invited Paper)** [13592-13]
- 13592 08 **From mapping to manipulation: 3D insights into dielectrophoresis and electrokinetics for advanced sorting toward colloidal memory applications (Invited Paper)** [13592-14]

---

## POSTER SESSION

---

- 13592 09 **Theoretical study of calixarene for the absorption and detection of carbon monoxide** [13592-27]
- 13592 0A **A new class of photochromes for ultrastable switching and photomechanical motion** [13592-30]
